3. The former of these measures seems to me calculated to afford some very desirable relief to co-sharers with perfect safety to the revenue of the State. Moreover it will be beneficial to the ryots, as clearing up, in cases on which it takes effect, all doubt regarding the person entitled to receive rent for them, and as tending to check the evil of under-tenures which spring up in some districts as irrepressibly as weeds on the land.

4. Section X. is well calculated to afford relief to sharers in whole estates; but the great majority of proprietors, where sub-division has taken place, are sharers in mouzas or component parts of estates; and as the jumma of mouzas has not been apportioned, it will be impossible to assign shares of jumma in such cases proportioned to the jumma on the whole estate.

Appendix, No. 7.

5. The consequence will of course be opposition to the vast majority of applications for separate accounts in shares in component parts of estates; provided that the fact of such applications having been made becomes known to co-sharers, and there is time for opposition; and the result must be that most of the applicants will be referred to the Civil Court.

6. A law for the apportioning the jumma of mouzas seems a necessary preliminary to carry out fully the objects of section X. and very desirable. No objection to such a measure would be consistent with our present laws, for such apportionment can be claimed under the Butwarrah law.

7. If sections X., XI., XII., and XIII. are to be enacted as they are in the Bill, there seems reason to anticipate that proprietors will frequently sell small shares of land with large shares of jumma, and thus compel co-sharers either to allow property larger and more valuable than that which the fraudulent sharer has reserved, to be sold for arrears of revenue, or to pay those arrears, and he make good in future the jumma unfairly apportioned.

8. It is quite possible, in spite of the precautions prescribed in section X, that co-sharers may be ignorant of applications for separations of accounts, or they may be away from home, or struck with sore sickness, or prevented by some cause equally potent from appearing within the time allowed.

9. Some check might be given to the separation of accounts without the knowledge of co-sharers by doubling the time allowed for objection; but this remedy might be very injurious to the honest applicant, and I can devise no better check than that of allowing closure of any accoant which may appear to have been opened unfairly at any time within one year from the date on which it was opened.

10. The second great alteration proposed by the Bill is that of recognizing and confirming under-tenures which the present law declares annulled by sale for arrears of revenue.

11. The two interests chiefly to be regarded by the Legislature in the amendment of the the Sale Law are, I apprehend, indisputably that of the great mass of the people, and that of the State which is necessary to control and protect it. To these all other interests seem of secondary importance, and should apparently be so treated.

12. It does not, however, appear to me that the importation of the third class of exceptions in section XXXV. into the Sale Law is consistent with due observance of this principle. It will render purchasers of shares of estates, the least exceptionable tenures as regards the State and the cultivators of the soil, less frequent; and it will make room for numerous gradations of idle middlemen, placing over the actual cultivators of the soil superiors, whose divided resources diminishing with their increasing numbers (vide Maltus), will allow them to afford no assistance when crops are poor, and must be equally apt to fail in furnishing the funds necessary to make the Malgoozar to discharge the public revenue; so that, as regards the ryots and the State, encouragement of these tenures seems to be much to be deprecated.

13. Again, the network of under-tenures, with which the Bill promises to cover the land, seems a texture of injustice to co-sharers, who will be compelled either to allow their own shares to be hammered away at sales, or to purchase others in which their wasteful co-partners have created sub-tenures, leaving them no profit adequate to the price they have been forced, under the alternative above mentioned, to pay.

14. Under-tenants, too, are very apt to combine in order to exclude those who purchase their rights, and this has a strong tendency to prevent realization of the Malgoozar's dues, and to throw estates, where section XLVII., restricting the power in section XXXVI., Regulation XI. of 1822, tacitly admits they ought not to be unnecessarily thrown, that is, on the hands of Government.

15. Under these considerations I am adverse to the confirmation which class 3 of the exceptions in section XXXV. would give to under-tenures. I approve highly of the encouragement the Bill holds out to the purchase of shares of estates; but for this very reason, among the others which I have stated, I deprecate strongly the propagation of under-tenures, which are at present unknown in some districts, as jeopardizing the stability of the revenue, as discouraging economy in co-sharers, as producing complication, fraud, and litigation, as dangerous to the zemindar, and as sinking the ryot to the lowest ebb of helpless and hopeless poverty.

16. It seems to me quite impracticable to carry out the directions at page 26 of the Bill. Ameens cannot be trusted in such matters, and if the collector can do the work therein cut out for him, he must either be a very complying officer, or be endowed with supernatural knowledge and power.

17. With these remarks on the two principal points of the Bill, which I am well aware do little justice to the important subject, I proceed to offer a few remarks on other matters in the Bill.

18. Section V. says that no interest in an estate is to be sold for recovery of demand not being land revenue, but which are similarly recoverable, saving after the notification therein described;

described; and if an under-tenure amounts to an interest in an estate, the terms of the section are deficient in precision, seeing that by Section XXV., Regulation VII., 1799, we can, under certain circumstances therein set forth, recover rent as revenue, and enforce its realisation by sale after the notice entered in Regulation VIII., 1835, which is other than that prescribed in section V.

19. The expression "due time" in section VIII. of the Bill and existing Act, is very vague. It cannot, of course, be intended that money placed to the general account of a Malgoozar, after the latest date fixed for payment, shall be transferred to his credit in the account of his estate; but it seems doubtful whether a sum credited in his general account before the said latest date, is not necessarily transferable on an application made subsequently to such date and at any time before the sale. This ambiguity might now be removed.

20. The power given in section IX. to mortgagees to prevent sales of estates seems to me objectionable. A is mortgagee under a deed of conditional sale from B. The latter, to pay off A, wishes his estate sold off by the collector to the best advantage, so that he may have something over for himself. The Bill allows A to prevent this, and perhaps enables him to foreclose his mortgage, and thus obtain the estate on what may be very inadequate consideration.

21. I do not perceive why the highest offer mentioned in section XIV. must be equal to the amount due up to the date of sale, when the liability of the purchaser will, under section XXXII., run from a different date, up to which only, under section XLIV., the defaulter has claim to rent.

22. It seems doubtful whether payment of revenue cannot be, according to the tenor of section XV., after the latest dates fixed for payment.

23. Some addition seems necessary to the closing provision of section XXIII., seeing that it may be impossible, from some cause or other, to receive the tender of payment by the defaulter at the time it is made; apparently he should not be allowed a longer time than that given to auction purchasers for completing payment of his balance, especially as some estates are made saleable only twice a year, and some even only once.

24. It occurs to me that section XXV. should be altered so as to allow the Commissioner to recommend reversal of a sale, even though a petition be not presented within the time specified in section XXIV. A proprietor may be in the clutches of his adversary, or the jaws of death, and thus incapacitated for filing a petition within time. Relief in such cases should be rendered possible.

25. If we are to sell "rights and interests" in estates under this Bill, as I suppose we are, in realisation of balances which have accrued in estates other than those in which the said rights and interests lie, alteration seems necessary in this section.

26. I do not understand how the execution of a decree mentioned in section XXIX. can be obtained without restoration to possession. The terms seem to me synonymous and convertible.

27. A slight alteration at the commencement of section XXXIII. of the Bill seems necessary, because, as noticed in paragraph 17 of this letter, we can, in realisation of demands recoverable as revenue, sell under a different Act.

28. I am very doubtful of the propriety of leaving the words noted on the margin in the specification of the first and second classes of exceptions in section XXXV. of the Bill. Section VI., Regulation VIII. of 1793 shows dependent talookdars who were at the time of the decennial settlement deemed proprietors. Their tenures, like many others, are transferable, and many of them very valuable; at present they can only be brought to sale under a summary decree for rent due at the end of the year (Clause 7, Section XV., Regulation VII., 1799). The Bill converts these talookdars, if they are in arrear at the time the estate in which they are situated is sold, into mere leaseholders, and deprives them and others of what they would obtain if their tenures were sold after paying the rent due on them, which may be in arrear from causes beyond their control; and this alteration of the law not only affects them very seriously, but may be deeply injurious to creditors also. The farmer of the Bill has blown hot on the interests of creditors in section IX., and cold on them in this section.

"And whereon no arrear of rent was due on the latest day of payment of revenue as fixed under sections III. and IV. of this Act.

29. In addition to what I have recorded in respect to sub-tenures generally, I beg to remark, in respect to those now existing, which are included in Class 3 of the exceptions in Section XXXV., that the terms under which these tenures were conveyed may have ostensibly conferred perpetual rights, but the parties knew well that the rights in question were really avoidable by sale for arrears of revenue, and the price paid was proportionately small. The Bill under consideration proposes to give to the tenant the difference of the price paid and the price which would have been paid, to the loss of his landlord.

30. To make the measure fair to the zemindars, it seems to me that the tenures in question should at all events remain liable to be voided by sale for arrears of revenue, unless the under-tenants intermediately secure themselves by purchasing their continuance.

Appendix, No. 7.

31. The rent of good arable land varies from 24 rupees a begah, for the tobacco and potato land at Hajeepore, to four annas a begah in some parts of the Sontal pergunnah; so that it seems necessary to say where the "good arable land," with the rent of which the rent of the land in the fourth class of exceptions in Section XXXV. may be equalised, is to be held situated.

32. I would add to section XXVIII. the words "or by the decision of the superior revenue authorities;" and I would alter section XXXIX. by making the awards of collectors open to revision by those authorities, with or without appeal.

33. I would remark on section XLIII., that Section XXXIV., Regulation XIX., of 1814, urgently requires amendment. The leading principle of the present sale law and Bill is that the revenue shall be paid by a fixed date; but any owner of a specific mehal under butwarrah is at liberty to pay after this date, as, until it expires, it is impossible to ascertain the share of balance which he ought to tender; and because in practice it is impossible to carry out the provision of the section.

I have, &c.
(signed) *H. Stainforth,*
Late Commissioner, Bhaugulpore Division.

From the Collector of Tirhoot, to the Commissioner of Revenue Bhaugulpore (No. 104), dated Tirhoot, 28 April 1856.

Sir,

I HAVE the honour to acknowledge the receipt of the Board's letter (No. 2), dated the 26th of February, with your order passed thereon, dated the 1st of April; and with reference thereto, beg to report my sentiments on the new sale law, together with those of Mr. Deputy Collector Davies.

2. The sections which most affect this district are X., XI., XXXVI., and XXXVII. On receipt of your order I thought it necessary to intimate to the most influential and respectable zemindars, that I should be happy to entertain any sentiments which they might think necessary to urge in modification or otherwise of any of the sections embodied in this Act; but to my astonishment these gentlemen are silent, and up to the present moment I have not been favoured with any reply to my requisition.

3. The information obtained from the Record Office with reference to the various settlements of 1797, 1824, and 1830, lead me to anticipate great difficulty in carrying out the provisions of the Act, should the smaller proprietors of estates oppose. I will take for instance, the settlement of Talook Luckhunpoor. In 1797 this estate consisted of one usli and nine dakhli villages; the sudder jumma was fixed at *Rs.* 860. 12. 6. A portion of this estate was sold for arrears of revenue, under the provisions of Regulation I. of 1793, section X. The estate was afterwards divided into two portions, with separate numbers and jummas on the rent roll but the area of the estate was not apportioned out to the purchasers at auction, the lands remained in joint occupancy. Now, in the event of all the proprietors coming forward and demanding that a separate account be opened, there will be no difficulty in complying with their request, but Talook Luckhunpoor may be the property of 50 or 60 maliks, some proprietors by right of inheritance, some by right of purchase; one malik may hold an anna share, another a pie share, another a gundah share, another a cowree share, another a krant share, another a dunt share, another a musunt share, and another a raen share. Opposition to the application there must be, not from one of the proprietary body, but from half a dozen of them, particularly as section XI. rules that the application must contain a specification of the land and its boundaries. The shares in properties in this district are sub-divided to such an extent that we seldom think of registering the share of a proprietor in the mutation register; we refer the individual to the civil courts, merely inserting his name in the mutation register, without specification of shares.

4. Again, the rent of a mehal comprising many villages has been settled in the lump. The rent roll is mehalwar and not mouzawar. A proprietor may hold a two-anna share in two villages out of ten villages comprising the mehal; or perhaps he may hold one village entire out of ten villages. On his application to open a separate account, there can be no difficulty in carrying out the provisions of the Bill, provided all the other proprietors are agreeable to the arrangement; but the suits instituted under the provisions of Regulation VIII. of 1800 preclude my anticipating any such happy combination of circumstances as would permit my carrying out the provisions of the Bill without constantly referring parties to the civil court. The parties must there seek their redress in the civil courts, and the mehal remains *in statu quo ante.*

5. The landed proprietors of this district are very wealthy. The advances made yearly by the indigo planters and Government on two products alone, indigo and opium, are, at the lowest computation, forty lacs of rupees. The tobacco crop on the ground on a beegah of land, sells for 40, sometimes 50 rupees the beegah. The value of land of course rises in proportion, but large zemindars do not exist in this district with one exception; for out of 5,804 mehals on the rent-roll of this district, one mehal only is the property of the Maharajah of Durbhenga. The necessity of registering the names of proprietors on the mutation register

register without specification of shares, the necessity of referring proprietors to the civil courts to determine their rights and interests in landed estates, proves to my mind most completely that sections X. and XI. will remain a dead letter in this district. The boon intended to be conferred on the proprietary body will be the cause of frightful litigation in the civil court.

6. The majority of the landed proprietors are Hindoos, and those of the upper classes, Rajpoots and Brahmins, are notoriously litigious; it remains to be seen whether their love of litigation and natural disposition of combativeness will succumb to self-interest. The suits instituted under Regulations VIII. of 1800, and XIX. of 1814, have solved this problem in favour of their love of litigation. The law on paper looks very pretty indeed; it is an admirable Bill, and meets with my entire approval; but to carry out its provisions with success is quite another affair. The success of the measure is with the proprietary body; their shares in estates being divided into anna, pie, gundah, pun, krant, dunt, musunt, and raen shares, must preclude my anticipating its successful working; on the contrary, that it will cause an enormous amount of litigation in the civil courts, is to me matter of no doubt whatever. Doubtless many proprietors (where the proprietary body in the mehal do not exceed eight or ten individuals) will take advantage of the provisions of this Bill, but my knowledge of the native character precludes my entertaining any sanguine hopes of its working with celerity and smoothness, not because the provisions of the Act are faulty, but because the native of India is naturally of a litigious disposition, and he is perfectly miserable if he sees his neighbour's condition more prosperous than his own. In a small village community of proprietors this feeling of enmity, one towards another, is intense; to that community the new sale law will be a curse, and not a blessing. Mr. Davies has expressed his sentiments as follows:—

"I have the honour to acknowledge the receipt this day of the Board's Circular, No. 2, dated the 26th February, in which a report is required from collectors on the Bill for improvement of the law relating to sales of land for arrears of revenue. The term is so general that it is difficult to know on what particular point a report is called for. Local peculiarities in regard to landed property which might be affected by the alteration the law is about to undergo there are none; the right of ownership in regard to superior and subordinate tenures are the same here as those prevailing elsewhere in this province.

"The relief offered by separating responsibility is very great indeed, and this measure is hailed with the utmost satisfaction by all the proprietary body. The approval of the principle is universal, and it is a matter of some surprise that, being so obvious and also one by which the Government benefits in an equal degree with the landholder, its recognition should have been so long deferred.

"On the details of the measure by means of which this result is secured it is difficult, without being allowed further time for study and thought, to offer any opinion with consideration.

"But on the first perusal of the Bill, there is a provision in Sections X. and XI., in regard to the period allowed, within which objections are permitted to be made, which struck me as being objectionable on account of its very limited duration. The circumstances under which a party possessing an undoubted right may be prevented from appearing within six weeks are innumerable, and will readily occur to every one; an extension of the time therefore to afford greater facilities for appearance is, in my humble opinion, absolutely necessary. One of the gravest objections to the provisions of the existing butwarah law, is the restriction in the time allowed for bringing forward adverse claims, an objection which has been repeatedly and forcibly brought to my notice by reason of the great number of butwarah cases I have to dispose of in this district. Hence my anxiety to see a similar fault avoided in this law.

"I have another objection to urge. It refers to the unlimited extent to which separate responsibility is permitted. I admit that the principle cannot be gainsaid; every sharer, however small his possession, is entitled to be secured in his just rights. But the question is, how will such a law affect landed property ultimately, from the encouragement it gives to fractional division? I have had cases before me in which applications have been made for the partition of land paying 11 annas revenue, and less. The expense and difficulties which occur in carrying through a butwarah case deter small shareholders, in many instances, from applying for the separation of their interests in a joint estate; but under the present law the separation of shares held in common tenancy will be easy and inexpensive, and the applications which will pour in will not count by hundreds or thousands but by tens of thousands, and in this district more especially, where the proprietary body is known to be very large.

"The most important, as also the most difficult question involved in this Bill, is the one which relates to the security given to under-tenures; from obviously selfish and interested motives the landholders are, as a matter of course, opposed to any legislation on this subject. The question, however, has to be considered not with reference to class interests, but on the broad principles of equity and justice, and with due regard to the security of the public revenue; but on this point the opinion of any one like myself, whose experience is confined to minor revenue matters, cannot be of any weight or consequence. I shall, therefore, be held excused for not offering any suggestions, and indeed the little I have written

Appendix, No. 7.

written on the subject of this Bill has been written with diffidence and hesitation, and more out of respect to the wish you expressed that I should consider and report upon the proposed enactment than from any desire of my own to give an exposition of my opinions."

I have, &c.
(signed) *E. F. Lautour*, Collector.

From the Officiating Collector of Monghyr, to the Commissioner of Revenue for the 12th Division, Bhaugulpore, No. 60, dated Monghyr, the 22d April 1856.

Sir,

In obedience to the instructions of the Board of Revenue, No. 2, dated 26th February 1856, I have the honour to submit a report on the proposed new sale law.

2. I presume that this report is only called for on such parts of the proposed law as may differ from Act I. of 1845. Sections X. to XVII. of this law enact a system of summary division of estates, and Sections XXXV. to XLI. detail at length a system of registration of under-tenures corresponding with the general provisions of Section XXVI. Act I. of 1845. With the exception of these two very important parts, the proposed law is generally similar to Act I. of 1845, with slight differences, such as the omission in Section XXVIII. of the words, "provided such arrears have accrued since the possession of the defaulting proprietor" (Section, XX. Act I. of 1845).*

3. The proposed system of summary butwarrahs appears to me scarcely necessary. The security which is designed for part owners could be conferred by some slight changes in the present butwarrah law, with less danger to the revenue. If the grounds of this opinion be wrong, the Board will, I trust, remember that my experience as a collector does not extend beyond one month. Under the present law a shareholder can always prevent the sale of the estate by paying up the balance due from another owner before sunset, and can recover the amount from the defaulter under Section IX., Act I. of 1845. And were the butwarrah law changed by the rescission of Circular Orders, No. 235, 24th July 1841, and No. 25, 20th January 1841, and a regular division of any shareholder's property from the main estate or the separate mehal rendered legal, such shareholder paying all expenses himself, then by instituting a regular suit, any shareholder may protect himself.

4. A summary butwarrah, such as is planned in the law under consideration, is very dangerous to the revenue, and opens the door to litigation endless. If every owner of a cowrie of an estate, the whole estate being perhaps a jagheer of five or six beegahs, is entitled to open a separate account with Government for the payment of one pie annually, and entitled to have the sixteenth part of a beegah measured off the said estate, there will be great increase of labour in the collections, and great opportunities of fraud. There are many small estates of this kind (with many owners) in this district. It may be said that this petty ownership does and must exist, and the law merely protects the owners. But registering a right is a very different thing from mere protection, and by the rules of political economy the extreme subdivision of the land is a certain cause of weakness in the state, a fact which is so certainly known as to have given rise to the law of primogeniture; consequently the extreme facility which the proposed law will give to this subdivision is impolitic, and it is possible that the occasional suffering of a part owner whose estate is sold for another's arrear may be and is productive of good to the state.

5. Sections XXXV. to XLI. of the proposed new law contain detailed instructions for a system of registration of under-tenures, such registration having been allowed in general terms in Section XXVI., Act I. of 1845. That this rule is unnecessary, at least in this district, is proved by the simple fact that no under-tenant has ever availed himself of the provision; and as under-tenants appear to me sufficiently protected by Section XXVI., Act I. of 1845, and Section X., Regulation V. of 1812, I think that this registration, if carried into effect to any extent, would materially increase the difficulty of realising arrears of revenue from estates, and would open the door to much fraud.

6. I have mentioned above my belief that a trifling alteration of the Division of Estates law would render any summary division unnecessary, an alteration which the Board of Revenue could effect without the interference of the Government. By filing petitions for such summary divisions just before the quarter day (which would prevent the sale of their shares), endless confusion and serious loss of time and revenue might be caused by fraudulent parties. For these various reasons the proposed sale law is in my humble opinion unnecessary, and, wherein it differs from Act I. of 1845, impolitic.

I have, &c.
(signed) *W. Tucker*, Officiating Collector.

---

* So in original.

From the Officiating Collector of Bhaugulpore, to the Commissioner of Revenue, Bhaugulpore Division, No. 102, dated Bhaugulpore, 19th April 1856.

Sir,

I HAVE the honour to acknowledge the receipt of the Board's letter, No. 2, dated 26th February 1856, calling on me for a report regarding the draft of a new sale law, and in compliance with the Board's orders, beg to submit a few brief comments regarding it.

2. The objects set forth in the preamble are most undoubtedly of the highest consequence, and the security to landed property given by an Act such as the one proposed, if carried out fully, will give a stimulus to the expenditure of capital on land which did not before exist.

3. The difficulty in carrying out the provisions of the Act in this district lies in the increase of work which it would throw on all departments of the collector's establishment, (this could however be obviated by increasing the establishment) to carry out the provisions of the Act, without a considerable increase in both the accountants towjee and other partments, would be, I believe, impossible.

4. On the towjee of this district there are borne 3,632 mehals, as noted below.

DESCRIPTION of MEHALS.	Number of Mehals paying a Jumma exceeding 100 rupees.	Number of Mehals paying a Jumma less than 100 rupees.	TOTAL.
Nizamut.			
1. Mehal permanently settled - - - - - -	563	702	1,265
2. Invalid Jagheer Mehal permanently settled - -	2	1,722	1,724
3. Mehal temporarily or summarily settled or let in farm - - - - - - - - - -	0	0	643
	565	2,424	3,632

According to the provisions of the Act, there is no limit as to what shares are to be permitted to open out separate accounts. In many estates the number of shareholders is very large and the amount of sudder jumma paid by each consequently small; I presume by the scale of fees entered at the end of the draft Act it was not intended that very small shareholders should be permitted to take advantage of the Act, and I would beg to suggest that no separate account should be permitted for any share not paying a sudder jumma of at least fifty rupees per annum to Government; and I believe that were this limit to be fixed, the number of applications for being allowed to pay for their shares separately would be very large; and I do not think it advisable to permit the indulgence of a separate account any parties whose share does not pay such a sum annually.

5. The security given to farmers by Section XXXVII. of the draft Act is of great importance, and it appears to me that the precautions noted therein for the prevention of the registration of farms fraudulently granted at low jummas (provided that can be carried out) are sufficient; I cannot but think however that to carry out the provisions of this section in a manner to fulfil the intentions of the Act will be very difficult, especially at first when a great many applications may be expected.

6. The report or measurement of an ameen which cannot be tested by an officer of the department, is not ground on which a collector can with any confidence decide as to how far the jumma put on the same is fair as regarding the sudder jumma of the estate, and in most cases of collusive farms there is no likelihood of any objection from any party, as the zemindar and mostajir would be both in league on the matter; and should local investigations not be held by an officer of the collectorate, it is probable that the Act may be taken advantage of in many instances to secure through the concurrence of ameens the registration of farms assessed at fraudulently low jumma.

7. The only security against this is in my opinion a local investigation, and I believe it to be of the highest importance to the public that this be insisted on; if assistance be given to the collector by covenanted or uncovenanted assistants sufficient to enable him to institute real inquiries into the matters regarding which he is required to satisfy himself by this section, the registration of farms will be a boon to the public, but I do not think that without such sufficient inquiry it will be productive of good. I would propose that no farms paying a jumma of less than 100 rupees be considered capable of being registered.

Appendix, No. 7.

8. It appears to me that the number of dakhil kharij suits instituted will be greatly increased by the promulgation of this Act.

9. I see no valid objection to the proposed Act, with the exception of the increased work which will be thrown on the collector's establishment, which is already too small for the work expected of it; should it become law, I trust that from the fees which are realised from applications under it, extra aid may be permitted to be entertained. At present the accountant's department in particular is much over-worked, and for every share that is separated from the parent mehal the number of chellans and entries in the zemindary account will increase, and the difficulty of making up the accounts during the last days of payment will be still more felt than it is at present. The Act is framed with a view to protect the interest of those who pay the Government revenue, but to enable it to do so efficiently it will be necessary to provide the collector with means sufficient to carry out its provisions.

10. I have but a very short time since entered the revenue line, and have still a great part of my time occupied by magisterial duties; the call for a report on this Act is urgent, and I regret not to have time to spare from my other duties to give the matter more thought, and more time to the writing of this report. I beg to forward this letter, trusting that the great press of business which occupies my time will serve as my excuse for its brevity and for any imperfections which it contains.

I have, &c.
(signed) *E. Russell*,
Officiating Collector.

From the Officiating Commissioner, Burdwan Division, to the Board of Revenue, Calcutta, No. 270, dated Burdwan, the 29th March 1856.

Revenue.

Gentlemen,

I HAVE the honour to acknowledge the receipt, on the 10th of this month, of your Circular, No. 2, dated the 26th February, requesting me to call for a report from each of the collectors of this division on the Bill for the improvement of the law relating to sales of land for arrears of revenue, and to submit the same to your Board.

Bankoora, Burdwan, Hooghly, Midnapore. The return from Beerbhoom has not yet been received, but will follow.

2. In accordance with this request, I forward the returns mentioned in the margin in original, and beg to state my own opinion on the Bill as called for also by your Board.

3. The draft law proposes the following alterations in the existing law:

First. The extension of the ordinary law of sale to the province of Cuttack, which has hitherto been exempted from its operation.

Secondly. The securing the rights of a mortgagee who pays up the balance due from an estate.

Thirdly. The securing the rights of a solvent shareholder against the default of his co-sharers.

Fourthly. The securing the rights of a solvent proprietor against the neglect or fraud of his agent.

Fifthly. The securing the right of under-tenants.

4. On the first point the opinion of the Commissioner of Cuttack will probably have decisive weight. I am aware of no valid objection to the proposed extension.

5. The second point secures the right of mortgagees very effectually, and, in my opinion, very fairly and properly. By the present law, although a mortgagee may pay up the balance due on an estate, that gives him no additional lien upon the property; he can only recover the sum so paid as a common debt in the regular mode through the civil courts. The draft law, however, provides, at the end of Section IX., that if the mortgagee can prove before a court of justice that the deposit made by him was necessary in order to protect any lien he had upon the estate, the amount so paid by him, "shall be added to the amount of the original lien." This amendment seems to me, as I have said above, a very just and proper one, and a great improvement upon the old law.

6. The third alteration protects the solvent shareholder from the default of his partners. There can be little question, I imagine, as to the propriety of this amendment if it be possible to carry it out; but the difficulty is, as to how it should be done. The draft Act proposes that every sharer in an estate, whether a sharer in a joint estate held in common tenancy or the holder of the specific portion of the land of an entire estate, should be able to protect his share from sale by paying up his own portion of the balance, and that in such cases the Collector, after certain inquiries, must open a separate account in his books for the solvent shareholder (Section X.), and must credit separately to his share all payments made by him on account of it.

7. It strikes me that this mode of proceeding will hardly answer the purpose contemplated; that is to say, that it will be found in practice so complicated and cumbrous, that it will probably break down.

8. There

8. There are hundreds (literally hundreds) of estates in this district alone, which pay less than one rupee per annum, and some of these have "recorded sharers," any one of whom may, under the new law, claim to have a separate account opened for him in the collector's office. What a mass of complicated accounts this will necessarily give rise to.

9. One of these "recorded sharers," for instance, comes to the collector on the latest day of payment, tenders the amount of his share, and gives in a written application asking to have a separate account opened in his name. The collector receives the money at once, and on the next day issues the notice required by Section X., and not until some time after can he decide upon the propriety or otherwise of allowing a separate account to be opened in his books. He may have hundreds of such applications, and the last of them may not be decided on for some weeks, or even months. In the meantime the collections and accounts in the office are thrown into confusion, and I am not sure that the Government revenue may not, perhaps, suffer in consequence.

10. Take a case for instance: A, B, C, D, are recorded proprietors of Mouza E. A, B, and C, deposit their separate shares and crave a separate account, but D deposits twenty rupees, saying that half, not only a fourth, of the estate is in his possession. After some time the collector "institutes a summary inquiry into the fact of possession," and decides, under Section XII., that D is in possession of a two-fifth share of the estate, and A, B, and C, of one-fifth share each. Now here will be a difficult matter to settle, for every one knows how very complicated butwarrah cases are at all times; but this is not only a butwarrah case, but an Act IV. of 1840 case also; and under the proposed law such cases may occur over and over again.

11. It seems to me, on the whole, that the draft Act mixes up, unnecessarily, a butwarrah law with a sale law, and that it would be preferable to separate the two—to pass the sale law without any butwarrah provisions, and to make a separate enactment for the latter purpose.

12. But if it be determined to have the two together, I would certainly recommend that a limit should be laid down, and that the benefit of separate payments should not be allowed to any shareholder who does not pay at least (say) 50 rupees per annum.

13. It is said that the share of a poor man paying 40 rupees per annum may be of as much concern to him as the estate of the Maharajah of Burdwan paying 40 lakhs, and that therefore it is not just to lay down any limit. It may not be easy to gainsay this, but still if we find in practice that this cannot be carried out, as I think, we must set aside the plea of universal justice for that of general utility. If there is no limit, the shareholders paying anna and even pice jumma are entitled to a separate account equally with these who pay lakhs; but this would, to my mind, give rise to so much complication and confusion in the accounts, as to jeopardise the entire scheme.

14. There should also, I think, be some limit as to the time within which applications for separation of shares should be required to be made. For instance, all such requests should be made in writing (say) one month before the last day of payment of revenue.

15. There is another point which I may notice connected with this part of the subject, namely, whether in case a sale takes place of a share which has been separated, and no bid be offered equal to the amount of arrear, a second period of ten days should be allowed to the defaulter to pay up his original balance. I would strongly urge that it should not; this indulgence would break in upon the essential principle of the sale law—a principle which has been found to work so admirably—and I should be very sorry to see it thus set aside. Such a clause would be, to my mind, a step backwards in legislation.

16. With regard to securing the rights of a solvent proprietor against the fraud or neglect of his agent, by allowing the former to deposit with the collector cash or Company's paper for the purpose of being applied to the payment of arrears, I imagine, there can hardly be two opinions. This will be a very great boon to all proprietors of land, and will be looked on as a benefit of no ordinary kind. The advantages are so self-evident that it seems strange it should never have struck any one before.

17. There should, however, it seems to me, be a discretion allowed to the collector to reject such applications, if he thinks fit. Without this we shall have landholders depositing Government securities with the collector merely to get rid of the trouble of drawing the interest themselves; others may place it in the collector's treasury for security's sake, and not for the purposes contemplated by the law.

18. I now come to the most important part of the draft Act, namely, the subject of under-tenures.

19. Under the present law all recent under-tenures fall on the sale of the parent estate. The natural consequence is, that but few capitalists will lay out their money on land to which they can get no sufficient title. Capital is universally admitted to be the great want of India, and therefore it may be not unfairly said that the present sale law has the effect of contracting, instead of developing the resources of the country; of depressing, instead of raising the value of land, and of discouraging, by every means in its power, the introduction of men of European skill, and enterprise and capital, into the interior of India.

Appendix, No. 7.

20. Many years ago the present Lieutenant-Governor of Bengal proposed a plan by means of which, as it seems to me, all these drawbacks would have been avoided. He suggested that under-tenures should not be in any way affected by a sale, that they should stand as good with the purchaser as with the old proprietor who created them, and that the sale in fact should be made subject to all the incumbrances which may have been imposed upon it before or after the time of settlement by any former proprietor. If, from the over-creation of such tenures, the value of the parent estate should have fallen below the amount of the Government revenue, so that the latter would be jeopardised, it was further proposed, at that time, that the estate should revert to Government, who would be empowered to make a new settlement of the land.

21. This always seemed to me a very complete remedy for the great acknowledged evil of the present law, one which would get rid of all the reasonable complaints of honest under-tenants, and at the same time secure, in the most complete manner, the revenues of the Government; but the draft Act proposes something quite different, and we are now told that the proposal to which I have alluded above does not give complete security to under-tenants, that it is a "half measure at best."

22. The new proposal is, that all under-tenures should be registered, and that when the holder of a new under-tenure (that is, of one created subsequent to the settlement) applies for registration, the collector should immediately cause the talook to be measured and surveyed at the expense of the talookdar. Then, if the collector is satisfied that the rent of the talook is fully sufficient to afford its share of the jumma of the estate, the tenure will be registered in complete detail, and this registry will secure it, in all time coming, whatever may become of the estate.

23. With much deference to the great name and to the acknowledged ability of the proposer of this amendment, I must say that I doubt very much whether it is calculated to benefit the person whom it professes to advantage (namely, the under-tenant) as much as is supposed; and it seems to me eminently calculated to jeopardise the Government revenue.

24. First, as to the under-tenant. By the original proposal his lease would stand good, notwithstanding a sale, and it would only be in case the value of the entire estate sunk below the amount of the sudder jumma that it could ever be hereafter questioned.

25. My belief is that this is a contingency which would but rarely occur, except in the cases which it was intended to meet, namely, cases of fraud; and in such cases, who would wish to uphold the interests of the fraudulent under-tenants?

26. It is notorious that the value of permanently settled land has risen very greatly during the last half century. If it had not done so, should we have two-thirds of the land in Bengal held under talookdaree tenure as at present? The original zemindar would not let his land except on a profit which the talookdar has to pay, and this profit shows the increased value of the land.

27. Wherever, therefore, there are under-tenures, especially when they are held by men of capital, we may be pretty sure that the parent estate is not likely to fall into the hands of Government from depreciation.

28. In the very uncommon case of a *bonâ fide* depreciation of permanently settled property by (say) diluvion, or the decay of old markets, or any other accidents, the under-tenure would be liable to a re-settlement, and it is said that advantage might be taken of this by the Government, and that the collector would fix the revenue of every beegah of land according to its existing value; so that a meritorious under-tenant would be fined by an enhancement of his jumma for having improved the value of his tenure at his own expense. But if this is the only objection, and it seems to me, I must say, very much of a visionary one, it might be partly remedied by declaring that in any new settlement so made, the new jumma of the entire mehal should not be raised above the permanently settled jumma. Thus, if the jumma of the whole estate was 100 rupees, and that of the under-tenure 50 rupees, the collector, if he thought fit at the re-settlement to put a jumma of 90 rupees on the under-tenure, would be unable to put more than 10 rupees on the rest of the property. It may be asked how would this benefit the meritorious under-tenant? It would, at any rate, guarantee him against any exorbitant demand.

29. The amended proposal is declaredly intended to benefit the under-tenant himself, but I very much question whether that person would not prefer the original proposal to the new one. There would be no expense of compulsory registration, no trouble, no measuring, no surveying, no ameens, no mooktears, no inquiring into crops, assets, and so on, in order to "satisfy" the collector that the rent of the talook was sufficient to afford its share of the jumma of the estate. All would be clear before him, and he could lay out what capital he pleased on his property from the day after the amended law was passed, and never trouble his head about the zemindar or his affairs, and never be obliged, as is too often the case now, I am inclined to think, to advance money to the zemindar in order to prevent him from carrying out a threat of default. He would also, if the estate were brought to the hammer, have the option, which I believe in nine cases out of ten he would seize, of purchasing the whole property himself; or if he did not choose to do this, he might, I believe, very

very placidly trust himself to be fairly dealt with by the collector, or, if not by him, by the commissioner, and failing him also, the Board and the Government.

30. And now as to the interests of Government under this new law. It strikes me that it leaves the Government too much in the hands of the collector. An under-tenant applies for registry. The collector causes the tenure to be measured and surveyed, and if he is satisfied that the rent paid by the under-tenant is fully sufficient to afford its share of the jumma of the estate, the tenure is at once registered, and this registry secures it for ever at the rent then fixed.

31. But do collectors never make mistakes in settlements? Are they never deceived by the ameens and subordinates to whom they must trust for a great portion of the information upon which their settlement must be founded? Are commissioners never wrong in their judgment in such matters? Has experience told us that the revenue authorities are immaculate? that they never commit an error or a fault in a settlement?

32. It may be worth the while of many under-tenants to spend large sums of money in furnishing false information during the progress of such surveys, but the collector's order once given, the under-tenant is safe "in all time coming;" there is no *locus penitentiæ* for the Government, the collector's order has been passed and cannot be amended.

33. On the whole, I am of opinion that the original amendment proposed would be found in practice to work better than the new one, that it would be more satisfactory to under-tenants, and that it would be a much safer principle for the Government to go upon themselves.

I have, &c.
(signed) *J. H. Young*,
Officiating Commissioner.

From the Officiating Collector of *Burdwan*, to the Commissioner of Revenue, Burdwan Division, No. 47, dated the 24th March 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your letter, No. 40, dated the 10th instant, with its enclosure from the Board of Revenue, No. 2, dated the 26th ultimo, on the subject of the proposed Bill for the improvement of the law relating to sales of land for arrears of revenue, and with advertence thereto I beg to offer the following remarks:—

2. The fundamental alterations proposed by the Draft Act to be introduced, may be condensed under the following five headings:

I. The doing away with the necessity of obtaining the previous sanction of the Board of Revenue to sales of estates for arrears of revenue in the province of Cuttack.

II. The securing to the mortgagee of an estate, in the event of his preventing the estate being sold by himself paying up the Government arrear, the same benefit *quoâd* the sum so deposited as he possessed in regard to his original lien on the estate.

III. The allowing landholders to deposit Company's paper with the collector, so as to prevent their estates being sold owing to accidental circumstances or owing to the fraud or neglect of their agents.

IV. The securing from sale the shares of non-defaulting co-proprietors in estates, whether the shares in question may be held in joint tenancy, or whether the area held by each sharer may be distinct.

V. The registration of *bonâ fide* under-tenures; both those which existed at the time of the decennial settlement, as well as those which have since been, or may hereafter be created, and the thereby upholding the proprietors of them in possession of their lands at the same rates as heretofore, whenever the parent mehal, of which they form integral portions, may be sold for arrears of revenue, or for other demands which are directed to be realised in the same manner as arrears of revenue.

3. It is to the last two most important of the five proposed fundamental alterations in the law that it is my intention chiefly to confine my remarks. I am not aware of any objection to the three other proposed alterations; but, on the contrary, I consider the concession which it is in contemplation to grant to mortgagees, and the allowing landholders to deposit Company's paper, to be eminently just and useful measures.

4. It occurs to me to remark, in connexion with the proposed change in the method of conducting sales of estates in Cuttack, that some alteration in the wording of Section V. of the Draft Act is called for in regard to estates which are not situated within that province. I allude to the second class of estates which it is proposed under the new law shall not be sold unless the provision of Section V. of the Act shall have been duly followed out in respect to them. I think it should be more clearly defined what is meant by permanently

Appendix, No. 7.

settled estates. The Board of Revenue ruled in their circular, dated the 18th May 1842, No. 13, that estates could not be sold under the general provisions of the sale law until their settlements had been confirmed by competent authority. The mode of procedure which has been adopted in consequence of this ruling has been to dispense with the fifteen days' special notice of sale in all cases where the settlements having been regularly completed with the proprietors under the provisions of Regulation VII. of 1822, had been confirmed by competent authority, even although those settlements were temporary ones only. On the other hand, estates settled in perpetuity by the settlement officer or collector, but the settlement of which had not been confirmed by competent authority, could not be sold without the fifteen days' special notice being in the first instance issued. I do not think it can have been the intention of the framer of the new Act to put the temporarily settled estates of the districts of Bengal in a more favourable position than that which they before occupied, in a better position indeed than that which it is intended the Cuttack estates of the same calibre shall henceforward occupy; and it seems to me therefore that the wording of the section ought to be so altered as to continue the Bengal temporarily settled estates which have been confirmed by competent authority on the same footing which they formerly stood on and on which it is now proposed to place the Cuttack ones. In the same manner the section ought, it appears to me, to define that permanently settled estates in Bengal districts are not to be sold without the special notice, unless their settlement has been confirmed by competent authority.

5. Next, in regard to the proposition of staying the sales of the shares of non-defaulting co-proprietors of an estate, whether the shares in question are held in joint tenancy (ejmalee), or whether they are held separately (tafreek or chinnit). It appears to me that, in the former case, that is to say, where the whole estate is held in joint tenancy, the mode of procedure recommended by Mr. Grant may with much advantage be resorted to, and that, in the second description of cases, that is to say, where the land held by each of the co-proprietors is held by them separately, the same method of dealing with the separate shares of the estate may be successfully carried out, although the operation will undoubtedly be one of great labour and intricacy. I agree in the propriety of allowing a non-defaulting co-sharer in either of the above descriptions of cases to save his share from sale, and also of Mr. Grant's proposal to bestow that boon on all classes of estates, however small their extent and jumma; and I am also of opinion that the allowing co-sharers to open separate accounts with the collector for the sums due on their respective shares is a proper measure, although it will certainly cause much additional trouble to the collectorate omlahs in some districts.

6. The manner, however, in which the Bill proposes that the defaulting proprietor's share shall be dealt with when put up to sale, and the course which is to be adopted in selling the whole estate when the balance due on the share is not covered by the amount bid for it, appear to me to be open to objection.

7. I do not see why it should be considered necessary in the former case for the amount of the bid to be sufficient to cover the amount of the balance. If the balance due by the sharer was rupees fifty, why should not the collector be allowed to sell, supposing there was a *bonâ fide* bid of rupees five, or say of one rupee even, Government being left to realise the residue of the arrear from the defaulter in such manner as they might be able? There would certainly be danger sometimes of the defaulting shareholder colluding with the new purchaser, but I do not think such a result would often occur. I would empower the collector to sell on any *bonâ fide* bid which might be made for the purchase of the share, how small soever that bid might be, and by whomsoever (the defaulting sharer alone excepted) that bid might be made. I would restrict the collector receiving a bid from the actual defaulter unless it exceeded in amount four times the sum due. In this manner twenty-five per cent. of the purchase money would be at once realised from the defaulter, and the Government arrear would be at once recovered. There is nothing, that I am aware of, in the existing law, which prohibits an actual defaulter bidding for the purchase of his own estate when put up for sale for arrears of Government revenue; nor is it desirable, nor was it I believe ever intended, that any such restriction should be imposed on landed proprietors, who may from time to time for various reasons be desirous of ascertaining the market value of landed property in the different districts in which they are proprietors by putting their own estates to the test of a public auction.

8. Under the existing law the course which a collector would adopt in the event of the actual defaulting proprietor of an estate making a bid and there being no other bidders for it, would be to bid for Government up to the extent of the balance, and if the defaulter went beyond it, to knock the estate down to him; but, as of course Government would not buy shares in estates, this method could not be followed out in dealing with them, and I would recommend, instead of it, the modified plan which I have noted above. The collector would only have to proceed to the ulterior measure proposed by Mr. Grant when there had been no *bonâ fide* bid, however small, for the share, or when the bid made by the actual defaulter himself was less than four times the amount of the balance.

9. Where the co-sharers who had paid up, and to whom would be given the option of purchasing the defaulter's share in the event of the latter not being disposed of at the first sale, might not be able to agree among themselves as to who was to be the purchaser, it appears to me proper that some provision ought to be made in the Bill to decide the point. One of the co-sharers might say, for example, that he was ready to purchase the whole of the defaulter's

defaulter's share, but that he was indisposed to purchase it in conjunction with his brother-sharers; and a second, perhaps a third, co-sharer, might say the same. To which of them in such case should the preference be given? To him holding the largest share in the residue of the estate? To the one who was prepared to pay the largest price? or, if the co-sharers could not agree amongst themselves as to who was to be the purchaser, would in such case the whole estate have to be brought to the hammer? I think that, in the event of dispute, the share should be sold to the highest bidder among the non-defaulting co-sharers.

10. With regard to the question of enforcing the registry of under-tenures, I am of opinion that it should be left optional with the proprietors of such of them as existed at the time of settlement to register or not as they might think proper. If registry were effected, it should thenceforward ensure the under-tenure holders from ejectment and enhancement of rent; but if it were not effected, I do not consider that the omission should be considered a sufficient ground for ignoring the validity of the tenure. To say nothing of the expense, there may be many good reasons why the holder of an old under-tenure is not prepared to register. He may have already obtained a suit in the courts upholding the validity of his tenure, or the very fact of his non-registering may be the means of inducing the zemindar to bring a suit to try the validity of a holding regarding which there previously existed no dispute whatsoever. I have no doubt that a very large number of the holders of the old under-tenures will take advantage of the provisions of the Act and will proceed to register; but, as I have remarked above, I would make the act of registering an optional, not an imperative one, and I would not put any limit on the period within which the old putnee holders should be required to proceed to registry, or in default of doing so, should lose the benefit they would otherwise have derived from resorting to it. From the wording of the Draft Act (Section XXXVI.), it would seem that the collector will not be required to make a survey of these old tenures when application is made to him for their registry, but that he is to be guided by the information filed by the applicant as to the boundaries and situation of the holding, and is to proceed at once to register in the absence of any objection on the part of the zemindar: but it seems to me that a survey and careful recording of these old tenures is quite as much called for as is a survey and record of the new under-tenures; for the zemindar might, if so inclined, collude just as easily with the holder of the one as he could with the holder of the other.

11. The proposal for surveying and registering the new under-tenures according to the rules laid down in the Draft Act is an equitable one, and although the carrying of it out will in many districts, especially in those to the eastward of Bengal, be attended with very great difficulties, still I think that the difficulties will not be insurmountable.

12. In this district (Burdwan) I do not anticipate much trouble in carrying out the work. The putnee talooks, generally speaking, consist of one or more whole villages, and as the boundaries of each village, as well as its exact area, will have been correctly marked out and ascertained by the revenue survey, the collector will find but little difficulty in ascertaining whether or not the annual talookdaree jumma bears a fair relative proportion to the gross revenue of the whole estate. The old collectorate papers will show him what were the area and assets of each separate village of each separate estate at the period when the records in question were drawn up, and although the assets and areas of some of the villages may now differ more or less from what they then were, yet I do not think that the difference will in many instances be found to be large.

13. Tracing out, surveying, and recording, parcels of land held in putnee, and the making an approximate calculation of their assets relatively to those of the estate of which they form a component part, will not be nearly so easy an undertaking where the under-tenures, instead of consisting of one or more whole villages, comprise, as is not unfrequently the case, only parts of one or more villages, those parts not being in one compact plot, but scattered in different pieces all over the village. The survey and the old collectorate papers will only in such cases be so far of assistance to the collector in enabling him to determine the relative area and assets of the under-tenure *quoâd* the gross area and assets of the parent mehal, that the former will show the limits and area of the villages in which the several parcels of land making up the under-tenure are comprised, while the latter will show the extent and jumma of the several villages as they stood at the time when the papers in question were prepared. It will still remain for the collector to survey and map the several parcels of land to ascertain the description of soil, and, having done so, to determine whether the putnee jumma paid by the putneedar for his holding is or is not fairly proportionate to that of the whole estate.

14. In this district and in Bancoorah, the registration of the putnee talooks will be materially assisted by the course which has been adopted in carrying out the revenue survey. The greater part of these two districts appertain, as you are aware, to a very few large mehals, which mehals are let out in putnee tenures of one, two, three or more villages in each, to a large body of putneedars now in Bancoorah. It not unfrequently happened that there were so many as 15, 20, 25, or even 50 contiguous villages all belonging to one and the same mehal, and the separate identification of each one of which was not therefore absolutely demanded by the survey rules; but as these fifty villages were all let out in putnee to several, perhaps, nearly to an equal number of putneeders, a mowzawarree survey, or what was in most instances an equivalent to a talookdaree survey, was deemed proper to be resorted to. This was effected in every instance in which adjoining villages were held

Appendix, No. 7.

by distinct putneedars, and in almost every instance the boundary was amicably adjusted between the parties, all future disputes in the magistrate's and in the civil court as to the boundary between the adjoining villages or putnees being thereby set at rest for ever. The putnee tenures in Burdwan are very similar in nature and extent to what they are in Bancoorah, and they are being dea't with in the same manner.

I have the honour to be, &c.
(signed) *H. M. Reid,*
Officiating Collector.

From the Officiating Commissioner of Revenue, 16th Division, to the Board of Revenue, Lower Provinces, Fort William, No. 308, dated Chittagong, 19th April 1856.

Revenue.

Gentlemen,

I HAVE the honour to submit my opinion on the draft of the new Sale Law, and to forward the communications I have received from the collectors of this division on the same subject.

2. Sections X., XI., and XII. treat of the separation of shares, whether held in common tenancy, or consisting of specific portions of land. A recorded proprietor may apply to the collector to pay his share of the Government revenue separately, and a recorded proprietor may, within six weeks of the issue of a notice, make objection to the application. It must be a well-known fact that numerous estates do not bear on the books of the collector anything like all the names of the parties who are the several proprietors. Is it intended that non-recorded, but at the same time well-known proprietors, shall be debarred the benefits of this provision of the law? If such is not the intention, it should be declared that all joint proprietors, be they recorded or not, shall be at liberty to avail themselves of the provisions of Sections X. and XI., and that they shall be at liberty to object to those provisions being made available by any co-proprietor; and the question, whether the party applying, and the party opposing were proprietors or not, might be left to be decided by the collector in the summary inquiry he is directed to make in Section XII.

3. But, if it is the intention of the law to confer the boon of separation only on recorded proprietors, the sections may stand. A correct record of the interest held by every individual owner of land in every estate is so desirable that I should be glad to find that the sections are meant to be restricted to recorded proprietors. If non-registration is attended with such hazard, and the reverse with such advantage, that owners of land will naturally seek for the record of their rights, we shall have in time a public record of owners of estates approaching to correctness and completion.

4. It depends also on what may be the aim of the law whether Section XIV. should or should not be modified. If the object is to force co-proprietors to register their names as such, then the limitation of the right to save the estate from ultimate sale by the payment of the arrear (after the failure of a first sale to realise the amount of the arrear) to recorded proprietors, is calculated greatly to promote the object in view. But, if there is no such object, and if it is right to make such a provision as that contemplated in Section XIV. in favour of proprietors, equal justice to all requires that any joint proprietor, recorded or not, should have it in his power to stay the sale of the entire estate by paying up the arrear due upon a fraction of it.

5. But, be the sections taken in their limited, or more extended sense, they cannot fail in operation to bring an immense immediate and prospective addition of business upon the collector and his establishment. Every partner in an estate will now apply to have his name registered in the collector's register of mutations. Being a recorded proprietor, his next step will be to apply for a separation of his share under Sections X. and XI. In most instances there will be no opposition, and the separation will be effected as a matter of course without much personal trouble to the collector; but the effect of the measure will be important as regards the labour to the collector's office. The revenue-payers will be multiplied in many districts several fold, and in the place of the 40,000 separate accounts now kept with as many, for the most part petty proprietors, the Chittagong collector will have to open separate accounts with perhaps not less than a lac of proprietors, of a still lower order.

6. But the instances of opposition, especially under Section XI., will be by no means rare, and the inquiry, however it may be called, cannot be otherwise than tedious and difficult.

7. My own mind finds no difficulty in imagining a case wherein nothing but a regular partition, made after a survey of the estate, would suffice to enable the collector to decide what amount of revenue ought to be the quota of the share sought to be separated. Cases connected with butwarrahs are, beyond all comparison, the most troublesome of all the duties which now come before a collector, and a great addition of such cases is not to be contemplated upon, without apprehension that the collectors will find themselves unequal to the prompt discharge of their duties.

8. Still the aim of the law is so admirable and the justice of it so undoubted that its provisions, as above discussed, ought to be retained as far as possible. The multiplication of revenue-payers, is what cannot be avoided, and an extra establishment, at a trifling cost, will meet

meet that difficulty, while the fees for the separation may be expected to yield a considerable sum of revenue at once. Where no opposition is made to a separation, and where no difficulty is experienced by the collector in ascertaining the proper amount of revenue to be put upon the share to be separated, the separation might be allowed to take place in the manner prescribed. But to provide against the collector being overworked by having to investigate difficult cases of disputed rights and interests, he should be allowed to refuse separation and to refer the parties to the Civil Court for the adjustment of their claims. The decision of the suit by the Civil Court might be declared to be summary, subject to modification or alteration by a regular butwarrah whenever that might take place.

9. In the Schedule A and B appended to the Act there is nothing said of the expenses of any local inquiry in connexion with Sections X. XI. and XII. If those sections are to stand and the collector is to be vested with no discretion to refuse an investigation, however complicated, provision ought to be made to authorise the collector to entertain, at the cost of the parties, any establishment he may require in order to effect any necessary local inquiry.

10. Referring to Section XV. it may be asked, is it the object of the Legislature to afford to landholders the means of purchasing the redemption of the land tax? If so, instead of a deposit of a public security bearing interest, the rate of which is subject to fluctuation, a specific sum, in lieu of the tax, should be fixed as the price of redemption, say a sum equal to 20 years' purchase. At this rate there can be little doubt that the privilege would only be rarely taken advantage of, but there may be estates so lightly assessed, or the property involved on the estate may be so valuable, or the condition of the party desiring redemption may be so peculiar, that the purchase amount would be as nothing compared with the benefit to be gained by the possession of a rent-free tenure in perpetuity.

11. If a deposit is observed only as a temporary security against sale, it should be at the option of the party desiring such security, to make it; and if the principle of compounding for the land tax is not one opposed to the stability and well-being of the State, the means of effecting it should be rendered as easy as the nature of the transaction will admit.

12. With a view to the improvement of under-tenures, three separate schemes have been proposed. One scheme is in the law; another has the high support of the present head of the Bengal Government; and the third emanates from Mr. Ricketts. One scheme is to compel the registration of all under-tenures, immediately from the zemindar, after inquiry, and to regard all registered under-tenures as safe for ever. The second scheme is to register all under-tenures, whether created by the zemindar or some inferior holder, the registry of which is desired by the parties themselves, without inquiry, and to hold such tenures safe against all future purchasers of the zemindaree so long as the latter is saleable for its arrears at a price equal to the arrear. Mr. Rickett's scheme is to register, after inquiry, all under-tenures which might be desired to be protected against Government as auction purchaser, and to register, without inquiry, all tenures which only require protection against other auction purchasers.

13. With regard to the first of these schemes, its details are contained in Sections XXXV. to XLI. of the Draft Act. Old talooks must be registered as well as those newly created. With regard to the first class of talooks, the old ones, the course of procedure, as laid down in the second clause of Section XXXVI., is simple, and seems to me a most judicious and advisable measure. If no other talooks are to be registered, those which profess to have been held prior to, or from the time of the perpetual settlement, ought certainly to be registered. On every change of proprietors, this want of a register gives rise to continual frauds, and is the cause of extensive and harassing litigation. Men who have no talookdaree rights assert them against the new purchaser, and if the old proprietor is in league with them, they often succeed in establishing a fraudulent title; and, on the other hand, an auction purchaser knowing the natural disposition of the natives to set up false titles, often disputes a valid one from sheer ignorance of the nature of the title.

14. But, owing to the facilities which exist for creating fictitious and fraudulent tenures, whether new or old, by forged deeds, I would not accord to any under-tenures any exemptions or privileges, such as would effect the rights and interests of Government as auction purchaser of the estate in which such tenure was contained, which are not now attached to such tenures. Talooks held twelve years prior to the revenue settlement are safe by the present law, but talooks created since then, lapse on a sale for arrears of Government revenue; and I would now deal with such, precisely as I would with newly created talooks, of which I am now about to speak.

15. In working the plan proposed for the registration of new talooks, I foresee innumerable difficulties. How is the collector to satisfy himself that a talook has been created in good faith so far as the interests of the Government revenue is concerned, and that the rent payable by the holder is not less than is fully sufficient to afford a fair proportion of the revenue assessed upon the parent estate? This couldnot be done without measuring and ascertaining the assets of the entire estate. Where a zemindar has ten villages and pays 1,000 rupees for the whole, by what means shall the collector be able to say that 150 rupees for any one village is a fair proportion of rent, as compared with the whole rent paid for all ten villages? He could only do this by actual survey and measurement of all the villages. Small talooks, then, in large estates are impossible; for who, for a talook of 500 rupees, would consent to pay the cost of measurement of a large estate?

 16. The

Appendix, No. 7.

16. The revenue survey will not make it much easier for the collector to decide whether the rent of a particular talook is such as to remove any risk of loss to the public revenue or not. With the area of the parent estate before him, it may still be a difficult question to decide what a fractional part of that estate ought to be assessed at, so as to leave no ground of apprehension that the assessment will always be ample to afford a fair share of the revenue assessed upon the parent estate.

17. But, say that the collector has ascertained the exact state of the talook, and that at a certain sum it will apparently pay its proportion of the public revenue assessed upon the parent estate; is it safe to declare that under no circumstances shall Government as purchaser be competent to alter the rent of any registered talook? Suppose that a zemindar has an estate which he cannot fully cultivate; suppose he draws a line through it, and gives the estate consisting of scattered patches of cultivated and waste in equal portions to himself, in some fictitious name, as two separate talooks. If the revenue was 1,000 rupees, the collector could not object to register each talook at 600 rupees. The registry over, suppose the zemindar offers the ryots of one talook better terms upon the other, and that they all agree to locate themselves upon the other. This done, suppose the zemindar falls into arrears and the Government purchase the zemindarree. It is plain to see that, in place of an estate yielding 1,000 rupees, the Government obtain one which yields only 600, with the chance of getting tenants for the lands thrown out of cultivation by the fraudulent act of the late proprietor.

18. Where such a fraud can be committed, there will not be wanting fitting parties to commit it. It will be as impossible to provide against it, as it is certain that it will be extensively practised; and this is such an insuperable objection to the measure proposed that no counter-advantages can compensate for it.

19. It can never be that, with the means of fraud so easily available, registration of an under-tenure shall be made without the most particular inquiry. I have instanced a case in which all the care and precaution possible would be unavailing to guard the interest of Government. Remove even the risk of loss to the Government revenue, the plan cannot be worked out. The collector would find it quite impossible to make the numerous inquiries previous to registration which the proposed measure, if carried, would require him to do.

20. In some estates the rent of a fractional part, if assessed in proportion to the rent of the parent estate, would be so light that no owner of such would, except in consideration of a large present premium, give away a talook on such an easy jumma. To insist on the rent of a part being equal comparatively to the rent of the whole, is to impose unfair terms on the zemindars; not to insist on it, is to give greater facilities and temptation to commit frauds against the public revenue.

21. Of the scheme contained in the law, I have strong and decided objections. Of the three schemes, that of the Bengal Government appears to me to be the best. Let any and every under-tenure be registered when both the parties concerned in the giving and accepting, agree to desire it. Let those tenures hold good against all auction purchasers of the parent estate, except when Government is the purchaser on the contingency (not likely often to happen) of the estate not being saleable at public auction for an amount equal to the arrear due upon it. Every zemindar will then be at liberty to make what terms he likes with his talookdars, and they will be free to do the same with parties holding from them. The Government revenue will in no way be put to risk or damage, and though the liability of cancelment of tenures is a feature in the Bengal Government scheme, which the scheme in the law obviates, I am still of opinion that the public have now such trust in the fair dealing of the Government, that the purchase of an estate on behalf of Government would not be regarded by the honest talookdars with any dismay. Holding at fair rates, there would be no fear that the talookdar would be disturbed, or subjected to any material increase of assessment, and those who had by artifice held at inadequate rates, are not the men upon whom any sympathy is to be bestowed.

22. By the plan of the Bengal Government any zemindar might, or he might not, create tenures. That talooks will be created in great number there is little doubt. A talook being created, it behoves the State to see that it has really all the protection which the law designs to afford. Registered talookdars should have the privilege of paying their rent direct to the collector; without this, fraudulent zemindars will be always defaulting in order to buy in their estate banamee. Every talookdar will be said to have been in arrears in order that their tenures may be destroyed. It may be that the zemindar will not often succeed in establishing that a talook was in arrears when it was not so, but he will succeed now and then, and success occasionally will amply repay him for having made the attempt on a large scale.

I have, &c.
(signed) *C. Steer*,
Officiating Commissioner of Revenue.

From the Officiating Collector of *Chittagong*, to the Commissioner of Revenue, 16th Division, No. 749, dated 16th April 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your office memorandum, No. 271, dated 13th ultimo, regarding the proposed new sale law.

2. The first ten sections of the new law appear to be very similar, and in many parts identical with the earlier sections of the old law, and do not seem to require any particular remarks. By Sections XI. and XII. the liability of joint proprietors of an undivided estate is limited to their actual interest in the property, and the following section points out the course to be pursued by the collector in separating a share held in common tenancy, and in apportioning to a sharer a specific portion of land. The part proprietor of an estate so often suffers from the indifference, the extravagance, or the malice of his fellow-sharers, that none can doubt the justice of providing him with some more substantial security than he at present enjoys. The new law will undoubtedly confer a boon on a large class of landholders, but it will also have the effect of increasing to a vast extent the expense of collecting the revenue. I can hardly imagine a case in which a joint proprietor will not avail himself of the advantages which the law offers, and there will be scarcely a zillah in Bengal in which the number of mehals upon the towjee will not be speedily trebled. In this district with its 40,000 sudder mehals, the increase will be in no way less remarkable, for the partners of a small Chittagong turruff are just as numerous as the partners of a large zemindaree. The increase, too, will be progressive; for the shares which have been separated will in course of time become themselves the subject of fresh divisions. It may be urged that by affording such facilities for subdividing estates, you will cover the land with petty tenures, and will destroy the extensive properties which now exist. The fact appears to be that these divisions are in existence already, and arise from the laws of inheritance, and the wants of the people. The law will not create, but will perpetuate them, and in the place of vast estates coming into the market, and passing into the hands of a single individual, a wealthy capitalist must hereafter be contented with buying property piecemeal.

3. To Section XI. I have no objection to urge, for Section XIV. will sufficiently repress the endless frauds which would otherwise spring from it. A consideration of section XII. leads me to think that the collector will often find it difficult to arrive at a correct decision by a summary inquiry when the land and jumma is disputed by the other sharers. In my opinion it would be better to refer the parties to the butwarrah laws when the objections do not appear frivolous or groundless. The collector's decision may be wrong, or the applicant may be in possession of more land or (which will be more common) may pay a much less jumma than properly falls to his share. So long as the estate remains in joint proprietorship, the weaker sharers have some hold over the stronger, but when the division takes place, and they become responsible for an undue proportion of the revenue, they may find it difficult to retain their lands. The sale would ruin them beyond hope of redress, and their more fortunate partner might complete the sum of his wrong-doing by becoming the purchaser of their shares under Section XIV. By the butwarrah laws now in force, the divided portion of a mehal, except in cases of fraud, becomes permanently severed from the parent estate, but by the present law, the separated portion is liable to be re-annexed at any time. In some instances, say where lands are exposed to diluvion, it would be hard to sell the property of one sharer because the lands of the other have ceased to exist. The provision should at any rate be modified; but, in my opinion, if a butwarrah is to take place, it should be so conducted as to obviate the necessity for any such stringent provision at all. I would rather in fact that the butwarrah laws should be revised and rendered more manageable than at present, than see the summary investigation proposed in Section XII. adopted.

4. Section XV. permits a recorded proprietor to deposit the amount of his revenue in cash or Company's paper with the collector. The provision is just, and whether it be used as a means of converting estates into freehold tenures or merely be used to avert the consequence of a co-parcener's bad faith or an agent's dishonesty, the result cannot fail to be beneficial.

5. The next section which, in my opinion, requires notice, is XXXIII. It is ruled, as in the present law, that, unless an appeal shall have been preferred to the Commissioner, no case shall lie in the civil court for reversal of the sale. In districts where estates are numerous, mistakes are apt to occur, and it sometimes happens that mehals are sold through an oversight, and the unfortunate proprietor remains unaware of the fact until the period of appeal has gone by. Such a case occurred in this district; payment had been made, but credited to another estate, which bears a somewhat similar name and jumma. The owner could obtain no redress, for the civil court refused to entertain his case, because he had not appealed to the Commissioner.

6. The most startling change to which the proposed law will give rise, concerns the condition and value of intermediate estates. The present law benefits the zemindar at the cost of the talookdar, and with but few exceptions places every tenure at his disposal. The proposed law will cover Bengal with perpetually settled mehals and render the jumma of the talookdar as fixed and immutable as that of the zemindar. The present law contains a reservation in favour of—First, Istumraree tenures which have been held for more than twelve years before the permanent settlement. Secondly, of such as were in existence at the time of

Appendix, No. 7.

the settlement; and Thirdly, of certain tenures of more recent creation. The proposed law, in addition to the above, will embrace tenures of whatever description belonging to the third or last mentioned class, and further will outstrip the present law by insisting upon a registration in all cases. As no talook can be deemed valid if unregistered, so no registered talook can be set aside unless it be proved within 60 years that the assessment is detrimental to the Government revenue. Thus, the advantages conferred by the registration will be enormous, and I cannot help fearing that the system will be attended with abuses just as extensive. Under the present law, the zemindar who opposes the talookdar's claim is probably a recent purchaser who has paid a high price for his estate and is anxious to turn it to the utmost advantage. Under the proposed law it will be difficult to prevent the talookdar and the zemindar from colluding, or to prevent the latter from creating fictitious tenures for his own peculiar profit. The collector who adjudicates on the validity of the tenure will (in the case of mehals of the first and second class) be often a passive instrument in the hands of parties between whom there exists no real variance. The title deeds may be forged, but who will prove them forgeries? The jumma may be merely nominal; but without a local inquiry and in the absence of trustworthy records, how will this fact be ascertained?

7. Section XXXVII. refers to talooks of recent creation. I presume that the zemindar is at liberty to create a permanent tenure, but I do not understand upon what terms he is at liberty to settle with his talookdars. A careful and provident man would insist upon a fair assessment; a needy and extravagant one would prefer to part with his lands on an easy jumma in expectation of receiving a larger jumma. To what extent then is the collector's interference required, and what is meant by the terms that the rent shall not be "less than is fully sufficient to afford a fair proportion of the revenue assessed upon the parent estate." The assessment throughout the estate may be light, and if one talook is to be assessed in the same proportion as the others, and not agreeably to the market rates, the zemindarry may be rendered comparatively worthless. If, on the contrary, we insist upon assessing the talook on the severe basis which is current in khass mehals, we may offend both talookdar and zemindar and deprive the latter of a very favourite method of satisfying his necessities. In most cases the mofussil inquiries must be extended to other lands than those of the talook which it is proposed to register. Sometimes it may be necessary to measure the whole zemindarree, and a most expensive agency will be required. The funds of course must be furnished by the parties whom the undertaking will benefit, and it will sometimes be a difficult matter to prevent the registration from becoming too costly a boon for the talookdar to avail himself of it. In districts which have been surveyed or measured, the task will be comparatively easy; but there are parts of Bengal where even the zemindars themselves possess no measurement papers and are utterly ignorant of the real extent and value of their possessions. In such cases the difficulties of the collector, and in fact of all parties concerned, will be increased ten-fold.

8. The introduction of a system of general registration will benefit the proprietors of recently-created under-tenures. To those who hold lands of the first and second class, the new law will, in my opinion, be ruinous. The old law left the zemindar to deal with them. By the new Act they will be put upon their defence at the prosecution of the collector. As in the case of lakherajdars, the *onus probandi* will lie with them; and when any pottah or sunnud is not forthcoming, they may be unable to prove the fact of possession, which perhaps is notorious in their own neighbourhood: such, it will be said, may be the case at present. True; but litigation is not now suddenly forced upon them at the instance of a third party. They are left in undisturbed possession until such time as the zemindar thinks proper to sue them.

9. The beneficial results which are likely to spring from the new Act are obvious; proprietors will be secured from the dishonesty of their agents or co-parceners, and a respectable and influential class of middlemen will be established. But the disadvantages are also to be considered. The zemindaree tenure will become comparatively worthless, and men will prefer vesting their money in under-tenures to purchasing fractional portions of estates and properties which yield little beyond their sudder jumma. The system of registration, with all its admitted advantages, will open the door to incalculable frauds, and tenures will be created regarding which the collector has no real knowledge. Government will in self-defence become an extensive proprietor, and then will follow increased expenses of collection and endless disputes with fraudulent talookdars.

I have, &c.
(signed) *J. S. Spankie*, Officiating Collector.

From the Officiating Deputy Collector of *Bullooah*, to the Commissioner of Revenue, 16th Division, *Chittagong*, No. 479, dated Bullooah, 26th March 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your memorandum, No. 271, of the 13th instant, and its accompaniment from the Board of Revenue, Circular No. 2, of the 26th February 1856, calling for a report on the draft of an Act to amend the law of revenue sales.

2. The

2. The current Act I. of 1845 was merely a liberal alteration of Act XII. of 1841, by which the particulars of an estate were more generally made known to the public by a new system of advertisement, and a mitigation of the severity of procedure as to forfeiture in cases of non-payment of the full amount of purchase-money allowed.

3. Act XII. of 1841 was enacted for the benefit of the agricultural community, to abolish the levy of interest, and penalties on arrears, and to systematize and amend the laws for the realisation of revenue.

4. The present obtaining system has, therefore, with slight amendments, been now going on for fourteen years, but during all this time it appears that the law had been objected to and proposals for its amendment have occupied the attention of the best revenue authorities, and have now resulted in the proposal of the Draft Act under review.

5. The preamble of the proposed law embraces all the provisions of the current system, and a great deal more—Six objects are detailed.

First.—The assimilation of zillah Cuttack to the permanently settled districts of Bengal in the matter of sales.

Secondly.—Reasonable security to persons having liens on estates.

Thirdly.—Provision to enable sharers in estates to protect their shares from sale by reason of the default of co-sharers.

Fourthly.—Provision to enable landholders and absentees to guard against accidental sale of their estates through the neglect or fraud of their agents.

Fifthly.—Enforcement of registration of dependent talooks, and security to such tenures when registered.

Sixthly.—Protection to under-tenants from loss by the voidance of their tenures by a sale for the causes of which they are not responsible.

6. Although in the proposed Act much of the spirit, procedure, and wording of Act I. of 1845 is retained, the above objects are new, and, with the exception of the last, untouched by the former Act.

7. The first eight sections of the proposed law differ from the same sections in Act I. of 1845, simply by the alteration as regards zillah Cuttack, a little difference in wording, and the writing of the word gazette, where the former word was gazettes. In this last particular it appears to me that the former reading was preferable, and I see no advantage in substituting the singular for the plural number.

8. I am aware of no reason why the process of direct sale in the event of arrear, which is found in practice to answer in Bengal, should not be extended to Cuttack.

9. In the first part of Section IX. the existing law has been liberally enlarged; the power formerly allowed to zillah judges is extended to the civil courts in general. The last part of the section guards a holder of a lien on an estate against loss by sale of the property.

10. It is not expressed, but it is clear from the wording of the section, that the collector is bound to receive the arrear if tendered before sunset on the latest day of payment, from anyone whomsoever, and to credit it to the estate, and thereby to prevent sale, without enquiry in any way into the rights, motives, or interests which cause the payment of the arrear—all such matters being left to the civil court. Under this ruling, which applies to the current law, a person having only a lien on the estate, was not regarded as a party interested in the estate; and in the case of such a person preventing sale by the payment of the arrear, his payment was regarded as gratuitous. By the proposed law, the amount paid is added to the original lien: and surely there can be no objection to the introduction of this fair and honest dealing.

11. I cordially approve of Section X. as to the separation of shares held in common tenancy, for the purpose therein described; also of Sections XI. XII. XIII. and XIV. as they secure the Government and permit the estate to be saved till any sharers may be able to make a more complete separation of their land and shares by formal butwarrah: these clauses are entirely for the benefit of the zemindars.

12. With reference to clauses XV. and XVI. relative to deposits for the protection of an estate from possible sale, I would remark that the deposits may be made long before sale is probable; in which case attachments by order of the civil courts may be received by the collector and occasion difficulty; the clauses seem, therefore, scarcely complete without some reference to the above contingency.

13. Under the present state of the law I know nothing preventing the deposit of a sum with the collector to guard against a possible sale, and I believe the deposit has actually been made.

14. Clauses XVII. and XVIII. merely re-enact the current law.

15. Section XXVIII. relates to the application of the surplus money; it is the same as the rule in the current law, and coupled with it is a difficulty. Very many estates come to

Appendix, No. 7.

the hammer because they are held by numerous partners in joint tenancy, and these cannot agree among themselves; the separate shares have not been recorded in the collectorate; often the several joint partners refuse to sign a joint receipt. Immediately after sale, precepts from the civil courts constantly desire the collector to attach certain amounts of the surplus proceeds in the name of some of the joint-holders, whose proportion of share is unknown to the collector; and thus sharers, whose rights are not affected by the orders of the civil courts, find it difficult to obtain their shares of the surplus sale money. In such cases as this, the course to be pursued by the collector, when a portion of the body of joint proprietors refuse to sign a joint receipt, should be defined. At present the law seems to rule that, unless the whole body of joint proprietors give the receipt, the collector should not pay the money—a practice attended with manifest hardship and requiring provision by law in this place.

16. The proposed law next requires the compulsory registration of under-tenures, and it carefully distinguishes old tenures and those created before settlement from new; part of Section XXXV. and the whole of XXXVI. relate to the registration of old tenures.

17. It is generally known that the present state of the law of registration is very defective, and often useless. In my own limited practice, in all difficult occasions I have found it totally so. The advantages of registration offered in Act I. of 1845 have scarcely ever been attended to. When a lease is granted, it is generally registered without inquiry by the register of deeds, but very seldom has the required notice been made to the collector—a neglect that would be fatal to a lessee if he tried at law to protect his lease against the interference of a purchaser at a sale under Act I. of 1845.

18. I am fully aware of all the advantages of registration. I would support any law which would make the complete registration of all old tenures general, but am averse to making such registration compulsory.

19. In the yet unsold estates, where registration of such old tenures has been neglected, the requisite proof for registration might be difficult to obtain, and the inquiry demands much of the collector's attention; and should registration not be granted, the tenure becomes reduced to a state similar to that of a ryot's.

20. I think any difficulty on this matter would be better left to the management of the purchaser and the occupant, and uninterfered with by the collector.

21. I would leave such old tenures as encumbrances on the estate exactly as they are now left by clauses one and two of Section XXVI. of Act I. of 1845, allowing the tenants liberty to register their holdings before the collector, if they choose, as security to themselves, but not visiting the neglect or inability to do so by any probable future penalty.

22. To the general provisions for causing the registration of tenures created subsequent to settlement, I am very willing to agree; but think that, if it was made compulsory only to register tenures created less than 12 years before the passing of the present Act, leaving tenures of older creation to benefit or not by registration, as may seem best to their owners, it would be found more to the advantage of the landed interests.

23. I think the words "fix a day" in the second clause of Section XXXVI. may be omitted with convenience to collectors, and no injury to the other parties concerned.

24. In the additional rules connected with registration under Section XXXVII. it is proposed that the collector shall commence measurement immediately. I am of opinion that it would be better to wait till the answer of the proprietor of the estate as to his objections to registration are received, and if necessary, decided by the collector.

25. With the above remarks I beg to express my opinion as to the rules for the registration of under-tenures, and proceed to notice the effect to be given to such registered tenures in the event of sale, not with any presumption that my remarks on such an important and disputed topic will be of any value, but simply because I have been ordered to report on the subject.

26. The effect of the proposed law is to cause all under-tenures to be registered, and all registered tenures to be considered as valid and permanent hereditary holdings with reference to the law of sale for arrears of revenue, and to be held good as such against all purchasers, the Government not excepted.

27. Another scheme, backed also by most experienced revenue authority, has been mooted—it is this, that all under-tenures created since the settlement, at whatever rates, could hold good so long as the parent estate should prove saleable for an amount equal to any arrear of revenue that might accrue upon it; and that whenever this should cease to be the case, the parent estate should be forfeited to Government, who should make a re-settlement of the whole of it.

28. I am rather averse to compel registration, and I deprecate the interference of Government between the zemindars and the under-tenantry, when that interference can be avoided.

29. The

29. The law proposes to give a permanence and a value to under-tenures, which were created by the zemindars, who at the time of creation did not consider the introduction of such proposed legislation, and only received the consideration from the accepting tenants naturally under the knowledge that the zemindars could cause a benamee sale of the whole property, and subsequently increase or alter any of the rents. It is fair to conclude that, had it been known that the value and stability of these tenures would have been increased, the salamee would have been greater at the time of their creation. I do not think the law is equally fair to the zemindar as to the tenant; it places the zemindar in the position of a mere collector of rents; it diminishes his authority and interest in the estate; it tends, in my opinion, to deteriorate the value of zemindaree property throughout the country.

30. I see no reason why these under-tenures should necessarily be interfered with by Government, or why Government should necessarily be bound by them. I will put a case. A zemindar, urged by feelings of gratitude for services done by some one to him, say, for an intricate and important lawsuit concerning possession of land, carefully conducted by a vakeel through all the perils of the Mofussil and Sudder Courts to a final satisfactory conclusion, wishes to reward that vakeel by the present of an extensive hereditary farm at a mere nominal rent, not one-tenth of its actual value in the market—what right have the Government to step in to interfere, and say, We object to this farm? it is injurious to the property? it does not yield a fair rent? Again, the estate is primarily answerable to the Government for the Sudder jumma. Should the estate be sold and fall to the Government, Government would be injured by any law binding it to support such a lease as the above. I think, therefore, with Mr. Ricketts, that there might be incorporated into this law two species of registered engagements; the one distinctly unconnected with the Government, binding against any one purchasing the position and rights of the zemindars, but not binding against the Government in the case of a lapse of the estate; and another species binding on the zemindar or any one succeeding to his place, and also on the Government, and depending for its sanction on full inquiry by the revenue authorities, subject to all descriptions of appeal from the collector to the Board of Revenue, and thence to the Civil Court.

31. Government does not enter on the possession of a forfeited estate with the ultimate aims of an ordinary purchaser; and where an estate becomes the property of Government, it is not the collector's sole object to get the highest possible jumma from each tenant. On a change of proprietors, the Government is preferred by the under-tenants to a new zemindar; the settlement proceedings are conducted under experienced supervision; no extortion or harshness is permitted, no salamee is demanded, and all proceedings are open to the appeal of higher revenue authorities. The present rules for settlement, contained in the settlement manual, direct a most careful adjustment of the rights of every occupant of an estate, and allow of the confirmation of every fair tenure found to be in existence at the time of the commencement of the Government ownership. I believe that, under the existing settlement procedure, each talookdar, putneedar, durputneedar, seputneedar, howladar, &c. would fare far better than they do on the advent of a new zemindar under the current law; and that the state of under-tenures with reference to a purchase by Government, is in reality, if not in actual law, much better than in the case of purchase by private individuals.

32. On the purchase of a considerable estate by an individual, the process of obtaining possession commences with its accompaniments of affray, murder, and paying, and is followed by the sequel of increased jummas and salamee. None of these objectionable occurrences take place in the event of an estate being forfeited to the Government: and I submit that in the settlement of such an estate, the Government ought to, and would give security to all actual tenants occupying under honest titles at fair rates.

33. It has been argued that, unless registration be binding against the Government, a tenant who has improved his land will pay a tax on his improvements, whilst an idle tenant, who has allowed his tenure to deteriorate, will receive a premium for his negligence. I cannot see the force of this argument; under the spirit of the present settlement rules, the tenant possessing a property brought up to a mature state of cultivation, would have the same secured to him after inquiry, subject to no further alteration of jumma; whereas in the case of the tenure where there is evident room for improvement, the rent would be fixed only for a short period, at the expiration of which, fresh inquiry, with an increased demand of rent, would ensue. Indeed, I think registration of tenures, of which the greater part consist of waste lands, which are widely spread over Bengal, with a view to the determination of a future fixed rent, unadvisable, if not impracticable; it is making an obligation binding for ever on the calculation of a future contingency.

34. I do not think there is any very great necessity to guard against fraud, where the Government is not concerned; this proposed law is not enacted for the security of intending purchasers. A purchaser is bound to satisfy himself of the value of the thing he wishes to buy; if he covets an unembarrassed estate, and buys a bag of lawsuits instead, he has himself to thank for this caveat emptor.

35. On the whole, then, I prefer the scheme, which allows of the registration and formation of tenures without the interference of the Government authorities to that in the proposed law now under review, which demands speedy registration of all under-tenures; and would render them permanently effective against the Government.

Appendix, No. 7.

36. The whole of the proposed law is a philanthropic endeavour for the general benefit of the landed and agricultural interests; its aim must be universally approved, it is only in particulars that I have ventured to differ. I have expressed all that I could find to object to, and have no further comments to offer.

I have, &c.

(signed) *F. B. Simson*,
Officiating Deputy Collector.

FROM the Commissioner, Cuttack Division, to the Secretary to the Board of Revenue, Lower Provinces, No. 563, Pooree, dated the 24th April 1856.

Sir,

Revenue.

I HAVE the honour to acknowledge the receipt of your letter, No. 2 of the 26th February last, on the subject of a Bill for the Improvement of the Revenue Sale Law, which is now before the Legislative Council. In reply I beg to forward copies of the communications on the subject, which I have received from the Collectors of the Division, and at the same time to submit the following observations:—

2. The first provision of the proposed Sale Law relates to the repeal of Regulation X. of 1818, and the discontinuance of the present practice of obtaining the previous sanction of the Board of Revenue to sales of estates in the province of Cuttack. The honourable Mover of the Bill appears from his speech, as reported in the published proceedings of the Legislative Council, to be under the impression that the dustuck system still prevails in this province. That, however, is a mistake. The dustuck system was abolished on the 1st of January 1854, and the provisions of Regulation X. of 1818 have ceased to be enforced since the same period. The revenue is now collected in Cuttack, as elsewhere, in the regulation districts of Bengal, by a system of payments on fixed dates enforced, in the event of failure, by the sale of the tenure on which they are assessed. The success of this measure has been most complete. The Government revenue is collected with even greater punctuality than before. Sales, as the marginal statement will show, have actually diminished in number, and the landholders have repeatedly described to me the annoyance and oppression to which they were subjected under the old system, when a whole army of peons was periodically let loose upon them, and expressed their lively satisfaction with the present arrangements. The only inconveniences attendant on the new system, arise from the necessity of submitting voluminous lotbundees periodically to the Board, the preparation of which imposes a serious task on the collector's establishment, and the obligation of obtaining the Board's previous sanction to the sales, which frequently involves their postponement in consequence of the Board's answer not being received in sufficient time to admit of the publication of the notices which the law requires. These inconveniences will be removed by the provision in the Bill to which I have referred, and both this and the proposed repeal of Regulation X. of 1818 have therefore my hearty concurrence.

DISTRICT.	Annual average Number of Sales from	
	1844 to 1853.	1854 to 1855.
Cuttack - - -	12	2½
Pooree - - -	1⅔	1
Balasore - -	1½	2

3. The next improvement of importance upon the present sale law, which the Bill contemplates, consists in allowing the amount of the deposit made by a mortgagee, in order to protect his lien on the estate of a defaulter, to be added to the amount of the original lien, thus affording the mortgagee the security of the estate itself in lieu of the mere right of recovering his deposit by an action against the proprietor, which is his only remedy under the present law. To this I can conceive no objection. It appears but equitable that the deposit which saves the estate from sale should be secured by a lien on the property in behalf of which it has been made.

4. The Collector of Cuttack (Mr. Shore) urges some objections to the provisions in Sections X. XI. XII. XIII. and XIV. of the Bill, whereby shareholders of joint undivided estates will be enabled to pay the revenue on their shares separately, and so to secure them from sale, except in the double contingency of one or more of the other shares failing, when exposed to auction, to realise the full amount of the arrears due upon them, and of these arrears not being made good within ten days of the sale by the solvent shareholders. He considers that these provisions will encourage the sub-division of property and the multiplication of petty estates, which is already, he thinks, a serious and growing evil in this country; and he would therefore limit their operation, as was done by the new rescinded Regulation VI. of 1807, to those shares the Sudder jumma of which should not be less than 500 rupees.

5. If I thought that the clauses of the Bill which I have quoted in the latest Section were likely to lead, as Mr. Shore supposes, to the further sub-division of petty estates, I should join with him in deprecating their introduction; for extreme sub-division, it is obvious, by creating a host of pauper proprietors, must materially increase the risk and labour of collecting the revenue, while its effect upon the people themselves and upon the prosperity of the country is likely, in my opinion, to be prejudicial.

6. I believe, however, that the operation of these clauses will in all probability be the very reverse

reverse of that anticipated by Mr. Shore. I think that the remedy which they provide against the fraud or negligence of co-sharers, will, in a great measure, put a stop to the partition of estates; that it will give the shareholders of joint undivided estates confidence and security in that description of property, and will render a formal partition of the estate under the butwarrah law unnecessary for their protection. Many persons appear to suppose that there is little difference between an actual partition, as effected under the provisions of Regulation XIX. of 1814, and the power which this Bill allows to sharers in undivided estates of protecting their own shares by the separate payment of their share of the revenue of the estate; but there cannot be a greater mistake. In the first place, according to the plan proposed, the whole estate continues answerable for the revenue assessed upon any portion of it; and in the next, the estate has the benefit of the joint funds of a number of individuals employing, generally speaking, a single manager, and retains an area sufficiently large to encourage the application of capital, instead of being split up, as it would be if partitioned into a variety of little unremunerative patches, each with a separate management, and dependent for improvement on the resources of a single individual. I consider the principle involved in these clauses to be worthy of adoption, and the details appear to me to be unobjectionable.

7. To the permission given to landholders, by Sections XV. and XVI., to secure their estates from sale, by depositing with the collector money or Government securities equal in amount to the Sudder jumma of their property, I can conceive no objection. It has been said that this permission may lead to the redemption or condemnation of the land tax; but, as Mr. Shore has pointed out, this cannot be until the interest on the public debt equals the land tax, and Government renounce the power of paying off the loans which they contract.

8. The provisions of Section XXXV. and the following sections, for the better security of under-tenures, have not been made applicable to this province. It has probably been thought that, as the recent settlement fixed and placed upon record the rights and interests of all persons at that time connected with the soil, and the under-tenures created since the settlement cannot be very numerous, it was unnecessary to disturb the existing arrangement. The number of under-tenures, however, which have been created since the settlement, either through the sale or abandonment of the old tenures, or the cultivation of lands formerly waste, is very considerable; and if it is advisable that the under-tenures in Bengal should be secured against forfeiture by the means proposed in this Bill, there seems no good reason why the measure should not be extended to Cuttack. Under-tenures created since the settlement, as it is, are limited in duration to the term of the zemindar's engagement with Government;* but this would form no objection, for the Bill deals, as I understand it, with the limited as well as the perpetual leases of Bengal, and does not propose to extend such leases beyond the periods for which they were originally granted.

* Act XVI. of 1842.

9. But I do not recommend that the provisions of the sections which I have quoted above should be extended to Cuttack. They would, from all I can learn, be very unpopular here. Nor am I disposed to think that they should be introduced into the revenue law of Bengal. Let us first examine the proposed measure under the supposition that it will be generally taken advantage of, that in the course of the next three years every talookdar, putneedar, moostajur, and ryot will have registered his tenure and secured himself against any enhancement of his rent during the period of his lease. The state of things, then, will be very much the same as that which has prevailed for the last 13 years in this province. Now, what has been the effect here? The answer, I fear, must be, that while the ryots and under-tenants are very much better secured against the exactions of their landlords than they were before, the agricultural improvement, which is stated to be one of the objects of the Bill, has not been attained; and this, for the very obvious reason that all incentive to the investment of capital in the improvement of the land has been removed from the only classes who have capital to invest. As matters stand, the sole person connected with the land who can benefit from its improvement, is the lowest on the scale, the ryot. The zemindar, the surburakar, mokuddum, and other intermediate holders, are no further interested than that any positive deterioration of the land would affect the ryot's power of payment, and any improvement would facilitate it. The motive, however, which these considerations supply is not sufficiently strong to induce these parties to lay out anything upon land which will return no direct interest on the money expended; natives have not sufficient foresight for a mere precautionary outlay. Indeed, in such a state of things as prevails here, the ryot's ruin is often the gain of the zemindar or the middleman. An inundation, which destroys all the hopes of the ryot, is not unfrequently a source of positive good to the zemindar, as it enables him to oust his under-tenants, and re-settle his estate free of all incumbrances.

10. Where this cannot be done, the zemindar sinks into the mere holder of a superiority, and has little more interest in the land than the owner of a jointure has in the estate on which it is secured. Talk to such a man of improving his estate by irrigation, by roads, by the introduction of new products, and his natural answer is, "What benefit shall I derive from these measures? The rents of my under-tenants are fixed, and if I trebled the resources of my estate, I should not be richer by a single pice." This is no imaginary reply, but an answer very similar to many which I have often heard since I came to this province. The case is precisely the same with the middleman. He, too, has nothing to look to beyond the rents of his under-tenants. The only hope of these men, apart from the cultivation of waste land, is the breaking up of the settlement tenures, and to this object many

Appendix, No. 7.

of the landholders and middlemen here devote themselves with great perseverance. According to the degree in which they succeed in this, they enhance the value of their property; and it is matter of notoriety that, in consequence of the increased facilities which a Government sale gives for testing and annulling under-tenures, a very much higher price is obtained for estates which are brought to the hammer than could be procured for them by private sale.

11. Throughout the discussions which have taken place on this Bill, the interests of the zemindars, in whom, by the theory of the perpetual settlement, the property of the soil is vested, appear to me to have been wholly overlooked. The question of fixity of tenure has been argued as if it affected the under-tenants and the Government alone. But it seems certain that the adoption either of Mr. Grant's measure or of that advocated by the Government of Bengal, would have the effect of depreciating the value of zemindary property to a very serious extent. At present, when a zemindary is sold by the collector, it passes into the hands of the purchasers free for the most part of encumbrances, and capable, under judicious management, of improvement to a greater or less extent, according to the circumstances of the case. It commands, therefore, a price calculated not merely according to its present rental, but according to the extent to which there is reason to expect that rental may be raised. But introduce fixity of tenure, and the zemindary is worth merely the market value of the existing rental, minus the cost and risk of collection. It cannot be doubted, I think, that, supposing registration to be generally adopted by under-tenants, there would be a very considerable difference between the value of zemindaries prior and subsequent to the act of registration; and, if this be so, it follows that, to the extent of this difference, the present Bill is a measure of confiscation.

12. It seems to be thought that the capital of the country is chiefly in the hands of the talookdars, and that agricultural improvement is to be looked for rather from them than from the zemindars. This idea has probably originated in the fact that indigo and sugar-planters seldom hold zemindaries, preferring to rent merely those talooks or villages which they require for the products they cultivate. As a general rule I believe it is unfounded. I cannot believe, for instance, that the improvement of the district of Burdwan would not proceed much more rapidly if the leases were under the control of the Rajah, than it is likely to do while the estate is sub-divided among putneedars who enjoy fixity of tenure, and who alone therefore have an interest in improving its resources. And even with regard to indigo and sugar-planters, it must be recollected that it is not in their character of middlemen that they expend their capital, but in that of manufacturers and contractors; their advances are frequently made to the ryots of estates in which they hold no tenures.

13. But suppose that the assumption to which I have alluded is correct, and that the improvement of the position of under-tenants in Bengal is so important as to justify the sacrifice of the zemindar's rights, is it quite certain that the most wealthy and most improving class of under-tenants, namely, the indigo planters, will really benefit to the extent that is anticipated either by Mr. Grant's measure (always supposing it to work) or by that of the Bengal Government, which, it would seem, they prefer. There is no doubt that their position as talookdars would be somewhat more secure than it is now, although I must say their entire disregard of the protection afforded to those who register under Clause 5, Section XXVI., of the present law, does not evidence much sense of insecurity; but would it be quite agreeable to them that the ryots and under-tenants in their talooks should be rendered equally secure? An indigo planter does not look for remuneration to the rent of the land he occupies. His object in taking a talook is to acquire a power over the ryots, which may enable him to induce them to cultivate indigo for his manufactory; and if the ryots could secure themselves by registry or otherwise against enhancement of rent, it is not unlikely that they might prove their independence by declining to sow indigo, and tendering their rent of a rupee or two per beegah instead. I do not think that indigo planters would wish to see the ryots as independent of them as they themselves are (or would be under this Bill) of the zemindar.

14. Then, let us consider what would be the effect upon the Government revenue of a general registration and fixity of under-tenures; and, first, with regard to the ante-settlement tenures, to which, I may observe, I have not alluded in the foregoing remarks. In cases where these tenures have formed the subject of suits or proceedings in the Civil or Revenue Courts, and the fact of their being ante-settlement tenures, bearing a certain fixed jumma, has already been judicially declared or otherwise clearly ascertained, there could of course be no objection to their registration in the mode proposed by the Bill. The holders of these tenures would acquire, from registration, a fresh security. Intending purchasers would more easily ascertain the assets or incumbrances of the estate they wished to purchase, and no injury would be inflicted on any one. But, according to the process which the Bill contemplates, there appears to me to be nothing to prevent an unprincipled zemindar from creating fictitious tenures of this description. The notice is to be served on the zemindar himself; no one, in all probability, will have any interest in objecting to the registry. Collectors in Bengal have no mofussil establishment, and the omlah, through whom they make their inquiries, may be bribed. It is not impossible, therefore, that the Collector may be deceived. The tenure is entered in the registry, and 10 or 15 years afterwards, when the zemindar allows his estate to go to the hammer, and settles down on his registered talook, containing the best lands in the estate, held at a pepper-corn rent, it will be almost impossible for any Government officer to prove the fraud. When we recollect with

with what profusion fictitious lakheraj tenures were created at the time of the permanent settlement, and how difficult it was found to detect them some 30 or 40 years later, we shall not suppose this fraud to be so improbable as at first sight it might appear. But the registration of *bonâ fide* ante-settlement tenures is an object so very desirable, and so perfectly unobjectionable, that I should be sorry it was abandoned from fear of fraud. What I wish is simply that fraud should be better guarded against than it seems to me to be in the present Bill, and to ensure this, I think the Collector ought to be vested with judicial powers in respect to the inquiries authorised in the 26th Section, and directed in all doubtful cases to examine parties upon oath. Fraud under the present Bill would, if detected, go unpunished. If the measure I recommend be adopted, the fear of incurring the penalties of perjury will render the attempt a very uncommon one.

15. I fear that not even this precaution would suffice to secure the Government revenue in the case of the registration of tenures created since the settlement, as provided for in the 37th section of the Bill. It appears to be forgotten that collectors are sometimes not only fallible but careless, and that survey ameens are very generally corrupt. If the proposed Act becomes popular, and registration general, it is not too much to suppose that, in a district containing 2,000 mehals, there will be 20,000 applications for registry and survey within the first year. What time or attention is it possible for the collector or any dozen of collectors to bestow upon these cases? and whence are competent and trustworthy ameens to be procured in sufficient numbers? Allowing that this difficulty may be overcome, still the collector must trust in a great measure to the report and proceedings of the ameen who conducts the survey. Even if the Revenue survey has passed over the district, it will be of little use to him, as the Bengal survey is not, like that of Cuttack and the North Western Provinces, a detailed survey, descriptive of each man's holding, but a mere demarcation of the boundaries of estates and villages. When the tenures, therefore, are created by the zemindar himself, for his own benefit, or that of his family, there would be little chance of discovering any fraud which might be committed, or of proving it, when discovered, to be a fraud, and not a blunder of the collectors. It must always be remembered, in considering this question, that, under the novel provisions of the present Bill, the land ceases to be hypothecated for the security of the Government revenue. For this security is substituted another and a very inferior one, namely, the zemindar's interest in the land; and if, through the carelessness of the collector or the corruption of the ameen, the zemindar is allowed to divest himself of more than a certain proportion of this interest, the revenue which the Government have hitherto derived from the estate is irretrievably gone. The Bill provides no mode of recovering it. This being the case, and the land being unfortunately the chief source we have to look to for our revenue in this country, it appears to me that we should be very unwise to place it in the power either of accident or fraud to alienate it. It may be and is, I admit, unlikely that frauds of the nature to which I have alluded could be perpetrated successfully to any great extent; but it is sufficient for my argument that they may be perpetrated, and that the revenue may suffer. I consider that we should be wrong to endanger it in any degree whatsoever.

16. I have argued the question up to this point, on the assumption that the provisions of the 37th section of the Bill will be generally put in force by the classes for whose benefit they are intended, and I have expressed an opinion that they would in that case be injurious to the zemindars, dangerous to the Government revenue, and of little benefit to any class except the mere terra tenant. But I believe that in fact the scheme will not work, that it is too complicated, involves too much risk of litigation, and will consequently only be taken advantage of by a very few individuals. This has already been stated publicly by a leading indigo planter, and is the opinion of all the most intelligent persons with whom I have conversed here. The measure contemplated in the Bill, too, will affect, it must be observed, only one class of under-tenants, those who hold immediately from the zemindars. This is obviously not intended, but it is so. It is not only by Government sales that the position of the durputneedar, the seputneedar, or the ryot, is endangered by Section XI. Regulation VIII. of 1819; if the putneedar fails to pay his rent to the zemindar, and the tenure is brought to sale, all leases granted by the putneedar are *ipso facto* voided. The decisions noted in the margin,* (though in my opinion erroneous), seem to show that the Sudder Court consider an ordinary sale for arrears of rent under Act VIII. of 1835, to be as fatal to under-tenures as a sale under Act I. of 1845 or VIII. of 1819. The under-tenant of a talookdar has, therefore, no inducement to go to the trouble and expense of the registration which will only protect him under one contingency, and that generally speaking not the most likely one.

* Chowdry Mohadeb Das, *versus* Chowdry Narain Mohapatur. Cuttack Zillah Decisions, 3d April 1850. Sudder Decisions, 13th August 1850. Cuttack Zillah Decisions, 28th January 1851.

17. If the principle embodied in the 37th section of the Bill were a good one, these difficulties might no doubt be got over. Registration might be made to protect the tenant not only against sales for arrears of revenue, but sales for arrears of rent also. But, if the Legislature are of opinion that it is desirable to have all under-tenures registered and their rents fixed in perpetuity, or at least for the term of existing leases, it appears to me that they ought not to throw the burden of such a great measure on the people, the majority of whom, it is evident, are either too poor, too ignorant, or too timid to avail themselves of it. They should proceed, as the Government of 1836, which was impressed with this view, did in Cuttack, enact that the rights and interests of every ryot and under-tenant throughout the country should be authoritatively fixed and recorded. The work unquestion-

Appendix, No. 7.

ably would be a vast one, but it was effectually done in the three districts of this division in the course of seven years, and by multiplying the establishment employed here, by the number of districts in Bengal, it could of course be accomplished there in the same space of time.

18. For the reasons I have already given, however, I object altogether to the principle embodied in the 37th Section of the Bill, and in matters of detail, if I were compelled to choose between them, I should prefer the Government scheme, which has the merit of being more complete, inasmuch as it secures every under-tenure up to a certain point without any action on the part of the tenants, is perfectly simple and inexpensive in its operation, and does not endanger the Government Revenue. But on two points I have the same objection to the Government plan as to that of the Bill; it affects, equally with the latter, the value of zemindary property, and it tends to produce a general fixity of tenure; add to which the absence of registration in the Government scheme would inevitably give rise to many frauds. Every zemindar who fell into difficulties, would, as a matter of course, break up the best portion of his estate into under-tenures at low rates for himself and his family, and the purchaser at the Government sale would find that, instead of a productive estate, he had merely purchased a right to certain rents, little more than sufficient to enable him to pay the Government revenue without actual loss.

19. I am altogether opposed to any measure which would have the effect of fixing in perpetuity a large proportion of the under-tenures of Bengal. If, as has been said, two-thirds of the land in Bengal is held under a talookdaree tenure, it should be remembered that the zemindaree tenure extends over the whole country, and that the talookdaree tenure is subordinate to it. I look for the improvement of the country, not only to the Talookdars, but to the growing intelligence of the landlords, and the better class of middlemen, and should be sorry to see their influence over the lower class of under-tenants extinguished, or to think that it would henceforth be impossible for a capitalist to obtain an unencumbered estate of any size in Bengal; on the other hand, I am fully sensible of the difficulties under which indigo planters and other mercantile men, who find it necessary to take talooks for the better prosecution of their business, labour from the present state of the law, and I think it very desirable that they should be relieved as far as possible. The problem, then, which we have to solve, is how to afford relief to an important class of middlemen, without interfering with the rights of others, endangering the Government Revenue, or erecting a barrier to improvement in the shape of a class of pauper landholders.

20. It seems to me that this will be best accomplished by a modification of the plan of the Bengal Government. The objections to that plan are, as I have already stated, that by excluding registration and the consent of the zemindar, it lowers the auction value of the zemindaree without affording the zemindar any compensation for the injury done him; and that it renders it impossible for a purchaser at an auction sale to know what he is buying. In order to obviate these objections and afford security to under-tenants, I would recommend that it should be competent to all under-tenants, in conjunction with their zemindars, or in the case of ante-settlement tenure or tenures, the rents of which have been permanently fixed by law, or by the decision of any competent Court, then in conjunction with the holders of such tenures, to present a petition to the collector, setting forth all the particulars regarding their tenure which the present law requires in such cases, and praying that the tenure should be secured by registration against all auction purchasers except the Government; that the collector should, upon receipt of such petition, issue notices in all the usual places and in the usual manner, making known the substance of the petition, and in the event of no objection being made by any third party, that he should register the tenure in a book to be kept for the purpose against the name of the zemindary in which it might be situated; that this registry should always be open to the inspection of intending purchasers at auction sales; and that all tenures so registered, and no other, should stand good against the auction purchaser—provided that, if the estate should not command at auction a price equal to its arrears of revenue, it should be in the power of the collector, after giving one month's notice to the tenants, to expose it to auction a second time, and in the event of the bids still failing to cover the arrear to purchase it on account of Government, and to annul all leases and tenures whatsoever. Should any objection be made to the registry by a third party, the collector might be directed to suspend his registration of the tenure for the space of six weeks from the date on which such objection might be filed; and the moonsiff or the judge might be authorized, on application being made to them within these six weeks, to grant a provisional injunction against the registry and to decide in a summary manner upon the applicant's objections, confirming or withdrawing the injunction as he considered the objections to be valid or otherwise.

21. Under this plan the zemindar would have an opportunity of securing his own interests and obtaining compensation for the diminution which registration would cause in the auction value of his estate; while he would be able to place an effectual check on the inconvenient multiplication of under-tenures at fixed rents. The Government revenue could not suffer by any possibility. The auction purchaser, by turning to the registry, would ascertain the exact amount of encumbrances on the estate he was about to purchase, and the honest under-tenant who did not object to pay a fair value to his zemindar for an improved title, would be able to secure himself against all future interference by as simple a process as it is possible to conceive. Even the interposition of Government for the protection of its own interests

nterests would not take place without time being afforded to the tenant to prevent the forfeiture of his tenure by the payment of the arrears due, a disbursement for the recovery of which the present Bill provides an ample security; and the inquiry into the objections of third parties whose interests may be involved would be tried at once in the Civil Court, without the necessity of any preliminary and probably inconclusive investigation by the revenue authorities. It is quite certain that there is a large class of talookdars and other middlemen who will not be pleased with this scheme, for the simple reason that they wish to secure all the advantages which the registration I propose would hold out, without paying for them and without consulting the interests or convenience of their landlords; but the Legislature will not, I apprehend, concern itself about the wishes of this or that party, but having determined what is most equitable and advantageous for all, will do that regardless of clamour.

22. The 4th clause of Section XXVI., Act I. of 1845, enacts, that lands held under *bonâ fide* leases at fair rents for the erection of dwelling houses or manufactories, gardens, tanks, &c., shall be excepted from the operation of the rule in that section, whereby under-tenures are voided on the occurrence of an auction sale of the parent estate for arrears of revenue. Clause 4, Section XXXV., of the present Bill introduces very important modifications into this clause. All lands occupied for the purposes specified in the present law are by these modifications excepted, whether held under *bonâ fide* leases and at fair rents or not, and the exception is extended to plantations which are not mentioned in the existing Act. It seems to me that, if this clause passes as it stands, a large proportion of the land in Bengal will speedily be held rent free. A man may cover two-thirds of his zemindaree with plantations of date, cocoa, betel, coffee, tea, or cotton, and give it rent free or at a peppercorn rent to his son: when the estate is sold, the auction purchasers will be unable to touch this land, and the whole taxation will fall on the rice lands or on wet spots where plantations of the valuable products I have mentioned cannot be created. I do not understand the principle upon which it is sought to render leases of such lands less open to question than others. I can conceive no reason why a man should not be required to pay a fair rental for land occupied by a manufactory, a garden, or a dwelling house, quite as much as for the miserable patch of rice swamp which adjoins them. I should say, "protect the owners of these places by all means against summary ejectment or harassing interference on the part of each new landlord, but do not throw away the revenue of the most valuable lands in the country, or compel the auction purchaser to forego the fair rental which they better than many other estates can afford to pay."

23. There is only one other point in the Bill which it will be necessary to notice. Mr. Schalch, the Officiating Collector of Balasore, suggests that the Collector should be authorised, when necessary, to put the auction purchaser in possession of the estate to which he has certified his title. It certainly is a defect in the law that, if the defaulting proprietor retains forcible possession, the magistrate is bound, under Act IV. of 1840, to support him, and the purchaser is obliged to carry his certificate of title in the Civil Court. I would amend the 27th section of the Bill, by adding the words, "and in the event of any person other than the purchaser retaining forcible possession of the estate or share of an estate sold, the purchaser may make affidavit before any magistrate, of his inability to obtain possession without the aid of the police, and the magistrate on being satisfied by the production of the Collector's certificate that the legal title to the estate is vested in the applicant, shall thereupon afford him the aid of such police force as may be necessary, and shall place him in possession, anything in Act IV. of 1840 to the contrary notwithstanding: and if any person resists the execution of an order for possession of an estate or share of an estate given under this section, or refuses obedience thereto, he shall be liable, on conviction before a magistrate, to the same penalties as if he had resisted the execution of an order given under Act IV. of 1840."

I have, &c.
(signed) *E. A. Samuells,*
Commissioner.

From the Officiating Collector of Balasore, to the Commissioner of Revenue for the Division of Cuttack, No. —, dated the 28th March 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your letter, No. 272, of the 10th instant, calling for a report on the draft Bill to improve the law relative to sales of land for arrears of revenue.

2. Having acquired my experience as a Collector chiefly in a district which has been temporarily settled under Regulation VII. of 1822, I feel great diffidence in expressing an opinion on an Act which will have effect through the permanently settled districts. In the one, the records of the late settlement afford great facilities for the introduction of many of the contemplated changes which, for want of such data, must, in the others, be effected at a greater cost and with a greater risk of endangering the Government revenue.

3. On the six objects of the Act as set forth in the preamble, I need say little.

Appendix, No. 7.

4. The first, the discontinuance of the previous sanction of the Board of Revenue to sales for arrears of revenue in this province is necessitated by the alteration in the mode of insuring the payment of the revenue by the abolition of the dustuck system, recourse being now had solely to the sales of the estates of defaulters. This alteration has been in work for the last three years and has answered admirably. The revenue is now paid up with greater regularity, and without the harassing measures previously adopted, which invariably proved useless, the arrears being seldom paid up except under the threat of sale. During this period the number of estates sold has averaged annually two, whereas for ten years previously, when the dustuck system was enforced, the sales amounted to one and half per annum. The permanent determination of the dates of latest payment will cause no injury or hardship. but on the contrary tend to remove uncertainty and to save much trouble in the offices

5. The remaining provisions of the Act provide for the better protection of parties holding a lien on an estate of co-partners, and of absentees, and for the absolute security and registration of dependent talooks and under-tenures. The necessity for these improvements, and the vast benefits that must result from the greater security thus afforded to the employment of capital on land in India, are too well known to require elucidation or support from any arguments I might advance.

6. The present draft Bill appears fairly to grapple with, and overcome the difficulty, which has hitherto been supposed to exist, of securing the Government demand while carrying out these improvements.

7. The rules laid down in Sections X. to XIV., for enabling co-partners to separate their shares, appear to me to afford every requisite facility for their protection, as well as for that of the Government demand.

8. The summary inquiries prescribed in Section XII., as also in Sections XXXVI. and XXXVII., should, I think, be judicial, and the Collector be empowered to administer oaths, and compel the attendance of witnesses and the production of accounts, &c. As the inquiry is summary, and subject to the revision of the civil court, an appeal to the superior revenue authorities is not, in my opinion, advisable. Such an appeal, if not final, but increases the expense and delays the final decision, which rests with the civil court, to whom any party dissatisfied with the Collector's decision should at once be forced to have recourse.

9. Section XV. appears to confine the privilege therein given for the protection of an estate, by a deposit to cover an arrear that may accrue on it to the whole estate, and not to shares of an estate for which a separate account may have been opened under Sections X. to XIII. I see no reason why this concession should not be extended to co-partners of such a share, any deposit made by them, however, not to protect the share if the whole estate become liable to sale under the provisions of Section XIV.

10. The Collector is empowered to give, on the completion of the sale, under the provisions of the 27th section of the Bill, a certificate to the purchaser showing his title to his purchase, but is nowhere authorised to put him in possession. With such power I think he should be vested; for it is unjust to enact, as by Section XXXII., that the purchaser shall become liable for the Government revenue from the latest date of payment, without enabling him at once, and without reference to any other court, to enter on possession. The defaulter has certainly lost all right to the estate from the latest date of payment; yet, as the Collector is not empowered to dispossess him, he may retain possession and oppose by force the purchaser. Should the latter also have recourse to violence, the magistrate may bring the case into his court under Section II. of Act IV. of 1840, and being restricted to the investigation of the fact of actual possession, must uphold the defaulter; for, however valid the certificate may be as a proof of the purchaser's title, it is none of his possession. The purchaser must, therefore, have recourse to the civil court, and be obliged to pay the Government revenue pending the decision of the suit, without obtaining his rents from the cultivators.

11. The Collector should, therefore, I consider, be vested with the power of placing the purchaser of an estate, or of a share of an estate for which a separate account has been opened, in possession of his purchase. If the purchase be that of merely the right and interest in an estate sold for arrears other than its own, or for demands realisable as arrears of revenue, the Collector would of course not give possession, but only a certificate of title.

12. The registration of all under-tenures granted previous to the settlement should, as enacted, be rendered compulsory to obtain their exemption under Section XXXV., for the exemption from all future questioning and dispute is cheaply acquired at the cost and trouble of registry. The period allowed for registration might be extended to five years at least, from the promulgation of the Act; for however widely it may be circulated, a considerable time must elapse before its provisions can be generally known to the many ignorant and indigent holders of such tenures.

13. The charges and cost incurred in the survey and local inquiry required to be made regarding under-tenures granted subsequent to the settlement would, I fear, be considerable, and in some cases deprive under-tenants of the benefit resulting from the proposed registration. I would therefore allow the under-tenant to register his lease with a view either to permanent or provisional protection. To obtain the former he must follow the course prescribed

scribed in Section XXXVII., and incur the expense of the survey, and the other necessary local inquiries; but to insure the latter, no survey need be made, and the under-tenure might be protected from annulment unless the estate under these conditions failed to sell for the amount of arrear due on it, in which case alone the provisionary registered under-tenure should be liable to be voided.

14. I would, for the reasons stated in paragraph 8, allow no appeal to the superior revenue authorities from the Collector's decision regarding registration, unless on the grounds of "the good faith in which a tenure may have been created so far as the interest of Government revenue is concerned," or "the adequacy of the rent for the security of that revenue," these being points on which no appeal can be made to the civil court.

15. It has been objected that the protection here given is afforded only to tenures granted by the proprietors, and not to tenures created by talookdars or others holding under the proprietor. The wording of the draft does not appear to me to warrant that restriction, nor can I suppose such to be its intention; for the reasons on which is founded the introduction of a system of registration and of protection for under-tenures created by the proprietors, apply equally to under-tenures granted by talookdars and other under-tenants, which it may be within their competency to create. There would be no greater difficulty in registering the latter than the former description of tenures.

16. The protection granted in Section XXXVIII. to talookdaree tenures pending the summary investigation of the Collector in case of the sale of the parent estate for arrears of revenue, should, I think, be allowed only where the price offered for the estate, when sold with the reservation of the under-tenure, covers the amount of arrears; should the price bid be less, the estate should be disposed of unencumbered by the act of the defaulter, otherwise there may be no means of recovering the Government revenue until the survey or other inquiries have been completed, which may extend over a considerable period.

17. The protection above proposed to be given to under-tenures in permanently settled estates, does not appear to be conceded to similar holdings in estates not permanently settled. The papers and records of the late settlement would easily enable the Collector at once to ascertain if the rent fixed on an under-tenure were equivalent to the Mofussil jumma assessed on the lands included in it at the settlement. A local inquiry would show whether the zemindars were fraudulently endeavouring to separate the non-productive and better cultivated lands from those which might have deteriorated since the late settlement.

18. Provided, then, it were proved that the rent fixed on the under-tenure was equivalent to the assessment on the lands composing it at the late settlement, and that the Mofussil jumma of the remainder of the estate was not less than fixed at the settlement, I see no reason why the under-tenure should not be protected from annulment up to the expiry of the current settlement. The Government revenue could suffer no risk, and the purchaser, in case of the estate being sold, would still be in receipt of at least the same amount as that on which the Sudder jumma he is called on to pay was calculated; all leases would of course terminate on the expiry of the current settlement.

19. Section XLIII. of the proposed Bill differs from the present Act in the important omission of the word "unrecorded;" hence any unrecorded proprietor, even if the heir of a deceased recorded proprietor, re-purchasing his own share or the whole estate, might acquire the estate free from all incumbrances except those specified in Section XXXV. This must be, I imagine, an oversight.

20. The Act should, I think, distinctly state from what party the expense of issuing the sale and other notices specified in Sections IV. V. VI. VII. XXIII. XXVII. XXXI. are recoverable; for although Circular Order, Sudder Board Revenue, sale series, paragragh 25, directs the defaulter and the parties interested to be charged with the expense of serving certain of these notices, it may be doubted whether this order is legal, and it would be better that this point should be clearly settled by the law itself.

I have, &c.
(signed) *H. V. Schalch*, Officiating Collector.

From the Collector of Cuttack, C. D., to the Commissioner of Revenue, Cuttack, No. 206, dated the 25th March 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your letter, No. 486, with the enclosed Circular from the Sudder Board of Revenue, requiring my opinion on the new Draft Act, published in the "Gazette" of the 6th February, relating to the sale of land for arrears of revenue. Dated 10th March 1856.

2. It is so long since I have been employed in the Revenue branch of the service, and so very recently that I have re-entered it. that I cannot but feel considerable diffidence in submitting the following remarks. I have had no opportunity of testing my views by the practical experience afforded in a Collector's office, and they relate to a subject on which hitherto I have not been able to bestow very particular attention.

Appendix, No. 7.

3. With the exception of those parts of the proposed law, which prescribe the manner in which sales are to be held, and of Sections XV.-XVII., which enable absentee proprietors to protect their estates by the deposit of Government securities, the general tendency, I may almost say object of the Regulation, is to encourage the sub-division of property. So far as this result is brought about by the creation of permanent under-tenures, I do not think there is any particular ground for objection. But the multiplication of estates by partition, is, I think, a serious and growing evil, one which it may eventually be found necessary to check by legislative interference. The present law, however (*vide* Sections X. and XI.), has a directly opposite tendency, prevents the possibility of the mischief resulting from a joint proprietary, correcting itself by forming a sale of the whole property, and at the same time introduces a new class of shareholders, whose registration will burden the district towjee as much as if they had become separate proprietors by regular process of butwarrah. The only countervailing advantage, so far as Government interests are concerned, is that, with so easy and cheap a way open to them of protecting their shares from the consequences of their co-parcener's default, shareholders will be less ready to resort to the tedious and expensive process of partition under Regulation XIX. of 1814. And in consideration of their having this protection, I would go further, and recommend the re-enactment of some such wholesome provision as that of Regulation VI. of 1807, placing some limit to the extent to which an estate may be split up and received.

4. The provisions of the 35th and following sections appear to me open to some objection. I should, in the first place, greatly hesitate before applying them to districts which have not been subjected to the revenue survey operations. The expense of even an approximate value of the entire estate will often be enormous, and the difficulty that will frequently exist in ascertaining whether the tenure under inquiry is assessed with its fair share of the jumma, will be the greatest exactly where accuracy is of the most consequence, that is, where the object is to defraud the Government.

5. On the other hand, the preliminary inquiries will often be so tedious and costly, as either to deter under-tenants from seeking the protection which it is the object of these provisions to grant them, or to involve, and consequently depreciate, the property in the process. But I allow that these objections, affecting the interests of the Government on the one hand, and of the under-tenants on the other, will not apply in all cases where the Sudder jumma of the estate is so light as to allow of a considerable margin, and to make very minute inquiries unnecessary, where the estate is not a large one, and the under-tenure embraces a large portion of it; or where it is so compact and well defined, that the survey records will suffice without additional measurements. In these cases registration may be granted without danger to the Government revenue, or much expense and harassment to the parties seeking it.

6. To meet less favourable cases, I would suggest that it be optional with applicants whether to register under the present provisions, by which they will obtain complete protection, at some expense, or under those formerly proposed, which would grant them protection without any expense at all, but subject to revocation in the event of the parent estate being bought in by Government. It is further, I think, worth consideration whether, instead of the provision attached to Section XXXV., the benefit of a registration similar to that of under-tenants might not be extended to resident hereditary cultivators. In this case no very extensive or minute inquiry will be necessary; the village rates can always be ascertained with sufficient accuracy to protect the Government revenue; and it is hardly necessary to dwell on the beneficial results that will ensue from thus improving the condition of so important a section of the population.

7. The scheme for protecting absentee proprietors or others, by allowing a deposit of Government paper to protect the estate from sale, appears to me altogether unexceptionable. It has been said that this plan involves nothing less than a redemption of the land tax; but it is manifest that before it can have this effect, it is necessary, first, that the interest on public debt should equal the amount of the land tax; secondly, that it should be out of the power of the zemindar to reclaim his deposit; and thirdly, that the Government should pledge themselves not to pay off the loan.

I have, &c.
(signed) *R. N. Shore,*
Collector.

Revenue.

From the Officiating Commissioner of the Nuddea Division to the Officiating Secretary to the Board of Revenue, Lower Provinces, Fort William, No. 4, dated Allipore, 2 May 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your letter, No. 37, dated 8th April 1856, drawing my immediate attention to your previous call on my predecessor, dated the 26th February, for his opinion and that of the Collectors in this division on the provisions of the draft of the new Sale Law.

2. I have

2. I have found so much to do since joining this office, that I have been unable to give the requisite attention to this important draft, or to find time to record in proper form conclusions to which I had come before leaving the Board. As it is, I am without complete returns from the Collectors, none of whom are as yet of a year's standing, and from whose letters, herewith submitted in original, the Board will not, I fear, obtain much assistance.

3. I will however first make my own remarks on the draft, or rather on those sections of it which contain new provisions, and which, omitting Section III., in which the only new feature is that it includes Cuttack and Sections IX. and XXIX., which contain obvious improvements on the old law, are Sections X. to XVI. and XXXV. to XLI.

4. Sections X. to XIV., which provide for the Collectors opening a separate account with the proprietor of each separate share in an estate, whether holding all the lands in joint tenancy or in possession of distinct lands, will, I feel sure, be received as a great boon by landholders generally, and the precautions taken to secure Government in Section XIV. are, I think, quite sufficient.

5. But I think it will be necessary to empower a Collector to close a separate account as well as to open one. The applications under Sections X. and XI. need not always be given in at the same time, and the result of the summary inquiry to be under Section XII. in a subsequent application may show the Collector that the demand entered in his accounts against a shareholder whose application had been previously granted was incorrect.

6. Thus A applies for a separate account to be opened for a four annas share of an estate in which B has an interest, consisting of a single village for which he has paid a jumma of 140 rupees, the sudder jumma of the estate being 600. The Collector grants A's application and enters a demand of 150 rupees against his share: subsequently B comes forward and applies to have an account opened with him for his village on 140 rupees. The joint tenant proprietors object that the jumma specified by B is insufficient; a summary inquiry follows, and the Collector decides on admitting the application. Either the deficient 10 rupees of sudder jumma must be entered against the shareholders who have not applied for a separate account, or a proportion of it at least must be added to the demand against A. The concluding provisions of Sections X. and XI. respectively seem to give a character of finality however to the Collector's sanction of an application.

7. Attempts will be made, beyond doubt, to get the question of adequacy of jumma on a specific portion of an estate settled summarily under Section XII., in preference to putting in motion the dilatory machinery of the butwarrah law. If the Collector find that the alleged specific jumma is that which has been recognised by the other sharers, he cannot reject the application for a separate account, however inconsistent this may be with his orders on previous applications.

8. I would therefore suggest that provision be made for a Collector's closing a separate account, or for his revising the demand which he had previously entered against a sharer on his sanctioning its being opened, from which date, as the draft stands, the separate liabilities of the sharer for the demand entered against him commence.

9. On Sections XV. and XVI. I have already recorded an opinion while secretary to the Board; indeed, if I mistake not, my note on Rajah Pertabchunder Sing's petition, or rather on Mr. Plowden's remarks on it, was what led to the issue of the Board's circular order on this subject, and to their subsequent address to Government, which has caused the introduction into the draft of these provisions for deposit. Very few landholders will have the means of availing themselves of the privilege which these provisions confer, and it seems unnecessary, therefore, to argue on the financial results which would follow were deposits to be made by landholders generally or by a large proportion of them.

10. By far the most important sections of the draft are those which provide for and regulate the registration of old and new talookdaree tenures. I wish I could add that, in my opinion, these provisions and regulations will, in practice be operative.

11. I have but one remark to make on Section XXXV., and that is, that arrears of rent are not paid so punctually in the Mofussil as to render it at all probable that any of the tenures on an estate sold for arrears will have fulfilled the last of the conditions specified in Clauses 1, 2, and 3 of the section. The latest days now fixed by the Board happen to fall about a fortnight after the expiration of the Bengali month, for which the rent of all tenures must have been paid in, or they will be liable to fall. This condition will be the cause of constant harassment to the under-tenants, and the question suggests itself, why should the purchaser profit by a default on the part of the under-tenant? For this default, if it occurred, was an injury to the previous owner.

12. The tenures forming the 1st and 2d classes of exceptions, for the registration of which in the Collector's office Section XXXVI. provides, have been hitherto registered only in the office of the zemindar. The under-tenants will hail with gratitude the public record of their rights which is now to be preserved. I have no objections to offer to any of the provisions of this section.

13. It is in carrying out the additional rules, prescribed in the following section for the registration of tenures for the third class of exceptions, that I apprehend difficulty. All new tenures are to be entered for registry within one month of their creation, and the

Appendix, No. 7.

applications are to specify the fullest particulars. The widest discretion is then left to the Collector, and the result will depend altogether on the way in which he exercises it, and on the view which he may take of the grave responsibility which this section imposes on him. He is to take whatever measures he may deem necessary to test the correctness of the particulars handed in to him, and to satisfy himself that the assets of the tenure are proportionate to the rent payable by the holder, and that this rent is proportionate to the revenue for which the estate is liable. To satisfy himself of this, he must go through all the details of a settlement of the estate, and it must depend on the size and character of the latter, whether this process can be gone through at a cost which the applicant for registry would care to pay.

14. If the Collector is easily satisfied, I find no remedy for an unwise exercise of his discretion other than that of recourse to the Civil Court within 60 years, with the object of showing that registration was obtained by fraud. It would be very difficult indeed, and the difficulty would increase every year of the 60 years term, for Government to prove such a plea to the satisfaction of the Court.

15. Where the under-tenure was the putnee of a fractional share of a joint estate, the Collector's inquiry would have to embrace the whole estate. Again, in the 24 Pergunnah s there are cases in which estates, forming separate numbers on the Towjee, are so mixed up one with the other that such an inquiry would have to embrace three or four estates.

16. It may be said that the law is not intended for exceptional cases such as those I have alluded to. No doubt if these provisions work well, so as to admit of compliance without risk to Government, with even a moiety of the applications for registry which will be given in, the country will have made a great stride. I have no information, it will be seen, from any Collectors on the general character of the new tenures occurring in their districts. I can only therefore argue on their character, such as I have found it in the tenures of the 24 pergunnahs, where they are for the most part putnees and farms of entire interests in estates, joint or otherwise. These estates will be more often found composed of plots of land in villages distant from one another, than of single villages or of compact groups of villages.

17. In my opinion, a clear understanding of what is the prevalent character of the under-tenures most requiring protection, and precise information as to how this character varies in different districts, is absolutely necessary before such decisive and final provisions as these can safely be made law; and, pending the collection of such information, I should prefer seeing the proposals of the Bengal Government introduced into this draft.

18. I shall conclude with a few words on the Collector's returns. Mr. Mangles has begged to be excused giving any opinion, on the plea of his inexperience in revenue matters. Mr. F. Lushington, Mr. Pigou, and Mr. Fowle, have altogether missed the points on which their opinions were required. On pointing this out to the two former gentlemen, and on requesting them to ascertain the views of their deputy collectors on the probable working of Sections XXXVI. and XXXVII. I obtained the further returns, which are also submitted. In the case of Moorshedabad, the second return is not a more satisfactory one than the first. In the case of the 24 pergunnahs, I have thus obtained the opinions of three deputy collectors of experience. That of Seebchunder Deb should, I think, carry weight with it.

Mr. Fowle's report reached me too late to admit of a second reference to him.

19. This officer's view of Section XXXVII. is nearly the same as my own. He brings forward, moreover, objections even to Section XXXVI., being of opinion, apparently, that here also the interests of Government require to be watched. I know the theeka tenure to which he alludes, and am aware that the transfers of lands in the manner described have taken place; but I do not think that the tenure prevails to such an extent in any one estate as to cause apprehension that the revenue may suffer by the admission of applications for registration. There is Section XLI. to enable Government to cancel a registration fraudulently effected if the means of proving fraud are available.

20. It might happen, possibly, that the owner of an estate might create a new tenure on terms exceedingly favourable to himself, and succeed in imposing on a careless and superficial collector and in registering it as an old tenure. It might happen that this incumbrance would affect the capabilities of the estate to bear its public assessment; but the case is an extreme one, and the fraud would be detected whenever the estate came to sale.

21. Referring to paragraph 6 of the letter of the collector of the 24 pergunnahs, in which he enumerates three classes of tenures, I may explain, though it is perhaps hardly necessary, that the khoorpahdar is nothing more than a sub-tenant at will, a labourer in fact, on terms agreed to yearly between himself and the real under-tenant. The chuckdar is the local term for a jungleblooree tenant, and the theekadar is the mocummeedar described in the deputy collector's letter.

22. Mr. F. Lushington, of Nuddea, has sent in the best report, though it gives no information on the character of the under-tenures. He thinks the difficulties which oppose registration under Sections XXXVI. and XXXVII. will render the provisions of both inoperative.

23. I wish I could have added the testimony of some of the landholders, mooktars, and others

others who attend my office; but very few of them, I find, are aware that any change in the sale law is impending. Measures should, I think, be taken to ensure a wider circulation of these draft Acts in the Mofussil.

I have, &c.
(signed) *A. Grote*,
Officiating Commissioner.

From the Officiating Collector of Nuddea to the Commissioner of Revenue for the Nuddea Division, Allipore, No. 302, dated Nuddea, 3d April 1856.

Sir.

I HAVE the honour of acknowledging the receipt of your letter, No. 111, dated 12th ultimo, calling upon me to submit through you to the Board, my opinion on the new sale law, published in the "Calcutta Gazette" of 2d of February.

2. This law contains three important provisions not included in Act I. of 1845.

I. The separation of shares whether held in common tenancy or consisting of specific portions.

II. Protection of estates by deposits.

III. The registration of old and new talookdaree tenures.

3. I propose to confine my observations to those sections which contain the provisions relating to these three heads.

4. Sections X. and XI., on the separation of shares.—I beg leave to observe that, if the practice of registering the names of all the proprietors in every estate was general, the separation of shares might be easily effected; but this is not the case, and if no objections, except on the part of recorded proprietors, are admissible, serious injustice might be committed.

5. The answer to this would be, that it is the intention of Government to enforce the registration of the names of all the shareholders in every estate. If such be the case, it would be unjust to enforce the provisions of this Act until ample time had been afforded to all parties to comply with the requisitions of the Legislature.

6. Sections XV. and XVI. The advantages set forth in these sections are so obvious and so free from any objection, that it does not appear to me necessary to say more than to express my entire approval of them.

7. Section XXXV. The first point to which I would draw attention in this section is, that after the registration has been completed, the estate, whether of the 1st, 2d, or 3d description, may be lost in the event of any arrear of rent being due on the latest day of payment of revenue as fixed under Sections III. and IV.

8. These arrears might be occasioned by an error in the calculation, or they might consist of a very trifling balance, and cases may occur in which it will be difficult for the holder of a tenure to prove that he was not in arrears; at all events he may be involved in litigation.

9. Section XXXVI. Registration of old talookdaree tenures. The proprietors of these old tenures are already protected by law, and though the advantages they would obtain on registration would be large and complete compared with what they now possess, I doubt whether many would be prepared to undertake the labour and expense it would necessarily involve.

10. They would almost invariably have to encounter the opposition of the owner of the parent estate, and if they failed in satisfactorily establishing their claims, the zemindar would avail himself of all the information thus gained, and ultimately the holders of these tenures would have to defend their rights in the civil courts.

11. Section XXXVI. Secondly: Great difficulty would attend the carrying out of this part of the section. "Summary investigation," and "reasonable time," are expressions which depend for their force on the mind of the Collector. There will be perpetual appeals on these points to the Commissioner, who will also have his view of "summary" and "reasonable;" and thus it will be scarcely possible for an owner of a tenure applying for registration and meeting with opposition, to look forward with any reasonable hope to its accomplishment.

12. Section XXXVII. The tenures to be registered under this section are those of the third class described in Section XXXV. I do not understand it to include secondary and lower classes of under-tenures, such as durputnee and seeputneedar.

13. If the difficulties of registration under the preceding section are almost overwhelming, I would submit that, under this section, they are so greatly increased as to render it impracticable.

Appendix, No. 7.

14. Under this section a Collector would have to measure the entire area of the parent estate, inquire into the capability of the soil, the condition of the ryot, the respective positions of the several villages, and ascertain the assets of the whole before he could determine whether the tenure was created in good faith as far as concerned the interests of the Government revenue. Besides this, there would be objections on the part of shareholders, recorded or otherwise, mortgagees, and parties having a reversionary interest in the estate opposing the registration and adding to its difficulties. It would not be an exaggeration to add, that in a very short time, the Collector would have the whole of his district under Regulation VII. of 1822 and IX. of 1825.

15. Few, if any, holders of new talookdaree tenures and farms would be prepared to undertake the cost and submit to the vexation, trouble and delay imposed on them, and then, after all, the application might be refused, or the provisional registration reversed after further reference or delay by order of the civil court.

16. It will be urged, perhaps, in reply to this, that, in districts where the survey has been completed, registration would be comparatively easy. On this point I would remark, that each towjee estate has been demarcated and surveyed without reference to the under-tenures comprised in them, or the quality and capabilities of the soil. It will therefore be impossible for the collector to determine, on reference to the survey records, whether a tenure has been created in good faith as regards the Government, or the adequacy of the rent for the security of the Government revenue.

17. I am thoroughly prepared to admit the great advantages of registration, but if it is to be of any great service, it must be simple and compulsory. The latter, for the obvious reason that no great improvement of this nature can be carried out in this country, unless the people in the first instance are forced to adopt it.

18. On these grounds, I would recommend that every zemindar within six months from the passing of this Act should be compelled, under penalty, to furnish a list descriptive of all the tenures in his estate with jumma wassil bakie duly attested. This would at once place the Collector in full possession of every particular regarding the assets of every estate, and check any opposition the zemindar might hereafter be disposed to show by either denying the existence of any under-tenure, or disputing its jumma or that of any jotedar.

19. On the receipt of this list, the Collector should immediately serve notices on the several classes of proprietors described in Clauses 1, 2, and 3, Section XXXV., and enforce the registration of their tenures by subjecting them to the penalty of non-exemption in the event of the sale of the parent estate for arrears of revenue, and also denying them the privilege of suing their under-tenants under the summary suit laws.

20. The inquiry previous to registration to be limited to the simple fact of possession.

21. No injury would accrue to the zemindar or the holders of under-tenures by this speedy disposal of the question: it would greatly simplify the Collector's proceedings; while the Civil Courts would be open for the adjudication of any fraud which might be alleged to have been committed.

22. The object of registration is, as I understand, to protect the holders of all under-tenures given in good faith and at a fair jumma, and at the same time to defend the interests of the Government. Now, it appears to me that the interests of the latter are sufficiently protected by Sections XIV. and XLI.; they will not, therefore, be jeopardised by the summary inquiry I would establish, whilst protection to the former would be given at once without much trouble and at little cost beyond the registration fees.

I have, &c.
(signed) *E. H. Lushington,*
Officiating Collector.

From the Officiating Collector of Twenty-four Pergunnahs, to the Commissioner of the Nuddea Division, No. 171, dated Allipore, 4th April 1856.

Sir,

No. 395.

I HAVE the honour to acknowledge the receipt of your Office Memorandum, No. 111, dated 12th March 1856, and in reply to forward the accompanying report on the Bill for the improvement of the law relating to sales of land for arrears of revenue, published in the "Gazette" of 30th January.

2. With reference to this subject, it will not be inopportune to advert briefly to the salient points of the past and present sale laws, to sketch their history, and how they worked, as well as to consider the one proposed to be passed and the causes that have given rise to its contemplated enactment. The first intimation that lands of proprietors would be sold for arrears of revenue, was promulgated in Section VII. of Regulation I. of 1793.

3. From

3. From that year, then, to the present time, there have been as it were three periods during which the sale laws of this country have been administered without any material intermediate alterations. The first may be said to have lasted from the enactment of Regulation XIV. of 1793 to the introduction of Regulation XI. of 1822, which latter swayed the decisions of the courts until the passing of Act XII. of 1841, which, with slight alterations introduced by Act I. of 1845, has continued in full force up to the present time.

4. Up to the passing of Regulation XIV. of 1793, the arrears of Government revenue could only be collected through the intervention of courts of justice. Subsequently Collectors were empowered, after issue of due notice, to seize the defaulter, to attach his zemindary, and, at the expiration of a year, to sell his estate, should the arrears still remain unliquidated; in the following year, Regulation III. forbad the proprietors of land, except in special cases, to be confined for arrears of revenue, and vested the authority for the sale of defaulter's estate in the Board of Revenue, thus obviating the many suits for false imprisonment that used to be instituted against the officers of Government.

5. In the years 1795, 1796, 1799, 1801, 1803, and 1814, Regulations connected with the sale of estates for arrears of Government revenue were enacted; but they affected more the practice in the different zillahs of the country, rendering them conformable to the local customs of the inhabitants, rather than affecting the principle of the law of sale, which continued the same in theory until 1822.

Thus Regulation VI. of 1795 affected solely the province of Benares.

Regulation V. of 1796 directed the amount of land to be sold, to be proportionate to the arrears demanded, and authorised the sale of estates in separate lots. Sections XXVIII. and XXIX. of Regulation VII. of 1799 pointed out the application of existing sale laws as far as regarded the allotment of estates proposed to be sold.

Regulation I. of 1801 was the result of indiscriminate attachment of lands by Collectors, and was enacted to remedy this, as well as to provide against unnecessary delays in the recovery of Government revenue; also it prohibited, except under orders of the Governor-General in Council, the sale of a fractional portion of an estate.

Regulation XXVI. of 1803 affected solely the North Western Provinces, as likewise Regulation XXVII. of the same year.

Regulation XVIII. of 1814 abrogated the necessity of the sanction of the Governor-General in Council for the sale of lands for arrears of revenue, and authorised the Collector of the district to advertise the lands of a defaulter for sale without the permission of the Board of Revenue, although their sanction was to be granted before any actual sale took place; and from this date to 1822 absolutely no change occurred in the sale laws in force.

6. In 1822, it being apparent that the existing Regulations did not define, with sufficient precision and accuracy, the conditions that rendered valid the sale held under them, or were sufficiently specific of the rights and interests of purchasers of estates sold in accordance with their provisions, and as likewise much unnecessary hardship and injury had occurred to zemindars who had been deceived or plundered by their own agents, almost the whole of the preceding Regulations were annulled and repealed, and the process of sales of estates for arrears of revenue was greatly simplified by the promulgation of Regulation XI. of 1822.

7. By this Act the issue of any dustuck, tullub-chittee, or process of demand to defaulters of revenue was forbidden, different rules and restrictions with respect to the separate classes of estates were framed, and Collectors were empowered to sell estates under the authority of the Board of Revenue.

8. This Regulation remained unmodified till the passing of Act VII. of 1830, when Collectors were authorised to sell estates without any previous reference to the Board of Revenue; and it underwent a further modification by the promulgation of Act XX. of 1836, which so far controverted one of the provisions of Regulation XI. of 1822, as to permit the sale of an estate under butwarrah for arrears of revenue, before the expiration of the year within which the arrears became due.

9. This system continued in force until the Legislature introduced Act XII. of 1841, whereby, with the exception of Sections XXXVI. and XXXVIII. of Regulation XI. of 1822, all other Regulations connected with sales of land previously passed, were rescinded. The most important points connected with the change being the abolition of the levy of interest, and penalty upon arrears of revenue, the fixing of periodical dates for final payments of revenue and sales of estates, the increase of rate of deposit of earnest money from 15 to 25 per cent., and the abolition of the system of issuing advertisements of the sale of estates.

10. The above law was again modified by the passing of Act I. of 1845, which rescinded the third and following sections thereof; by the new law, the extra indulgence of permitting the original defaulter to make good his arrears within three days of a purchaser failing to pay, within the prescribed law of 30 days, the amount of purchase-money of any

Appendix, No. 7.

estate sold for arrears, was granted; but, with this exception, and that of rendering the law inapplicable to the town of Calcutta, or the settlement of Singapore, Penang, and Malacca, there does not appear any material difference between this law, which remains in force up to this date, and the provisions of Act XII. of 1841.

11. On comparing the draft of the law in contemplation with Act I. of 1845, the analysis noted in the margin* exhibits in what sections the new matter is embodied, and how far the provisions of the present law will be continued by those of the proposed new Act. The new matter is contained in Sections X. XI. XII. XIII. XIV. XV. XVI. XXIX. XXXVI. XXXVII. XXXVIII. XXXIX. XL. XLI. XLVII. XLVIII. XLIX. L. and LI. Before, however, touching upon the same, I desire to record two suggestions that present themselves; the first refers to the 6th Clause of Section V. of the proposed new Act as well as of Act I. of 1845, wherein it appears to me that a more detailed description and specification of what is intended by the words "or other demands not being land revenue" is as desirable, as it would prove advantageous in the prevention of subsequent disputes; for instance, in the case of embezzlement of public money by a nazir or treasurer or other officer in charge of Government funds, and of the delinquent's property placed in security, being ordered to be sold, I presume the sale would be effected under this clause and section; but I think it would be preferable to have the examples specified.

12. The second suggestion is, that, whereas in Section VI. of the contemplated Act the notification desired to be issued therein is to be published in the "Official Gazette" (singular), so, in Section VI. of Act I. of 1845, the notice is desired to be published in the "Official Gazettes" (plural); if, therefore, there are two "Official Gazettes" which is the one intended to be specified by Section VI. of the new Act? or would the publication of the notification in either be considered sufficient to ensure the validity of the sale? It appears to me that this point requires definition; under the present law, the notices are published in the English "Government Gazette" published in Calcutta, and likewise in the Bengalee "Government Gazette" issued from Serampore, so that no room is left for doubt on this score.

13. I now come to the consideration of the new matter promulgated by the law under review: it may be classed under three heads.

First.—The opening of accounts for separate shareholders.

Secondly.—The sanction to the depositing of Company's paper for the saving of an estate from sale.

Thirdly.—The registration of shikmee tenures, so that their integrity be not affected by the sale of the estate to which they belong.

14. Sections X. to XIV. inclusive treat on the proposition of a recorded sharer of a joint estate held in common tenancy, being permitted to pay his share of Government revenue separately; and direct that, if an application to that effect be, after summary investigation by the Collector, approved of by that officer, that then, after certain preliminary measures, a separate account is to be opened with such a shareholder. The justice of this measure no one can contradict; but, if it became law, the Government must be prepared to sanction applications for the increase of native establishments, as the great amount of work entailed thereby could not possibly be disposed of without such an increase; but it doubtless entirely neutralises the effect of the chicanery and deceptions that have often transpired connected with sales, where a rich shareholder, in order to become possessed of the share of a poorer one, has suffered his own share to fall in arrears, and when the estate has been put up for sale, has purchased the whole benamee. With reference also to the scale of fees as entered in Schedule B., it would be as well to define whether or not the Schedule in question was intended to interfere with such portions of Regulation XV. of 1797, as define the amount of fees to be levied for the registration of transfers.

15. Sections

---

* Sections II., III., IV., V., VI., VII., VIII., IX., of proposed law agree with corresponding ones of Act No. I. of 1845.

Containing new Matter.—X., XI., XII., XIII., XIV., XV., XVI., XXIX., XXXVI., XXXVII., XXXVIII., XXXIX., XL., XLI., XLVII., XLVIII., XLIX., L., and LI.

Sections of the proposed Law which correspond with Sections of Act I. of 1845:

New law.	Act I. of 1845.	New law.	Act I. of 1845.	New law.	Act I. of 1845.
XVII.	X.	XXV.	XVIII.	XXXIV.	XXV.
XVIII.	XI.	XXVI.	XIX.	XXXV.	XXVI. with slight alterations.
XIX.	XII.	XXVII.	XX.	XLII.	XXVII.
XX.	XIII.	XXVIII.		„	XXVIII.
XXI.	XIV.	XXX.	XXI.	XLIII.	XXIX.
XXII.	XV.	XXXI.	XXII.	XLIV.	XXX.
XXIII.	XVI.	XXXII.	XXIII.	XLV.	XXXI.
XXIV	XVII.	XXXIII.	XXIV.	XLVI.	XXXII.

15. Sections XV. and XVI. accord permission for the deposit of Company's paper for the protection of estates from sale, a measure which must obtain the sanction and approbation of all revenue officers, as protecting zemindars from the misconduct of their agents and enabling them to travel on pilgrimages, or with any other object, without finding themselves sold out on their return, in consequence of a few rupees not having been paid into the collectorate treasury on their account.

16. Although Section XXIV. of the proposed new Act is, in every respect, to the same effect as Section XVII. of Act I. of 1845, I consider it proper, whilst new measures are in contemplation, to call your attention to the fact, that although by the section in question the Commissioner is empowered to cancel any sale, and award compensation and moderate damages to the purchaser, yet no provision is made for the payment of any such damage or compensation, as justice may require, when a sale has been unwarrantably effected through any mistake of the omlah of the office.

17. Sections XXXV., XXXVI., XXXVII., and XLII. treat of the rights of the purchaser of an estate under the new law to receive it free from all incumbrances, which may have been imposed upon it after the time of original settlement, and of the exceptions that are to be observed to this rule; also of the registration of old talookdaree tenures so excepted, and likewise the registration of similar tenures created after the passing of this Act. In these sections the principal new matter is the requirement of the holder of the tenure not to be in arrears on the latest day of payment of revenue, as fixed under Sections III. and IV. of this Act, and the prescribing the registration of old and new talookdaree tenures. However judicious these provisions may be, for the definition of the respective rights of parties concerned in the sale of an estate, and as such, I consider them worthy of all approbation, I cannot but consider the carrying out of the rules under Sections XXXVI. and XXXVII. as transforming the Collector's cutcherry into a civil court, and that, subsequent to the passing of this law, the Collector will find his time entirely taken up with investigations as to the rights of every petty talookdar in the zillah. In most districts of Bengal, such as Rajeshye, Moorshedabad, Pubna, and Furreedpore, where I have myself held appointments in the fiscal department, holders of the tenures defined in Section XXXV. of the Act under review, possess documents defining their rights; but in the zillah of 24-Pergunnahs these documents are rare, as the zillah was measured in 1793, and no further definition of an under-tenure granted, than the entering of so much land against such and such a ryot's name in the jummabundee papers; and upon this frail tenure has the land gone down from father to son in the same families, but no separate pottah was granted by former zemindars to the holders of such lands, who nevertheless, in cases of arrears of rent, in accordance with the established practice of the zillah, sell these tenures under Act VIII. of 1835, which sales are recognised by the civil courts. These rights, also, are moreover frequently sold by the holders thereof in private transactions; it remains, therefore, to be considered whether the Board of Revenue will recognise these amongst the shikmee tenures designated in Section XXXVI. Further, it appears that the putnee tenures under Regulation VIII. of 1819 are not specifically mentioned in the list of those entered in Section XXXV. of the new Act; and though, from the specification of the particulars that the application for registration is to contain, it may be presumed they are included in the category, yet it would be more satisfactory to have the point defined.

18. In Section XXXVI. it is provided that, in case the Collector's proceeding be not satisfactory to the applicant for registry, the party is at liberty, within the space of one year from that officer's decision, to refer to the civil court. If such be the case, of what use are the provisions of Section XXXIX., which declare awards of Collectors to be open to appeal to superior revenue authorities? and should this continue in force, then must Section XXXVI. be slightly modified in this respect.

19. Section XLI. provides that, unless within 60 years from the date of registry a decree be passed at the suit of Government by a civil court pronouncing the registration to have been obtained by fraud, the entry in the permanent registry book shall be considered an effectual protection of the tenure. It appears to me that the intervention of the civil courts is unnecessary in such a case, and that, as the Board of Revenue has the power under Regulation XIX. of 1814 to quash a butwarrah fraudulently effected, so might it also take upon itself to nullify a fraudulent or otherwise erroneous registry, and without specifying any limit within which the discovery should be made.

20. On comparing Section XLIII. with Section XIV. of this Act, it appears to me that the provisions of the former neutralise those of the latter, inasmuch as Section XLIII. specifies that the purchaser of an estate under its provision will acquire it subject to all its incumbrances, whereas Section XIV. declares such a purchaser to obtain the estate free from them. I may have misconceived the terms of Section XLIII., as they are a little obscure, and in that case, I trust, I shall be undeceived.

21. None of the remaining sections of this Act appear to me to call for special notice, but there are one or two suggestions connected with the working of the whole law, that I trust I shall not be considered as trespassing too much on your attention in laying them before you.

Appendix, No. 7.

First.—It appears to me that the fees prescribed to be levied are excessive, and will effectually prevent the holders thereof in zillahs, where the under tenures are held at rents under 500 rupees per annum, from profiting by the security held out to them by registry; and I would recommend a scale of fees for tenures paying under 500 rupees per annum.

Secondly.—In event of an individual petitioning for registry on acquiring land by purchase, gift, inheritance, or in any other mode, are the fees to be levied in conformity with the new law or Regulation XV. of 1797? Mutations, likewise; are they to be continued under Section XXI. of Regulation VIII. of 1800, or under the contemplated law?

Thirdly.—There is no specification in the Act under review for the sale of land, save of estates paying revenue to Government; and the Act in no place provides for the sale of any kheraj or lakheraj tenure that may have been pledged as security of good conduct by those who may have subsequently forfeited the same.

Fourthly.—The words "right and interest," hitherto intended to specify the amount of proprietorship to be disposed of, are entirely omitted in the phraseology of the new Act, as likewise mention of the validity, or otherwise, of a sale of an estate if subsequently discovered to have been purchased by an omlah of the Collector's office or one of his deputy collectors. These remarks have been, I am aware, extended to an unwarrantable length, but I have deemed it expedient to notice every point connected with the working of the proposed law that has presented itself for my consideration, or that may have been suggested, and I trust that this will be deemed sufficient apology for their prolixity.

I have, &c.
(signed) *F. A. Lushington*,
Officiating Collector.

From the Deputy-Collector of the Twenty-four Pergunnahs to the Officiating Collector of the Twenty-four Pergunnahs, No. 65, dated Allipore, 22 April 1856.

Sir,

With reference to your office memorandum, No. 242, dated 9th instant, forwarding copy of a letter from the Officiating Commissioner, No. 122, dated 8th instant, I have the honour to submit, as follows, my humble opinion as to the practical working of Sections XXXVI. and XXXVII. of the draft Act, to improve the law relating to sales of land for arrears of revenue.

2. These two sections contain rules for the registration of the first three classes of under-tenures described in Section XXXV. The tenures forming the first and second classes are those which existed at the time of the decennial settlement, and are called the old talookdaree tenures, and the tenures constituting the third class are those created subsequent to that settlement, and are called the new talookdaree tenures and farms.

3. The object of Section XXXV. is to protect the rights of under-tenants on the sale of the parent estate on account of arrears of revenue. To attain this object without any prejudice to the interests of Government, it is provided, that if the tenures are duly registered under Sections XXXVI. and XXXVII., and no arrears of rent are due from them on the latest day of payment, they are secured against any risk whatever.

4. I shall now proceed to consider how far the rules laid down in Sections XXXVI. and XXXVII. are sufficient to answer the purpose for which they are proposed to be enacted. In doing so, I beg to be understood that my remarks have reference to the under tenures of this district only, and may not therefore apply to the other districts of Bengal.

5. Section XXXVI. lays down the following rules for the registration of the old talookdaree tenures. The holder of such a tenure shall apply to the Collector for registration, who shall issue notices requiring the proprietor of the parent estate or any other party interested, within 30 days to file any objection he may have to the registry of the tenure. In the absence of any objection, the Collector, if, after making due inquiry, he is satisfied of the applicant's claim, shall register the tenure. If any objection is made, he shall make a summary investigation of the case, and grant or reject the application according to the result of that investigation.

6. From the above it appears that, in the cases of old talookdaree tenures, the Collector's inquiry shall be confined to the claim of the applicant so far as the rights of the proprietor and other private parties are concerned; and if that claim is established, the registry of the tenure shall be allowed without any inquiry as to the adequacy of the rent payable by the holder.

7. In this district the tenures of the above description are chiefly those called the ticcadaree lands. These tenures were granted by former zemindars to private individuals generally at a quit rent, for some service done, or for clearing jungle or breaking up a new soil, but seldom for pecuniary consideration. Few documents of these tenures are to be seen, the only proof of their existence being the mention made in the measurement and assessment papers of 1190 B. S.

8. But

8. But most of these lands have since been resumed, or have lapsed in default of heirs, and are now held by the proprietors in the names of their sons and relations. With a view of making a provision for their families, in the event of their estates being sold for arrears of revenue, the zemindars have not only transferred the tenures to their children at an inadequate rent, but have in many cases made a complete exchange of those lands; that is, the integrity of the tenures, as far as the quantity is concerned, has been preserved; but parcels of good land, in lieu of bad ones held by the original grantees, have been substituted.

9. It is most probable that these proprietors will take advantage of the proposed enactment, and get the lands registered in the names of their families and dependents, thereby reducing the hustbood of the mehals to a great extent; and the summary inquiry prescribed by Section XXXVI. will hardly enable the Collector to detect the fraud.

10. For the registration of the new talookdaree tenures and farms, the rules given in Section XXXVII., in addition to those prescribed in the preceding section, are that the Collector shall cause such measurement, survey, and local inquiry to be made as he may deem necessary for the security of the Government revenue. He shall satisfy himself that the tenure was created in good faith, so far as the interests of the Government revenue are concerned, and that the rent payable by the holder is not less than is fully sufficient to afford a fair proportion of the revenue assessed upon the parent estate.

11. To ascertain this latter point, it will be necessary, in many cases, to measure and survey not only the tenure to be registered, but the entire estate in which the tenure may be situated. For the tenure may contain land of a superior description, so that, although the rent payable by the holder may be equal to the average rate of the estate, yet it may be very inadequate with reference to the quality of the soil.

12. Under such circumstances, unless the total area of the estate be measured and a jummabundee prepared, after ascertaining the rates current in the mehal for the different sorts of land contained in it, it is next to impossible that any satisfactory opinion can be formed on the above point. I need hardly say that such an inquiry must entail on the Collector much loss of time, and on the parties concerned trouble and expense.

13. There is another circumstance connected with the zemindarees of this district which makes an inquiry of the above nature peculiarly difficult. It is this: almost in every pergunnah there are villages, the lands of which are held jointly by the proprietors of two or more separate estates. For instance, the lands of mouzah Kouchpookhurea in pergunnah Magoorah are possessed, ijmalee, by the proprietors of no less than fifteen different estates, as per margin, according to their respective shares.

No. on the Towjee.	NAME OF ESTATE.	Amount of Share in the Village.					
		R.	*a.*	*g.*	*c.*	*k.*	*t.*
1	Kist Chetlah and others - -	0	1	13	1	1	0
2	,, Rungunberya, &c. - -	0	0	16	3	1	1½
3	,, Naskurpore and others -	0	0	17	3	0	1
4	,, Kudumtollah and others -	0	0	17	3	0	1
5	,, Angaberya and others -	0	0	17	3	0	1
6	,, Roynuggur and others -	0	2	13	1	1	0
8	Mouzah Joolphia and others -	0	2	13	1	1	0
9	Kist Chetlah and others - -	0	0	5	1	1	0
10	Ditto - - - - -	0	0	5	1	1	0
11	Mouzah Suntoshpore and others -	0	0	5	1	1	0
12	Kist Chetlah and others - -	0	0	5	1	1	0
13	Ditto - - - - -	0	0	5	1	1	0
14	Ditto - - - - -	0	2	13	1	1	0
15	Kist Khureaberya and others -	0	1	6	2	2	0
16	,, Chetlah and others - -	0	0	3	0	1	1½
	TOTAL - - -	1	0	0	0	0	0

14. Now, it is easy to guess how difficult it would be for the Collector to prosecute the inquiry prescribed by Section XXXVII., if an under-tenant of any of these estates were to apply for the registration of his tenure; and it is well known that, owing to this circumstance, some of the mehals above alluded to, have been under butwarrah for upwards of 20 years, and the partition remains unfinished up to this date.

I have, &c.

(signed) *Sibchunder Deb*,

Deputy Collector.

FROM the Collector of Behar to the Commissioner of Revenue for the Division of Patna, No. 39, dated Gya, the 10th May 1856.

Sir,

I HAVE the honour to acknowledge the receipt of your letter, No. 1254, of the 12th of March, with its enclosures from the Sudder Board, regarding the draft of a Bill for improving the Revenue Sale Law, and in reply to state as follows:—

2. I have carefully perused the Bill in question. I have compared it with Act I. of 1845. I have studied attentively the several new clauses which have been introduced, especially Sections X. to XVI. and XXXVI. to XLII.; and with every desire to weigh impartially the advantages which the contemplated Bill is presumed to involve, I am forced to the conviction that the advantages which may in some instances be conveyed to small farmers and petty shareholders by the operation of these new clauses are not of so paramount a nature as to necessitate the passing of a special Bill for their benefit, and am also of

Appendix, No. 7.

opinion, allowing advantages by the proposed changes may be secured to certain parties, that the same object, with perhaps a little more difficulty, is equally obtainable by legal process under the laws now in force, and I feel, moreover, forcibly convinced that the new law, if thoroughly acted up to, will so multiply the present arduous duties of the treasury department in a Collector's office, as to render it impossible to carry on the duties with the limited establishment now entertained; and it seems desirable, before passing the draft into law, that Government should well consider whether the advantages supposed to accrue to the petty shareholders by the new Act are commensurate with the immense increase of work its provisions will entail on their revenue officers and the expenditure and enlarged establishment will impose upon the State.

3. Act I. of 1845 has been in force now for more than 10 years, and as far as my experience goes, has worked admirably; it is thoroughly understood and appreciated by all classes of shareholders, and has stood the test of time to the thorough satisfaction of both Government and the people. Where then and what are the overwhelming motives that render it necessary to set aside an Act that not only works well, but is acceptable to the landed proprietors? No doubt some slight alterations might advantageously be effected in the old Act, such as substituting three periodical days for payment of revenue instead of four, and fixing the dates, not arbitrarily, but conformably with the three periods in the year in which the landlord collects his principal rents, namely, at the time of the Bhudree, Khurreef, and Rubbee crops, apportioning the kists according to the relative value of the said crops. Attention should also be paid in fixing the days of payment to the period of opium advances; the latter affords immense facility to the landlord in the payment of his Government revenue, and Government should bear in mind (I am speaking of Behar), that the ryots pay their rents to the zemindars from those advances, and that the latter are then in a position to pay Government. If the opium advances and fixed dates for paying in revenue are far removed one from the other, the smaller landholders, who compose the greater part of the class in this zillah, are compelled to borrow money at exorbitant interest to meet the Government demands; so that, if feasible, some attention should be called to this point.

4. But to revert to the Bill under discussion. If passed, its tendency will be to cause all ijmalli estates to become mouzawarry, and all mouzahs, or a large portion of them, now held under one or two or more recorded proprietors, to be subdivided into as many shares as there are shareholders; for, if not recorded proprietors, a dakhil kharij suit can make them so, and it is natural to conceive that every one possessing a distinct interest in a mouzah will prefer paying in the amount of his share direct to Government, and when, as frequently occurs in this zillah, some 80 or 100, or even more proprietors of a small estate, possessing infinitesimal interests in it, take advantage* of the proposed Bill to pay in their minute portions of the revenue direct into the Government treasury—and if no one oppose them there is no reason why they may not—what increase of labour will it not entail? What innumerable petty interests in estates must be entered in the treasury books? What an enormous aggregate of chellans and their counterparts? What a confusion of accounts? What difficulty in regulating the fractional portions some 40 or 50 shareholders, possessing a small mouzah paying a small Government jumma, will have to pay separately into the treasury? and what insuperable difficulties will present themselves at the last day of payment, when all these vast numbers of minute shareholders shall rush to the treasury to pay in their portions of the Government revenue? How impossible for the establishment, which under existing circumstances can scarcely during that period keep head against the current, to contend against the torrent which will pour in at the moment? It will fairly swamp them.

5. Such views may appear distorted and exaggerated, but it is only by putting forth an extreme case that the possible results can be gathered; and I am of opinion if Sections X. to XVI. are allowed full play, and are thoroughly acted up to by the petty shareholders of small estates, that a consummation such as I have hinted at may not be impossible, and the necessary consequence must be a large increase to the present treasury establishment, great delay in preparing and transmitting accounts, and a labour altogether incommensurate with the advantages proposed.

6. By the laws in force any recorded proprietor, if he wishes to separate his interest from the main property, can do so under the provisions of Regulation XIX. 1814, and his share becomes a distinct mouzah and is protected against sale as long as the Government revenue assigned upon it is regularly paid up; and as no restrictions, except that of insisting on the land so divided being compact and well defined, are imposed by the butwarrah laws. every part proprietor of an estate, if so disposed, can become independent, and I do not see why a law enabling a shareholder to pay in his rent separately, but not preserving his share from sale, is called for; it only creates and accumulates work without effecting anything that the laws in force could not with greater security convey.

7. In

* I do not say they will, for Schedule B. will prevent them. I am only representing the legitimate result of the Bill, if carried out to its full tenor and extent.

7. In this zillah a vast number of estates are held in common tenancy, not of land but of produce; the system is bowlee or payment in produce instead of money. On the crops being cut they are appraised, and each shareholder, after deducting the ryotty hissa, gets his share of the remainder according to the amount of interest he holds in the mouzah. I conceive that in such a case the purchaser of a share under Section XIII. of the new Act, would experience great difficulty in getting his acquired rights assigned over to him; he has no land to take possession of, but a share in the produce, which fluctuates continually and to an interloper is almost intangible. A case of this nature would come under Section X., but does not that section apply rather to nugdee than to bowlee interests? The one is fixed, the other fluctuating; one is easily defined, the other varies so much as to render it impossible to assign a true valuation.

8. I am not aware that any instances occur in this zillah of shareholders in an estate possessing defined and distinct portions of land, so that Section XI. is hardly applicable to Behar; but I conceive, if any such instance exists, the question of separation could be more satisfactorily settled by the butwarrah than by the proposed law.

9. The matter of possession enjoined to be inquired into by the Collector in Section XII., is not so susceptible of proof as may be imagined; the evidence of the puarree and the statement of a nizamut peon, corroborated by witnesses, would constitute the grounds of decision, and nothing could be more untrustworthy or unsatisfactory; and in 90 cases out of 100 litigation would ensue, appeals would be preferred to higher authority, and the labour of both offices be indefinitely, and, to my notions, unnecessarily increased.

10. Sections XIII. and XIV. lay down rules for the sale of such share or shares as may fall into arrears, and are of such a nature as virtually to subvert and demolish the superstructure raised in the preceding clauses; for cases may, and will occur, where the highest offer for the ijmali share exposed to sale shall not cover the amount of arrear due thereon; the consequence is that the shareholder who, under Sections X. or XI., has obtained the privilege of opening a separate account, and who has, under Section XLVIII., been heavily mulcted to secure the said privilege, finds, through no fault of his own, that neither the fees he has paid under Schedule B., or the regularity with which he has scrupulously paid in his share of the Government revenue, in any way absolve or exonerate him from the calamity, neglect, wilful or unavoidable, on the part of the ijmali shareholders has plunged the entire estate. The shares of the insulated, as well as those of the united proprietors, become equally involved in the final catastrophe, and the only party benefited is Government, who appropriate the amercement* enjoined by Schedule B., and which was only paid in under a delusive hope that some corresponding advantage might result from it.

11. Sections XV. and XVI. are in every way just and appropriate, as there are many absentee shareholders of estates who are at the mercy of their local agents; and instances have been known where these latter, taking advantage of their position, have, through collusion or remissness, involved their principals in great difficulty. The proposed section enables such absentees to secure their interests unsubjected to risk or intrigue.

12. Section XVIII., corresponding with Section XI. of Act I. of 1845, has a tendency, I think, to make landholders procrastinate, an evil to which they are intuitively disposed; and instead of regarding the quarterly day of payment as the real arbiter of their fate, they look more to the character of the Collector, and pay in or adjourn payment accordingly. Some Collectors, as I know, confine themselves strictly to the letter of the law, and these rarely have an estate in arrear; others, more lenient or supine, find their sale-roll incumbered with applications for indulgence, and the consequence is, the rule being undefined, an immense latitude is left to the arbitrary will of the Collector. He may or he may not exempt an estate from sale, and it is possible that human frailty as much as stern impartiality may decide the point. I think, if certain periodical dates are specified, full and timely notices promulgated, and the landholders given to understand that from one year after passing of the Act no margin or latitude would be attended to; that, except an appeal to the Commissioner, no door of escape or retreat was open to them; that then, without any undue harshness or injustice to the landholders, the Government revenue would be paid in on the fixed dates with the greatest punctuality; and that there would be but few occasions for special consideration, if they did arise, and good and creditable reasons assigned. There would be ample time for the Commissioner to exempt such cases from sale; procrastination being a disease amongst the natives, strong remedies should be applied to correct the evil; there can be no hardship when every man knows beforehand that he has got three months to collect and pay in his rent.

13. Section XXIII., corresponding with Section XVI. of Act I. of 1845, requires one or two words of comment. A case occurred when I was Collector of Berhampoor, which presents a curious illustration of the working of this rule. An estate with an arrear of 21-10-6, and bearing a Sudder jumma of 31-14-11, was knocked down for 1,810 rupees, of which sum 25 per cent. or 452-8 was paid in as deposit. The purchaser, disapproving of his

* I call it a fine, because if the share is sold, and the fees, instead of being returned, are forfeited, the natives will regard them in the light of a fine.

Appendix, No. 7.

his bargain, failed to pay up the full amount of the purchase-money; the estate was re-sold, the defaulter purchased it himself for 29 rupees. The question was whether the balance of the original purchase amount was to be collected from the defaulting bidder or not. I was of opinion that Section XVI. only provided for levying a difference in case the price realised at the re-sale was less than that acquired at the first sale, and referred the point for the consideration of the Commissioner, who referred it to the Board, the result of which was, that the difference of price was to be levied from the defaulting bidder and paid over to the proprietor. Now this is an extreme case, and I opine one hardly contemplated by the framers of the law. I conceive some distinction might be drawn between cases where the re-sale exceeds the amount of the first sale, and where there is a declension of price. A compulsion of payment in the latter case seems equitable, but barely so in the former, where the proprietor is himself the purchaser. The mulct paid in as deposit is amply sufficient to preclude any reckless speculation.

14. Passing on to Section XXXIV., we come to rules for registration. I am of opinion that very few tenures referred to in the first and second clauses, and possessing the peculiar qualifications enumerated in Section XXXVI., are to be found in Behar. Talookdaree tenures, distinct and apart from those referred to in Regulation II. of 1819, may exist in nizamut mehals, and if so, the option of effecting their registration is very properly conceded.

15. It also seems to be very desirable that farming leases and tenures of the description referred to in Clause 3 should be secured against any interference on the part of a purchaser of the parent estate; but at the same time, I think it possible for the Collector to be deceived in the inquiries he is called upon to make under Section XXXVII. He is there enjoined to satisfy himself that the tenure or lease was created in good faith as far as the interests of the Government revenue are concerned, and that the rent payable by the holder bears a fair proportion to that assigned on the parent estate. Now, as far as the interests of Government are concerned, I admit that fraud can scarcely be practised with impunity, as (supposing the Collector to have been deceived) the power of selling the whole estate if it falls into arrear, guarantees the Government from loss; but it is possible that a landholder possessing two mouzahs constituting one lot or estate, one of which mouzahs is good and the other bad, may effect a fictitious transfer of the good mouzah to his wife or son at half the Sudder jumma of the whole estate, and obtain registration under this Act. Now, supposing 500 rupees to be the Sudder jumma, the Collector would see, especially if warranted by the deposition of the putwarree and other testimony, no unfair proportion, if the villages possessed nearly the same area, in assessing each at 250 rupees; whereas one might be * worth 450 and the other only 50 rupees. Such instances are not uncommon. The landholders might then wilfully permit the estate to fall into arrear, and allow it to be sold. The purchaser in that case, bound by this Act to respect and not to interfere with the registered tenure, would find himself in the position of having to pay 250 rupees Government revenue for a mouzah which only yielded 50 rupees; and though by a regular suit under Section XLI. he might get the lease annulled, yet it would be a work of time. I entertain no doubt but that frauds of this and other unforeseen natures will arise out of this Act, and cause a great deal of trouble.

16. It is very difficult to foresee and anticipate all the possible results that may arise from the working of a Bill of the nature under review. Many of its provisions are doubtless admirable; but as my opinion is asked, I trust I may be absolved from impertinence or presumption if I venture the remark that the Bill does not appear absolutely called for. I think it will lead to abuses which, though dimly foreshadowed in my mind, are not sufficiently potent to authorise the expression of them. I think the Bill will conduce to great litigation, to a large increase of labour, to great confusion and trouble in the treasury department of a Collector's office, and that there is nothing introduced which the laws now in force do not, with perhaps a little more delay and difficulty, equally provide for.

17. The main objects to be obtained are set forth in the preamble: the first is that persons having liens upon estates should, by paying the money necessary to protect it from sale, have their rights secured. Does not Section IX. of Act I. of 1845 convey the same right? The second object is to afford shareholders easy means of paying in their share of Government revenue; can the means be called easy which are shackled† with such fees and charges under Schedule B. as of themselves tend to render the Bill abortive? for not one petty shareholder in 50, unless influenced by party discord or some peculiar and hidden motive, will incur the expense of obtaining a registration, especially when he knows beforehand that he does not thereby protect his share from subsequent sale, nor, if it did, is a special law on the subject requisite. Where there are many shareholders in an estate, the general interest requires that each shall pay up his quota of the Government revenue; if one fails, another pays it in under protest, and has his remedy in a civil action. The third motive

* The Sudder and Mofussil jummas are of course quite distinct, the latter is always in excess of the former; but I am only here putting a case, and the amount of the Sudder jumma is qute sufficient for the purpose.

† In the former part of this letter, I have attempted to point out the disadvantages the provisions of the Bill would entail if really carried out, but I am of opinion that, if passed, it will become a dead letter, as no petty shareholder will pay in the fees and expenses enjoined under Schedule B.

motive is to protect absentee landlords against the sale of their estates through neglect or fraud of their agents. The Sudder Board's circular, No. 3, of the 21st of March 1854, moots the same question; it is one of considerable importance, and the justice of such a measure cannot be denied; but it may be asked what impediment exists at present, without any special law, to a Collector's receiving and crediting payment of revenue from recorded proprietors in anticipation? I know of none, and I doubt very much whether a Collector would be justified in refusing such advance payments; if the case refers to a farmer who holds land in lease from the zemindar, and, as an absentee, desires to protect himself from loss, then some law is desirable to effect it; but surely it cannot be urged that to secure this one point a new sale law was imperatively called for. The fourth motive is to enforce the registration of dependent talooks existing at the time of settlement, and to give security to such talooks when registered. I submit that the Bill does not enforce registration, but leaves it optional with the talookdar to effect or not as he likes, and my opinion is that Schedule B. operates as a serious impediment to any such registration. If registrations are effected, security is doubtless afforded by the Bill; but as regards Behar,* I doubt whether any of the nature implied exist, or if existing, that they will be registered; but, whether registered or not, they were protected against interference on the part of a sale purchaser by Section XXVI. of Act I. of 1845. The fifth and last motive is to protect farming tenures from loss or interference on the part of the purchaser in case the parent estate is sold for arrears of revenue. I say farming tenures, for none other could fall into the category of having rents fixed on them proportionate to those assigned on the parent estate —and if right in this view, the section above quoted affords the protection here set forth, so what necessity for a new law?

18. Having thus very imperfectly, and under the drawback and difficulties attending severe sickness, endeavoured to represent my views of the Bill in question, I would desire in conclusion to state a case existing in this district, for which no provisions have been suggested in the Bill under review. I allude to the case of the Belounjah Rajah, one well known to Government, and one which, notwithstanding repeated references from me, has not hitherto been finally disposed of; and as in the course of events it may entail much misery upon an impoverished but ancient house, I think the matter demands careful consideration.

19. The case is briefly as follows.—The father of the present Rajah, heavily involved in debt, and apprehensive that the sale of his entire raj would entail ruin upon his house, applied to Mr. Commissioner Smith, who proceeded to Bellonjah, and effected an arrangement whereby certain mouzahs, some 30 or 40, were made over to the creditors in mokurree, conditionally on the debts being remitted, and Government revenue to the extent of 7,391 rupees being paid in by them, and Mr. Smith ruled that the said mokurreedars were responsible for this portion of the Government revenue, and that the raj was only liable for sale in case the proceeds from the defaulting mokurreedars was insufficient to cover Government arrears. This order, illegal as it was, was confirmed by the Board in their letter No. 39, of the 28th March 1834, and on the strength of their confirmation, no less than 19 of these tenures were, up to 1843, sold for their own arrears. During the incumbency of Mr. Collector Taylor, a question of sale arose. Mr. Taylor saw the illegality and declared his inability to sell the defaulting tenure, and that the entire raj must be advertised for sale. Mr. Commissioner Gough acknowledged the dilemma, but urged distraint and less violent measures, and from that time to this, distraint and dustucks through the Nazir have been in force to collect the revenue; but the present rajah feeling the insecurity of his raj, petitioned to have Mr. Smith's provisions legalised. I recommended the introduction of Regulation VIII. of 1819 into this zillah, so as to treat these mokurrees as putnee talooks. The Board declined, and directed that the revenue should be collected from the mokurreedars under the provisions of Section XXV., Regulation VII. of 1799 and Regulation VIII. of 1835; but with all deference, I submit that these laws do not apply, and that the Collector could not, under one or the other, bring one of these mokurreree to sale, and that, in case of default, the existing law requires and enjoins that the entire raj should be advertised for sale.

20. Such is the case, and in a new sale law, was it not possible to introduce some clause whereby mokurree tenures in Behar should be placed in the same category as putnee talooks in Bengal? This would have been an essential boon, and one not only urgently required, but one which would have found great favour with the large landed proprietors of this district. I do not say or think that mokurree tenures in every respect correspond with putnee talooks, but the same rules might, I conceive, be brought to bear on both. The two tenures, with the exception of difference of local custom, possess strong features of resemblance; but, if Regulation VIII. of 1819 was not deemed applicable, some special clause or clauses might have been introduced elucidating and settling this vexed question.

I have, &c.
(signed) *R. F. Hodgson*,
Collector.

* As Collector of Behar, I only write of my own district. I do not presume to infer that the putnee talooks in Bengal may not benefit by this and other clauses.

Appendix, No. 7.

From the Collector of Dinagepore, to the Commissioner of Revenue, Rajeshaye, No. 144, dated, Dinagepore, 8 April 1856.

Sir,

I HAVE the honour to acknowldge the receipt of your letter of the 11th March, calling for a report on the Bill for the improvement of the law relating to sales of land for an arrear of revenue, published in the Gazette of the 30th January last. The Bill to be reported on, embodies (a single section excepted) the whole of the present Sale Law, Act I. of 1845. It contains additional provisions for the protection, first, of the interests of the recorded sharer of a joint estate held in common tenancy, second of a recorded sharer of a joint estate whose share consists of a specific portion of the land of the estate. It protects also, first, Istemraree or Mokurreree tenures which were held at a fixed rent 12 years anterior to the permanent settlement. Second, tenures existing at the time of settlement not liable to increase of assessment. Third, tenures of whatsoever description created since the time of settlement. The provisions embodied in this Bill from Act I. of 1845 have worked so well for these last 10 years, and are acknowledged to be so well adapted to the requirements of our revenue system, as to render any interference with them in my judgment unnecessary and uncalled for. Their incorporation in the present Bill is sufficient evidence of the opinion entertained of their value. I may, therefore, be permitted to pass over this portion of the Bill, merely expressing my regret that, since additional provisions on the subject were considered necessary, they were not made the basis of a separate and distinct Act, instead of being incorporated in the present Bill. Reverting to the more specific provisions of the present Bill, the first and second relate to the protection, first, of a recorded sharer in a joint estate held in common tenancy; second, of a share which consists of a specific portion of the land of the estate; and I do not hesitate to state that the provisions are not only imperatively called for in justice to the co-sharer who has paid up his portion of the Government revenue, but that the mode proposed is, in my judgment, effectual, without in any way compromising the interests of the Government, or causing any loss or inconvenience to the zemindars. The idea appears to have been taken from the rules which obtain under the butwarrah regulation, and it may occasion surprise that a principle so distinctly enunciated nearly half a century ago, should hitherto have escaped the attention of our Legislators. The next division of the subject comprises under-tenures, as already shown.

1. The istemrare or mokurreree tenures which existed 12 years anterior to the permanent settlement.

2. The tenures existing at the time of the settlement.

3. Tenures of whatever nature, created since the settlement. I see no objection to the provisions of the Bill regarding the first and second descriptions of tenures. They are already in some measure protected by the conditions of the permanent settlement; the difference being that the permanent settlement consists simply in a declaration in favour of all such tenures generally, whereas the provisions of the present Bill are calculated to identify them. With reference to the third description of under-tenures, namely, those created since the permanent settlement, the question is no doubt one of great difficulty. I admit the necessity for protecting them in the event of a sale of the parent estate; and the scheme proposed in the Bill would perhaps be the best that could be devised, did it not appear in my judgment to be, under existing circumstances, hardly practicable. The difficulty springs from the obvious necessity (as proposed in the 27th Section of the Bill) for not only measuring and surveying the under-tenures, which operations are obstacles sufficient in themselves, but for the Collector satisfying himself that the rent payable by the holder is not less than is sufficient to afford a fair proportion of the revenue assessed upon the parent estate. To do this, it will be necessary, first, to ascertain what the actual assets and profits of the parent estate may be. But all revenue officers know the difficulty of ascertaining accurately, even in a case of butwarrah, the assets of an estate, and the time which elapses ere it can be tested, classified, and made available for that purpose. In no case can the inquiry be brought to a close in less than two years; but in cases where the zemindarees are large, three, or even four years may elapse, or a proximate period. Such being the state of things in butwarrah cases with respect to a single zemindaree, what labour and time will it not involve when brought to bear upon the zemindarees of an entire district. Added to this labour, will be the inquiry regarding the assets of the under-tenures, of which will be found, I surmise, nearly four or five thousand in most districts, and in no district less than two thousand. If the applications for registration of these under-holders come in nearly together, which will unavoidably be the case as I apprehend, the number of ameens that must be employed may be imagined, the numerous reports that must be made by them, the interlocutory orders in numbers that must be passed, and the lapse of time which all this work will involve. Supposing that, at the end of the first six months, a thousand cases are ready for decision by the Collector, and that that officer is able to dispose of as many cases per mensem as the Civil Court, namely, 25, he will only have decided 300 by the end of the year, or 1,800 in six years, or 3,600 in 12 years, unless the Government greatly increase the number of Collectors employed in Bengal, and thereby the expense to Government. Desirable, therefore, as the object of the Bill may be, I much fear that the difficulty of compassing it is of such a nature as to place it beyond our reach. I should, for these reasons, be disposed to prefer the scheme formerly

formerly proposed by Government, namely, that "all under-tenures in an estate, without exception or inquiry, should be allowed to hold as good against an auction purchaser as they were against the former proprietor, as long as the parent estate should be saleable at a price that would cover the arrears of revenue due from it; that as soon as the parent estate should fail to be saleable at such a price, it should be forfeited to Government. The Government scheme is recommended by the hope it affords of eventually repairing the injury inflicted by the permanent settlement of Bengal. For the lapse of the zemindarees to Government on account of arrears of revenue, will afford Government the opportunity for restoring to the actual cultivators of the soil the status, of which that settlement unfortunately deprived them, and transferred, apparently under a misconception, to the mere tehsildars of the Mogul Government, who were mistaken for a body analogous to the landed proprietors of England. I am aware of the outcry which is raised against any measure which is supposed to have the slightest tendency to trench upon that settlement. But to remove the evils of a system acknowledged to have proved most disastrous to the great body of the people is, in my judgment, not merely advisable, but a duty imperative upon Government. I have to notice two other points of the present Bill, namely, first, that provided for in the last paragraph of Section IX.; and second, that composing the entire paragraph of Section XV. The first is a provision for refunding to the mortgagee, who may have discharged the arrears of Government revenue, to protect himself against the sale of the estate before the mortgage has lapsed. The second is the chance afforded to the proprietor of a zemindaree to protect his estate from sale by making a deposit of public securities, the interest of which shall be sufficient to pay the Government assessment charged upon the estate. Both of these provisions are based upon obvious justice, which demands their implicit adoption.

I have, &c.
(signed) *F. A. E. Dalrymple*, Collector.

FROM the Officiating Deputy Collector of Maldah to the Commissioner of Revenue, Rajshahye Division, Beauleah, No. 447, dated Maldah, 28 April 1856.

Sir,

I HAVE the honour to furnish the report required by the Board's Circular, No. 2, dated 26th February, and your letter, No. 71, dated 11th ultimo, on the Bill for the Improvement of the Law relating to Sales of Land for Arrears of Revenue, published in the "Gazette" of the 30th January last.

2. The main points in which this Bill differs from the law, as it now stands, appear to be these:—

First. It is proposed to secure parties having an interest in an estate against loss in protecting that interest, in case of its being imperilled, by the estate being allowed to fall into arrears, and so become liable to sale.

Secondly. To enable sharehholders in estates, duly paying their shares of the Sudder jumma, to protect their shares in case of the estate becoming liable to sale through default of their co-sharers.

Thirdly. To enable proprietors to secure their estates from sale through the neglect or fraud of their agents.

Fourthly. To enforce the registration of dependent talooks existing at the time of settlement, by giving security against the consequences of the sale for arrears of revenue of the parent estate to talooks so registered.

Fifthly. To protect the holders of under-tenures, created in good faith, from loss by the avoidance of their tenures through sale of the parent estate for arrears of revenue.

3. With a view to the attainment of the first object, Section IX. of the Bill permits persons, not being proprietors, to deposit the amount of arrears due from any estate, with the view to its being carried to the credit of the estate, and so of saving it from sale in case of the proprietor defaulting; the amount so deposited and credited being recoverable by suit in the Civil Court, or in case of the party holding a lien upon the estate, being added to the amount of that lien.

4. I think it impossible to take exception either to the object here proposed, or to the means by which it is to be attained; I think it most just and right that parties having interests in estates should be enabled to protect those interests, and that they should at the same time, as far as possible, be secured against loss in so doing; and I know of no method whereby the object would be attained so simply and effectually as it is by that proposed in this Bill. As the law now stands, what security have such persons? None whatever. The recorded proprietor is the only person whom the law recognises in connexion with the estate; all revenue paid on account of it must be paid in and credited in his name; the existence of other parties is absolutely ignored; and they have consequently no safe method whatever of protecting, against the consequences of the neglect or fraud of the proprietor of an estate, interests in it which may possibly be greater than his. This is not as it should be;

Appendix, No. 7.

be; where an interest can be legally created, there should also be the means of protecting it legally; these means the Bill before us proposes to provide, and, as I have already said, in, I think, as simple and effectual a manner as possible.

5. In the next place, Section X. of the Bill proposes to empower the Collector to open a separate account with any shareholder in a joint estate held in common tenancy, who may desire to pay his share of the Government revenue separately; the form of application and course to be pursued by the Collector on receipt of it are prescribed in the Bill.

6. I am of opinion that this is also an excellent provision, and one calculated greatly to increase the security and enhance the value of landed property. It provides for a want hitherto, I believe, greatly felt, that namely, of security against the neglect or fraud of a co-sharer. As the law stands, the whole of a joint undivided estate is answerable for the whole of the revenue due from it; the smallest arrear remaining due after the last day of payment, renders the whole estate liable to sale; where the property in an estate is, as in this country so frequently happens, vested in a body, often a large one, of proprietors, great inconvenience must frequently be occasioned by the operation of this rule. I remember one case which I may quote as an instance of this; an estate in Chittagong, of which I now forget the name, was the property of a considerable body of shareholders; one set of shareholders invariably failed to pay in their share of the revenue when it became due, and the other set found themselves consequently compelled to find the whole amount, to raise the balance perhaps at an hour's notice or allow the estate to go for sale, and this happened not once, but regularly every quarter-day. It can easily be imagined how much annoyance and actual loss was caused by such a process of paying in the revenue, and how much the value of a share in such a mehal would be deteriorated by it. If the Bill under report become law, such a thing could not occur; the body of paying shareholders would at once apply for the opening of a separate account with them, and their interests would then be safe from the consequences of their co-sharers' default. I have no doubt whatever that this provision of the Bill will be taken advantage of to a great extent, should it become law.

7. And it cannot, I think, be doubted that the permission contained in this section may be granted with perfect safety to the Government revenue. In respect of the liability of the land for the revenue assessed upon it, no change whatever is made in the existing practice; all that it is proposed to do is to allow butwarrahs being made of jumma, as they now are of land; the object to be attained is the same, and the process by which it is to be attained infinitely more simple and inexpensive; while at the same time all risk to the Government revenue is avoided; I think it highly probable that one effect of this provision of the Bill will be to put a stop, in a great measure, to butwarrahs of lands for the future; by no means an undesirable result.

8. I now come to one of the most important of the alterations in the law which the Bill proposes to effect; by the section last referred to, shareholders are enabled to protect their interests against the fraud or neglect of their co-sharers; Section XV. of the Bill provides for the protection of the proprietor against the neglect or fraud of his own agent, by permitting him to deposit money or Government securities to meet any demand that may accrue against the estate.

9. The importance of this provision consists in this: that, as has, I believe, already been pointed out elsewhere, it virtually sanctions the redemption of the land-tax; it does so most undoubtedly; a proprietor of an estate has only to deposit Government securities to the value of 20 or 25 years' purchase of the revenue payable by the estate, according to the rate of interest which the securities bear, and his estate is secured against sale for ever.

10. The change in the nature of land tenure in this country which the enactment of this provision will involve, is unquestionably one of the utmost consequence; the object which the Bill proposes to attain is merely the securing of the proprietor against the fraud or neglect of his agent; the actual consequence may be the gradual conversion of all the zemindarees, independent talooks, and estates, under whatever denomination, paying revenue direct to Government, into virtually freehold tenures. Are the Legislature prepared to sanction this change? for my part I see no reason to dread it; on the contrary, the insecurity of landed property in this country has hitherto, I believe, been one of the causes which have chiefly retarded its advance in material prosperity; it is the cause which has mainly deterred from entering largely into zemindaree business Europeans, the men of capital, and what is perhaps more important, the men of energy.

11. One chief cause of this want of security in the case of estates paying revenue direct to Government, is the impossibility of reposing full confidence in native agents, mooktears, &c., and under the present system the least neglect,—it is unnecessary to suppose fraud on the part of any one of these men,—might throw the most valuable estate in the country into the market; security is possible only so far as actual personal supervision is possible; I know that now no European zemindar thinks it safe to be absent from his property as the quarter day comes near; I have frequently heard complains of the inconvenience thereby caused, and suggestions of the identical remedy which it is now proposed to provide. No provision of the Bill will, I am certain, be more popular than the one which enables the proprietor to dispense with the services of agents of all kinds, of whose honesty he can never

never feel fully assured. If, to enable him to do so, the law is compelled at the same time to empower him virtually to alter the nature of his tenure, and secure it to himself and his heirs for ever, free of all demands, I see no reason why it should hesitate to do so; he is entitled to the fullest security for his property, compatible with the safety of the public revenue, and I do not see how anything can be urged against the provision of the Bill under consideration on the score of danger to the estate's income.

12. The sections of the Bill last noticed provide for the security of the Sudder malgoozar. I now come to those sections by which it is proposed to insure that of the subtenant also. This is to be effected by means of registration; the mode in which this registration is to be effected is prescribed in Sections XXXVI. and XXXVII. Sections of the Bill.

13. There can be no doubt that nothing has tended to shut out capital from land more than the insecurity of under-tenures; under the law, as it has hitherto stood, the great mass of under-tenures on an estate are quashed as soon as the estate is sold for arrears of revenue. It is needless here to do more than refer to the great amount of injustice, oppression, and fraud hereby rendered possible; every man who has had any experience in Mofussil practice knows what a powerful weapon this power of annulling under-tenures whenever he pleases is in the hands of a zemindar, and it is not allowed to rust for want of use. The question as to the best means for putting a stop to the improper exercise of this power, and for securing the under-tenant in the enjoyment of what is indisputably his property, has long attracted much attention, and various modes of solving it have been proposed at different times; so let us see how the Bill proposes to deal with it.

14. It proposes to except from avoidance and annulment, through sale of the estate, all under-tenures which may have been duly registered in one or other of the modes prescribed by Sections XXXVI. and XXXVII. of the Bill, according to the nature of the under-tenure. Security is to be obtained by registration, the process being as follows.

15. In the case of old talookdaree tenures existing for a certain period before, or at the time of settlement, the tenant must first present his application to the Collector, stating all particulars with regard to his tenure as far as they are ascertainable; on receipt of this application, the Collector is required to serve a notice on the recorded proprietors of the parent estate, and otherwise publish one, calling on all parties interested to appear within 30 days and prefer any objection he or they may desire to make. If no objection be preferred, nothing, of course, remains but to complete the registration; but if an objection be preferred, then an inquiry must be made; this inquiry will be summary, and the Collector's award is liable to be reversed by a decree of court.

16. In the case of new talookdaree tenures and farms for terms of years, the same course must be adopted, and in addition thereto, the following process must be gone through. On receipt of the application, the Collector is to cause whatever measurement, survey, or local inquiry he may deem necessary for the security of the Government revenue to be made, in order that he may be enabled to satisfy himself that the tenure was created in good faith, so far as the interests of Government are concerned, which he is bound to do before completing the registration.

17. The process of registration in the case of old talookdaree tenures is no doubt simple enough, and it may therefore be passed over without further remark, especially as it will be comparatively seldom employed, and will cease to be so after the lapse of three years from the passing of the Act; the mode of procedure, prescribed in the case of new talookdaree tenures and farms, requires some notice.

18. This process of registration differs from the other chiefly in this: that the Collector is bound, before completing the registration, to satisfy himself that the interests of Government are not endangered by the creation of the tenure; this, of course, he cannot do without a local inquiry. The Bill accordingly directs him to institute such an inquiry, and to make such survey, measurement, &c., as he shall deem necessary; but it does not say who is to bear the expense of such survey and measurement, nor does it in any way provide for the performance of the work by competent persons.

19. Looking at the instruments which the Collector must perforce employ in the conduct of this inquiry, and the manner in which such an opportunity is likely to be taken advantage of by them, it would, I think, be much better, if possible, to dispense with it altogether; the question is, is it possible to permit registration without such grievous inquiry? I think it is. The sole object of the inquiry prescribed by the Bill is the protection of the public interests; private interests, it is presumed, will be sufficiently well guarded by the parties themselves; the Collector must watch over those of the public, and his superintendence must be no mere thing of form, but close and vigilant; for this reason the Bill declares that, in case of an estate being at any future period thrown upon the hands of Government, it shall acquire the property subject to the provisions of the Bill, that is, in the case of permanently settled estates, subject to all encumbrances which may have been imposed upon it by the creation of under-tenures the permancy of which has been secured by registration. Such being the case, a really close and vigilant superintendence must be exercised by the officer who conducts the inquiry; otherwise the interests of Government will certainly be liable to suffer.

Appendix, No. 7.

20. The sole object of the inquiry being the protection of the public interests, it follows that, if any other sufficient means of protection can be discovered, the inquiry may be dispensed with, and it is not necessary to go far in search of them: let the present system of annulment of under-tenures on sale of the estate be continued in all cases in which an estate is thrown upon the hands of Government; and the Government interests are at once protected in the most efficient manner; they are secured in a way in which they never will be under the Bill. Nor would there be any injustice whatever in exempting the estate from the operation of the provisions affecting private purchasers; the original agreement made between the Government and the zemindar was that, so long as he continued to pay a certain amount of revenue, so long he should remain in undisturbed possession of the estate; the under-tenants are bound to the tenant-in-chief, and through them to the Government by similar agreements: there can be no injustice whatever in declaring that, if they fail in their part of the contract, they must pay the penalty; that, if one set of tenants fail in paying the stipulated amount of revenue, the Government will cancel the agreement made with them, and proceed to oust them and induct another set who will pay it.

21. To sum up briefly, I think all the provisions of the Bill excellent, with the exception of those which declare registered under-tenures not liable to annulment on sale of the parent estate to Government, and prescribe a local inquiry as the means by which Government interests are to be protected against any fraud in the creation of those under-tenures. In lieu of these, I would propose to substitute a clause declaring all under-tenures liable to avoidance in case of the estate being thrown on the hands of Government, and to allow the mode of registration prescribed in Section XXXVI. of the Bill to be adopted in all cases.

(No. 5.)

PETITION of Rajah Sutt Shurn Ghosaul, dated 19 November 1856.

To the Honourable Members of the Legislative Council of India.

The humble Petition of Sutt Shurn Ghosaul of Bhookoyloss, Zillah 24-Pergunnahs, a Zemindar in the Presidency of Bengal.

Most respectfully showeth,

THAT in continuation of his petition dated the 19th September last,* your petitioner begs to suggest to the Honourable Council to introduce in the proposed law a section to the effect that holders of under-tenures created since settlement, from whom no balance was due on the latest day of payment, should be entitled to damages from the defaulting proprietor, his successors, &c., in proportion to the loss sustained by them, by the avoidance of their tenures on the occasion of a sale of the zemindaree in arrear within a period to be judiciously and wisely limited by the Honourable Council.

Such a provision in your petitioner's humble opinion will tend much to realise the laudable object of the Honourable Council to protect the interests of the tenure-holders contemplated in the latter part of the Bill, and will not only suppress fraud and collusion, but it will also prove a preventive as well as a remedial measure.

And your petitioner, as in duty bound, shall ever pray,

Bhookoyloss, 19 November 1856. *Sutt Shurn Ghosaul.*

No. (6.)

From the Junior Secretary to the Government of Bengal, to the Clerk of the Legislative Council, No. 864, dated Fort William, 8 December 1856.

Sir,

Revenue.

IN continuation of this office, letter No. 671, dated the 19th September last, I am directed to forward herewith, a copy of a letter No. 433, dated the 18th ultimo, and of its enclosure, regarding the proposed new sale law, from the officiating secretary to the Board of Revenue.

I have, &c.
(signed) *C. T. Buckland,*
Junior Secretary to the Government of Bengal.

* See further Papers (No. 3) relative to the Sale Law Improvement Bill.

From the Officiating Secretary to the Board of Revenue, Lower Provinces, to the Secretary to the Government of Bengal, Revenue Department, No. 433, dated Fort William, 18 November 1856.

Sir,

In reply to your letter of the 1st ultimo, No. 696, I am directed by the Board of Revenue to forward, herewith, copies of the Minutes * of the Members on the Lieutenant-Governor's printed Minute on the subject of the proposed new sale law.

*Mr. Dampier's, dated 31st ultimo. Mr. Stainforths, dated 17th instant.

I have, &c.
(signed) *E. T. Trevor*,
Officiating Secretary.

Mr. *Dampier's* Minute.

I have looked over the Minute of the Lieutenant-Governor regarding the proposed new sale law. I do not think any lengthened or detailed remarks on it necessary or called for from the Board.

I quite concur in the opinion expressed by Mr. Halliday as to the advisability, to use the least strong term, of fixing a limit to the amount of revenue paid by a shareholder which would give him the privilege of opening a separate account with the collector. Even under the present system of separation by butwarrah, several officers (the late Commissioners† of Bhaugulpore and Cuttack being, I think, amongst them) have represented the necessity of confining the operation of the butwarrah laws to sharers in estates paying not less than 50 rupees annual revenue to the Government.

† Messrs. Brown and Samuells.

I would also confine the use of this privilege to recorded proprietors, and not have any inquiry as to possession by the collector as a rule. Possession and registration may be said always to go together; but where an heir was not registered and is in possession, there can be no injury done in making the registry of his name necessary before he can open a separate account; and this measure would also tend to check the entry of fictitious names or of benamee holders on the register.

I conceive it to be impossible that the intent of the proposed law is to alter the status of the dependant talookdars and other holders whose tenures' rents or revenue were fixed by the permanent settlement. If it is necessary to have a penalty for the non-registry of such tenures, it should be of the nature laid down in Section XXI. Regulation VIII. of 1800, to be inflicted on zemindars for non-registration of mutations in their holdings. The zemindars and these talookdars and others are alike protected by the laws of, and declared permanent by, the decennial settlement; and we have no more right to avoid such tenures for an arrear of rent, than we have to break up the permanent settlement of a zemindaree on the occurrence of an arrear of revenue.

I must say that, granting the expediency of rendering post settlement under-tenures more secure, it appears to me that this measure is proposed to be done without much reference to the right of the zemindars. It may be said that, as the zemindar cannot profit (excepting by fraud) by the annulment of such tenures by the sale of the estate for arrears of revenue, he is not actually injured, or a loser, but certainly the pecuniary value of such holdings is vastly increased by this measure; and had this permanency of tenure existed or been even thought likely to exist when the tenure was given, or if he had now the power of withholding the permanency, excepting on payment of an additional fine, a much higher price or consideration would have been or might now be levied by the zemindar—which he now is deprived of.

I must say that I am very much inclined to concur in the plan proposed by the Lieutenant-Governor; and even with that, and limiting the provisions of the law to tenures holding direct from the zemindar or other person paying revenue to the Government, I still think that the inquiries proposed by Sections XXXVI. and XXXVII. to be carried out by the collector will present difficulties almost, if not in many cases completely, insuperable.

It may also be a question by whom are the expenses attendant on such inquiries to be paid. By the Government who is not interested in the matter: by the zemindar whose interests are, if anything, injured by this security given to his under-tenant; or by the under-tenant himself? The last is the just course; for if, as a necessary part of the scheme, the under-tenure is to be protected from the time of application for registration, it will not be an object for even honest claimants to hasten the conclusion of the summary inquiries, whilst to dishonest or false claimants it would be an advantage to delay by any means their conclusion. The expenses of all kinds should, I think, in the first instance be levied from the claimants to registration, leaving the deciding officer the power of adjudicating any portion of them to be refunded by opponents and counter claimants.

31 October 1856. (signed) *W. Dampier.*

Mr. *H. Stainforth's* Minute.

It certainly seems necessary to limit the separation of accounts in joint undivided estates, if the project of separating them is to become law. But I venture to recommend that it be abandoned, as the objects sought may, apparently, be more easily and effectually attained by allowing the collectors to receive petitions, presented within seven days from the latest

Appendix, No. 7.

date for payment, by registered proprietors who have paid their quotas of the revenue (which should be ascertained, in order to carry out Section III. Regulation XV. of 1797, and are not liable to alteration saving in cases of specific portions of mehals under the butwarrah law); and to exempt from sale, at the time thereof, such portions as they may find, on such petitions supported by dakhilas, to be free from arrears of revenue.

Such a system would prevent influx, into the collector's offices, of work with which it might be impossible to cope, and it would at all events save a large amount of inconvenience, labour, and expense which it is difficult to estimate before-hand; moreover, it would be quite as effectual, as that proposed in the Bill, in preventing minute sub-division of estates by butwarrah.

It would also avoid the obvious conflict between Sections X., XI., and XII. of the Bill, and Sections IV., XXXIII. and XXXIV. of Regulation XIX. of 1814, which latter sections must apparently be rescinded if the former pass into law.

The remarks of the Lieutenant-Governor on the ante-settlement talookas have my entire concurrence. The talookadars were certainly required, by Clause 8, Section XV., Regulation VII. of 1799, to register all transfers of their talookas in the zemindar's cutcherry; but it was also incumbent on the zemindar to keep up such registers. This, however, it was not their interest to do, as it would have given firmness to the independent tenures, detracting from the value of their own, and there can be no doubt that both parties have failed in their duty in respect to these registers. Under such circumstances to require the talookadars to register their talookas in the manner proposed in the Bill, after so great a lapse of time, in a country in which the means of preserving documentary evidence are extremely defective, seems to me only another term for compelling them, in the great majority of cases, to expose their inability to defend themselves against claims for higher assessment, and most unjust.

I am strongly adverse to alteration of the law, so as to maintain post-settlement tenures after a sale for arrears of revenue and to cause the creation of such tenures in places where they do not exist at present, because I believe them to be, as I have already stated, bad for ryots. Moreover, I doubt whether even the plan, proposed by the Lieutenant-Governor in the 51st paragraph of his Minute in respect to such tenants, can be adopted with safety to the public revenue, for it strikes me that a zemindar may, by fraudulently creating several tenures in subordination, intercept such a portion of the rent payable by the ryot as will leave little receivable by the Government. It was found necessary to supersede Section VIII. Regulation V. of 1812, by Section XXIX. Regulation XI. of 1822; and we should, I submit, be most cautious in our proceedings now.

I trust that I may, without impropriety, add to the foregoing remarks on the Lieutenant-Governor's Minute, some further observations on the details of the Bill.

Section XII. I do not perceive why a collector should wait till an estate be notified for sale under Section VI., before he issues the proclamation prescribed in Section VII. Apparently the latter should be issued as soon as possible after the estate is ascertained to be in balance.

Sections X., XI., and XII. Referring more specially to the fact that $\frac{1}{16}$ of the sharers in joint undivided estates are notoriously unregistered, it seems to me that objections should be received from any persons who can show themselves to be sharers, whether they are registered or not.

Section XIV. I do not see how a collector is to proceed if two or more co-sharers are ready, each simultaneously, to pay up the arrears of a defaulting co-sharer.

" Section VII." should apparently be added after " Section VI." in the 14th Section.

Section XVIII. In the 18th Section I would prescribe a proclamation notifying to the ryots the removal of the attachment.

Sections XXXV. and XLIII. Section XLIII. of the Bill, founded on Section XXIX. Act I. 1845, contemplates giving to shareholders in estates under butwarrah, who may have saved their shares under Sections XXXIII. and XXXIV. Regulation XIX. of 1814, and who may purchase portions of estates sold in realization of arrears of revenue, greater rights than it allows to other shareholders who may purchase, but it does not explain what excess of right the former class of purchasers is to be held to acquire.

Section XXXV., too, of the Bill specifies the rights of purchasers of " entire estates," but neither in it, nor in any other part of the Bill, is there any specification of the rights of purchasers of portions of estates.

In the absence of such specification, it seems to me that purchasers to whom its 10th Section relates, can obtain no greater rights than those conferred on them by Section XXXIII., Regulation XIX. of 1814, which is recognised as living law by the 43d Section of the Bill, and yet it seems unquestionable that the framer of the Bill must have intended to give them rights not inferior to those which he intended to give to non-defaulting sharers who may purchase. What, however, he intended to give to these latter, he has left in doubt and uncertainty.

Obviously there should be a clear specification of the rights acquired by all descriptions of purchasers of portions of estates inserted in the Bill; and, in my judgment, these rights should be, in all cases, equal, even when the purchasers are non-defaulting sharers or persons previously unconnected with the estate.

No

No law hitherto passed has authorised annulment of tenures (not being farms) throughout an estate, on account of the sale of a portion of it; and I do not suppose that the author of the Bill intends to allow this. But application of the powers given in Section XXXV. of the Bill, so as to annul pottahs to the extent of purchase, will, I submit, give rise to much confusion and inconvenience.

It may happen, for instance, that the holder of a tenure, asserted to have existed more than twelve years before the decennial settlement, may have a decision passed against him in favour of a purchaser of a portion of an estate, cancelling his tenure quoad such portion; under such circumstances, I do not see how we could make a butwarrah of the estate. Section XXX, Regulation XIX. of 1814, tell us how to proceed in respect to two descriptions of estates, that is, those held by sharers in common right and interest, and those in which the shares consist of separate mehals; but the case contemplated would be of neither kind. We should have one portion in which the assets for allotment of the jumma would be a share of the rent payable by the ryots, and another portion in which they would be the rent paid by the intermediate tenant, which the proprietors of the unsold portion cannot alter, and for questioning which, until a further sale, there is no mode of proceeding whatever.

To me it seems that the only rights which should be conferred on purchasers of portions of estates are those granted by Section XXXIII, Regulation XIX, 1814. If, however, greater rights are given to them, it will apparently be necessary to alter Section X, Regulation I, of 1793, Section VIII, Regulation VIII. of 1801, and Section XXX, Regulation XIX, of 1814.

(signed) *H. Stainforth.*

17 November 1856.

(No. 7.)

PETITION of certain Zemindars of the 24-Pergunnahs.

To the Honourable the Legislative Council of India.

The humble Petition of the undersigned Zemindars of Zillah 24-Pergunnahs.

Showeth,

THAT your petitioners have viewed with deep concern the project of an organic change in the constitution of the landed system of this country contained in Sections XXXV. to XLI., XLVII., and XLIX., of a Bill entitled, "A Bill to improve the law relating to sales of land for arrears of revenue in the Bengal Presidency," read a second time before your Honourable Council on the 26th January 1856.

That your petitioners observe that the effect of the operation of the proposed law will be to ultimately dissolve the permanent settlement, and to destroy with it the various interests which have grown upon it.

That your petitioners submit with all due respect that your Honourable Council is not competent to entertain a project of law of this purport and tendency.

1. Because it is contrary to the spirit of the Statute of Parliament 24 Geo. 3, c. 24, s. 39, and to the command therein conveyed, the said section running as follows:

"And whereas complaints have prevailed that divers rajahs, zemindars, polygars, talookdars, and other native landholders within the British Territories in India, have been unjustly deprived of, or compelled to abandon and relinquish, their respective lands, jurisdictions, rights, and privileges, or that the tributes, rents, and services required to be by them paid or performed for their respective possessions to the said United Company are become grievous and oppressive. And whereas principles of justice and the honour of this country require that such complaints should be forthwith inquired into and fully investigated, and if founded in truth, effectually redressed. Be it therefore enacted that the Court of Directors of the said United Company shall, and they are hereby accordingly required forthwith to take the said matters into their serious consideration, and to adopt, take, and pursue such methods for inquiring into the causes, foundation, and truth of the said complaints, and for obtaining a full and perfect knowledge of the source and of all the circumstances relating thereto as the said Court of Directors shall think best adapted for that purpose, and thereupon according to the circumstances of the respective cases of the said rajahs, zemindars, polygars, talookdars, and other native landholders, to give orders and instructions to the several Governments and Presidencies in India, for effectually redressing, in such manner as shall be consistent with justice and the laws and customs of the country, all injuries and wrongs which the said rajahs, zemindars, polygars, talookdars, and other native landholders may have sustained unjustly in the manner aforesaid, and for settling and establishing upon principles of moderation and justice according to the laws and constitution of India, the permanent rules by which their respective tributes, rents, and services shall be in future rendered and paid to the said United Company by the said rajahs, zemindars, polygars, talookdars, and other native landholders."

2. Because your Honourable Council are in fact as well as in the eye of the law, the Governor-General of India in Council, that is to say, the same authority which guaranteed in the most solemn manner the maintenance in perpetuity of the settlement made in 1790.

Appendix, No. 7.

That the proclamation of the Governor-General of India in Council, by the which the permanent settlement was inaugurated, contained among other provisions the following:

ART. 6. "In the event of any zemindar, independent talookdar, or other actual proprietor of land with or on behalf of whom a settlement has been, or may be, concluded, or his or her heirs or successors, failing in the punctual discharge of the public revenue which has been, or may be, assessed upon their lands under the abovementioned regulations, a sale of the whole of the lands of the defaulter, or such portion of them as may be sufficient to make good the arrear, will positively and invariably take place."

ART. 9. "The Governor-General in Council thinks it necessary further to notify, in elucidation of the declarations contained in this article, (which are conformable to principles of the existing regulations,) that if any zemindar, independent talookdar, or other actual proprietor of land shall dispose of a portion of his or her lands as a dependent talook, the jumma which may be stipulated to be paid by the dependent talookdar will not be entered upon the records of Government, nor will the transfer exempt such lands from being answerable, in common with the remainder of the estate, for the payment of the public revenue assessed upon the whole of it, in the event of the proprietor, or his or her heirs or successors, falling in arrear from any cause whatever, nor will it be allowed in any case to affect the rights or claims of Government, any more than if it had never taken place."

The proposed law, therefore, militates in letter as well as in spirit against the law which established the permanent settlement.

That the power reserved in Article 7 of the abovementioned proclamation to the Governor-General of India in Council to enact such regulations as he may think necessary for the protection and welfare of dependent talookdars, ryots, and other cultivators of the soil cannot be so construed as to mean that the Legislature of India is at liberty to enact a law or regulation for the protection of any class of under-tenants that would endanger the permanence of the settlement of 1790.

That the argument founded on the plea that default on the part of a zemindar in the payment of the revenue assessed upon his estate dissolves the contract between him and the Government, and sets the latter at liberty to make any arrangement it chooses for realising the public revenue from the lands comprised in such estate, is equally untenable.

1. Because the defaulting zemindar is entitled to the full value of his estate, except so much of it as he may have parted with by his voluntary acts or the voluntary acts of those he represents or has succeeded, and any act of Government which would diminish the value of this interest of the zemindar would be an act of confiscation.

2. Because the dissolution of the contract between the defaulting zemindar individually and personally and the Government cannot alter or otherwise affect the zemindary character or tenure of his estate any more than default on the part of a putneedar can, by dissolving the contract between him and his zemindar, alter or affect the character or tenure of the putnee estate.

3. Because the argument, if allowed to be valid, would destroy the institutional character of the permanent settlement as apart from its fiscal character; and that the settlement had such an institutional character apart from its fiscal character is a fact notorious and recorded in history and in State documents.

That your petitioners further deny that the proposed law is justifiable on grounds of expediency.

That the ostensible object of the proposed law is to give security to under-tenures of all sorts.

That the tenures enumerated in what are called the exceptive clauses of Section XXVI. of Act I. of 1845 do not stand in need of such security, and these comprise the tenures by which the vast mass of cultivators hold the lands they cultivate, and almost all resident tenants hold the lands on which they reside.

That the supposed benefit of the proposed law is therefore chiefly intended for the holders of tenures intermediate between the zemindar and those referred to in the preceding class.

That the middle-tenures do not practically stand in need of greater security than the tenures of resident cultivators, a fact apparent upon the face of the official lists of zemindaries sold for the realisation of arrears of revenue since the law now in force for the realisation of the public land revenue was enacted, and clearly deducible from the circumstance of middle-tenures having been since the date of the permanent settlement continually increasing in number and value.

That the proposed law, if enacted, will not even give to middle-tenures that theoretical security which is said to be wanted for them; for the Bill among other things contemplates and provides for the contingency of a state of things in which middle-tenures in defaulting zemindaries will have to be destroyed without any compensation to their owners.

That the immediate effect of the enactment of the proposed law will be the multiplication of these middle-tenures.

That the multiplication of middle-tenures is an unmitigated evil, a fact proved by the circumstance that rent is highest and the rights of the resident tenantry have suffered the most in those districts of Bengal in which middle-tenures abound, it being notorious that middlemen are the most oppressive and extortionate of landlords all over the world.

That

That the proposed law is unnecessary to the reasonable protection of under-tenures, the owners of which can under the law now in force obtain from the executive authorities, on cause shown, exemption from the consequences of a sale of the zemindary in which they hold.

That the proposed law is not called for by any valid considerations of justice towards the owners of under-tenures.

1. Because the proposed law is framed only to benefit the owners of tenures held immediately of zemindars.

2. Because the interests of the holders of all under-tenures, whether held immediately or mediately of zemindars, will be better secured by a law declaratory of the right of the holders of under-tenures to compensation for the loss of their tenures by the sale of zemindaries for the realisation of arrears of revenue.

That, therefore, your petitioners pray that the Bill for the amendment of the law relating to the sale of lands for arrears of revenue be passed without the Sections numbered XXXV. to XLI., XLVII, and XLIX., and that instead of the last-mentioned sections others be inserted therein declaring the right of all under-tenants to sue defaulting zemindars for compensation for loss sustained by them in consequence of such default.

And your petitioners, as in duty bound, will ever pray.

Twenty-five Signatures.

(No. 8.)

PETITION of Protestant Missionaries residing in or near *Calcutta*.

To the Honourable the Legislative Council of India.

The Petition of the undersigned Protestant Missionaries residing in or near *Calcutta*

Respectfully showeth,

THAT your petitioners desire to express to your Honourable Council the satisfaction and gratitude with which they observed the introduction into your Honourable Council, on the 22d December 1855, by the Honourable J. P. Grant, of a Bill to improve the law relating to sales of land for arrears of revenue in the Presidency of Bengal; and their earnest hope that the leading principles and provisions of that valuable and important measure may be speedily embodied in a law.

2. That your petitioners beg leave to submit to your Honourable Council their views on the evils which that Bill is designed to meet; and generally, on the position of the cultivating classes in this Presidency; and they respectfully but earnestly solicit the favourable consideration of your Honourable Council to their representation of the claims of those classes of the community who are unable effectually to plead for themselves.

3. That your petitioners recognise in the perpetual settlement an important boon to the whole Presidency, in its limitation of the land tax, and they regard that settlement as the probable foundation of great national prosperity. But in the practical operation of the system, your petitioners observe two distinct classes of evils.

First. The under-tenures are insecure; the rents of the cultivating classes are capriciously varied; and the interests of those classes are virtually unprotected.

Secondly. The zemindars are armed with extraordinary and excessive powers.

4. That your petitioners believe it to be notorious that the intentions of the laws for securing leases to the tenants, for securing them receipts on their payments of rent, for limiting within just bounds the rents reserved in leases, and for checking the custom of exacting abwabs and other arbitrary additional charges and cesses, are commonly frustrated and defeated. On the other hand the power of the zemindars (as recognised in Regulation VII. of 1799, Section XV., Clause 8), to compel the personal attendance of their tenants, for the adjustment of rent and other purposes, is, practically, in many parts of the country, a substitute for the regular and ordinary processes of the law, and is virtually the subjection of the tenants to a state of slavery; and further, this evil is in many instances greatly aggravated by the estates being held in co-tenancy, so that several shareholders, who are often in a state of conflict, equally exercise an arbitrary and unrestrained authority.

5. That while this law thus presses severely on the tenants, your petitioners observe that, from the increased cultivation of the soil, and the greatly increased value of its produce, the zemindars, who were primarily regarded simply as collectors of the land tax or farmers of the revenue, entitled to a fair profit on the returns, derive now a revenue greatly in excess of the revenue which they pay to Government; and thus, contemporaneously, while the zemindar has been rising in wealth and power, the tenant has been sinking into penury and

Appendix, No. 7.

dependence, subject to illegal and exhausting exactions, harassed by contending proprietors, and oppressed by the exercise of extra-judicial powers.

6. That your petitioners submit that this result was neither designed nor contemplated by the perpetual settlement. By that arrangement certain great advantages were secured. A moderate assessment was levied on the land in substitution for uncertain and unlimited demands; and an important class in the community, who were regarded as foremost in intelligence and influence, were placed in a position of responsibility, usefulness, and honour. But these zemindars have, since that time, not only acquired by law the power of enforcing their demands by *ex parte* proceedings, commencing with the arrest and imprisonment of the tenants, but have also received the sanction of the law, as already stated, to their custom of enforcing the personal attendance of their tenants at their pleasure; and both these powers, but especially the latter, your petitioners believe, they often greatly and shamefully abuse.

7. That in the practical and extended development of this system, it is manifest that the tenants suffer from a lax administration of laws passed for their protection; that they are oppressed by the execution of other laws, which arm the zemindars with excessive power; that they do not share with the zemindars in the advantages derived from the development of the resources of the country; that the profits thus monopolised by the zemindars are already incalculably valuable; and that, year after year, the condition of the tenants appears more and more pitiable and hopeless.

8. That your petitioners are compelled to add, that other evils increase the wretchedness of the condition to which a tenant is thus reduced. The village chowkeydars are the servants of his landlord; the Government police are corrupt, and he cannot vie with his landlord in purchasing their favour; the courts of justice are dilatory and expensive, and are often far distant from his abode, so that he has no hope of redress for the most cruel wrongs; and he is frequently implicated in affrays, respecting disputed boundaries, in which he has not the slightest personal interest. Ignorant of his rights, uneducated, subdued by oppression, accustomed to penury, and sometimes reduced to destitution, the cultivator of the soil in many parts of this Presidency derives little benefit from the British rule, beyond protection from Mahratta invasions.

9. That your petitioners believe that, under these circumstances, the interference of your Honourable Council is urgently demanded by justice and benevolence; and they view the present Sale Bill as an important step in the right direction.

10. That the objections of the zemindars to the measure appear to your petitioners entirely futile. It appears to your petitioners unquestionable that your Honourable Council may justly protect the tenant, provided only it leave the zemindar ample means of paying the Government revenue, and a fair profit on his collections. The elevation of this zemindarry class, by extraordinary protective and fostering measures, is not a policy that can be wisely or equitably pursued, to the sacrifice of the great mass of the people.

11. That your petitioners confidently submit to your Honourable Council that the zemindars have not fulfilled the just expectations of the State, or the conditions connected with the perpetual settlement. The extension of cultivation in Bengal, for which they claim credit, your petitioners ascribe, not to the enterprise, capital, or public spirit of the zemindars, but to the great increase of population during the last hundred years of domestic peace. Far from accelerating the progress of the country, either in civilisation or material prosperity, the zemindars have generally checked the accumulation of capital by their tenants. They have not stimulated exertion by their own example, nor encouraged confidence by generosity and kindness. On the contrary, by arbitrary exactions, they have repressed the industry of their tenants, and by the exercise of their excessive powers under the Regulation VII. of 1799, they have destroyed every vestige of their independence.

12. That your petitioners are well aware of exceptions. They know that there are powerful middle-men, indigo planters and others, who have resisted and struggled with the zemindars, and against whom it is impossible to enforce the extraordinary powers which are mercilessly wielded against the poor. But your petitioners desire to be understood as speaking of the great mass of the cultivating classes constituting a large proportion of the entire population; and on these your petitioners believe that the oppressions of all the various grades of superiors, both middle-men and zemindars, have been practised, and are still practised, with lamentable effect, partly with legal sanction, and partly without it, but entirely, in nearly every case, without the slightest hope on the part of the tenant of legal redress.

13. That, in respect of the exactions of the middle-men, your petitioners believe that a considerable part must be ascribed to the uncertain tenures of that class. Having no permanent interest in the soil or the people, they are seldom the protectors of their dependent cultivators. If fixity or permanence of tenure were established, then, immediately, as your petitioners believe, the tendency would be to establish just relations between the landlord and the tenant from the highest to the lowest; and that principle your petitioners therefore earnestly desire to see adopted and carried out. At present it is infringed, in the first instance, by the right of the Government to sell the land for arrears of revenue, and thereby avoid the under-tenures with some few exceptions; and then, still more, by the entire

entire absence of protection to the tenants, and the undefined relations of landlord and tenant throughout the Presidency.

14. That in connexion with this subject, the Calcutta Missionary Conference, in the year 1852, requested one of its members, well acquainted with the subject, to prepare a paper on the redemption or commutation of the land-tax, and that document was published and circulated both in India and in England. Subsequently, the Missionaries of Calcutta, in their petition to Parliament in the same year, prayed for a measure having the redemption of the land-tax for its object, with the view at once to induce capitalists to invest in land, and to enable small holders to acquire permanent freehold rights.

15. That your petitioners have annexed to this petition a copy of the paper referred to, and respectfully submit its statements and arguments to the attention of your Honourable Council.

16. That your petitioners now find, with great satisfaction, that the Board of Revenue have unanimously approved of the 15th section of the present Bill, which provides that any recorded proprietor or co-partner of an estate, may, by deposit of Company's paper, secure his estate from sale for arrears of land revenue; and have distinctly recognised the expediency of permitting the complete redemption of the land-tax.

17. That your petitioners anticipate, from the adoption of the principle involved in that section, a powerful stimulus to exertion for the purpose of securing freehold rights; and as the result of the possession of those rights, the creation of that spirit of freedom which has always been the spring of enterprise, emulation, and social progress.

18. That your petitioners submit that the terms of the 15th section may be safely extended, by a provision for the payment of a definite rate of purchase money (which your petitioners apprehend might be twenty years' purchase of the recorded land-tax), in consideration of which that tax might be held to be absolutely redeemed for ever; and your petitioners further suggest that certain encouragements to such redemptions might be granted, in the form of partial remissions of arrears; an official survey of every estate redeemed, with an official certificate and record of boundaries; and a public notification, in the Government Gazette, of the names of all who avail themselves of this law.

19. That your petitioners believe that it is the interest of the Government both to facilitate and to encourage such redemptions, not only because an immediate saving will follow in respect of a reduction of the establishments for collecting revenue, but also because they will introduce a new and highly beneficial element into the landed system.

20. That your petitioners desire to express their conviction of the necessity for the provisions contemplated by this Bill for the protection of under-tenures by registration.

21. That, in respect of ante-settlement tenures, your petitioners submit that the security provided by the Bill is simply an act of justice and good faith, required by the perpetual settlement; and that, as the proposed registration will be voluntary on the part of the talookdars, no satisfactory objection can be urged to it.

22. That, in respect of some tenures, (both ante-settlement and post-settlement tenures,) your petitioners apprehend that they largely partake of the character of English copyholds, but with additional disadvantages attending them; and your petitioners submit that all the principal reasons which have been stated for the enfranchisement of those tenures in England, apply with greater force in support of the proposition for protecting and fixing tenures of the same nature in Bengal.

23. That, in respect of post-settlement tenures, your petitioners understand that the intention of the Bill is to protect, by registration, all which have been, or may be hereafter created *bonâ fide;* that is, on which the rent reserved is fairly and duly apportioned to the entire land tax of the estate.

24. That it is objected to this proposed law, that the inquiry into this apportionment will be attended with impracticable difficulties.

25. That your petitioners acknowledge that such might be the case, were the total land tax of the estates exactly, or nearly exactly, equivalent to their total rental. But in fact it is notorious that the rental of zemindaries is ordinarily more than double their total land tax or sudder jumma; and in all such cases it appears that it would be difficult to err. Any careful collector inquiring into a lease could, in such circumstances, form a sufficiently accurate estimate of the fairness of the rent reserved—the sole object of his inquiry being its proportion to the sudder jumma or land tax of the estate, and the aggregate value of the estate being, as already stated, so great, as to afford a large margin to cover all probable mistakes. Placing the case on the lowest ground, your petitioners submit, therefore, that fraudulent leases, sanctioned and registered by the collector, (created too in the face of the provision which renders them liable to be annulled and avoided, at any time within 60 years, on the ground of fraud), are not likely to be so numerous as seriously to endanger the Government revenue.

26. That your petitioners feel it to be unsatisfactory to argue the question on this ground,

Appendix, No. 7.

or to consider, in detail, the probable number of such frauds, or their united ultimate effect on the aggregate land tax. They respectfully submit that your Honourable Council may be expected to rely, for the security of the land tax payable to Government under the perpetual settlement, not on the exact accuracy of the collectors and ameens, but on the gradual improvement of the country and development of its resources. In most parts of Bengal the assessment was originally moderate; the progress of the country has rendered it light; and, with a further advance of society and a further rise in the produce, the fixed Government revenue will be trifling, compared with the value and extent of the cultivated soil. A country which, like Bengal, already feeds upwards of 40,000,000 of people already exports annually produce to the value of at least 15,000,000 *l.* sterling, and already receives annually upwards of 5,000,000 *l.* sterling in bullion, as the balance of its trade, after paying the greater part of India's tribute to England, and in which there are still boundless resources undeveloped, cannot long feel as a burden a land tax of three millions and a half.

27. That your petitioners believe that no part of that tax will be lost through the operation of the present Bill; but if some hazard is inevitable, they respectfully inquire, if fear lest part of this tax may possibly, under this Bill, be sacrificed by some fraudulent leases remaining undetected in their creation, and undisturbed during the whole succeeding 60 years, should be regarded as a sufficient bar to the enactment of a measure which not merely gives fixity and permanence to all under-tenures, old and new, and immediately encourages all improvement, but also affords the promise of an accelerated progress in wealth and prosperity, in the course of which all landlords may be expected to liberate their land altogether, without loss to the Government?

28. That when your petitioners inquire for the alternative if this Bill be rejected, they find a proposition to establish and fix under-tenures, but subject in the ultimate contingency of a Government sale to disturbance and re-settlement—a proposition which, in their judgment, differs from this Bill entirely in spirit and effect. The one condition and qualification annexed to this proposed amendment, must, they fear, check the operation and expansion of the system which they desire to see established, and tend to perpetuate the plague of doubt and hesitation, which is now effectual in restraining the investment of capital in land and development of the resources of the country. It interposes a possible partial loss of the Government revenue in a doubtful contingency, as an impediment to the destruction of a vicious system, which is ruinous to a large portion of the population and crushes them into degradation and misery.

29. That your petitioners regard another objection to this Bill, namely, that it will tend to the multiplication of small holdings, as altogether illusory. The existing system certainly has that tendency, because it checks the accumulation of capital in the farming classes; but the system contemplated by this Bill, if liberally expanded and carried out, will tend to the increase of wealth, and this, with other civilising causes, must lead to the investment of continually larger amounts of capital in land, and thereby to the consolidation of estates and the absorption of improvident and pauper proprietors.

30. That with these views your petitioners look with anxiety and earnest desire for the enactment of this proposed measure, but they are bound to state that they wish also to see additional measures carried with it.

31. That your petitioners believe that they have truly and accurately represented the condition of the cultivating classes. Your petitioners believe it to be true that, superadded to the evils they endure from a corrupt and inefficient police, and an administration of civil and criminal justice which confessedly requires extensive improvement, they are liable to be constantly harassed by the conflicting and unsettled claims either of contending shareholders of joint estates, or of contending neighbouring proprietors; by the severe laws of distraint and arrest; by the power of their superior landholders, whether zemindars or middle-men, to compel personal attendance at their pleasure; by illegal exactions; by the unfixed nature of their tenures; and by the prevalent custom of refusing both leases and receipts.

32. That for this class your petitioners believe themselves called upon to speak. Your Honourable Council receives petitions from many of those who consider their interests affected by this and other measures—particularly zemindars and indigo planters—and their representations reach the British Parliament. But the mass of the people—the cultivators of the soil, and those directly or indirectly dependent on them—are usually unheard and unrepresented. Yet your petitioners believe that the case of these numerous classes is such as urgently to demand consideration; and your petitioners, influenced by the desire that the British Government may be honourably distinguished in the blessed work of "showing mercy to the poor," and affected by a deep sense of the social wretchedness prevalent in the land, and the fearful obstacles which it presents, alike to the progress of enlightenment and truth, and the advancement of the material interests of the country, are constrained to appeal earnestly to your Honourable Council; and to entreat your Honorable Council so to legislate, as to afford hopes of new and better days; to secure, with the blessing of God, the public tranquillity, which is now endangered through the sufferings and

and the irritation of the people; and to lay the foundations of general prosperity and freedom.

33. Your petitioners therefore pray your Honourable Council to pass the Bill to improve the law relating to sales of land for arrears of revenue in the Presidency of Bengal, and to pass such other measures as shall be necessary for the emancipation and protection of the cultivating classes.

And your petitioners will ever pray,
(signed) *Alexander Duff,*
And 20 other Signatures.

APPENDIX

Referred to in the foregoing Petition.

On the desirableness of Commuting the Government Land Tax.

IT has long been the settled conviction of many missionaries labouring in Bengal, that the present condition of the rural population of that Province is not only a great impediment to the diffusion of Christianity in general, and to the development of a Christian character on the part of converts in particular, but also a social and political evil of great and growing importance, which, unless checked in time, must ultimately result in the universal prevalence of pauperism, servility, duplicity, and indolence. The causes to which the misery and degradation of the peasantry must be attributed are manifold; such as the long continued prevalence of Hindoo idolatry and Muhommadan oppression, of early marriages and the prejudices of caste; also the innate defects of the national character, and the density of the population. Causes like these cannot well be remedied by legislative enactments; but there is another which appears to admit of such a remedy, namely, the mutual relation between the zemindars and the ryots, to which the alarming deterioration of the peasantry must be in a great measure attributed, whilst at the same time it places the zemindars in a position which is calculated to prolong the evil to an indefinite period, without any prospect of improvement.

It would no doubt be an injurious as well as a difficult undertaking to attempt an abrupt and total abolition of the present zemindary and ryot system. The best means of providing a remedy for the actual state of things appears to be the application of a new principle to the tenure of land—a principle of such a nature that it should operate gradually and almost imperceptibly, and yet produce a beneficial change in the public mind, by leading the rural population to hope for that amelioration of their circumstances, of which at present they can see no prospect. It has long appeared to some men who have attentively considered the subject, that the principle of freehold tenure would be of such a nature, and that it might be introduced gradually, if an Act passed, allowing the commutation of the land tax; in other words, permitting capitalists to purchase estates, as opportunities might present themselves, by paying down, once for all, the capital which is represented by the Government land tax; with the understanding that estates, thus purchased, should never again be subjected to the land tax. The rate at which the capital might be calculated, could easily be fixed by a legal enactment. Supposing, for instance, that the land tax represents an interest of five per cent., the capital would be equal to 20 years' purchase. Or should it be thought that five per cent. is too low a rate of interest for India, the capital might be declared equal to the amount of sixteen years' purchase.

The capital represented by the land tax of Bengal is immense, amounting to more than 100,000,000*l.* sterling; and the number of capitalists ready to avail themselves of the contemplated arrangement would naturally be very small, especially at first. It is clear, therefore, that the operation of such an arrangement would be very gradual, and could not be productive of dangerous consequences.

The benefits would probably be considerable. The *bonâ fide* proprietors of freehold estates would naturally take a deeper interest in the profitable cultivation of the land and the general improvement of the neighbourhood, than can be expected of zemindars, whose tenure of estates is always more or less precarious, because if ever they fail to make the quarterly payment at the collector's office within the appointed time, the estate is put up to auction the next day, and disposed of to the highest bidder. The relation between *bonâ fide* landlords and tenants would be much less complicated, and therefore much less productive of animosities and disputes, than that between zemindars and ryots. Long leases might be given by a landowner, or portions of the estate sold out and out; and thereby a manly spirit of independence infused into the peasantry, to which at present it is an utter stranger. And if the boundaries of an estate, when thus sold out and out, were clearly defined by competent authority, the principal plea now advanced by zemindars in defence of their system of keeping up a body of clubmen would be neutralised; for they generally profess to hire these men, in order to settle, by physical force, the boundaries which the law has hitherto left unsettled in many parts of Bengal.

Appendix, No. 7.

It is very probable that a class of landholders, of a much better character, would be brought into existence.* At present, to become a landholder or zemindar is tantamount to involving one's self in endless litigation, besides running a great pecuniary risk. The purchaser of an estate must be prepared to contest numerous lawsuits with his neighbours, to keep in his pay a body of clubmen sufficiently powerful to overawe theirs, and to make two or three quarterly payments to the collector, before the estate has yielded him any income. It is owing to these difficulties that so few English capitalists have laid out their money in the purchase of land in Bengal, and that the few who have done so do not differ more in their character from native zemindars. These difficulties, again, have proved a great obstacle to persons who have wished to form Christian settlements, and from the nature of things they must continue a great hindrance to such designs. It is supposed that the introduction of the principle of freehold tenure would be very beneficial in this respect.

A commutation of the land-tax would not deprive the Government of any part of its revenue. The capital paid into the treasury by purchasers might be laid out in a number of ways equally productive. It might be applied to the reduction of the public debt, or to the construction of canals and railways, on which tolls might be levied: not to mention ordinary roads and bridges, in which Bengal is still so lamentably deficient.

There would, probably, be found some difficulties, at first, in the working of such a plan as that which is here suggested, but it is supposed that these would not prove very serious, much less insurmountable. The greatest difficulty, perhaps, would be that of dealing justly with the fair claims of those ryots who hold what is called paitrik (ancestral) land. It would perhaps be desirable to fix a rate at which such ryots might redeem their land from the zemindars.

Whatever may be thought of this particular proposal regarding the commutation of the land-tax, the following considerations will show that a change in the present system is desirable, or rather imperatively required.

The rent or land-tax which the ryots have to pay to the zemindar amounts on an average to about two rupees per beegah, or taking the beegah to be one-third of an English acre, to about 12*s.* per acre. Those who hold only paitrik land are more favourably circumstanced, because the rent for that does not generally exceed one rupee per beegah. But most of those ryots who hold paitrik land also hold land of a different description, for which they have to pay at the higher rate. And the rent for land which is fit for gardening or for being built upon, is higher than two rupees; so that this rate may fairly be considered as the average. It constitutes about 40 per cent. of the gross return in a good year. A beegah of land in a favourable year yields about five rupees. If the two rupees for rent are deducted, there remain three, which the ryot can call his own. It is believed that 12 beegahs is about the average amount which a Bengali ryot holds. The proceeds of that, after deducting the rent, amount to 36 rupees per annum. Out of this sum he has to provide food and clothing for himself and family, to keep his houses in repair, and to maintain the necessary stock of cattle and implements, besides paying for extra labour during the seasons of ploughing and reaping. Now it is barely possible for him to provide food and clothing with three rupees a month; but the means of meeting all other expenses must be derived from other sources, such as fishing or jobwork of various descriptions. All such sources are precarious and almost invariably insufficient. The consequence is, that the ryot is compelled to incur debt. The most common rates of interest at which he can borrow money from the zemindar or the money-lender, are three and four pice for the rupee per month, which are respectively an annual interest of 56 and 75 per cent. When about to plough his land, he is usually under the necessity of obtaining an advance of seed corn from the zemindar, to whom he has to repay it at the season of harvest with 50 per cent. interest, or for the twelvemonth with 80 per cent. interest. In this way he becomes more and more deeply involved in debt. And yet the basis of this calculation,

* The circumstances under which the writer originally drew up this paper, compelled him to confine his remarks exclusively to one subject. But he embraces the present opportunity for throwing out a few hints on some collateral topics. If Government really wish to encourage honest and conscientious men, and especially Europeans, to purchase estates in Bengal, the following improvements, among others, will be indispensable.

1. A comprehensive system of registration, the working of which should be entrusted to really able men. All documents relative to landed property should be registered; and when thus registered they should be regarded as authentic. Such a system has long been contemplated, but in order to be efficient, it should be accompanied by—

2. A thorough survey of the country, especially for the purpose of ascertaining the numberless disputed boundaries of estates. An able Government officer once remarked in a conversation with the writer, that "the reason why the Lower Provinces are called settled, must be, because everything in them (concerning boundaries) is unsettled, just as *lucus* is so called a *non lucendo*."

3. A "statute of frauds" should be enacted, declaring the prevalent practice of *benami* (anonymous or pseudonymous) possession to be illegal. The ostensible owner should be treated by the law as the real owner to all intents and purposes. The system of secret trusts, now prevalent, is a gigantic fabric of iniquity and fraud, to which the world probably cannot furnish a parallel.

4. The village police should be reformed. Its present state is infinitely worse than a state of utter inefficiency; it is so bad that one can scarcely venture to describe it.

A sub-division of the judicial districts is required. The scantiness of the means of communication throughout Bengal greatly increases the obvious disadvantages arising from the overgrown size and population of the present districts. Thousands of villages are situated at a distance of two or three days' journey from the magistrate's or judge's office.

The writer believes that the introduction of all these and similar reforms would be facilitated, and their efficiency increased, by the commutation of the land-tax.

calculation, five rupees as the gross return of a beegah, is, if anything, too high rather than too low. In the majority of years the amount realised is considerably less; for storms and inundations and droughts and murrain among cattle are calamities of frequent occurrence in Bengal; and seasons of sickness in the family are an additional source of difficulties.

The position in which the ryot stands to the zemindar is disadvantageous to both parties; but certainly more detrimental to the former than to the latter. The payment of rent for the current year, or of arrears, the repayment of advances of various kinds, and the payment of interest, constitute so many different heads of accounts between the two parties. Many estates are the joint property of a number of zemindars, of whom one may be entitled to one-half, another to a quarter, a third to the twelfth or sixteenth part of the proceeds. In such cases it is the usual practice for each shareholder to maintain a separate agency, and to keep separate accounts, so that every ryot has transactions with a number of landlords. In the majority of districts the zemindars give written receipts for the rent; but even there the ryot does not always find it an easy matter to obtain such receipts; and in some localities the zemindars never give them. It must be acknowledged that in innumerable cases the ryots are not only backward, but positively unwilling to pay; and the multiplicity or intricacy of their accounts, together with the fear (frequently well-founded) of being overcharged, constitutes an additional and very prolific source of disputes, which most commonly terminate in favour of the zemindar, although it is not denied that they occasion considerable loss to him also.

The position assigned to zemindars by the law is very peculiar. They are neither *bonâ fide* landowners, nor *bonâ fide* fiscal officers appointed to collect the land-tax. Perhaps the nearest approach to a correct description of their position would be to say that they are landowners, whose estates are mortgaged to Government, the mortgage being liable to be foreclosed, as soon as they fail to make their quarterly payments. They are almost all, however, in the habit of treating their ryots not merely as their tenants, but as their serfs. They call themselves rajahs or kings, and the ryots their subjects. They almost universally either claim more than their due, or else they claim it in an improper manner, for it is not easy to determine what really is their due. They exact contributions from their ryots when a marriage or a birth, or a death takes place in the family. They exact contributions for the avowed purpose of observing funeral rites in commemoration of their dead ancestors, and of celebrating the annual heathen festivals. These practices are almost universal. In numerous localities they exact from the ryots gratuitous labour in the field or at the oar; and compel the poor people to allow them, without payment, the use of their cattle or of their boats, if they possess any. It is not unusual, especially at a considerable distance from the civil stations, for zemindars to go still further in the abuse of their power, by inflicting imprisonment and torture upon any ryot who may have incurred their displeasure.

It is true that there exist laws of a most praiseworthy nature, which are intended to protect the ryot against unjust ejection from his tenure and against oppression generally; but these laws remain, to a great extent, a dead letter. Not to dwell upon the well-known fact that witnesses who will swear to anything can always be had in this country by the highest bidder, the ryot has very little money to spare for law suits. The advance which must be paid into court as a guarantee for the appearance—or *de facto* for the maintenance—of witnesses; the expense of a journey to the civil station, and of his own support, and that of his witnesses during their stay there, and the serious loss which such a stay must, at certain seasons, occasion to his property, and particularly to his crops: these are formidable obstacles to the ryot. He cannot, generally speaking, afford single-handed to contest a lawsuit with his zemindar, who possesses greater pecuniary resources, greater influence at head quarters, and greater experience in legal proceedings.

The powers with which the collector is armed, in order to enforce payment on the part of recusant ryots, are so great that they are a source of terror to the rural population. Some of the Government regulations, in which those powers are defined, are best known by the numbers which they bear. As an instance, that regulation which is usually called the seventh or huftum, may be mentioned. The enforcement of this regulation conveys to the Bengali ryot the same uncomfortable impression which is usually connected with the idea of being "quartered" or "decimated." When he sees that he is about to be "septimated," he makes every effort in his power to escape from his fate by flight, thereby risking the loss of all he possesses in the world. If these regulations were only enforced in those cases to which they were originally intended to apply, the evil would not, perhaps, be very great; but the zemindars frequently succeed in prevailing upon collectors (by false representations) to enforce them in cases to which they ought not to be applied at all.

In many cases the zemindars themselves are not aware of all the misery which is inflicted in their name upon the ryots by the agents whom they employ in collecting the rent. These middlemen are, in truth, the greatest tyrants. And as such middlemen would have to be employed by Government in case the ryotwari system should be substituted for the zemindari system, it is clear that such a change would not be of any great advantage to the ryots, probably of none at all. It is well known that the middlemen employed by humane European indigo planters, are in many cases as oppressive as those employed by native zemindars. What is wanted is, that the ryot should have direct access to his landlord, and that the interests of both should be the same. And this object would probably be accomplished, in process of time, if by legalising the commutation of the land-tax, the prospect of becoming freeholders was opened to capitalists.

It appears, therefore, desirable that the subject of the zemindari system should be examined into by the Committee now appointed by Parliament, and that this aspect of it should form a special topic of inquiry. The zemindars have taken measures to bring their grievance to the

Appendix No. 7.

notice of Parliament; but it is greatly to be feared that the grievances of ryots, which even in this country are not extensively known to Europeans, will be passed over in silence, unless especial attention is directed to them. The contemplation of them has often caused the hearts of missionaries to bleed, and often led them to ask whether it is possible, in the present social condition of the majority of the population, for Christianity to take deep root in this country, and to produce those fruits of veracity, industry, prosperity, disinterestedness, generosity, and nobility of character, by which the Gospel is intended to become a blessing to mankind at large.

(No. 9.)

From the Secretary to the Government of Bengal, to the Clerk of the Legislative Council, No. 1296, dated Darjeeling, 11 April 1857.

Revenue.

Sir,

In continuation of this Office letter, No. 864 of the 8th December last, I am directed to forward, herewith, a copy of five letters from the Board of Revenue, as noted in the margin, in which are submitted the opinions and remarks of the Commissioners of Revenue in the Lower Provinces on the Lieutenant-governor's minute on the subject of the Bill to improve the law relating to sales of land for arrears of revenue.

* No. 494, dated the 9th December 1856.
* „ 22, „ „ 9th January 1857.
† „ 29, „ „ 16th „ „
„ 40, „ „ 23d „ „
* „ 60, „ „ 6th February „

I have, &c.
(signed) *A. R. Young*,
Secretary to the Government of Bengal.

From the Commissioner of Revenue for the Division of Rajshahye, to the Board of Revenue, Lower Provinces, Fort William, No. 208, dated 13 December 1856.

Gentlemen,

I have the honour to acknowledge the receipt of your letter No. 530 of the 9th instant, forwarding copy of one from Government dated the 1st October last, No. 696, together with a printed copy of the Lieutenant-governor's minute on the proposed new Sale Law, and in reply to submit the following remarks:

2. With reference to the 4th and 5th paragraphs of His Honour's minute, I would beg to observe that I am not aware of any special reasons why the district of Sylhet should be exempted from the operation of the proposed law. It is true that landed property is very minutely sub-divided there, but when I was in charge of that collectorship, many years ago, I found no difficulty in realising the revenue under the sale law then in force, Regulation XI. of 1822. Although the zemindars often withheld payment of the arrears due until the last moment, they almost invariably produced the money (sometimes only a few annas) when their estates were put up for sale. I am averse to any of the other modes of collecting the revenue, having seen in Cuttack how ineffectual the provisions of Regulation X. of 1818 were for the purpose, and how much oppression was occasioned by the "dustuck system" in that province.

3. I now proceed to consider the remarks of the Lieutenant-governor on Sections X., XI., XII., XIII., and XIV. of the proposed Bill.

4. I must confess that I am unable to see any valid reason for exempting shareholders under 50 rupees from a participation in the benefits proposed to be conferred on the whole body of landed proprietors by those sections; as justly remarked by the Legislative Council,‡ the object is to confirm the just rights of the sharer by securing his property when there is no default on his part, and a share paying 40 rupees may be of as much concern to the owner as are estates paying 40 lakhs of rupees to the rajah of Burdwan. I apprehend that the shareholders under 50 rupees constitute a much more numerous body than the shareholders above that limit, so that by admitting the latter only to the benefits of the law, we should be excluding the majority of the proprietary body from what all have an equal claim to, besides laying ourselves open to the imputation of legislating for the rich and not for the poor.

5. The suggestion of the Lieutenant-governor in regard to the omission from Section XII. of the direction to the collector to institute summary inquiry into the fact of possession, has however my full concurrence.

6. By restricting the benefit of the Bill to recorded shareholders we insure sufficient evidence of the fact of possession, which must, under the existing rules regarding dakhil kharij, have been ascertained before the name of the shareholder was recorded; a second inquiry on this point would therefore merely have the effect of opening a door for fresh litigation, besides giving unnecessary trouble to the collector.

7. It

---

* These are mere transmitting letters and are therefore not printed.
† An extract of this letter has been printed.
‡ See Mr. Grant's speech on first reading, Proceedings vol. I, column 854.

7. It would be advisable, I think, to allow the privilege of opening separate accounts to those co-partners only whose names have been recorded in the collector's office with a specification of their shares, for where there is no such specification, an inquiry would be requisite on that point before the sharer of an estate held in common tenancy could be admitted to the benefit of the Bill. In such cases, there is generally a dispute among the shareholders as to the extent of each person's share, and it is the province of the Civil Courts, and not of the revenue authorities, to decide such disputes.

8. I see no objection to the Lieutenant-governor's suggestion that the collector be empowered to charge an agency commission on drawing and applying interest of Government securities deposited with him under Section XV. of the Bill, but I would not deprive the zemindars of the permission, which it is proposed to confer upon them, of making such deposits, which would unquestionably be a great boon and protection to absentee landholders.

9. I now proceed to consider the remarks of the Lieutenant-governor on the sections of the Bill which provide for the registration of under-tenures, and constitute doubtless the most important portion of it.

10. With regard to the "ante-settlement" tenures referred to in the first and second clauses of Section XXXV., I cannot perceive that any injustice would be done to the holders by requiring them to register with the view of giving them "absolute security" against the encroachments of all future auction purchasers of the entire estate; the process prescribed for registration is neither difficult nor costly, and the advantages which would be gained by it would infinitely more than compensate the holders for any trouble and expense to which they might be put in placing their title upon a permanent and secure basis, while the just rights of the purchasers of the estate would be maintained. I cannot think that, with such great advantages in view, any *bonâ fide* holder of such tenures would consider it a hardship to be compelled to register.

11. Neither do I see how the rights of these under-tenants can be affected by such process. It is true that it exposes them to litigation, but it does so once for all; whereas, at present, their title is liable to be disputed by every successive auction purchaser.

12. But the objection suggested in the 20th and 21st paragraphs of the Lieutenant-governor's Minute is not so easily got over. It certainly looks very like imposing a new as well as a severe penalty for arrears of rent, to declare these tenures to be absolutely voidable by the auction purchasers, if any arrear, however small, should happen to be due on the latest date fixed for the zemindar's payment to Government; such a state of things might happen without any fault on the part of the tenant, for the time for realising the rents due to the zemindar from his under-tenants does not always correspond with that fixed by the Government for the recovery of its dues, and it seems hard that such a penalty should attach to a default which may be purely accidental and unintentional on the part of the under-tenant. Under the existing law, the zemindar has the power of bringing certain descriptions of under-tenures to sale with their privileges intact, and annulling others after obtaining a decree for arrears. I think, therefore, that the words "and whereon no arrear of rent was due on the latest day of payment of revenue as fixed under Sections III. and IV. of this Act" might well be omitted from the first, second, and third clauses of Section XXXV. of the Bill.

13. I now come to the question of registering the tenures created since the settlement, which, as remarked in my report of the 15th April last, No. 256, seems to me to be "the difficulty" of the Bill. The Lieutenant-governor has placed in a clear and forcible light, the extreme difficulty, not to say impracticability, of carrying out the provisions of Section XXXVII. with the agency at present available. I see no such difficulty as regards the tenures referred to in Sections XXXV. and XXXVI., but I conceive that the scheme of registering all descriptions of under-tenures created since the settlement, after such measurement, survey, and local inquiry, as may be necessary to satisfy the collector that the tenure "was created in good faith so far as the interests of the Government revenue are concerned, and that the rent payable by the holder is not less than is fully sufficient to afford a fair proportion of the revenue assessed upon the parent estate," must be abandoned from the impracticability of carrying it out.

14. It might perhaps be sufficient to enact that all tenures created since the settlement of the estate shall hold as good against an auction purchaser, as against the former proprietor, provided they were created in good faith, and that the rent is sufficient to afford a fair proportion of the revenue assessed upon the parent estate; and to leave it to the civil courts to decide any questions that might arise regarding the auction purchaser's right to set them aside. In such cases, a report might be required from the collector, as is done with regard to suits instituted in the civil courts under Regulation II. of 1819.

I have, &c.
(signed) *F. Gouldsbury*, Commissioner.

Appendix, No. 7.

From the Officiating Commissioner, *Burdwan* Division, to the Board of Revenue, Lower Provinces, Fort William, No. 193, dated Beerbhoom, the 17 December 1856.

Revenue.

Gentlemen,

I HAVE the honour to acknowledge the receipt of your Secretary's letter of the 9th instant, No. 530, forwarding copy of a letter from Government, together with a printed copy of the Lieutenant-governor's Minute on the proposed new Sale Law, and calling upon me for any further remarks I have to offer on the subject.

2. In reply, I would beg to say that I have no further remarks to make on the Bill in question, except that it seems to me, if I may be allowed to say so, that the Minute of the Lieutenant-governor on the subject is entirely unanswerable, and has completely exhausted the subject.

I have, &c.
(signed) *J. H. Young*, Officiating Commissioner.

From the Commissioner of Revenue, *Bhaugulpore* Division, to the Secretary to the Board of Revenue, Fort William, No. 137, dated Camp Booari, 30 December 1856.

Sir,

I HAVE the honour, in reply to your letter, No. 530, of the 9th instant, to give my opinion as follows on the points mooted in the Lieutenant-governor's minute on the proposed Sale Law.

2. Sections X. to XIV. will, if a limit is fixed, confer a great boon on shareholders, but if they are extended to those paying small sums, and if the collector is to institute a summary inquiry into possession, they will be productive of far more harm than good. Enormous establishments will be required to keep the accounts, and the proprietors will constantly be harassed by parties claiming to have their names recorded as separate shareholders, and consequent inquiries into possession and butwarras already far too numerous in some districts would become enormously increased. I would confine these sections to parties already recorded, or who may hereafter be recorded in the usual way, and the amount of whose revenue is over 100 rupees.

3. I am not aware of any serious objection to Section XV., as it probably will not be extensively worked.

4. With regard to Clauses 1 and 2, Section XXXV., they appear to me calculated to do great injustice and injury to the holders of tenures guaranteed against increase of rent at the time of the decennial settlement; and as to post-settlement tenures, unless Government are prepared to do the whole revenue survey over again, and much more minutely and correctly than before, and to add a large extra staff of collectors, deputy collectors, ameens, &c., for the purpose of settling disputes, calculating the assessments, &c., I do not see how the thing can possibly be done.

5. With regard to the proposals in paragraph 51 of the minute, it appears to me they are are very good as far as they go, but they do not in my opinion go far enough. I wish to see some provision restricting the rights of present proprietors to increase at will or by a suit in the civil courts, the rent of tenures held with or without documents at a fixed jumma for a certain number of years, say twelve, before the attempt to increase was made. This would be going very little farther than is proposed by the registry provisions of the Bill now before the Legislative Council, and it would be unattended with the evils which registry and proportionate assessment as proposed must entail on a very great number of under-holders and zemindars and on Government itself, while the Government revenue on the Lieutenant-governor's plan would always be secured.

6. I trust the superficial manner in which I have given my opinion will be pardoned in consideration of the fact that I am daily marching and have a great deal to do with the Sonthals, whose business I cannot now postpone for other work.

I have, &c.
(signed) *G. U. Yule*,
Commissioner of Revenue.

Extract of a Letter from the Secretary to the Board of Revenue, Lower Provinces, to the Secretary to Government of Bengal, No. 29, dated 16th January 1857.

Para. 2. The Commissioner of Dacca has no remarks to offer on the subject.

From

From the Commissioner of Revenue, *Patna*, to the Secretary to the Board of Revenue, Calcutta, No. 1351, dated 1st January 1857.

Sir,

With reference to your letter, No. 530 of the 9th ultimo, forwarding a printed copy of the Lieutenant-governor's minute touching the proposed new Sale Law, I have the honour to submit the following observations:—

2. In my former letter recording my views on the subject and expressing my approval of the Bill, I referred to the general principles and anticipated results of the proposed law, rather than to the facility of carrying out its provisions in practice, which was a point I did not touch upon; the minute of the Lieutenant-governor throws strong doubts upon the practicability of giving due effect to the provisions contemplated, at least without overwhelming the executive department.

3. In the arguments recorded by the Lieutenant-governor in the 8th and following paragraph, I fully concur. The concession now proposed is, beyond controversy, the concession of a privilege and not the restoration of a right, and the Government has indisputable right to limit that privilege by whatever bounds or restrictions public policy or convenience may dictate.

4. Whether, therefore, his Honour's estimate of the practical difficulties or injurious effects of the law be carried or not, I cannot doubt the wisdom of trying the law on what the Lieutenant-governor calls "manageable terms."

5. The effect of the law in encouraging excessive sub-division is a question which appears to me exceedingly difficult to solve.

I scarcely think it can be assumed that the privilege of separate payment and account will necessarily have this effect. On the point mooted in the 13th and 14th paragraphs of the minute, I concur in the expediency of dispensing with the summary inquiry into the fact of possession.

6. The recorded proprietor should be the person with whom the collector deals, and if this has, as it will, the effect of ensuring a more faithful representation, it will be in itself no slight benefit.

7. Not that I can fully concur with Mr. Theobald in his enumeration of the supposed perplexities as to the meaning and interpretation of the word possession.

8. Common sense would, in most of the instances cited by him, be a sufficient guide, but the inquiries would undoubtedly be embarrassing from their frequency, and unsatisfactory in their result, while the other criterion appears sufficient for the purpose.

9. On the subject noted in the 15th paragraph I do not feel myself competent to pass any opinion worthy of acceptance.

The question of the under-tenures, viewed in the light of the Lieutenant-governor's very able comments, assumes a very important aspect, and the several arguments urged against the Bill are beyond all question worthy of the most careful consideration.

10. I propose to consider the points *seriatim*.

Paragraph 17. If the Lieutenant-governor's reasoning in regard to the ante-settlement tenures is sound, the objection raised, as far as regards these tenures, ought to prevent the Bill from passing into law.

11. The argument, as I understand it, is that, because the law of 1793 conferred certain rights on the holders of these under-tenures, and declared the revenue payable by them to be fixed for ever, therefore it is unjust to call upon them in 1856 to register their tenures.

12. On the same grounds the condition and penalty in regard to arrears is condemned as a violation of the privilege formerly conferred.

13. As far as regards the registration, I cannot concur in this reasoning. I cannot believe that, because the Legislature of 1793 conferred permanent privileges on the holders of certain tenures, that therefore the Legislature of 1856 may not reasonably and justly, in pursuance of a great public measure (beneficial to these persons as well as to others), call upon them to establish by registration the rights then conceded; and as no legislation can be efficient unless penalties are attached to a neglect or disregard of its provisions, I consider these penalties as a necessary and indispensable part of the enactment.

14. That the fulfilment of this demand on the part of the Legislature may, in some or in many instances, entail counter-claims and consequent litigation, does not appear to me to affect the question.

15. The demand itself is reasonable, and if it be indispensable to the attainment of the important end proposed, the mere fact that a refusal to comply therewith will entail a forfeiture of privilege formerly granted, is not, I conceive, a sound or logical argument against it.

16. I would fully admit that the holders of these tenures are entitled to precisely the same exemption from violation of their recorded rights as are the proprietors of estates under the permanent

Appendix, No. 7.

permanent settlement, and that the Lieutenant-governor is justified in comparing their status with the status of such proprietors; but I would say that in the case of both I should consider the Legislature entitled to demand the discharge of a reasonable duty like that of registration, in the furtherance of a great national good.

17. The objection as regards the post-settlement tenures is not one of principle, but refers to the practical difficulties which will attend the execution of the law.

18. As before observed, in recording my opinion on the Bill, I did not carefully consider this part of the question, but highly approving of the principle and purport of the proposed law, I confined my observations to those questions; but it is impossible to read the remarks of the Lieutenant-governor on this part of the question without feeling that, if one-half of his assumptions are correct, the difficulty of carrying out the law will be appalling.

19. It makes a moderate man shudder to read the catalogue of perplexities which His Honour has arrayed as the concomitants of this enactment, and I am certainly not prepared to deny the accuracy of the anticipation, though I consider the list of horrors somewhat overcharged; and if the present law is to entail such consequence, I certainly think the provisions suggested by the Lieutenant-governor will be better calculated to secure the end in view than those of the Bill.

I have, &c.
(signed) *W. Tayler,*
Commissioner of Revenue.

Land Revenue.

From the Officiating Secretary to the Board of Revenue, Lower Provinces, to the Secretary to the Government of Bengal, No. 40, dated Fort William, the 23d January 1857.

Sir,

W. Dampier, Esq.

In continuation of my letter of the 16th instant, No. 29, I am directed by the Board of Revenue, to state that the Commissioner of Nuddea expresses his general concurrence in the sufficiency of the provisions which the Lieutenant-Governor has proposed for enactment in the 51st and 52d paragraphs of his minute.

I have, &c.
(signed) *E. T. Trevor,*
Officiating Secretary.

Revenue.

From the Commissioner of Revenue, 16th Division, to the Board of Revenue, Lower Provinces, Fort William, No. 267, dated Chittagong, the 26th January 1857.

Gentlemen,

I have the honour to acknowledge the receipt of your letter, No. 530 of the 9th ultimo, with a copy of a letter from the Secretary to the Bengal Government, accompanied by a minute of his Honour the Lieutenant-Governor, on the subject of the new Sale Law.

2. I have not had an opportunity of seeing upon what grounds the Board have objected to the supersession of Regulation I. of 1801, but the grounds are, I doubt not, very cogent, as they apply to the state of the Sylhet district, and it may be some few others circumstanced as Sylhet is. As regards the districts of this division, however, Regulation I. of 1801 has been inoperative since the enactment of the present Sale Law, and I am not aware that any inconvenience has been experienced by restricting the mode of collecting the revenue to the uniform procedure laid down in Act I. of 1845. Whether therefore Regulation I. of 1801 is retained or not, is immaterial as regards this division, but if its cancelment can be shown, as no doubt the Board have fully shown it to be likely to be attended with serious difficulties and evil consequences in other places, a good reason would certainly seem to exist why Regulation I. of 1801 should not be struck out of the statute book as one of the modes for the recovery of the Government revenue.

3. There has, I suppose, been found no one to contend that, whatever advantages may be derived by it, the registration of separate shares, as contemplated in Sections X., XI., XII., XIII., and XIV., will be unattended with the effect of throwing a vast amount of extra labour upon the collectors and their establishments. The principle of the measures contemplated in these sections is however so just, that it ought to be conceded to all, if such extended concession is possible. To extend the boon to every sharer while the establishments of the collectors are upon their present too limited scale would be impossible, but the law provides also the means of affording an increased establishment in that it lays down fees for registration. These fees cannot fail, I should say, to amount to a considerable sum in every zillah, and from this source, to which there will be a continued income, it would, I think, be found that the necessary number of extra hands to carry out the scheme of separate registration for all, would not be attended with that increased expense to Government which ought to be regarded as an obstacle to the introduction of a measure of such wide utility as that contemplated by the Act.

4. To

4. To encourage and extend a "pauper proprietary" is certainly objectionable; but can that be helped, and is it certain that the new law will have that effect?

5. The object of allowing shareholders to register their shares separately is that the just rights of all may be secured to all. If it is just to guard the large proprietor against the risk of being sold out by the default of his smaller co-sharer, the same consideration should also make us mindful of the poorer partner's interests. Neither the rich nor the poor partner, neither he whose share of the public revenue is 1,000 rupees, nor he whose share is but a few rupees, have any right, certainly, to demand that separate accounts shall be kept with them, and that they shall be saved from the consequence of a default on the part of either; but if the consideration of its being right is allowed to be a good plea in contending for the boon to the larger sharer, the same consideration cannot be otherwise than sound and good when the case of the smaller sharer is under consideration. Sub-division of estates must continue so long as natives are the owners of them, and it will never seem fair to the people that the poor proprietor, and the one therefore who most needs protection, and the rich proprietor, are not treated on equal terms. As we cannot prevent sub-division of estates, as we are bound in justice to put all like classes upon the same footing, it is better that we even charge each sharer with the cost of maintaining an extra establishment under the collector (if that be necessary), than that we refuse to recognise as equal the rights of every class of proprietors, and so put what the public would consider an unfair limit to a measure to the benefits of which all have an equal claim.

6. But it is much to be doubted whether, from the great advantages talookdars will derive by the provisions of the new Act, the sub-division of estates will not hereafter be much less common than they have hitherto been. A petty proprietor is now, and must always be very much in the power of his wealthier and larger co-sharer. The one collects or not just as the other likes; if the larger partner so determines, the smaller partner can realise nothing of the rents of his share: as it is, the insignificant proprietor is completely subservient to his more powerful co-proprietor. The latter can, without incurring any penalty, stop the collections of the smaller sharer, put it out of his power to pay his quota of revenue, cause the sale of his share, and ruin him.

7. Hereafter, when the new Sale Law comes into operation, a petty proprietor, being a part owner with a wealthy and large proprietor, would make a good bargain who got as an under-tenure some portion of the joint estate, and gave up his interest in the superior tenure altogether. As a talookdar he would enjoy all the rights of the zemindar within his property. There would be no divided authority; his tenant would be his own, and his tenure would be safe for ever if its rent was a fair one.

8. I think, then, notwithstanding that it may seem to encourage the sub-division of estates to admit each sharer to the privilege of a separate proprietor, this effect will be in a great measure counteracted by the other contemplated provisions of the Act, and that there is reason to suppose that the sub-division of estates into small shares among poor proprietors will be rather checked by the operation of the new law, than that it will receive a new impulse to farther progression.

9. The Lieutenant-Governor is of opinion, whether the plan of a limit be adopted or not, that the direction to the collector to make a summary inquiry into the fact of possession ought to be omitted from Section XII.

10. In dakhil kharij cases it does not need that a proprietor should prove what the extent of his share is to obtain the registration of his name: he is registered as a joint proprietor if he is proved to be in possession at all. In cases where a proprietor's name is recorded jointly with others, without specification of what his share is, some means must be devised to ascertain this: either no proprietor ought to be registered under the new law in regard to whose share, and the extent of it, there was any dispute, or some means ought to be provided for ascertaining what the extent is, if the inquiry into the fact of possession, that is the extent of the thing possessed, was a matter of manifest difficulty. I suggested in the 8th paragraph of my letter, No. 308, of the 19th April last, that the collector might be empowered to refuse registration, and refer the parties to the Civil Court for the determination of the matter. I still think, under all the circumstances, that this would be the most advisable course.

11. The Lieutenant-Governor also questions the expediency of allowing a zemindar to deposit money or Government securities with the collector, so that the amount or the interest upon the securities may be used in liquidation of balances.

12. I cannot doubt that such a measure would be highly beneficial to very many of the larger zemindars, and that it would frequently be taken advantage of. In the case of the Calcutta Government agency its abolition was no doubt based on good grounds; probably one of those grounds was, that in Calcutta no such institution on the part of Government was wanted by the public, but in the mofussil the public are not so independent. Dishonesty on the part of mofussil native agents being of such common occurrence, and there being no public agencies at mofussil stations capable of looking after the interests of constituents, it would, so it seems to me, be no more than a reasonable, humane, and politic concession to the wants of a very large and a very important class of the public, to allow every collector to act as an agent for absentee zemindars, for the drawing and paying of money deposited with him in liquidation of balances due from the estates of the depositors. This might, and

Appendix, No. 7.

no doubt would tend to raise the value of Government securities, but I confess that I am such a poor politician that I am at a loss to understand why a Government should shrink from a measure, the effect of which was that it would make its paper of higher value in the market. The current price of Government securities is the test of the measure of the prosperity of Government, and unless undue means are used, it seems to me to be the duty of every Government to promote by all means the value of its own securities.

13. I see no objection why a commission fee should not be drawn by the collector upon sums paid into the treasury by him on behalf of the parties by whom they were deposited as security for the Government revenue, and to be applied towards its liquidation.

14. Sections 16 to 27 of the Lieutenant-governor's minute treat of the case of ante-settlement tenures, which the Lieutenant-governor is desirous of having exempted from the necessity of inquiry and registration.

15. What is now wanted by all descriptions of landholders is a certainty as to what they possess. Tenants and zemindars are now all alike in the dark in this respect. A man when he buys a zemindaree does not know what it consists of; a tenant is not safe for a day. It is to make each more sure and safe in his possession that the new law is devised. A man buying a zemindaree is not safe if ante-settlement tenures are not recorded. If you exempt these from the process laid down for all subsequently created tenures you leave open the door to no end of fraud. A zemindar contemplating the sale of his zemindaree as certain will make all manner of forged deeds in support of ante-settlement tenures to which he will assert his right and possession. In some he may succeed, and whether he succeeds or not the new purchaser finds he must incur the expense of several lawsuits before he can oust the fraudulent and fictitious ante-settlement talookdars, and that, unless he does incur this expense, he is unable to obtain the just rents of a great portion of his estate.

16. There is therefore no security for any one purchasing a zemindaree as to what he purchases if ante-settlement talookdars are to be exempted from showing their title deeds, as an obligation which is to be imperative on all other classes of talookdars.

17. The case of zemindars and talookdars I take permission to say is not analogous: a talookdar, of whatever sort, is liable upon the suit of the zemindar to be called upon to prove his right to hold his talook on such and such conditions. The zemindar cannot be so called upon to do anything of the kind. To make the zemindar subject to certain new conditions provocative of litigation, would be to infringe upon his rights, and it could not be done with any show of reason or justice. But in the case of the ante-settlement talookdars, the only hardship they suffer is in being made to do that at once which they are ever liable to be called upon to do, and this small wrong may surely be inflicted for the advantages it will produce.

18. In what the Lieutenant-governor says in Sections 29 to 48 I altogether coincide.

19. The Lieutenant-governor, in the 49th paragraph of his minute, recommends that tenures which authorise the holders to collect portions of the rent of each ryot shall not be considered entitled to registration as protected tenures under the Act. Such an exclusion would however, it seems to me, be an interference with the private rights of parties, without any very good cause. Say that a man living in a village not being able to rent the whole, wants to rent quarter of it as a talook. What's the objection to such an arrangement? True, it may be be more troublesome to the ryot to pay his rent in portions to two or three persons instead of to one, but his position renders him liable to this.

20. With the exception of the points above-mentioned, I consider that the draft which his Honour the Lieutenant-governor has drawn up on the subject of under-tenures is a decided improvement over the original draft Act, and that it will, as his Honour observes, "subserve all the essential purposes of the Bill" now under consideration, without incurring any of its most serious difficulties.

I have, &c.
(signed) *C. Steer,*
Commissioner of Revenue, 16th Division.

(No. 10.)

MINUTE by Mr. *H. T. Raikes,* Judge of the Sudder Dewanny Adawlut at Calcutta.

On the Bill "To Improve the Law relating to Sales of Land for Arrears of Revenue in the Bengal Presidency."

I SHALL not offer any remarks on the object and policy of this Bill, having merely considered its details with reference to the working of the law in the Courts hereafter.

I observe that the same doubt and difficulty will exist under the provisions of this law as now exist regarding the effect of a decree of court annulling a revenue sale under the present law.

Section

Section XXIX. of the draft contemplates the annulment of a sale for informality by decree of court, but it does not provide for the execution of such decree by restoration of the estate, though it prescribes that "execution of such decree must be obtained before six months after the date thereof, otherwise the party obtaining the decree shall lose all benefit therefrom." What is the meaning of "execution of such decree must be obtained." The decree can go no farther than to declare the sale annulled. It then merely places the old proprietor in the same position he held just before the sale was made; he is still a defaulter and a new sale may be made; but it seems to me he has no act to perform, which can represent in any way obtaining execution of his decree. What then is he expected to do? The section goes on to say, "and when execution of such decree is duly obtained, the party obtaining it shall not be restored to possession until any amount of surplus purchase-money that may have been paid away, &c. &c.; and if such party shall neglect to pay any amount so recoverable within six months from the date of such final decree, he shall lose all benefit therefrom." To make this intelligible it should be explained how the decree-holder is to be restored to possession, as the court passing the decree can apparently do nothing either on its own motion or on the motion of the decree-holder. To give the intended effect to this section, it seems to me necessary that the law should declare the courts competent to annul sales if made in contravention of the provisions of the Act, and also to restore the estate to the defaulter on the conditions inserted in the section, provided the decree-holder applies to the court to give him full execution of his decree according to the exigency thereof within the period stipulated.

The only other point I would refer to is that Section XXXV. give us now the power of sweeping away all incumbrances created between settlement and sale. But I do not understand how this privilege is to be exercised when the purchaser is one of the class described in Section XI. Under the rule laid down in that section his own share is reserved, while he may purchase the remainder of the estate under Section XIV. What is the position of the tenantry who are probably holding under all the sharers who were then joint landlords? Does the sale give the sharer who purchases, the right of ejectment and enhancement over the portion or share of the estate purchased, or over the whole? I should say, as far as the law provides, such right would extend only to the newly acquired shares. The purchaser would then be in a singular position with respect to a tenant who had held under the joint proprietors; he might be ejected to the extent of the share purchased and could not be meddled with as to the remainder reserved to the purchaser.

13 March 1857. (signed) *H. T. Raikes*, Judge.

(No. 11.)

From the Member of the Legislative Council for Bengal to the Junior Secretary to the Government of Bengal, dated Fort William, 3 September 1856.

Sir,

In accordance with the opinion expressed by his honor the Lieutenant-Governor in your letter of the 7th July, I have abstained from making any attempt to proceed with the Sale of Under-tenures Bill. It will lie over until the Select Committee appointed to consider the Sale Law Amendment Bill shall have made their report on the resolution referred to them on the motion of Sir James Colville, relative to the protection of under-tenants of the second and inferior degrees against the consequences of a sale of the superior tenure for arrears of rent.

The Select Committee has as yet held no meeting. When the remarks of the Bengal Government on the proposed amendment of the sale law shall have been received, it will doubtless proceed at once to settle that Bill. But I do not think that it will be in a position to deal with the important question referred to it respecting tenures of the second and inferior degrees, until it is furnished with some information as to the extent to which such tenures prevail, their peculiar conditions, and the practice as respects their treatment on a sale of the superior tenure for arrears in the several districts of these provinces.

It is of course well known that the greater part of the land in Burdwan and Hooghly is let in putnee; that the putneedars have very generally granted under-leases to dur-putneedars, who again have sub-let to se-putneedars, and so on; and that the same state of things prevails to a considerable extent in Nuddea and some other of the neighbouring districts. The conditions of these sub-tenures and the effect upon them of a sale of the superior tenure are ascertained by law. It is also known that in the districts of Backergunge and Bhullooah there is very commonly, under the talookdars, a chain of Ousat talookdars, howalahdars, neem-howalahdars, &c.; and I have obtained some information of the condition on which these sub-tenures are held and the practice which obtains respecting them in case of sale. But I have no information as to the extent to which the practice of sub-letting may prevail in other parts of the country. There may probably be tenures subordinate to the talooks of Dacca, Tipperah, and Mymensing, to the jotes of Rungpore, the gantees of Jessore, the tickahs and chuchs of the 24-Pergunnahs, the mokuddumees of Cuttack, and the mokurrarees and shickmee talooks of Behar; but without some knowledge of the conditions of such sub-tenures, of the practice which may obtain respecting them in case of sale, and especially of the extent to which they may

Appendix, No. 7.

prevail, it will, I apprehend, be impossible for the Select Committee to make a satisfactory report or one upon which any practical measure could be based.

Should the Lieutenant-Governor concur in this view, he will probably think it advisable to direct the Board to call upon the several Commissioners for information on the points above indicated, in order that it may be available to the Select Committee when they come to consider the question referred to them.

I have, &c.
(signed) *E. Currie,*
Member of the Legislative Council.

From the Secretary to the Government of Bengal, to the Member of the Legislative Council for Bengal, No. 13, dated Fort William, 6 January 1857.

Sir,

Revenue.

With reference to your letter dated the 3d of September, I am directed to forward herewith a copy of a letter, No. 503, dated the 19th ultimo, and of its enclosure, from the Officiating Secretary to the Board of Revenue, on the subject of under-tenures in the districts of the lower provinces.

I have, &c.
(signed) *W. Grey,*
Secretary to the Government of Bengal.

From the Officiating Secretary to the Board of Revenue, Lower Provinces, to the Secretary to the Government of Bengal, Revenue Department, No. 503, dated Fort William, 19 December 1856.

Sir,

Land Revenue. W. Dampier and H. Stainforth, Esquires.

In reply to your letter of the 10th September last, No. 636, I am directed by the Board of Revenue to submit herewith a copy of an abstract of the returns from Commissioners to the circular issued by them on the 17th idem, calling for the information relative to under-tenures required by the Legislative Member of Bengal. The further report promised by the Commissioners of Rajshaye, Cuttack, and Bhaugulpore, will be forwarded on receipt.

2. The information given is of necessity defective, except for the district of Cuttack, where the under-tenures were defined and registered at the settlement, and the Board fear that fuller information cannot be obtained without great loss of time, and, with reference to the apathy and unwillingness of zemindars generally to let the state of their property be known, would, if obtained, be far from trustworthy.

I have, &c.
(signed) *E. T. Trevor,*
Officiating Secretary.

Abstract of Returns to Board's Circular, No. 29, dated 17 September 1856, on the subject of the Number and Conditions of Under-Tenures in Bengal, and the mode in which they are affected by the sale of the Parent Estate for Arrears of Revenue.

Commissioner of Burdwan, 20th November 1856, No. 164.

The officiating Commissioner of Burdwan, Mr. J. H. Young, says that the exact number of tenures in each district cannot be ascertained without great delay, and, when obtained, would not add much to the sort of information required by the Legislative Member of Bengal.

The following memorandum has, however, been compiled from the best information available to the Collectors.

	Putnees.	Dur-putnees.	Seputnees.	Chahar-putnees.	Putees.	Tahoot-daree.	Mokurree.
Burdwan -	1,960	500	250	100	85	—	—
Beerbhoom -	436	1	4½	- -	- -	5	1
Hooghly -	424	589	—	—	—	—	—

The

Appendix, No. 1.

The numbers for Bancoorah and Midnapoor are not given. Of the Hooghly putnees, five pay revenue into the 24-Pergunnahs' treasury, as well as all the durputnees.

In Burdwan, about 14–16ths of the land may be estimated as being let out in putnee, more than 13–16ths of the malgoozaree area belonging to the Rajah. There are not at present any tenures below chaharputnees. In two pergunnahs, there are a few tenures styled putee, a word which the Collector considers a corruption of petee and identical in meaning with shikmee. These tenures existed prior to the decennial settlement and their area and the jumma paid to the zemindar are on record in the Collector's office. The holders are *quasi* shikmee talookdars paying their quota of the Government revenue to the recorded proprietor who is responsible to Government. As long as the fixed demand is paid, the tenures cannot be sold, and they are not liable to be cancelled on the sale of the zemindaree for arrears. A purchaser of a putee may at any time apply for mutation of names—when sold, the sales are not under Regulation VIII. of 1819, but under Act VIII. of 1835, and the purchasers succeed to the same rights as the former proprietors.

In Bancoorah, there are other inferior tenures as jumma pottah, jote, khoorfa or durjote, and the bhagjote or equal division of produce between the leaseholder and cultivator. The leases are generally granted for an unlimited term, and the tenures are liable to an increase of rent.

The tahootdaree tenures in Beerbhoom are liable to be sold on the sale of the estate to which they belong.

The Collector of Midnapore reports twelve different kinds of out-tenures in that district; namely, 1 kharposhie, 2 shikmee, 3 putnee, 4 durputnee, 5 mourosee yara, 6 maiadee yara, 7 kutkeena yara, 8 soodbooktan yara, 9 nizjote kundarra, 10 jotepottah, 11 jungle booree aymah pottah, 12 koordah lakhiraj bazeaftee, all of which are affected by the sale of the superior tenure. The putnee and durputnee are found in Midnapore proper only; the others prevail in Hidjellee also.

Seven descriptions of sub-tenures are reported in Dacca, namely, 1 putnee, 2 durputnee, 3 suputnee, 4 shikmee, 5 shikmee howla, 6 morasee pottah, 7 mussakushee pottah. The effect of a sale of the superior tenure on the first three is declared in Regulation VIII. of 1819. The remaining four are described to be tenures granted by the zemindars with or without a consideration, and, unless they existed for a period of 12 years prior to the decennial settlement as provided in Section XXVI. Act I. of 1845, are liable to be annulled by an auction purchaser at a sale for arrears of revenue. The Collector is unable to give even an approximation to the number of under-tenures in the district from the difficulty of communicating with the proprietors of the 8,460 small estates of which the district is chiefly composed.

Commissioner of Dacca, 28th November, No. 153.

Seven kinds of under-tenures are reported in Mymensing, 1 mourosee shikmee, 2 durshikmee, 3 mokureree shikmee, 4 pottae, 5 putnee, 6 kaim chuck, 7 kaimjote. The first three are stated to be protected under Section XXVI. Act I. of 1845. Nos. 4, 6, and 7 are tenures liable to be annulled in the event of a sale for arrears of the superior tenure. No. 5 is provided for under Regulation VIII. of 1819. The Collector's records afford no data for ascertaining the extent to which under-tenures exist, and the information could not be obtained from the landholders without great delay and difficulty.

In Sylhet, the sub-tenure system does not prevail. In one pergunnah only about 30 putnees have been created by the proprietors. There are about 75,000 estates on the rent-roll, and the custom of the district is for proprietors not to create under-tenures but to dispose of portions of their interest by sale or otherwise, thereby creating innumerable co-sharers. In some instances the unrecorded shikmee sharers amount to no less than 800. These shikmeedars are not tenants of an inferior degree, but joint-sharers in the superior tenure and responsible for the Government revenue.

In Backergunge the following sub-tenures are reported to exist: 1 shikmee, 2 oosut, 3 neem oosut, 4 howlah, 5 oosut howlah, 6 neem oosut howlah, 7 teem (qy. neem?) howlah, 8 meeras malgoozaree, 9 putnee, 10 durputnee. A peculiar feature in this district appears to be that, generally, as many as six grades of tenants intervene between the zemindar and the ryot, though it occasionally happens that the zemindar, passing over the talookdaree grade (the first three), creates at once a howladaree tenure, and in such case the sub-tenures are reduced to three. All the sub-tenures above noticed are subject to sale for arrears of rent under Act VIII. of 1835, but a purchaser succeeds only to the right possessed by the defaulting talookdar or howlahdar, as the case may be, and cannot interfere with the tenures subordinate to the tenure which he has purchased. All the tenures above described, save such as may be protected under the provisions of Act I. of 1845, fall on the sale of the superior tenure for arrears of Government revenue. The few putnees and durputnees in the district are subject of course to the provisions of Regulation VIII. of 1819.

The deputy-collector of Furreedpore has not been able to obtain the necessary information from the zemindars, and has therefore submitted no report. The omission, the Commissioners observes, is not of much consequence, as all the permanently settled estates in Furreedpore are on the Dacca rent-roll.

In three years, 252 applications have been made in Nuddea for sale of putnees, but as applications are made twice a year, and putnees not in arrear are not included, the above number cannot be taken as the number of putnee tenures in the district. On reference to the dehabundee or chowkeedaree register of the magistrate's court, out of the number of 2,934 villages in the district, 1,246 are held khas, 1,094 in putnee, 45 in durputnee, 527 in ijarah, 17 in gantee, and 5 in mourosee. It is not said in what year the register was prepared, or how

Officiating Commissioner of Nuddea, 28th November, No. 329.

Appendix, No. 7.

how far it can be depended on; if it be correct, three-fifths of the villages in the district are held on under-tenure.

The Collector of Jessore describes the gantee tenure as most frequent in that district. durputnees and durgantees are few, and seputnees and segantees fewer still. In one large estate there are 2,000 ganteedars paying a jumma of 200 rupees and upwards, and 80,000 paying under 200 rupees; the latter are called kaimee. The ganteedar, the Collector says, can exist immediately subordinate to the zemindar, the putneedar, the durputneedar, or the seputneedar, and is generally considered to reap by far the lion's share of the profits, and therefore seldom commits his interests to a durganteedar. Of course his most advantageous position is immediately under the zemindar, for when a zemindar has once given his land in gantee he cannot in any way enhance the rents, and it frequently happens that the ganteedar may be collecting rents ten times the amount which he pays to the zemindar. Should, however, the zemindar subsequently let out the land in putnee, his agreement with the zemindar is no longer a protection to him, except to keep him in legal possession, for the putneedar can re-measure the land and raise his rents accordingly. The same thing may be done by the dur and seputneedar. The holders between him and the zemindar may get rid of the ganteedar by being so severe on him as to compel him to retire apart from the collection of rents; the ganteedar has other privileges, such as receiving fees for every marriage, birth, or death amongst his ryots. Where dur and seganteedars do exist, they have the same privileges also, but in a less degree. The bonus paid to the zemindar for a putnee tenure appears to be generally 2½ year's jumma. Indigo planters are mentioned as holding land generally in farm.

The records of the 24-Pergunnahs do not furnish materials for giving the number of under-tenures in the district. One of the most common is the ticca tenure, which is a ryotee tenure, and the holder of which pays rent direct to the zemindar. Very few ticcadars hold pottahs, but their right is recognised by their neighbours and the zemindar. The tenures may be sold for arrears of rent, are recognised in civil courts as being liable to mortgage, may be transferred by gift or willed away, and, unless proof of possession can be adduced for 12 years before the decennial settlement, the right and title to the tenure is forfeited by the sale of the estate for default of revenue. Three species of ryotee tenure may be classed under the ticcadar; the kurfadar, the durkurfadar, and the sekurfadar, who hold their tenures under the ticcadar by virtue of a pottah and cultivate the soil, the sekurfadar being subject to the durkurfadar in the same rates as the durkurfadar is subject to the kurfadar, and the last to the ticcadar. If the latter's right preserve him from the effect of a sale of the zemindaree, then do the holders of the three above-mentioned under-tenures also escape injury. The chuckdaree tenure is a permanent one, and to be met with only in this district, in Jessore, and in Backergunge. These tenures are issued by the Soonderbuns grantees, and given principally with a view to the clearing of jungle at the expense of the chuckdars. The holders retain their rights though the grant in which they are situated may be sold, and the new purchaser cannot enhance their jumma. Deputy Collector Shib Chunder Deb, who has long been in the district, says, the extent to which the ticca tenure prevails is limited, or about $\frac{1}{30}$th of the culturable area of the district, many tenures having been resumed by the zemindars, or having lapsed for want of heirs strong enough to maintain themselves.

The Collector of Moorshedadad describes the mourosee holdings of that district as consisting of jotes and gantees, chuck jummas, chowbiggas, and sebiggas. These, he says, are farms held on hereditary leases with a fixed jumma, and if created prior to the decennial settlement are not liable to enhancement, and are not affected by sale of the superior tenure. Chowbiggas and sebiggas are small holdings let at four and three biggahs per rupee; they are ancient tenures, originally rent-free, but resumed and settled at those rates in consideration of past services; more particular information, the Collector says, would require many months to collect.

The Commissioner has received no report from Baraset, Mr. Eden having only lately taken charge.

The commissioner (Mr. Grote) remarks that such information as is required by the legislative member could hardly be picked up even by an intelligent and attentive Collector after having been a year or more in the district. The manner in which the sale law affects under-tenures could only be known in the event of a purchaser suing summarily a tenant of the second degree, or distraining his property for a higher amount than had been agreed on between the tenant and his predecessor, and such cases seldom occur. Of 104 calls made on the Moorshedabad landowners, only 23 were imperfectly answered, and three Nuddea proprietors declined to furnish any information. Valuable information should however be forthcoming from the records of estates which have come under the Court of Wards, or under khas management, and which have been subjected to butwarrah or settlement. Mr. Grote concludes his report with the following partial statistics of some estates:—

"Such returns, however, as were made to the calls of the Moorshedabad and Nuddea Collectors give the following information. In the latter district 157 returns, representing, I presume, as many estates, gave an aggregate in the latter of 80 putnee, 24 ijarah, seven gantee, and 58 mocureree tenures. Mr. Lyon holds in ijarah all his lands in Moorshedabad, and adds, 'there are no putnee mouroseejotes, or other under-tenures within the lands with which I am connected, and, so far as I am aware, there are comparatively few such, with the exception of putnees, in the immediate vicinity of the banks of the Ganges.' Mr. Bishop, for Messrs. Watson, says that Hoodah Ecoonee, a large estate belonging in part to the

the latter, is divided into 34 putnees, three ijarahs, and 18 gantees, and that Rokunpore, another large estate of theirs, is all in putnee. Mr. Larruletta has let in putnee the only estate he has. I annex the original letter* of Baboo Poolinbeharry Sein, which is fuller than any other of the replies, and gives some interesting information on the subject of the prevalent under-tenures. Rajkissen Raie, another zemindar, returns about two-thirds of his villages as being farmed, while the rest is khas.

"12. The general complaint of the European landholders in Moorshedabad, whose letters I have perused, is the want of security for putneedars against sales of estates for wilful default, and this want will be amply supplied if the original Draft Act proposed by the Bengal Government becomes law.

"13. So far as my experience goes, I believe that in practice few subordinate tenures however old and good their titles, maintain themselves after the sale of the tenure on which they depend. The profits of such subordinate tenures must be in many cases too inconsiderable to render it worth the tenant's while to litigate in the Courts with the superior tenant, who again may, if strongly tempted, combine with the zemindar and sacrifice his own tenure in order to break up a really valuable subordinate tenure.

"14. In the 24-Pergunnahs the ticca tenures are I know extensively sublet, thesub-tenants being generally of the class referred to in Clause 3, Section XXVI. Act I. of 1845. The small estate of Gobind Chunder Dutt, under the Court of Wards, in part consists, I find, of 251-15 biggahs of ticca land for which the minor ticcader pays an annual rent of 70 rupees 8 annas to different zemindars, while the rents payable by his sub-tenants are entered in the accounts of the estate at 510 rupees.

"15. In law the subordinate tenure, if the *bonâ fide* creation of a ticcadar protected by Clause 1, Section XXVI. Act I. of 1845, would, I imagine, stand under any transfer of the superior tenure."

Baboo Poolinbeharee Sing, in his letter to the officiating Collector at Moorshedabad referred to in paragraph 11 of the above extract, says that his zemindaree, and generally most others, contains the following classes of under-tenures:—1st, putnee, durputnee, and seputnee, the nature and conditions of which are well known. 2d, ijarahs and durijarahs or farms and under-farms, the nature and terms of which are also well known. 3d, mourosee ijarah, or farm held on a hereditary lease with a fixed jumma not liable to enhancement, provided the creation was anterior to or at the time of the decennial settlement. 4th, chuck jumma, or a certain quantity of land held in the lump at a fixed rent assessed without reference to prevailing rates. 5th, jote jumma. Most of the lands in most zemindarees are held in jotes under the following denominations—(1) Istemraree or mokureree jotes are hereditary tenures held at a fixed rent provided they were created more than 12 years before the settlement. Like the chuck jummas, these tenures comprehend lands of all descriptions, and may be considered as small putnees. (2) Jotes consisting of one or more biggahs of land, generally culturable, held at a certain rent, liable to be increased on re-measurement of the village. 6th, charbiggas or land held at four biggas a rupee, sebiggas or land held at three biggahs a rupee. Those tenures created before the decennial settlement are not open to resumption or enhancement of rent. Of the above descriptions of tenures, those created prior to the settlement are not so liable to enhancement of jumma, unless on a general measurement of the pergunnah they be found to comprehend more lands than the pottah specifies. In private or decree sales these tenures are not liable to enhancement, but under the sale law all the tenures, especially those of recent creation, are cancelled by sale, and the occupants may be ousted at pleasure by the auction purchaser. The mokureree, or istemraree jotes, and those that existed before and at the time of the decennial settlement, are the only ones that cannot be cancelled. Not having received returns from his zemindarees in several districts, and having no register of the under-tenures existing within, he cannot speak to the number of such in his estates, but in the portion situated in Moorshedabad one mehal has been let in putnee and one in ijarah.

Extract from letter from Deputy Collector of Baraset, who reports the existence in his jurisdiction of—1st, perpetual gantees or tenures under the zemindars which are saleable for arrears of rent as well as in satisfaction of decrees. They are transferable tenures, but the tenant does not lose his right on the sale of the zemindaree. 2d, durmourosee gantees, these are granted by the ganteedar in perpetuity, and are not affected by the sale of the superior tenure. 3d, chucks, these are held under the zemindar for the purpose of clearing jungle. They are saleable by the holder at pleasure, but are not affected by the sale of the zemindaree. They may be sold for arrears of rent or in satisfaction of decrees. Nuddea, 9th December 1856, No. 342.

In Lohardugga there are only two estates, namely, Chota Nagpore and Purgunnah Palamow, the latter a Government purchase. The four largest under-tenures in the Chota Nagpore zemindaree are the jaghires of Boondoo, Burway, Sillee, and Tamar, created apparently before the British Government. These estates consist of from 80 to 250 villages each, and the jaghiredars pay a fixed rent to the Maharajah. Succession is strictly according to primogeniture in the male line. In each jaghire there are several sub-jaghires, some created by the jaghiredars, and others by the Maharajah of Chota Nagpore. The latter are not Chota Nagpore, 24th November 1856.

* *See* an abstract of the information contained in this letter following this extract from the Commissioner's report.

Appendix, No. 7.

not numerous though very ancient and probably anterior to the jaghires, to which they are now attached. In the Tamar jaghire, where the inhabitants are chiefly Coles, almost all the under-tenures are held by mankees and moondas, who are in fact the proprietors of the soil. The moondas hold from two to ten villages, and over every four or five moondas there is a mankee. The moondas pay a certain fixed rent to the mankees, who make a proportionate fixed payment to the Rajah of Tamar. Most of the Cole tenures are of very ancient origin, though there are no written title-deeds. Similar tenures are found in other pergunnahs, especially Sonepore. Besides the above four large jaghires there are about 600 smaller ones in the Chota Nagpore zemindaree. Some of these jaghiredars hold only a portion of a village; but the tenures of others consist of as many as 150 villages. All pay a fixed rent to the Maharajah, and are hereditable in the male line. To almost all, conditions of service are attached, which are sometimes enforced and sometimes not. Several of these jaghires were created before the settlement, but the majority of them are believed to be posterior to that event. Within the larger jaghires there are sub-jaghires, but the number is not known; a few jaghires are for life only, but such tenures are rare. In every part of the same zemindaree there is a large number of petty bhoceharee tenures. The bhoceharees are descendants of the rude race which first cleared the jungle; their tenures are rent-free, but they are bound to render service to the Maharajah or the farmers holding under him. In purgunnah Palamow, a khas mehal, there are 130 jaghiredars and 102 hereditary ijarahdaree tenures, the remainder of the pergunnah consisting of khulsah villages leased to farmers for a fixed term. Most of the jaghirees are held under conditions of service, and they, together with the hereditary ijarahs, pass to male descendants. After the purchase by Government, many of these tenures became by law liable to resumption, but the under-tenants were confirmed in their rights by Government. As the sale law is not likely to be introduced into this province, the Commissioner does not deem it necessary to enter into the question of the effect of the law on these under-tenures.

In Hazareebagh there are 5,858 under-tenures of different kinds, and probably more of a small kind, of which nothing is known. In the large estate of Ramgurh there are 3,289 recorded under-tenures of various sorts. There are jaghires granted for the maintenance of the members of the Ramgurh family, which have been held for generations; most of them on conditions of service, which have of late years been seldom enforced, and most of them pay only very small quit rents. There are in the same estate 22 rent-free tenures exempted at the time of the settlement. There are also several khyrat tenures not recorded in the Principal Assistant's Office, and probably created since the settlement. There are also several service jaghires held under the condition of guarding the ghâts and jungle passes. Some pay a small quit-rent; others, in places where the service is considered of the most importance, are held rent-free. About one-third of the Ramghur estate is held in jaghirdaree and rent-free tenure of different descriptions; the remaining two-thirds are in the zemindar's own hands, who lets portions in farm. In pergunnah Kurrackdia there are 2,114 under-tenures, of which 76 are rent-free mehals not assessed at the permanent settlement. Most of the oldest tenures in this pergunnah have been granted for the maintenance of the relatives of the proprietors of the guddees, but few under-tenures in this part of the country were in existence at the time of the settlement. There are a few farms for undefined periods given at low rates to money lenders, but the farms of villages are mostly for a limited number of years. In pergunnah Kendie there are 141 different under-tenures. A few are khyat and maintenance tenures, but many of the villages are farmed to persons who have lent money to the proprietor. In the confiscated mehal pergunnah Koderma, there are 94 under-tenures all leased to the heads of villages. In the rent-free feudal tenure of Koonda there are 220 under-tenures, some of which are khyrat and service tenures, but the most common under-tenures are farms for short periods.

In Maunbhoom there are a few putnee talooks and still fewer durputnees, the majority being in the Pachete zemindaree and of recent origin; but Regulation VIII. of 1819 is never put in force in this division. The zemindars realise rents by summary process and attachment. There are jaghiredars paying a small fixed rent to the zemindars, shikmee zemindars, mookurereedars, and durmokurereedars; also a few mankee and moonda tenures like those of Chota Nagpore, some of which are of very ancient origin. There is, however, a large number of police ghat-walee tenures, the tenants performing police service and paying a small quit-rent to the zemindars. Many of these ghat-walee tenures were in existence before the settlement.

In Singbhoom is the Dhulbhoom estate, the Rajah of which owns the whole pergunnah of Ghatsillah, with the exception of the ghat-walee and rent-free tenures therein. Each village is held direct from the zemindar, either in perpetuity or for a specified term, the tenant being styled purdhan. A purdhan rents one or more villages; occasionally a large village is divided amongst two or more purdhans. The purdhan is remunerated by a certain quantity of the best land in the village, held rent free. He cannot be ousted during his lease as long as he pays the stipulated rent. When the Rajah grants a lease of a turuff consisting of several villages to a farmer, the latter cannot interfere with the arrangements made with the purdhans, who pay their rents to him instead of the zemindar. When the zemindar creates a mokurereе tenure, the mokurereedar acts as purdhan in his own tenure. The putnee tenure is unknown in the Dhulbhoom estate; the purdhanee system prevails everywhere, and there are no intermediate tenures of any kind. In Sonthal villages the purdhan is called manjhee, and in Cole villages moonda. Some of the ghatsillah, jaghiredaree, and ghat-walee tenures are of very ancient date; but there is no record of them in the Singbhoom office.

The

Appendix, No 7.

The following tenures prevail in Bograh: 1 muzkooree talook, 2 shikmee talook, 3 istemraree jote, 4 istemraree talook, 5 mukuree chuck jumma, 6 mukooree jote, 7 mourosee jote, 8 mourosee ijarah, 9 putnee talook. The first two were created before the decennial settlement, and the others were made since by the zemindars on condition that the lessee and his heirs are to hold them at a fixed rent in perpetuity; no sub-tenures of any description in this district, except durputnees, which are few in number, and the rights of sub-lessees are liable to be affected by the sale of the superior tenures under Regulation VIII. of 1819.

Rajshahee, 29th November 1856, No. 188.

In Dinagepore there are only about ten putnee talooks; but there are a great many istemraree jotes, all of which are affected by the sale of the superior tenure.

The under-tenures in Rajshahye are chiefly putnee and mourosee or permanent jote. The latter is subdivided into seven denominations: 1st, mourosee jote; 2d, mourosee ijarah; 3rd, mussurkus; 4th, mutkudamee jote; 5th, chuck jumma; 6th, shikmee talook; 7th, mooktah ooperpatta jote. These distinctions are, however, merely nominal. The extent of the under-tenures may be estimated at one-fifth of the entire area of the district.

	No.		Rupees.
Putnee	600	jumma	2,50,000
Mourosee ijarah	25	„	25,000
Kiemee mourosee jote	500	„	5,000
Mussurkus	100	„	5,000
Mutkudumee jote	100	„	5,000
Chuck jumma	200	„	20,000
Shikmee talook	100	„	5,000
Mookta ooperputta jote	50	„	2,000
	1,675		3,17,000

These tenures have generally been sublet in durputnee and durjote, and again in seputnee and duradoojote; but such instances are exceedingly few. The sub-tenure holders exercise the same rights over the ryots as zemindars; they may enhance the jumma and alienate their rights in the tenure without the sanction of the superior landlord. In the event of sale of the superior tenure under Act I. of 1845, of putnees under Regulation VIII. of 1819, and of mourosee jotes, &c., under Regulation VII. of 1799, the sub-tenures of inferior degrees, except those mentioned in Sections XXVI. and XXVII., Act I., of 1845, are liable to be cancelled at the option of the purchasers, who, however, out of policy, do not at once oust the under-tenants, but make fresh arrangements with them. The effect of a sale of the superior tenure on sub-tenures is exactly in accordance with the law, and no other practice prevails.

The zemindarees in Rungpore are subdivided into jotes of greater or less extent. Some are of considerable size, the jotedars paying as much as from 5,000 to 20,000 rupees annually to the landholder. Portions are sublet by the jotedar to persons termed choohadars, who either cultivate themselves, or collect their rents again from under-tenants. These jotes prevail principally in pergunnah Baharbund; but they are to be met with all over the district, and their number it is difficult to estimate without a patient inquiry. On the sale of the superior tenure it is not customary for the purchaser at once to oust the choohadar, but he usually calls upon them to enter into fresh engagements. There are but 54 putnees (in which are three durputnees) in Rungpore, all created within the last 10 or 15 years, on the zemindaree of the Rajah of Danasnuggur. Of the number of istemraree and mokureree jotes, called in the district oopun chuckee, the Collector can give no accurate account. The last quinquennial register for 1222, B. S. gives a total of 572 such tenures; but there are probably more. Under tenures in oopun chuckee lands are affected much in the same way as in common jotes by the sale of the superior tenure. The effect on the dur and seputnee talooks is ascertained by law.

From the inquiries made by the Deputy Collector of Pubna it does not appear that there are any peculiar tenures in that district. About one-third of the district is let in putnee; but durputnees are not numerous, and seputnees or (as they are called in Pubna) durputnees are still fewer, if they exist at all. Both zemindars and putneedars very generally give leases of their holdings to ijarahdars for terms of years. Although the zemindars deny the existence of mourosee or mutkudmee jotes, there is no doubt that they do exist to some extent, and that many are summarily sold for arrears of rent, and some of the holders have gained decrees in the Sudder Dewanee to the effect that their jotes are of that nature, and are not liable to enhancement of jumma, or to annulment whilst the jumma is paid. One of these jotes in pergunnah Yoosufshye pays a rent of 10,000 rupees. The principle which is applied by law to under-tenures of the first degree is, in practice, considered to apply to all the sub-tenures. Thus, if the putnee tenure is transferred by private sale or under a decree of the Civil Court, the durputnees, farms, and under-holdings within it are held valid; but if the putnee is sold for arrears of rent under the provisions of Regulation VIII. of 1819, the purchaser is held to receive it free of all durputnees, farms, and incumbrances made by the late putneedar.

Rajshahee, 9th December 1856, No. 201.

The province of Cuttack is temporarily settled. The tenures and under-tenures of every estate are defined. The sum set apart as zemindar's allowance varies from 35 to 40 per cent. The following under-tenures are not voidable by the sale of the parent estate: 1st, mourosee mokudumee, being alienations prior to the British occupation, and of a hereditary and transferable

Commissioner of Cuttack, 21st November 1856, No. 393.

Appendix, No. 7.

ferable nature. The holders are proprietors, and can only be ousted by sale under Act VIII. of 1835, on default of payment of their fixed jumma, and after summary suit. They have either a whole village or a share in it, collect the rents, and receive an allowance of 20 to 25 per cent. out of the zemindar's allowance mentioned above. In the case of half-rentally settled lands, the allowance to the zemindar and mourosee mokudum is seven and a half per cent. each. The tenures are strictly subordinate, and no butwarrah can be claimed. 2dly. Mourosee surbarakaree tenures correspond with the first, except that the allowance is less to the holder, varying from 15 to 20 per cent. 3dly. Proostee. The difference between this tenure and the mourosee mokudumee is only in name. The holders of some tenures of this name in Pooree have no recognised rights, but are mere servants of the zemindar. 4thly. Pudhanee. These are also akin to the three previous tenures; they are found chiefly in Pooree. 5thly. Shikmee zemindaree, much the same as mokudumee, the chief distinction being that, while the latter affects a village or share in it, the former applies as well to some portions of land as to an entire village. 6thly. Khureeda jummabundee. These are divided into two classes, called awul and doam, or first and second. They do not affect the right of management in a village, or share of it, but the possession of a certain specified quantity of land. The holders of the first class, who purchased from the zemindar, receive an allowance of 30 per cent., the remaining 5 or 10 per cent. going to the proprietor of the parent estate; those of the second class, who purchased from the mokuddum or other holder of a sub-tenure, are regarded as representatives of the latter, and are allowed 20 per cent., 15 per cent. being allowed to the proprietor of the parent estate, or if the land be managed through a mokudum, then the per-centage is equally divided between him and the zemindar. The tenures of the first and second class, formed prior to the British acquisition of the province, are hereditary and transferable, and are not affected by the sale of the parent estate; those of subsequent formation are vitiated, unless otherwise provided at the settlement. 7thly. Ayma, exactly the same as khureeda jumma bundee. 8thly. Tunkee, or alienations at quit or fixed rents prior to the British occupation.

The following under-tenures are null and void on the sale of the parent estate for arrears: 1st. Meadee mokudumee; 2d. Meadee surburakaree. Both these were created since the British occupation. 3d. Shikmee zemindaree. There is only one tenure of this class ascertained, and no apportionment of profits was made, but the parties were left to settle it among themselves. 4th. Pudhanee. Two tenures of this kind are reported in Cuttack; but the holders seem to have no rights of any kind, and to be mere servants of the zemindar, who has the right, under the settlement, to oust them for misbehaviour, and the common ijarah, or farm, usually of one or more villages for a certain number of years, is of subsequent date to the British rule.

List of Under-tenures in Zillah Cuttack.

4. Pudhanee	2	2	1,923	244	189

Commissioner of Patna, 29th November 1856, No. 1147.

The under-tenures in the province of Behar are, first, mokureree grants, of which there are four kinds. The first kind descends in hereditary succession, and are given out on receiving a specified sum, styled nuzurana, without any regard to the Government revenue, which is paid by the maliks. The second kind descends also in hereditary succession, on receipt of nuzurana, conditionally, on the holder complying with certain stipulations, on default of which the tenure is liable, by the wording of the deed, to be resumed by the malik. The stipulation generally is, that the holder pay the Government revenue, and that default of three kists at any time during the year authorises the malik to institute a summary suit for recovery, and to eject the incumbent; but if the tenure is hereditary, the courts have decided that the malik cannot eject the holder; but, on default, can only cause the sale of the mokureree rights. The third kind is only a life tenure, held without payment of nuzurana, conditionally, on the holder paying such a fixed annual sum as covers the Government roll, and ensures besides a certain profit to the malik. The fourth kind is of similar import, held only for life, and on payment of nuzurana.

2. Ijarahs.

Appendix, No. 7.

2. Ijarahs.—These differ very little from ticcas. In ticcas the malik looks to some considerable profit over and above the Government roll. In ijarahs the malik is content with a very small profit, but demands, in compensation, a large sum as zurpeshgee. These ijarahs are always given for five, seven, or nine years, at the end of which time, if the zurpeshgee is repaid, the land lapses again to the malik; if unpaid, the land remains in the hands of the jarahdar till the debt is liquidated. No interest is given, the profits of the lease being considered an equivalent. These ijarahs are diversified by stipulations, according to the will and interest of the parties concerned.

3. Ticcas or Farms.—Of these there are eight or perhaps more kinds, but one general principle marks the whole. The first kind is let out at a stipulated jumma on payment of zurpeshgee without specification of time, and remains in force as long as the zurpeshgee remains unrecovered. The second is let out for a fixed period without zurpeshgee, but on payment of an annual sum to the malik. The third is leased out for a fixed term on payment of a large nuzurana conditionally, on the farmer paying the Government roll only. The fourth is let out for a stipulated period on payment of zurpeshgee, which is repaid at the close of the engagement. The fifth is leased out for a period on payment of zurpeshgee, which is repaid annually by deducting certain sums from the rent. The sixth appertains to mokureree wazoozasht estates, paying a certain fixed sum to the State, as specified in Regulation VIII. of 1793; and which are leased out on the mokureree jumma on payment of nuzurana. The seventh is leased out at a fixed rate for the life-time of the ticcadar, on payment of a nuzurana. The eight is leased out on payment of a stipulated number of maunds of grain in kind, for a fixed number of years, liable to resumption if the grain or an equivalent in money is not handed over to the proprietor at given periods. A summary suit is in this as in all the other instances, a necessary prelude to ejection.

There being no register of under-tenures, their number cannot be ascertained, but it is presumed that one-half of the land in the division is let out in under-tenures, a system which the large landed proprietors prefer to the trouble of seer management. Tenures derived from proprietors direct, are let and re-let over and over again. In each and every instance of under-tenures enumerated above, the sale of the parent tenure for arrears, cancels existing agreements. None are exempt from the ordeal but those protected by Section XXVI., Act I., of 1845.

4. Shikmee Tenures.—These are recognised at the time of settlement effected under Regulation VII. of 1822. They are the lands resumed under Regulation IX. of 1825, being found to have been held under invalid titles, or what parties entitled to a malikana immunity in lakheraj estates originally held as a tenth part of the estate by virtue of that right. These tenures are brought under settlement as dependant talooks, in accordance with the Board's Circular, No. 52, of the 7th August 1838, and are held to be transferable property by gift, inheritance, or sale. They are also let and sublet, and are sold in satisfaction of summary decrees for rent, under Act VIII. of 1835. The holders of these lands pay a fixed revenue to the zemindars, and are not affected by the sale of the parent mehal.

In Chittagong the tenures immediately above the holdings of tenants at will are successively as follows:— Commissioner of Chittagong, 2d December 1856, No. 200.

Third class istemraree, ryottee, chasa, and durtuppa;

Second class itmauree and tuppa;

Third class talook;

And above the talooks are the several denominations of sudder mehals which are under direct engagement with Government.

In Bullooah the tenures lowest in the scale, not reckoning jotes of cultivators, are vasat talook, neem talook, shikmee tuppa, neem howlah, mushkussee ryotee, gyrmokureree, merasee jote, and kursa jote: above these are howlah, puttaee talook, and shikmee talook. To these also may be added, because the holders pay their rents to the superior landlord, tuppas, jimba, and khood khast, and then come the estates which pay revenue to Government direct.

In Tipperah the tenures next above the ordinary jotes are duraghat talook, jimba, chuckhusta, mushkussee, and dur talook. Above them are aghut talook, khoshbash karkona, meeras, howlah, puttaee, and ousut talook; after which follow the several denominations of zemindarees.

In all the above classes the tenures under each class are like, or equal tenures, and are not gradations of tenures. The classes are grades of each other. All are understood to be permanent, hereditary, and transferable tenures. All lapse with the sale of the parent state, except those protected under Act I. of 1845. For sale on any other account than arrears of Government revenue, the inferior tenures do not fall. The sale of a superior tenure for arrears does not affect the lower tenures. Every description of tenure and under-tenure is subject to sale by summary process for arrears. Where there is no stipulation rendering the tenure liable to sale for arrears, a sale can only be resorted to after a decree obtained at the end of the year; where such a stipulation has been entered into, sales are made of the tenure in arrear without the necessity of a prior decree, just as putnee talooks are sold at the mere instance of the zemindar after a short notice. Indeed

Appendix, No. 7.

the same law is the authority in both cases; but, except in the case of putnees under Regulation VIII. of 1819, the holder of a lower tenure has no option or power to pay up the arrear of the tenure immediately superior, and save it from sale.

Besides the several tenures enumerated above, there are in all the three districts of the division putnee talooks: these are however not generally common. There are also in certain parts of the division a few tenures peculiar to the locality, of both superior and inferior grades, but they differ in no essential respect from those which generally obtain.

Commissioner of Bhaugulpore, 6th December 1856, No. 33.

The Collector of Bhaugulpore reports that there are very few mokurerees and no shikmee tenures in that district, and that he is not aware of any sub-tenures.

The Collectors of Monghyr and Tirhoot have misunderstood the point of the inquiry. The first mentions mokureree, takas, kutkeenas, and mortgages; the other gives a list of names of fifty descriptions of rent-free holdings. Further report has been called for, but to avoid delay, Commissioner says that, from what he can gather from the work which comes before him and otherwise, mokureree and shikmee tenures liable to be affected by the sale of the parent estate, are very rare in the districts in question, and that sub-tenures under them are almost unknown. Where they do exist they are merely for temporary periods.

Commissioner of Assam, 5th December 1856, No. 149.

All the land in Assam is held on the same tenure, that is, in full right of either possession or occupation subject to the payment of the Government revenue by the pottahdars. There are no under-tenures known to the regulation and requiring provision in the proposed law of sale. A small quantity of land is cultivated by ryots not proprietors, or not holding pottahs from the Collector, but all such are merely tenants at will or pykasht ryots. Other holders of land paying revenue may be considered as the actual landholders, liable to pay a tax for their land, or as khoodkasht ryots paying rents, the Government being the zemindar.

(signed) *E. T. Trevor*,
Officiating Secretary.

From the Secretary to the Government of Bengal, to the Member of the Legislative Council for Bengal, No. 17, dated Fort William, 10 January 1857.

Sir,

Revenue.

In continuation of my letter No. 13 dated the 6th instant, I am directed to forward herewith a copy of a letter, No. 7 dated the 7th instant, from the Officiating Secretary to the Board of Revenue, on the subject of the under-tenures of the districts of Balasore and Pooree.

I have, &c.
(signed) *W. Grey*,
Secretary to the Government of Bengal.

Secretary to the Government of Bengal.

From the Officiating Secretary to the Board of Revenue, Lower Provinces, to the Secretary to the Government of Bengal, Revenue Department, No. 51, dated Fort William, 28 January 1857.

Sir,

In continuation of my letter of the 19th ultimo, No. 503, I am directed by the Board of Revenue to forward a copy of a letter from the Commissioner of Rajshahye, dated the 31st ultimo, No. 224, on the subject of the tenures and under-tenures of zillah Maldah. The information is extremely meagre, but, for the reasons before stated, full particulars, cannot be had without an investigation almost inquisitorial. LAND REVENUE. W. Dampier, Esq.

I have, &c.
(signed) *E. T. Trevor*,
Officiating Secretary.

From the Commissioner of Revenue, Rajshahye Division, to the Board of Revenue, Lower Provinces, Fort William, No. 224, dated Rajshahye, the 31st December 1856.

Gentlemen,

Having now received the reply of the Officiating Deputy Collector of Maldah on the subject of the tenures and sub-tenures of his district, I have the honour, in continuation of my letter No. 188 of the 29th November last, to report that the information which that officer has been able to collect on the subject is to the last degree unsatisfactory and altogether fails to supply such data as alone would enable him to furnish a full and complete reply to your Board's call. To many of his requisitions addressed to different landholders in the district he has received no replies at all, and those that have been furnished either evade the question, or contain little beyond some general statements which convey no information upon it whatever. With such data to found upon, it is of course impossible to speak, he says with any degree of certainty that such conclusions as he may come to would be found correct, if severely tested; in fact he can do little beyond conveying his general impression on the subject.

2. He regrets that the information in his possession will not allow of his attempting to give any estimate of the number of tenures of the second and inferior degrees now existing in the district; all that he can say on the subject with any degree of confidence is that they appear to be considerably fewer in number than he had previously supposed. In many zemindaries there are none at all, if at least the zemindars' statement of the case be correct, as indeed he believes it to be in many instances, the land being entirely in the hands of ryots who pay rent direct to the zemindar without the intervention of any middleman: this state of things appears to prevail to the greatest extent in the northern and eastern parts of the district.

3. In the southern on the other hand, and especially in the large pergunnah of Shershabad, sub-tenures of the kind referred to in Mr. Currie's letter are found to a large extent. A requisition for information on the subject addressed to the proprietors of this purgunnah not having elicited any answer as yet, he is unable to state the approximate numbers of these tenures, but he knows it to be large. In fact the general impression of people acquainted with the condition of the property is that it has been destroyed as a zemindary by the creation of these jotes as they are called. The jotedars of Shershabad, it is well known, swallow up all the profit that is got from the estate, and little or none passes by them into the hands of the zemindars.

4. He has been unable to ascertain to what extent sub-tenures of the lower degrees prevail in this and other properties. Of a number of requisitions, addressed to various jotedars on the Shershabad estate, one only has elicited an answer; the jotedar in this instance states that there are no shikmee jotes or durjotes on his property. Mr. Craster is inclined to think that sub-tenures of these lower degrees are not very numerous in his district, though what their number may be from total want of all data he cannot pretend to estimate.

Appendix, No. 7.

5. As to the manner in which the sub-tenures are affected by sale of the superior tenure in cases where the mehal is sold for arrears of Government revenue, all under-tenures, with the exception, of course, of those belonging to the classes specially protected by legal enactment, are annulled. The same rule does not apply to the cases of sub-tenures of the lower degrees: these, it appears, are not voided by the sale of the superior sub-tenure; the purchaser, it would seem, merely steps into the place of the late proprietor without acquiring any right or interest in the property beyond that of which his predecessor was in actual possession.

I have, &c.
(signed) *F. Gouldsbury,*
Commissioner.

II. *Bombay.*
III. *Madras.*
IV. *North-Western Provinces.*
V. *Language of the Courts:*
1. Different Languages hitherto used.
2. Proposed use of the English Language.
3. Objections to the foregoing Proposition.
VI. *Judges:*
1. Qualifications of the Native Judges.
2. Recommended Employment generally of Europeans.
3. Preference of the Natives for European Judges.
4. Disapproval of the Non-employment of Natives
VII. *Law Officer, or Assessor.*
VIII. *Omlah, or Native Subordinates.*
IX. *Juries.*
X. *Witnesses.*
XI. *Generally as to the Law and Procedure:*
1. Law which now prevails in the Mofussil.
2. Importance of a proper substantive Law.
3. Liability of Government to be sued in the Courts.
4. Exemption of Judicial Officers from Legal Liability.
5. Question as to an extension of the Jurisdiction of the Supreme Courts.
6. Appeals: Grievances on this score.
7. Improvements to be derived from simplifying the Procedure.
8. Simple and summary Procedure recommended by the Law Commission.
9. Petitions representing the Views of Indigo Planters, &c. in Bengal.
XII. *Effect of the Mode of Administration upon the progress of Settlement.*

I. *Complaints of Mal-administration in Bengal:*

In Bengal great complaints have been made by Europeans against the administration of justice, *Tremenheere* 381. 456–459.

Witness has acted since 1854 as agent for an association of planters and merchants in the Mofussil, established for the purpose of securing referees in the local administration of justice, *Theobald* 850–852——Objections of the planters, &c. to being tried by the inefficient and prejudiced native courts, *ib.* 957. 1039–1044——Trial by the sessions judges is not satisfactory to the planters, *ib.* 1042–1044——The planters, &c. should be tried in their own language by a jury and a competent professional judge, *ib.* 1043–1046——The natives as well as the Europeans suffer under the grievances complained of by witness, *ib.* 1169, 1170. 1177——No remedy has yet been applied in the reform of the grievances, the existence of which has been admitted by Mr. Halliday and Mr. Grant, *ib.* 1171–1175——The insecurity of property through the inefficiency of the police and the magistracy goes to a great and grievous extent, *ib.* 1178, 1179.

Witness has generally managed to get redress in cases of attempted injury to him, but it has often been at considerable trouble, expense, and demoralization, *Freeman* 1482——Statement as to the greatly enhanced rate of interest which planters are obliged to pay for loans of money for Mofussil purposes, *ib.* 1515. 1714–1719, 1820–1823——General con-

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (*MOFUSSIL*)—continued.

I. *Complaints of Mal-administration in Bengal*—continued.

currence by witness in the evidence of Mr. Theobald as to the inefficiency of the administration of justice up to a certain period, *Freeman* 1553-1557——Great pecuniary losses to the indigo planters when, through false charges brought against them, their business operations are necessarily suspended, *ib.* 1565, 1566——In all important cases Europeans should have full opportunity to employ English advocates, *ib.* 1728——The mal-administration of justice in the Mofussil has been a matter of common notoriety ever since witness went to India thirty-three years ago; it is the permanent state of things, *ib.* 1765-1767. 1773.

Witness fully concurs in the evidence of Mr. Freeman relative to the inefficient state of the law, the police, and the magistracy, *Mac Nair* 1968-1972——The administration of justice in the Mofussil is altogether a lottery, the best chances of which are with the criminal, and yet nothing is being done to remedy the state of things, *ib.* 2002——Corrupt system of taking evidence in the Mofussil courts, *ib.* 2002. 2131, 2132——More bribery is necessary in the courts of the native judges than of the English judges, *ib.* 2401-2403——Witness confirms the views of Mr. Theobald and Mr. Freeman, and his opinions are those of the settlers generally, *ib.* 2424, 2425. 2441, 2442. 2489, 2490——More costly and ruinous result of proceedings in the Mofussil courts than in the Supreme Court, *ib.* 2554-2560.

Under the present system neither person nor property is secure, *Wise* 2645-2647——Witness has suffered in several ways through the present state and administration of the laws, *ib.* 2654-2656——Want of supervision over the native courts, *ib.* 2968-2970——Concurrence generally in the evidence of Messrs. Freeman, Mac Nair, and Wise, in regard to the state of the law, police, and magistracy, *Dalrymple* 3188-3190——The magistrates often detain people in prison unlawfully, and witnesses are constantly detained in a very improper manner, *ib.* 3508-3519.

Outline of the main defects of the criminal courts throughout Bengal, *Mackenzie* 3587——Expensiveness of suits in the criminal courts, *ib.* 3587. 3591——Useless forms required, *ib.* 3587——Justice is not expected in the criminal courts, and is not obtained; in fact, of those convicted of minor offences from one-third to half are innocent, whilst in heinous cases it is difficult to get a conviction, *ib.* 3588-3590. 3596-3601——The expense and delay are much greater in the civil courts than in the criminal courts; numerous sources of such delay and expense, *ib.* 3615-3623.

The great majority of the small actions in the civil courts are false or extortionate; they are mainly actions by the money lenders and zemindars against the ryots, *Mackenzie* 3642-3636. 3885-3888——A number of practical reforms are required in the administration of justice, which witness considers to have been worse in 1850 than when he went to India in 1838, *ib.* 3937-3940——Improvement in the condition of the people and in the Government revenue would be the combined result of an improved administration, *ib.* 4023-4026.

Prejudicial effect of the law in the Mofussil not only upon the interest of the planters, but generally, *Baillie* 4811-4813——Wretchedly inefficient, oppressive, and corrupt character of the departments of administration, *Waller* 4840, 4841——Full concurrence in the evidence of other witnesses as to the wretchedly corrupt state of the Company's courts, *ib.*——Admission by numbers of gentlemen in the civil service that the attempt to dispense justice is a total failure, *ib.* 4873——Expediency of all Christians as well as of European settlers being subject to the jurisdiction only of European or Christian judges, *ib.* 4976, 4977. 5029, 5030. 5056-5059. 5074-5077.

In witness's experience life and property were safe in the Mofussil, *Mills* 8772, 8773——Opportunities of the judge for arriving at a just decision from the nature of the native evidence; this is frequently of a circumstantial character, *ib.* 9079-9085——Europeans and their property have been perfectly secure from open violence in Bengal, *Bidwell* 9260——Belief that in civil cases Europeans are dealt with impartially by the native judges, *Marsham* 9429, 9430——Peculiarly disorganised and demoralised state of the lower parts of Bengal, *ib.* 9440-9442. 9595-9597.

II. *Bombay:*

Excellence of the Elphinstone code as first laid down for the administration of the Mofussil territories in Bombay; it has since been encumbered with a number of supplementary regulations which have destroyed its simplicity and deformed its beauty, *Warden* 6052-6056——There is every desire in Western India to administer justice properly, but the judicial system is defective, *ib.* 6087-6095. 6111-6118. 6194——Undue amount of the costs in small cases, as ascertained by witness on a circuit as Judicial Commissioner from Bombay, *ib.* 6097-6099.

As regards the administration of justice in the Mofussil, witness believes that the native courts are scandalously corrupt, and are calculated to shield rogues and thieves, rather than to secure justice, *Landon* 8383 *et seq.*——Belief that all the officials in the native courts are open to bribery, *ib.* 8399——In criminal as well as in civil cases the native

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (*MOFUSSIL*)—continued.

II. *Bombay*—continued.

native courts are most corrupt, and the entire system is such that gross injustice is committed and grievous crimes are unpunished, *ib.* 8422-8434——Bribery is equally rife among the officials of the criminal and of the civil courts, *Landon* 8431-8434——Attempts have been made to bribe European judges, *ib.* 8436——Attempt on one occasion to bribe witness as a witness in a case of adoption, *ib.* 8437——Illustration of incompetency on the part of a native magistrate, *ib.* 8580-8585.

III. *Madras:*

The defects in the administration of justice in Madras are attributable to the system, *Ouchterlony* 5511——Persons and property are perfectly secure in Mysore; witness never heard any complaints of insecurity in Madras, *Onslow* 6731-6733.

IV. *North Western Provinces:*

Badness to the last degree of the native courts in the North West Provinces, *Saunders* 9875-9880. 10052-10055——Witness has had great injustice done him by the native judges, but has always had it remedied by an appeal to a court presided over by a European, *ib.* 10055——Increased litigation through the system of native judges, *ib.* 10221-10223.

V. *Language of the Courts:*

1. Different Languages hitherto used:

Particulars as to the languages now used in the Mofussil courts in Bengal; the official language is the Persian, *Freeman* 1732, 1733. 1781-1783——The Persian language was till about ten years ago the language of the courts of Lower Bengal, and Hindoo is now chiefly used, although Bengalee is the vernacular in the provinces, *Wise* 2988-3005——The European judges in Lower Bengal administer justice entirely in the Bengalee language, *Mackenzie* 3845-3851.

Means by which the Persian language when used in the courts was rendered intelligible to the suitors, *Hawkins* 4148——The Hindee language is not used in the courts of Lower Bengal, *ib.* 4149——The language of the courts is Bengalee and not Hindoostanee, but the latter is the *lingua franca* of India, *ib.* 4150, 4151——Further statement that the language of record in the Mofussil courts is Bengalee, although the civil proceedings are generally in Hindoostanee, *ib.* 4406-4416——In Bedar and the North-western Provinces of Bengal Proper, the Hindee and not the Bengalee is the language of the courts, *ib.* 4477-4479.

Several different languages which obtain throughout Madras; Hindostanee is not generally spoken, *Onslow* 6873-6876——The language in the courts in Bengal is, to a great extent, Hindostanee, which is not intelligible to the great mass of the Bengalees, *Mullens* 7268-7272——Use formerly of Persian as the language of the courts in Bengal, *W. H. Martin* 9163. 9233. 9237——The Bengalee is used in Bengal, and the Hindostanee in Hindostan, the plaintiff and defendant being nearly always familiar with the language used, *ib.* 9230-9241——On the abolition of the Persian language in the courts in the North-West Provinces, a mixed language was used which was not intelligible to the bulk of the natives, *Saunders* 10076. 10220.

2. Proposed use of the English Language:

The introduction of the English language into the courts is in every way desirable, and would be a most beneficial reform; arguments in support of this proposition, *Theobald* 1018; *Freeman* 1509. 1563; *Mac Nair* 2056-2058; *Wise* 2658, 2659. 2898-2904. 2937-2939. 2988-3041; *Dalrymple* 3545-3547; *Waller* 4852-4868. 4880; *Ouchterlony* 5551; *Warden* 6082-6086; *Mullens* 7277.

Way in which efficient interpreters might be provided in the event of the use of the English language in the mofussil courts, *Freeman* 1624-1629; *Mac Nair* 2362-2367; *Wise* 2905, 2906. 3010-3024. 3115-3117; *Ouchterlony* 5522.

The introduction of the English language in the courts would cut at the root of the present corruption and do away with the native omlah, *Freeman* 1634-1636——Further evidence strongly in favour of introducing the English language into the courts of justice; it would give satisfaction to the natives, and would benefit them in a greater degree than the Europeans, *ib.* 1726. 1731-1735——Natives would readily qualify themselves in the English language, *Mac Nair* 2056. 2063; *Wise* 3035-3041. 3066——The use of the English language would be a great benefit to the natives, who would learn it more quickly than the civil servants learn the native language, *Mac Nair* 2310-2316.

Better justice for all under the proposed English courts, *Wise* 2937——The natives would soon appreciate the improved administration of justice, *ib.* 2937-2939——Advantages for purposes of appeal, of the evidence being all recorded by the judge in the English language, *ib.* 3026-3029. 3066-3068——A knowledge of the native language for colloquial purposes would be sufficient, if the English language be used, *Waller* 4871.

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (*MOFUSSIL*)—continued.

V. *Language of the Courts*—continued.

2. Proposed use of the English Language—*continued.*

Gradual way in which the English language should be introduced into the courts, *Waller* 5115-5133; *Warden* 6083. 6086. 7552. 7560——Impression that Mr. Hawkins does not object to the introduction of the English language, provided that it be done gradually, *Waller* 5120——Three years' notice might be given before introduction, *ib.* 5121——It might first be tried in some one district, *ib.*

Expediency, if the English language be used, of the judges being still acquainted with the native languages, *Ouchterlony* 5557, 5558; *Warden* 6083. 6087. 6091; *Mullens* 7326-7328——Aptness of the natives in learning foreign languages, *Warden* 6083. 6262——If the English language be used in the courts, any attempt at deception on the part of the interpreters would be detected by the pleaders on either side, *ib.* 6104-6109——Circumstance of the use of the English language in the Supreme Court at Bombay not being distasteful to the natives, *ib.* 6119-6122——The interpreters, if the English language be introduced into the Zillah courts, will not be more costly than the present staff of the judges, *ib.* 6125.

A large number of European officers would be required in order to carry out the use of the English language, *Mullens* 7277. 7288, 7289——Satisfaction rather than dissatisfaction on the part of the natives if the English language be introduced, *ib.* 7278-7290——Further statement as to the interpreters, &c. necessary if the English language be used; necessity of the continued employment of some natives, *Warden* 7552. 7560.

3. *Objections to the foregoing Proposition:*

Witness prefers the use of the vernacular in the courts of law, *Tremenheere* 363——Evidence strongly opposed to the introduction of the English language into the courts; the natives would not feel confidence in its use, and would labour under a feeling that injustice was being done to them, *Mackenzie* 3818-3831. 3845. 3866. 3919-3921; *Hawkins* 4145, 4146. 4148. 4262-4268. 4293. 4338-4341. 4391-4393. 4414, *et seq.* 4487-4503——The confidence felt in the administration of justice in the Supreme Court and the Small Cause Court at Calcutta does not offer any parallel to the proposed use of the English language in the Mofussil courts, *Mackenzie* 3852-3866.

Even if there were the most honest interpreters in the world the natives would not be satisfied that justice was being done, *Hawkins* 4293; *Martin* 9173. 9243-9245——Greater means of the Bengalese for understanding proceedings in Hindoostanee than in English, *Hawkins* 4414-4424——As regards the use of the English language it is not correct to argue from the Presidency towns to the Mofussil, *ib.* 4433. 4441. 4452——Doubt whether the majority of the natives in Calcutta prefer the use of the English language in the Supreme Court, *ib.* 4453——Witness does not object to the gradual introduction of the English language among the people by means of extended education; and the time may come when its introduction into the courts may be advisable, *ib.* 4490-4497. 4501.

Objections to the English language being the language of record in the Zillah courts, or in the Sudder Dewanny Adawlut, *Baillie* 4522-4524. 4618-4622——The use of the English language should be confined to the examination of Englishmen who may be parties to any suit, *ib.* 4523. 4564-4566. 4614-4620——The natives would not feel confidence in the use of the English language, *ib.* 4524——Probable advantage if native evidence were taken down by the judge in English as a record of the case, *ib.* 4662——Requirement of a larger rather than a smaller staff under a system of interpreters in lieu of omlahs, *ib.* 4663-4666——Probable feeling of the natives in the event of the English language being substituted for the Hindostanee as the spoken language of the courts, *ib.* 4814-4821.

In all cases where natives are concerned it is very inexpedient to introduce the English language into the courts, *Onslow* 6573, 6574. 6596, 6597——As regards the introduction of the English language into the courts generally witness considers the proposition impracticable and absurd, *ib.* 6897-6899——The use of the English language and of English barristers as judges, with English modes of procedure, would be the very worst thing that could be introduced into the Broach district, *Landon* 8703-8705.

Grounds for strongly objecting to the introduction of the English language into the Mofussil courts, *Mills* 8872, 8873. 9009-9017; *Bidwell* 9348-9365. 9382——It would be a most dangerous innovation, *Mills* 8872——Alarm and dissatisfaction among the natives if the English language be introduced, *ib.* 8873——Occasional inaccuracies of the interpreters in the Supreme Court at Calcutta, *Bidwell* 9349-9351. 9379, 9380——Necessity of the judges understanding the native language even if the English language be introduced, *ib.* 9381, 9382.

Grounds for strenuously objecting to the introduction of the English language into the Mofussil courts; opinion that it would be very unpopular among the people, would not lead to any improvement in the administration of justice, and would, in fact, be one of the greatest misfortunes that could happen to the country, *Marsham* 9445-9449. 9693-9703. 9782-9784——Reference to the abolition of the Persian language in the courts

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (MOFUSSIL)—continued.

V. *Language of the Courts*—continued.

3. Objections to the foregoing Proposition—*continued.*

courts as having been considered a great boon by the people, who were entirely unacquainted with it, *Marsham* 9446-9448——Confidence of the people in the native language as now used in the courts, *ib.* 9700-9702——The language now used in the courts in Bengal is understood by the people, *ib.* 9784——As a matter of policy the use of the native language in the courts should be retained, *Saunders* 9890.

VI. *Judges:*

1. Qualifications of the Native Judges:

Unfitness of many of the native judges to administer justice to the natives, *Tremenheere* 341. 364. 382 *et seq.*; *Theobald* 1285——Natives should not preside in the criminal courts at all; they are not fitted for the position either by moral character or legal training, *Mac Nair* 2482-2488——Low morality in many instances of the native judges; instance of this in the dismissal of a sudder ameen for bribery, *Wise* 3042. 3150-3154.

More partial and prejudiced action of Mahomedans than of Hindoos as judges, *Mackenzie* 3767-3770——The native sudder ameens and moonsiffs are, as lawyers, competent, but are open to corruption, *ib.* 3808——The native judges in Bombay are entirely unfit for the impartial administration of justice, *Landon* 8447, 8448——Corrupt character of the native judges in the North-Western Provinces, *Saunders* 9876. 10052-10056.

Witness's limited experience of the Mofussil courts in Bengal does not enable him to confirm the statements which have been made as to the inefficiency of the judges and magistrates, *Baillie* 4580-4584——The native judges have on the whole turned out very well, *Warden* 6195. 6265——The character of the native judges has improved of late years, owing to their increased pay, education and supervision, *Mills* 8837-8839. 9001-9005. 9064-9072——Experience upon which witness grounds the opinion that the native judges on the whole perform their work well, *ib.* 8903——The character of the native judges in Bengal varied very considerably, but on the whole witness was not satisfied with them, *W. H. Martin* 9142, 9143.

Very great improvement of late years in the character of the native judges, owing very much to their better education; they are now very trustworthy, but about thirty years ago they were very corrupt, *Bidwell* 9283, 9284. 9289-9293. 9328-9334. 9342, 9343. 9371-9373——Opinion that the native judges in India are as good as any judges in the world out of England, *ib.* 9290——Less efficiency of native magistrates than of native judges, *ib.* 9294, 9295. 9312, 9313. 9377, 9378——Propriety of Europeans being subject to the civil courts in the mofussil, *ib.* 9344-9347.

Dissent from the evidence that the native judges are universally corrupt, *Marsham* 9405——Since 1831, when the native judges were exceedingly deficient in all judicial qualifications, Government has done everything in its power to improve the body, and with considerable success, *ib.* 9405-9408. 9417-9419——Necessity of an examination before the promotion of moonsiffs to the offices of sudder ameen, and principal sudder ameen, *ib.* 9405——Higher and better educated class of society from which the native judges are now selected than on the introduction of the system, *ib.* 9419.

2. Recommended Employment generally of Europeans:

Importance, on the score of improved administration, of substituting Europeans, educated in India, for the native officials now employed as sudder ameens, moonsiffs, &c., *Tremenheere* 341. 364, 365. 382-386. 401-403. 425-443. 472-478. 487, 488——Witness would only employ Europeans until the natives proved themselves properly qualified, *ib.* 474-477——Expediency of an additional number of European judges, *Freeman* 1633.

Sundry advantages to be derived from a substitution of English for native judges in all the Mofussil courts, *Mac Nair* 2406-2411. 2482-2488. 2528. 2617-2619; *Landon* 8415 *et seq.*; *Saunders* 9889. 10056——For salaries of 3,000 *l.* a year well-trained English judges might be procured, *Wise* 3033, 3034. 3077——Sufficiency of the salaries in order to induce competent men to go out from this country, *Mackenzie* 3809-3811; *Waller* 4870. 4875——Natives should be judges only in civil cases, with an appeal to an European judge, *Mackenzie* 3832-3835.

Trustworthy interpreters might be obtained under European judges, but the latter would not generally require interpreters, *Landon* 8416-8421——Exoneration of the European judges from the charge of bribery, *ib.* 8435, 8436——Opportunity by departing from the exclusiveness of the covenanted service, and by employing Europeans in India or from England, of obtaining an adequate number of well-qualified Europeans for presiding over all the courts, *Saunders* 9889. 10059-10063. 10110, 10111.

3. Preference of the Natives for European Judges:

The natives have more confidence in the decision of European than of native judges, *Mac Nair* 2397-2400; *Wingate* 7861; *Landon* 8449-8452. 8588-8591; *Mills* 9006.

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (*MOFUSSIL*)—continued.

VI. *Judges*—continued.

3. Preference of the Natives for European Judges—*continued.*

9073; *W. H. Martin* 9242; *Bidwell* 9284. 9309. 9343. 9346, 9347——Satisfaction to be felt by the natives with the extended employment of competent European judges, *Freeman* 1784——Request in a statement by certain ryots in Bengal that justice be administered to them by Europeans, *Mullens* 7159——The natives have a very high opinion of the integrity of the European judges, *Marsham* 9450.

4. Disapproval of the Non-employment of Natives:

Approval of the retention of the native civil judges, *Dalrymple* 3312-3318——Doubt whether greater efficiency would be attained by the appointment of well-educated young Englishmen to the situations of sudder ameens and moonsiffs, *Baillie* 4589——Native judges must be trusted under a system empowering them to call the parties before them, *ib.* 4772-4774——Approval of the appointment of natives as judges; they should, however, have more education and higher salaries, *Warden* 6265-6270.

Objection to substituting barristers from this country for natives in the offices of sudder ameen and moonsiff, *Wingate* 7862-7865——Approval of the employment of natives as sudder ameens, &c., as the only means of fitting them for office, *Mills* 8840-8846——Properly qualified Europeans cannot be procured at the pay of the native judges, *Bidwell* 9285. 9288. 9314; *Marsham* 9560, 9561——Approval of the present system of employing European judges as supervisors of the native judges, and of training and improving the latter by actual employment under such supervision, *Marsham* 9411-9424.

VII. *Law Officer, or Assessor:*

Practice in regard to the Mahomedan law officer whom the English judge may call in to act with him as assessor; the judge is not dependent upon the assessor in arriving at a decision, *Mills* 9041-9060.

VIII. *Omlah, or Native Subordinates:*

Corrupt character of the omlah; the European magistrates are to a great extent in their hands, *Theobald* 949, 950. 1040-1042. 1105, 1106——Evidence relative to the omlah, or native officers attached to the courts; their duties and their corrupt character, *Auld* 1345-1348. 1359-1372. 1396-1419——Instances of planters having many decrees remaining unexecuted; corrupt character of the omlah on this score, *ib.* 1403-1414——The corrupt state of the omlah is a main cause of the insecurity of property, *Freeman* 1477, 1478——Evils of the present system of interpreters in there not being a proper check upon them; how this may be remedied by a proper system of advocates, *ib.* 1737-1744.

Very corrupt character of the native omlah, *Mac Nair* 2000, 2004, 2005. 2484; *Wise* 2643; *Saunders* 9876——Check upon the mal-practices of the omlah when the judges are efficient, *Wise* 3025. 3030. 3115-3117——The native omlah would still be required under a system comprising the English language and efficient interpreters, but their bribery would be duly checked, *ib.* 3115-3117. 3158, 3159——Influence of the sheristadars over the European judges; belief that the British officers generally are more or less influenced by their native subordinates, *Warden* 6110-6113. 6272-6274——Reference to Mr. Elphinstone's delineation of the character of the Hindoos as illustrating the injurious operation of the system of omlah under the Company's courts, *ib.* 7511-7513.

Influence of the native omlah equally in the case of judges appointed from this country as of judges appointed from the service in India, *Mills* 9010-9012——In the Supreme Court the judges are not influenced by the omlah in the same way as in the Company's courts, *ib.* 9013-9017——Witness was never dependent on his omlah, *W. H. Martin* 9246——The judge or magistrate is not, as a rule, under the influence of his omlah; the reverse is the rule, *Bidwell* 9270. 9300-9302.

IX. *Juries:*

Inefficiency of the native juries in the mofussil, but not in the presidency towns, *Baillie* 4781-4785——Practice as regards juries in the trial of criminal cases in the Mofussil; the system might with advantage be extended, *Mills* 9033, 9034. 9061, 9062.

X. *Witnesses:*

Respectable natives never give evidence willingly, *Dalrymple* 3517; *Mackenzie* 3592——Unreliable nature of the native evidence in the criminal courts; it is, as a rule, hired and false, *Mackenzie* 3587. 3592——Reference to the antipathy of respectable natives to appear in court as witnesses; probable cause, *Baillie* 4797. 4799, 4800. 4828, 4829; *Landon* 8422-8430——Means suggested by the Law Commission for obviating the difficulty, as regards the personal attendance of witnesses, *Baillie* 4798.

XI. *Generally*

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (MOFUSSIL)—continued.

XI. *Generally as to the Law and Procedure:*

1. Law which now prevails in the Mofussil:

In the event of a Hindoo sueing a Mahomedan, or *vice versâ*, the law of the defendant prevails, both in Calcutta and the mofussil, *Hawkins* 4162-4164——Numerous modifications of the Mahomedan law, as now administered, *ib.* 4297-4299——Rule in the English law as to the law to be introduced into the colonies, *Baillie* 4668-4674——In the absence of specific law and usage the judge in India is to determine by justice, equity, and good conscience, *ib.* 4681-4686.

2. Importance of a proper Substantive Law:

It is exceedingly important to enact a Mofussil substantive civil law; steps taken by the several Law Commissioners with a view to supplying this want, *Hawkins* 4166-4179——Great importance of a proper substantive law in the Mofussil, *Baillie* 4529-4533. 4599——Objection to comprising the Presidency towns in a substantive law for the Mofussil, *ib.* 4599——Doubt as to the expediency of applying the English law in all cases of controversy between man and man, in which the law of the country or usage cannot be taken as a guide; advantage, however, of specific rules rather than of the present uncertainty, *ib.* 4687-4705——The body of English law should be introduced, with such modifications as are necessary to suit the religious habits and social condition of the natives, *Waller* 4898——Further evidence as to the importance of introducing the substance of the English law all over India; equity must not, however, be separate from law, as in this country, *ib.* 5061, 5062. 5192-5198.

3. Liability of Government to be sued in the Courts:

Doubt as to Government being liable to be sued in the Mofussil courts, *Mac Nair* 2532, 2533——Civil cases are often brought successfully against Government, *Mackenzie* 3896, 3897——Footing of perfect equality upon which the Government of India have placed themselves with the natives in the courts of law, *Mills* 8886-8890; *Marsham* 9492-9496.

4. Exemption of Judicial Officers from Legal Liability:

Magistrates and judicial officers of all classes should be put under proper legal responsibility to the public, *Theobald* 995-997——Origin of the Act XVIII. of 1850, for the "Protection of Judicial Officers," *ib.* 995——Absence or difficulty of redress in the event of planters being aggrieved by the civil servants, *Freeman* 1830-1834. 1841——Since 1850 the civil servants are not so responsible as previously, in the event of misconduct, *Dalrymple* 3472-3474. 3523-3525.

Explanation as to the effect of the Act of 1850, giving protection to the Company's judicial officers in the Mofussil; case of Calder *v.* Halkett adverted to hereon, as showing that the civil servants of the Company had not the same protection as magistrates and judges in England, *Hawkins* 4182-4186——The Act of 1850 was founded on the recommendation of Sir Lawrence Peel, *ib.* 4183. 4186.

Explanation in support of former evidence as to the origin of the Act XVIII, the Act of 1850, *Theobald* 9390——Statement in support of former evidence, and in correction of the evidence of Mr. Hawkins, in regard to the question of the legal liability of Indian judicial officers previously to the Act of 1850, *ib.*

5. Question as to an extension of the Jurisdiction of the Supreme Courts:

Feeling among the natives and in the Mofussil against an extension of the Supreme Court, *Hawkins* 4160, 4161. 4432-4437——Suggestions with a view to a gradual approximation of the Queen's and Company's courts, so that in course of time an amalgamation may be effected, *ib.* 4161——In matters of law and practice the Mofussil and Calcutta are as distinct as two foreign countries, *Baillie* 4531. 4599——An amalgamation of the Supreme Court and Nizamut Adawlut in course of time can best be effected by first introducing a new system of procedure into the Mofussil courts, *ib.* 4597-4599.

Belief that the great majority of the natives prefer the Queen's system of law to the Company's system, *Waller* 5133-5141——Reference to and confirmation of certain documentary evidence, showing the strong preference of natives as well as of Europeans for the Queen's courts over the Company's courts, *ib.* 5142-5154——The attempt of Sir John Peter Grant to extent the jurisdiction of the Supreme Court was differently received in the Mofussil in Bombay, *Warden* 7473-7476.

Strong repugnance on the part of many natives to any extension of the jurisdiction of the Supreme Court, *Mills* 8881-8884; *Marsham* 9513. 9515——The Rajah of Burdwan, who is the largest landowner in Bengal, avoids sleeping in Calcutta in order to continue exempt from the jurisdiction of the Supreme Court, *Marsham* 9514, 9515.

6. Appeals; Grievances on this score:

Multiplication of appeals from the native courts, *Freeman* 1745-1749; *Mackenzie* 3587——Appeals, as at present, should be almost entirely disallowed, *Mackenzie* 3715.

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (MOFUSSIL)—continued.

XI. *Generally as to the Law and Procedure*—continued.

6. Appeals; Grievances on this score—*continued.*

3795-3801. 3812-3817——The great defect in the civil courts is the great multiplication of suits and appeals, after decrees are obtained, *Mackenzie* 3835, 3836——Expediency of a power of appeal in each case to the superior court in Calcutta, *Hawkins* 4106——Necessity of means for putting an end to the false claims which are made before decrees are executed, *ib.* 4222-4224——Evil of the frequent appeals, more particularly of the special appeals under the present system; one appeal is quite enough, *Baillie* 4534-4537.

In the Company's courts the trouble of the litigant may be said really to commence on the day when he gets his decree, *Waller* 4877——Approval of a judicious limit to the right of appeal, the natives being very litigious, *Onslow* 6569, 6570——Grievances consequent upon the delay in obtaining the fulfilment of decrees, *Landon* 8400——Practice as regards appeals from witness's decisions as judge in the Mofussil in Bengal, *Martin* 9247-9250.

7. Improvements to be derived from simplifying the Procedure:

Improvement if a system of oral evidence were introduced into the courts, *Mac Nair* 2115-2118——Facility for false swearing and corruption under the present procedure of the courts, *ib.* 2131, 2132——New laws or constant changes in existing laws are altogether inexpedient, the main want being a summary and proper administration of the law so as give justice without litigation, *Mackenzie* 3663-3666. 3474. 3973. 3975, 3976——Necessity of an efficient magistracy and police, and of a short and simple system in the courts as means towards increasing the revenue, *ib.* 3713-3715——A summary system in the courts in Bengal, such as the Punjaub or non-regulation system, unfettered by forms or rules, would be far preferable to the tardiness, costliness, and injustice of the present system, *ib.* 3714, 3715. 3795-3801——Summary mode of administration of justice under which the ryots were better off in former times, although they then paid larger rents for their lands, *ib.* 3956-3961.

Witness infinitely prefers the Punjaub non-regulation system to the present tedious system in Bengal, *Hawkins* 4482, 4483——Badness of the civil procedure in its having became a heap of technicalities, *Baillie* 4514——Radical defect of the system of legal procedure in its being the use of an English system without proper subordinate agents to carry it out, *ib.* 4514-4518——Simplicity of the former, or Mahomedan system of procedure, *ib.* 4514. 4518. 4611——Consideration of the question of the general untrustworthiness of the native testimony in the Mofussil; advantage hereon of improved agency in the courts, but still more so of a simple procedure, and of an examination face to face, *ib.* 4764-4771. 4794-4796.

Decided objection to the introduction of the non-regulation system into Bengal, *Waller* 4889——Expediency of a simpler and cheaper course of proceeding, especially in petty cases, *Warden* 6096, 6097. 6174, 6175——Approval of a summary system of justice in the mofussil upon the principle of the Small Cause Court at Calcutta, *Mullens* 7282-7289——Great improvement if there were a summary process by which judgment and execution could speedily be obtained, *Landon* 8402-8406——A more summary system is required in criminal as well as in civil cases, *ib.* 8428——An abrogation of the regulations, and the employment exclusively of European judges, are the best remedy for the evil operation of the courts, *ib.* 8696. 8702.

As regards the Punjaub code, witness is not prepared to give it his entire approval, but considers that the practice of the courts should be made more simple and rapid, *Mills* 8992-9000——The system of legal procedure in Bengal is most unpopular with the natives, and it is of urgent importance to introduce a summary and inexpensive system, as in the Punjaub, *Marsham* 9702-9708——Great improvement if there were a despotic or summary mode of administering justice, *Saunders* 9881-9888.

8. Simple and summary Procedure recommended by the Law Commission:

Explanation of the main points of procedure in civil cases under the new code; great improvement to be effected thereby, *Hawkins* 4115-4144——Total abolition of written pleadings under the new code, *ib.* 4115. 4119. 4127——System under the new code in regard to the examination of the parties and the framing of the issues, *ib.* 4115-4118. 4128-4143——Single appeal under the new code in civil cases, *ib.* 4115.

Inaccuracy of certain statements in objection to the civil procedure under the new code, *Hawkins* 4124-4144——The procedure in the Punjaub is not more summary than under the new code, *ib.* 4136, 4137——Explanation as to parties being allowed to give in written statements; these are not to be in the nature of written pleadings, *ib.* 4140-4143——The best system of procedure is that provided by the code framed by the Law Commission, *ib.* 4483.

Importance of a thorough simplification of the system of procedure, which can best be effected by introducing the recommendations of the late Law Commission, or, in short, the

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (MOFUSSIL)—continued.

XI. *Generally as to the Law and Procedure*—continued.

8. Simple and Summary Procedure recommended, &c.—*continued.*

the county court system, *Baillie* 4518-4521——Witness concurs generally in the views of Mr. Hawkins as to the legal reform required in India, *ib.* 4603, 4604——Importance of the recommendation of the Law Commissioners that the proceedings in the mofussil courts should be *vivâ voce*, and that written pleadings should be abolished, *ib.* 4655-4661.

9. Petitions representing the Views of Indigo Planters, &c. in Bengal:

Petition of the Indigo Planters' Association in Bengal complaining of the state of the courts, police, &c., and praying for certain reforms therein, *App.* (*Fourth Rep.*) *p.* 229-233.

Petition of landed proprietors, indigo planters, merchants, and traders in Calcutta and the Lower Provinces of Bengal, complaining of the measures contemplated by the Law Commissioners, more especially as regards an abolition of the Supreme Court, *App.* (*Fourth Rep.*) *p.* 233-235.

Petition from British subjects generally in Bengal, in strong opposition to the measures proposed by the Law Commissioners, *App.* (*Fourth Rep.*) *p.* 236-238.

XII. *Effect of the mode of Administration upon the progress of Settlement:*

A great improvement in the courts is one of the remedies required as an encouragement to settlement, *Theobald* 877. 886; *Saunders* 10257, 10258——Witness attributes the non-increase of settlers in Bengal mainly to the bad state of the laws and of the police, and the general insecurity of person and property, *Theobald* 1095. 1170. 1172, 1173; *Mac Nair* 2053-2055. 2606; *Dalrymple* 3236-3238. 3282-3293. 3352-3370. 3574, 3575.

The distrust in the officers of the courts is injurious to settlement, *Auld* 1370-1372——Witness cannot call to mind any instance of a settler being driven out of the Mofussil in Bengal through the state of the judicial system or police, *ib.* 1429, 1430——Statement as to witness having been obliged, by false charges against him, and by a mal-administration of justice, to quit an estate near Calcutta, for which he gave 20,000*l.*, and to employ a manager over it at a salary of 500 rupees a month, *Freeman* 1473-1475. 1478-1484——Rights were claimed by the tenants which were entirely abrogated under the sale, *ib.* 1475. 1885. 1891-1894——Fraudulent manner in which these claims were supported, *ib.* 1475. 1885. 1894-1897.

Great increase of Europeans in Calcutta, and almost total absence of increase in the Mofussil, attributed to the mal-administration of justice and the insecurity of property in the latter place as compared with the operation of the Queen's courts in the former, *Freeman* 1512-1517——The way in which justice is administered deters, not only European settlement, but native enterprise, *ib.* 1771——Further statement as to the difficulties experienced by witness from the under-tenants on the estate purchased by him in the Hooghly district for 20,000*l.*, *ib.* 1772. 1774. 1885. 1890-1897——Sum realised by witness on the sale of the Hooghly estate, *ib.* 1898-1902——The mode of administration of justice, rather than the laws relative to land, is the main obstacle to settlement, *Dalrymple* 3352-3354.

Objections urged by the settlers to the system of administration; question as to the system being a check to increased settlement, *Hawkins* 4319-4323. 4329——Evidence to the effect that the mode of administration of justice in the interior has not operated in deterring settlements; increase of settlement in the Presidency towns adverted to hereon, *Baillie* 4512, 4513. 4585. 4633-4642. 4741, 4742. 4826, 4827——With reference to certain enumerated reforms required, witness is not aware that they have prevented European settlement, *ib.* 4741, 4742——Probable injury to planters by means of false charges against them, *ib.* 4802, 4803.

The required improvements in the administration of justice will not only encourage British settlement, but will lead to an improvement of the condition of the natives, *Waller* 5136, 5137——Witness has heard from mercantile men that capital has been deterred from India by the defective system of administration, *Ouchterlony* 5465——Attention should be paid to the complaints of the settlers against being placed under the system of law as administered by the Company's courts, *ib.* 5523.

The mode of administering justice in Bombay is some obstruction to successful colonisation, *Warden* 6173-6176——Indirect obstacle to settlement through the very bad law courts of the country, *Mullens* 7142. 6169——Discouragement of settlement in India through the long delays in remedying many of the defects, of which settlers and planters have complained, *ib.* 7153.

The mode of administration of justice and the state of the police in the Mofussil in Bengal, though defective, were not such in witness's time as to deter Europeans from settling as indigo planters, *Mills* 8770-8773. 8782, 8783——Evidence in disproof of the

Reports, 1857-8—*continued.*

ADMINISTRATION OF JUSTICE (*MOFUSSIL*)—continued.

XII. *Effect of the mode of Administration upon the progress, &c.*—continued.

assertion that the state of the police and of the courts in the Mofussil is an obstacle to the increase of European enterprise, *Marsham* 9503-9512.

Advances to Cultivators. Explanation as to the system of native money lending to cultivators in Bengal, and the usurious price paid for loans in the interior of the country, *MacNair* 2000, 2001; *Wise* 2700, 2701. 2775, 2776. 2827-2845. 2981-2983——Scarcely anything is done by cultivators or others without an advance, *MacNair* 2096——Way in which the accounts are made up in the case of advances by European indigo planters, *ib.* 2097-2101——The European planters do not charge exorbitant rates or loans to the ryots, *ib.* 2102-2105.

Opinion that the system of advances by the indigo planters is not an advantageous mode of applying capital; the indigo houses, in fact, are generally very unsuccessful, *Baillie* 4553-4555. 4736, 4737. 4804-4810. 4832.——Absence of obstacle to the employment of capital in the purchase of produce in India; large amounts are in fact invested in indigo advances, *ib.* 4600-4602——Witness, in the Neilgherries, never made an advance for produce, which system he considers to be the curse of India, *Fowler* 5742——Reference to a statement by certain ryots in Bengal as to the evil operation of the indigo houses and the system of advances; weight attached to this statement, *Mullens* 7154-7168——Injurious operation of the system of advances to the ryots, and of the forced cultivation comprised therein, so that the increased rate of wages is not so much benefit to the cultivators, *ib.* 7212-7218. 7314-7319.

See also *Contract Law. Indigo and Indigo Planters.*

Affrays and Affray Bill (*Bengal*). Particulars as to the Affray Bill for Bengal proposed by the Government about four years ago, and subsequently dropped; grounds upon which the commercial interest opposed this Bill, *Theobald* 965——In dropping the Affray Bill, an improved law was not brought forward, *ib.*——Different grounds of the objection of the planters to the Affray Bill, *ib.* 1232, 1233——Explanation as to the employment by the planters of their own establishments, or of "lateeals," in protecting their interests, *ib.* 1100——Lateeals, or bludgeon-men, are not, to witness's knowledge, kept in pay by the Bengal planters, *Freeman* 1835. 1840.

Fewer disputes and affrays of late years than formerly between the European zemindars and the ryots respecting the rights of property, *MacNair* 2495-2497——Necessity of the present resort by Europeans to self-defensive measures, *Wise* 2643. 2646; *Waller* 4887——The zemindars, European as well as native, find it necessary to protect themselves, and occasionally to collect their rents by force, *Mackenzie* 3807. 3889, 3890.

Frequent affrays between indigo planters and zemindars about 30 years ago; various causes of these affrays, *Miles* 8774-8781——Of late years affrays between planters and zemindars have greatly decreased, *ib.* 8774. 9102-9106——Entire inadequacy of the police in Lower Bengal, so that the planters and zemindars resort to means for their own protection, and disgraceful and violent affrays are frequently the result, *Marsham* 9435-9440. 9777-9781——There were ten times as many affrays in former years as at present, *ib.* 9777——The affrays between the planters have been largely owing to the want of a definite boundary of estates, *ib.* 9778. 9780.

Report of the secretary of the Indigo Planters' Association on the Act IV. Bill, and Revised Affray and Mochulka Bill, read at a meeting of the society on the 5th April 1855, *App.* (*Fourth Rep.*) *p.* 238-242——Resolutions of the meeting with reference to the Bill in question; petition to the Legislative Council on the subject, *ib.* 242, 243.

Petition and report of the Indigo Planters' Association relative to the original Affray Bill, *App.* (*Fourth Rep.*) *p.* 251-257——Letter from the secretary of the Bengal Chamber of Commerce, dated 28 October 1854, in objection to the proposed Affray Bill, *ib.* 257.

Agra. See *North Western Provinces.*

Agriculture. Urgent importance of agricultural improvements in India, agriculture as a science having been altogether neglected, *Tremenheere* 342. 348-350——The native does not improve the soil, or its resources; he wants an example, *Theobald* 1177——The cultivated lands of India are mostly worn-out soils, *Fowler* 5818. 5835-5839. 5844-5847——Importance of British capital and science in order to improve the worn-out soils, *ib.* 5882-5886

Reports, 1857-8—*continued.*

Agriculture—continued.

5882-5886——Effect of European settlement to make the nations better agriculturists, *Onslow* 6605-6613——The use of agricultural machinery is by no means incompatible with small occupations as in Bombay, *Wingate* 7691-7694.

See also *Advances to Cultivators. Bengal. Bombay. Coffee. Cost of Production. Cotton. Drought. European Capital and Skill. Hill Districts. Indigo and Indigo Planters. Irrigation. Labour. Land Revenue Settlement, and Tenure and Sale of Land. Manures. Ploughing. Rain. Seeds. Sugar. Tea. Wheat.*

Algeria. Successful colonization by the French on the hills in Algeria, *Freeman* 1528, 1529——Facilities for colonization respectively in India and Algeria, *ib.* 1750-1752.

Appeals (*Court of Law*). See *Administration of Justice*, XI. 6. *Appellate Court.*

Appellate Court. Approval of there being one grand appellate court at Calcutta, constituted of Queen's judges, the covenanted service being at the same time abolished, *Waller* 5223, 5224.

Arbitration of Disputes. Frequent practice of the natives in Bengal to submit disputes to the settlers for arbitration, *Wise* 2780-2786——Settlement of disputes at times through punchayets, or village juries, *ib.* 2785-2789.

Armogum Shoal. Means for forming a harbour inside the Armogum shoal; large amount estimated many years ago for the cost of this work, *Ouchterlony* 5289-5292.

Arracan. Large export of rice from Akyab, in Arracan, through the enterprise mainly of Sir Archibald Bogle; *Tremenheere* 157-161.

Assam. Reference to Assam as being a very improving country, *Hooker* 722——Facilities for European colonisation in the tea districts of Assam, and in the hilly districts generally, *Wise* 2670-2679——The land in Assam chiefly belongs to Government; favourable terms on which it may be leased, *ib.* 2672, 2673. 2870. 2879-2882——Inadequate means of communication between Calcutta and Assam; Government have put two steamers to the route, *ib.* 2794-2802. 2871-2873——Difficulty as regards the supply of labour in Assam, *ib.* 2875, 2876.

Encouragement given by Government to tea cultivation and European settlement in Assam, *Mills* 8811-8813——Particulars relative to the Assam country, and the impediments to increased settlement and cultivation therein; reference to an official report by witness on this subject in 1853, *ib.* 8821-8836——There is a great want of labour, *ib.* 8822*, 8823. 8833——Expediency of greater liberality in granting land in Assam; witness mentioned in his report that it would be better to sell the waste land, *ib.* 8822*-8833. 8954-8962——Few European settlers besides the Assam Tea Company, *ib.* 8834——Assam is a fine field for the employment of European capital, but not for colonisation, *ib.* 9020.

See also *Tea.*

Auld, Stewart Jolly. (Analysis of his Evidence.)—Indigo planter and manager of an estate in Lower Bengal; has been there for sixteen years, and has only recently come to England, 1309-1314——Was for a short period before leaving India an honorary assistant magistrate, 1315-1320——Written opinion given by witness in India as to the benefits to be derived from appointing planters, &c., in the Mofussil as magistrates, and as to the powers to be vested in them, 1316. 1318, 1319——Position and duties of the honorary magistrates, 1317. 1321. 1420, 1421——Great usefulness of the appointments in question; favourable feeling of the natives on the subject, 1322-1328.

Absence of disposition in the Government in India to prevent European settlement, 1329-1331——Check to settlement in Bengal through the bad state of the police, who are exceedingly corrupt, 1329, 1330. 1343, 1344. 1373-1377. 1395. 1429, 1430——Difficulty in remedying the inefficiency of the police, or of the judicial system, on account of the badness of the tools with which the Government are obliged to work, 1330-1337. 1390-1393. 1428——As manager of the estate of Messrs. Watson & Co., witness did not experience any hostility from the local authorities; doubt as to Englishmen being equally unimpeded in other districts, 1338-1343. 1349-1354. 1373-1377. 1429, 1430.

Evidence relative to the omlah, or native officers attached to the courts; their duties, and their corrupt character, 1345-1348. 1359-1372. 1396-1419——The appointment of honorary magistrates had reference to the heavy business devolving upon the paid magistrates, 1355-1358——The distrust in the officers of the courts is injurious to settlement, 1370-1372——Advantage of honorary magistrates in their local knowledge, 1378-1382——The government are doubtless aware of the character of the police, &c., and some slight improvements have lately been made, 1383-1389.

Advantage if, on account of the corrupt character of the omlah and police, European superintendence or agency were introduced, 1390-1393. 1418. 1455——Appointment

Reports, 1857-8—*continued.*

Auld, Stewart Jolly. (Analysis of his Evidence)—*continued.*

recently of honorary magistrates further adverted to; probability of the appointments having resulted through the mutiny, 1422-1426. 1440-1454——Witness has found efficiency and inefficiency in the covenanted officers; some have been ignorant of the languages, 1427——Tenure of land in Midnapore and Rajshaie; there is no obstacle to purchase by Europeans, 1431-1439.

B.

Baba Booden Hills. Excellent climate of the Baba Booden Hills, *Onslow* 6777.

Baikie, Robert, M.D. (Analysis of his Evidence.)—Has been seventeen years in the Madras Presidency; resided for seven years in the Neilgherry Hills, 732-735——Unhealthiness of hill climates in India where the elevation is below 3,500 feet, 735, 736——Advantage of the Neilgherries on the score of temperature, and of the comparatively small fall of rain, 738-740——Exceedingly heavy falls of rain on the western ghauts in Southern India, 740-745——Extent and nature of the soil in the Neilgherries, 746——Great advantage if there were military stations in the Neilgherries, 747, 748.

Obstacles to cultivation by any large number of European emigrants in Southern India, 749-757. 785——Facility and advantage of cultivation in the Neilgherries, Mysore, &c., by a higher class of settlers, who should direct native labour, 749-760. 784-789. 836-845——Doubt whether Europeans can settle in the Neilgherries without deterioration in course of time, 758. 771-774. 834, 835——Excellent European schools in the Neilgherries, 761, 762——There are in the Neilgherries three distinct climates; character of the climate as compared with England, 763. 771-778——Limited extent to which cultivation was carried in the Neilgherries when witness was last there, that is, in 1842; 764. 790. 804-810.

Considerable importance of branch lines of railway to the foot of the Neilgherries and other hill districts, 765, 766——Excellent roads communicating with the hills in Madras, 767-770. 798-803——The Neilgherries are 7,365 feet above the level of the sea, 775——Absence of any obstacles on the part of government to European settlement in the Neilgherries, 779-783. 790——Nature of the land tenure; rights respectively of government and of the natives, 783. 786, 787. 790-794. 823-828——Belt of unhealthy country on the approach to the Neilgherries, 789.

Selection of the Neilgherries by government in 1819 as a sanitary station for officers, 791-797——Favourable effect of the climate of these hills upon the officers and men under medical charge of witness; the latter, however, suffered from not being under proper discipline, 811-817. 823——Degeneracy of the Portuguese who settled many years ago in Ganjam, 818-821. 829-832——Belief that in the plains the European race would die out in the third generation, 833——Facility for raising coffee in the Neilgherries; doubt whether other products can be raised with a commercial profit, 836, 837. 844, 845——There are diseases peculiar to the Neilgherries, 842, 843.

Baillie, Neil Benjamin Edmonstone. (Analysis of his Evidence.)—Was in India continuously from 1823 to 1844; resided exclusively in Calcutta, 4505-4507——Was an attorney of the Supreme Court, also for twelve years a vakeel, and for six years of that time the Government pleader, in the Sudder Dewanny Adawlut, 4508——Concurrence in the evidence of other witnesses that the native police in Bengal are about as bad as they well can be, 4509-4511——The bad state of the police is less an obstruction to the settlement of Europeans than of the natives, 4509——Approval of the employment of European serjeants in the police, 4511——Improvement if European detectives were also employed in the police, *ib.*

Belief that the defects of the civil procedure generally have not deterred European settlement in the Mofussil, 4512, 4513. 4585——Badness of the civil procedure in its having become a heap of technicalities, 4514——Simplicity of the former, or Mahomedan system of procedure, 4514. 4518. 4611——Radical defect of the system of legal procedure in its being the use of an English system without proper subordinate agents to carry it out, 4514-4518——Importance of a thorough simplification of the system of procedure, which can best be effected by introducing the recommendations of the late Law Commission, or, in short, the county court system, 4518-4521.

Objections to the English language being the language of record in the Zillah courts, or in the Sudder Dewanny Adawlut, 4522-4524. 4618-4622——The use of the English language should be confined to the examination of Englishmen who may be parties to any suit, 4523. 4564-4566. 4614-4620——The proposed subjection of Europeans to native criminal judges is very impolitic, 4525. 4586.

It would not answer to select the Zillah judges in the same way as the native judges, but they might with advantage be selected from gentlemen practising at the bar of the Sudder Dewanny Adawlut and the Supreme Court, 4526——Under the present system it is highly desirable that the judge should have a previous legal education and training,

4527,

Reports, 1857-8—*continued.*

Baillie, Neil Benjamin Edmondstone. (Analysis of his Evidence)—*continued.*

4527, 4528——With a substantive law, previous legal training in the judge would not be essential, 4527——Great importance of a proper substantive law in the Mofussil, 4529-4533. 4599——Evil of the frequent appeals, more particularly of the special appeals, under the present system; one appeal is quite enough, 4534-4537.

One of the greatest wants of India is that of capital, 4538. 4540, 4541. 4556——Great evil of the high rate of interest; way in which this is aggravated by Government operations, and by speculative indigo contracts, 4539. 4557. 4567-4572——Belief that the people of India are very poor, and that hoarding is not carried on to any extent, 4540. 4542——Way in which the silver is absorbed in the country without being hoarded, 4540——Great inconvenience through the use of silver as the sole circulating medium, 4542-4544.

Better position of the ryot if capital were more abundant, 4545——Particulars as to the operation of the coercive legislation relative to advances by the planters to the ryots; necessity of a summary remedy in the hands of the planters, 4546-4549. 4555——Grounds for concluding that it would be highly inexpedient to sustain a putnee against a purchaser of an estate sold for arrears of revenue, 4550-4552——Protection already, under the Act of 1845, of leasehold tenures for terms not exceeding twenty years, 4551. 4632——Opinion that the system of advances by the indigo planters is not an advantageous mode of applying capital; the indigo houses, in fact, are generally very unsuccessful, 4553-4555.

Explanation that on account of the occupancy of the ryots the fee-simple of the land cannot be obtained by capitalists by a redemption of the land-tax, 4558——Whether as regards the zemindars or the ryots, witness does not see any advantage to them in a right of redeeming the tax, 4558-4562——Respect in which, as regards the application of capital, it is an advantage, rather than otherwise, that the land should be charged with the tax, 4558——Opinion that the use of the native language in the Zillah courts does not tend to the perversion of justice; in witness's time, at least, the judges were sufficiently acquainted with the language, 4563. 4580. 4621, 4622.

Statement as to the ryots' tenures or pottahs, by which land in Calcutta, or building sites, is held; absence of any bar to settlement through the indefinite right conveyed by these pottahs, 4573-4577——Witness was a salaried officer of Government only when pleader in the Sudder Dewanny Adawlut, 4578, 4579——His limited experience of the Mofussil courts does not enable him to confirm the statements which have been made as to the inefficiency of the judges and magistrates, 4580-4584.

Political grounds upon which witness objects to the appointment of natives to the higher offices, 4587, 4588——Doubt whether greater efficiency would be attained by the appointment of well-educated young Englishmen to the situations of sudder ameens and moonsiffs, 4589——Objection on political grounds to the exclusion of natives from the office of sudder ameens, &c., 4589-4594.

Greater expense of the regular proceedings in the Supreme court than in the Mofussil courts, 4595——Higher class of practitioners in the Supreme courts than in the Mofussil courts, the expense being very irregular in the latter courts, 4595, 4596——Exceeding difficulty of an amalgamation of the Supreme court and Nizamut Adawlut, 4597——An amalgamation in course of time can best be effected by first introducing a new system of procedure into the Mofussil courts, 4598——Objection to comprising the presidency towns in a substantive law for the Mofussil, 4599.

Absence of obstacle to the employment of capital in the purchase of produce in India; large amounts are, in fact, invested in indigo advances, 4600-4602——Witness concurs generally in the views of Mr. Hawkins as to the legal reforms required in India, 4603, 4604——Further statement in favour of the introduction of military serjeants into the police, 4605-4610——Disadvantage in the limited means of experience of the judges since the alterations introduced by Lord William Bentinck, 4612, 4613.

Limited jurisdiction of the English Mofussil magistrates over Europeans; advantage of some extension of this jurisdiction, 4623-4627——Respect in which the process against defaulting cultivators may be said to be more stringent in the case of opium than of indigo, 4628——Further statement as to the ill success generally of indigo speculations; belief that there has on the whole been a loss, 4629-4631.

[Second Examination.]—Further evidence to the effect that the mode of administration of justice in the interior has not operated in deterring settlement; increase of settlement in the presidency towns adverted to hereon, 4633-4642. 4741, 4742. 4826, 4827——Parties to contracts in the interior can only sue in the Supreme court in the event of one of them being a European, 4643, 4644——Superiority of the Supreme courts to the Mofussil courts on the common law side, and probably on the equity side, so that suitors in Calcutta are not likely to resort to the latter courts, 4645-4654. 4710.

Importance of the recommendation of the Law Commissioners that the proceedings in the Mofussil courts should be *vivâ voce*, and that written pleadings should be abolished, 4655-4661——Probable advantage if native evidence were taken down by the judge in English,

Reports, 1857-8—*continued.*

Baillie, Neil Benjamin Edmondstone. (Analysis of his Evidence)—*continued.*

English, as a record of the case, 4662——Requirement of a larger rather than a smaller staff under a system of interpreters in lieu of omlahs, 4653-4666.

Rule in the English law as to the law to be introduced into the colonies, 4668-4674——Misapplication as regards English law in India in applying it to the regulation of sales of land, 4675-4680——In the absence of specific law and usage, the judge in India is to determine by justice, equity, and good conscience 4681-4686——Doubt as to the expediency of applying the English law in all cases of controversy between man and man, in which the law of the country or usage cannot be taken as a guide; advantage, however, of specific rules rather than of the present uncertainty, 4687-4705.

Practice as regards the application of the English law where the Hindoo or Mahomedan laws of contract do not apply, 4702-4705——As regards the views of the natives at the Presidency towns in favour of the Queen's courts, they reflect very much the views of the Europeans around them, 4706-4710——Doubt whether a system of legal training in this country would provide the most efficient kind of judges for the Mofussil, 4711-4725——Practical experience and general competency of all English judges appointed to the sudder courts before 1844; 4725-4730——Belief as to the efficiency generally of the European magistrates up to 1844; 4731. 4824, 4825.

Further reference to the badness of the native police, 4734——Also to the defective system of procedure of the civil courts, 4735——Also to the injurious operation of the system of advances to indigo cultivators, 4736, 4737. 4823——Also to the inexpediency of subjecting Europeans to the native criminal judges, 4738, 4739——Also to the inconvenience of being obliged to make all payments in silver, 4740——With reference to the foregoing state of things, witness is not aware that it has prevented European settlement, 4741, 4742.

Disadvantage to settlers, as putneedars, in their liability to be dispossessed of their tenures, 4743-4745——Further statement as to its being in part an advantage to purchasers of land, that it should be subject to the revenue, 4746-4751——Further statement as to the absorption rather than hoarding of silver, 4752-4759. 4822——Importance of capital in order to develop the resources of the country further adverted to, 4760-4763.

Consideration of the question of the general untrustworthiness of the native testimony in the Mofussil; advantage hereon of improved agency in the courts, but still more so of a simple procedure, and of an examination face to face, 4764-4771. 4794-4796——Native judges must be trusted under a system empowering them to call the parties before them, 4772-4774——A knowledge of the native language, and of the customs and habits of the people, is essential in the English judges, 4775. 4780——Respects in which the native advocates are chiefly inefficient, 4776-4779.

Inefficiency of the native juries in the Mofussil, but not in the Presidency towns, 4781-4785——Impression that by the regulation of 1834, the requirement of a license before settlement was entirely removed 4786-4791——Reference to the antipathy of respectable natives to appear in court as witnesses; probable cause, 4797. 4799, 4800. 4828, 4829——Means suggested by the Law Commission for obviating the difficulty as regards the personal attendance of witnesses, 4798——Probable injury to planters by means of false charges against them 4802, 4803.

Practice as regards indigo advances further adverted to in connexion with the losses of indigo houses, 4804-4810. 4832——Prejudicial effect of the law in the Mofussil, not only upon the interest of planters, but generally, 4811-4813——Probable feeling of the natives in the event of the English language being substituted for the Hindostanee as the spoken language of the courts, 4814-4821.

Balston, William. (Analysis of his Evidence.)—Was seven years in India; went out as a contractor on the Great Indian Peninsula Railway, and travelled in Guzerat and Scinde, 5895-5897——Considers that the climate of India, so far as it affects the health, is no obstruction to the settlement of Europeans who intend eventually to leave the country, 5898——The climate, however, as affecting the productive power of the soil is the chief obstacle to extensive settlement, *ib.*——The produce of India is on the average very little more than 10*s.* an acre, *ib.*——The drought prevents the land from producing enough to support any cultivator, except the Hindoo or Mussulman, who lives on less than 2*d.* a day, 5898. 5935.

Statistics connected with the province of Guzerat; it is the most favoured district of India; but even there no European paying the wages of labour could cultivate the land to a profit, 5898-5903——In the case of cotton in Guzerat, the land tax comes to fifty-two per cent. of the value, 5898——Statement showing the exceedingly low value of cotton, wheat, &c., in the interior, as compared with the value at the place of export on account of the difficulties of transport, 5904-5906——Calculation that, irrespective of irrigated lands, the average value of produce on the cultivated lands in Madras is only 5*s.* 4½*d.*, 5906-5908.

Much more fertile character of the Bombay Presidency than of Bengal or Madras,

Reports, 1857-8—*continued.*

Balston, William. (Analysis of his Evidence)—*continued.*

5908—— Statement to the effect that the general products of Bengal and of the North-Western Provinces, have no exportable value, on account of the great difficulty and cost of carriage by the Indus and Ganges, 5908-5921——By means of ample supplies of water, the European of small capital may cultivate land more profitably in India than elsewhere, 5920.

Proposition for the construction of canals to be used for purposes of navigation and of irrigation; details in support of this proposition, which, if carried out, will immensely facilitate successful colonization by Europeans, 5921 *et seq.*—— Enhanced price of rice in the interior through the difficulties of transport from the seaboard, 5931, 5932—— Similar statement as regards salt, *ib.*——Particulars as to the very slight extent and the very imperfect means of irrigation at the present time, 5936-5942. 5950. 5972-5979—— Great cost of irrigation, as at present provided; instance of a charge of 5 *l.* per acre for irrigated land, 5942. 5946-5949.

Calculation that by means of the proposed canals, irrigation may be provided at from 2 *s.* to 4 *s.* per acre, and that such charge would yield a return of ten per cent. on the cost of the canals, 5942. 5951-5953——Enormous advantage of irrigation to the cultivators, 5942. 5945. 5951—— European skill and capital would be required in making the canals, 5943, 5944——Belief as to the facility, in an engineering point of view, of constructing the required canals; their maintenance also would be very easy, 5952-5966. 5986-5990.

Immense improvement effected by irrigation in the quality and produce of the cotton plant; grounds for this statement, 5967-5980. 5997-6006——The present cost of Guzerat cotton in Bombay may be taken at 3 *d.* per pound, of which the cultivator gets only 33 per cent., 5981-5983——Calculation that by means of the proposed canals, a bale of 400 lbs. of cotton may be produced per acre, and delivered at the seaport in India, at a total cost of 2 *l.* 8 *s.* 6 *d.*, which bale would be worth 10 *l.*, and the seed 18 *s.*, leaving a profit of 8 *l.* 9 *s.* 6 *d.* per acre, 5984-5996.

Anticipation that in course of time the proposed canals would result in driving the American cotton out of the English market, 6007-6018——In order to encourage the cultivation of cotton in India, irrigation is wanted more than railways or other works, 6018—— Effect of a large reduction in the price of cotton to enable the English manufacturer to compete successfully with the eastern manufacturer, and to increase the consumption in India of British-made goods, 6019.

[Second Examination].—Effect of the climate in checking the growth and produce of the sugar cane, as well as of the cotton plant, 6279. 6284——Statement that in the case of sugar, the land tax and the cost of irrigation amount together to 50 per cent. of the cost of production, 6279-6284——Great importance of facilities of irrigation in the case of sugar, 6284, 6285——The effect of irrigation on grain and oil seeds is to double the crop, and even to produce two crops in the year, instead of one, 6286.

Particulars in connexion with the contract taken by witness under the railway company, and which he failed to fulfil, for a supply of wooden sleepers, 6287-6296——Witness was only about three months in Guzerat, 6297, 6298—— He did not consider the climate in Guzerat unfavourable to European settlement, 6299-6302—— Further statement as to the large amount of the land tax in Guzerat in proportion to the value of the crop, 6303-6305——Grounds for former statement as to the exceedingly heavy cost of irrigation in Western India, 6308-6317.

Opinion that in a great part of Guzerat it would be practicable to supply irrigation at a charge of from 2 *s.* to 4 *s.* an acre, 6318-6321——Number and depth of the rivers and nature of the levels of the country considered in reference to the practicability of the proposed canals of irrigation and navigation; witness is not minutely informed on these points, 6321-6339——Great importance of canals as a means of navigation further adverted to; illustration in the case of grain and oil seeds, 6328. 6332.

Banking Facilities. Advantage of an extension of banking facilities in India; how it might be effected, *Onslow* 6851-6858.

Belgaum. See *Cotton*, II. 2.

Bellary District (*Madras*). By means of a certain proposed canal, ten millions of acres in the Bellary district may be irrigated, a large proportion of which is now waste, and upon which cotton, sugar, rice, &c., may be grown, *Onslow* 6651-6653——Except the difficulty of procuring land, there is no practical obstacles to settlement in the Bellary district, *ib.* 6675-6682.

Bengal. Distribution of Europeans all over Lower Bengal as indigo planters, and purchasers of produce, *Theobald* 853. 856——Lower Bengal comprises a population of about 40,000,000, and is the most fertile part of all India; it includes Behar and Tirhoot, *ib.* 854, 855——Absence of increase of late years in the number of Europeans engaged in agricultural and commercial pursuits in the interior districts of Lower Bengal, *ib.* 857 ——Larger operations, but not larger number of the European agriculturists in the

Reports, 1857-8—*continued.*

Bengal—continued.

interior of Bengal, *Theobald* 1094——Although the Europeans generally have increased in number of late years, the colonists have not increased, *ib.* 1211. 1212.

Great development of the resources of Bengal through European enterprise, *Freeman* 1541; *MacNair* 2018, 2019. 2080; *Wise* 2696-2699. 2702-2704; *Dalrymple* 3266, 3267; *Marsham* 9509-9511——There has not been an increase of twenty-five or thirty Europeans in the Mofussil in Bengal within the last twenty-five or thirty years, *Freeman* 1808——There are now fewer European settlers in the interior of Bengal than there were twenty years ago, *MacNair* 1981——Principal products of Lower Bengal, *ib.* 2017——Increased value of late years of estates in Bengal, *ib.* 2140-2146.

Explanation as to the non-increase in the number of settlers, notwithstanding the success of settlement, *MacNair* 2341-2347——Different districts in which Europeans might advantageously settle as overseers and capitalists, *ib.* 2491-2493——There is scarcely any opportunity at present for an increase of European planters in the districts in Lower Bengal, *ib.* 2502——Probable causes of the zemindaries in Bengal being so valuable, *ib.* 2531. 2565.

Under a proper state of laws, and with power to hold land in perpetuity, cultivation would soon be immensely extended by Europeans, *Wise* 2681, 2682——The number of Europeans in the Mofussil has not increased, *ib.* 2705, 2706——There are not above thirty or forty Europeans in the five districts of European Bengal in which witness is interested, *ib.* 2897——Many parts of Lower Bengal are occasionally very unhealthy, *ib.* 3092-3096.

Absence of increase in the number of Europeans in the Mofussil, notwithstanding the increase of factories; more Europeans and natives are employed than formerly, *Dalrymple* 3233-3235. 3277-3281. 3502——Difficulty in procuring estates, *ib.* 3337. 3504-3506——Number of years purchase fetched by the sale of zemindaries and putnees in Bengal, *ib.* 3338-3343. 3451-3453——Insufficiency of the inducement as regards the employment of European assistants, adverted to as the cause of the insufficient number available for the factories, &c. *ib.* 3360-3369. 3407-3413——With proper laws and police, and proper means of communication, there is no country more advantageous for settlement than Bengal, *ib.* 3551, 3552.

The gross produce per acre throughout Bengal is about thirty-two shillings money value, *Mackenzie* 3657——Number of settlers outside the Presidency towns, and altogether in Bengal and Agra, *Mullens* 7144-7147——Witness has understood that European settlers have at present a capital of 4,000,000 *l.* invested in land in Bengal, *ib.* 7144——Particulars as to the English and East Indian population in Calcutta and throughout Bengal before the rebellion broke out; rapid advance of late years, *ib.* 7340.

Witness does not know any part of Bengal where colonization is practicable, *Mills* 9021——There is no scope for the capitalist in the Upper Provinces, *Marsham* 9764.

Bengal Coal Company. Complaint as to Government withholding from the Bengal Coal Company the services of a scientific overseer in the case of the erection of blast furnaces for iron ore, *Freeman* 1926-1928.

Bentinck, Lord William. Lord William Bentinck was very favourable to European settlement, *MacNair* 1975-1978——Great improvements effected since Lord William Bentinck's system of employing the natives; his government is looked upon by many as the great era of modern improvement in India, *Marsham* 9650-9664——As regards the numerous changes in our system of administration during Lord William Bentinck's time, witness questions whether they can all be considered improvements, *Saunders* 10185-10196.

Bhutan. Character of the government and nature of the soil in Bhotan (Bhutan), *Hooker* 669-674——Inaccessibility of Bhutan Proper to European trade; causes of this, *H. and R. Schlagintweit*, 6998. 7032-7039.

Bidwell, Alfred Clarke. (Analysis of his Evidence.)—Went to India in 1830, and filled various offices in the Bengal revenue service from 1831 up to 1856, when he left India, 9262-9268. 9328, 9329——Grounds for considering the colonization of India by Europeans to be, in the ordinary sense of the term, impracticable, 9270——The Government offer no obstacle to European settlement, *ib.*——Great obstacle, on account of the rains,

to

Reports, 1857-8—*continued.*

Bidwell, Alfred Clarke. (Analysis of his Evidence)—*continued.*

to the construction of roads in Bengal, 9270——Neglect until within the last few years of roads and public works in Bengal; cause of this, 9270. 9366.

Europeans and their property have been perfectly secure from open violence, 9270——Weakness of the law in enforcing contracts or agreements, *ib.*——Low standard of morality in the native character, and malpractices resorted to in order to evade the law, *ib.*——Peculiar inefficiency of the police owing to the corrupt character of the natives, *ib.*——Probability of arbitrary and unpopular conduct on the part of some indigo planters, whilst others bear a high character for fairness and benevolence, *ib.*

Inaccuracy of the statement that the civil servants are unacquainted with the language of the country, 9270——Stringent examination undergone by the civil servants in the native languages, 9270. 9306, 9307——The judge or magistrate is not, as a rule, under the influence of his omlah; the reverse is the rule, 9270. 9300-9302——The indigo planter is very much at the mercy of his native *employés*, 9270——Statement as to M. Courjon and Mr. Larulletta having successfully carried on business in the Mofussil, though subject to the jurisdiction of the mofussil courts, 9271-9282. 9335-9341.

Very great improvement of late years in the character of the native judges, owing very much to their better education; they are now very trustworthy, but about twenty years ago they were very corrupt, 9283, 9284. 9289-9293. 9328-9334. 9342, 9343. 9371-9373——Greater confidence of the natives in European judges than in native judges, 9284. 9309. 9343. 9346, 9347——Properly qualified Europeans cannot be procured at the pay of the native judges, 9285. 9288. 9314——The sons of European soldiers may advantageously be trained for employment in the police 9286, 9287.

Less efficiency of native magistrates than of native judges, 9294, 9295. 9312, 9313. 9377, 9378——Although the police are very inefficient, they are not universally corrupt; witness has seen some very good darogahs, 9296, 9297. 9312——Approval of increasing the pay of the darogahs, although in some instances better pay may have led to heavier bribery, 9298, 9299——Witness considers that the civil service as an administrative body has improved every year, 9302. 9328-9333.

As regards Mr. Grant's sale law it is a great pity it was not tried, 9303——Improvement of late years through the more stringent operation of the sale laws, 9304, 9305——Disapproval of a separation of the judicial and revenue services, on the score that the training in the latter is very useful in the former, 9315-9318——Improvement if the civil servants before going to India were more directed to the study of the principles of law, 9315. 9318——Advantage in allowing proprietors to redeem the land-tax at thirty years' purchase, 9319-9323——Circumstance of savings banks not being resorted to by the native community, 9324-9327.

Propriety of Europeans being subject to the civil courts in the Mofussil, 9344-9347——Grounds for objecting to the introduction of the English language into the Mofussil courts, 9348-9365. 9382——Occasional inaccuracies of the interpreters in the Supreme Court at Calcutta, 9349-9351. 9379, 9380——Satisfaction of the Calcutta natives with the Supreme Court, 9352-9357——Advantage in public opinion in this country being brought to bear upon the conduct of affairs in India, 9367-9370.

Expediency of a further increase in the pay of the native judges, 9373-9376——Necessity of the judges understanding the native language even if the English language be introduced, 9381, 9382——Importance of encouraging the spread of the English language; the natives are very desirous to learn it, as a qualification for employment, 9383-9389.

Black Acts. See *Criminal Jurisdiction (Mofussil Courts).*

Bombay. More healthy character of some of the districts in Bombay than of Bengal or the Carnatic, *J. R. Martin* 285-289. 329-331——Much more fertile character of the Bombay Presidency than of Bengal or Madras, *Balston* 5908——Opening for European capitalists in Bombay in the superintendence of cotton and sugar cultivation, *Warden* 6170, 6171——Witness never met with any European capitalist in the Mofussil, *ib.* 6172——Any European capitalists who may have gone out to Bombay are exceptional cases, *ib.* 7491-7494.

Except in Khandeish there is no great extent of unappropriated land in the Bombay Presidency, *Wingate* 7648. 7653——Opinion that there is no part of the Presidency suitable for colonization for Europeans, *ib.* 7648——Depressed state of agriculture at one period in the districts conquered by the Peishwa, *ib.* 7699.

Quotation from an article by witness, in the "Bombay Quarterly Review," for April 1857, referring to great improvements during recent years, and great prospective improvements in the condition of the agriculturists, *Wingate* 7699——The experience of witness goes to show that the Presidency of Bombay has, during the last twenty-five years, made great advances in commerce, manufacture, population, and colonization, *ib.* 7715-7729——Great increase in the use of bullock carts in the Deccan, &c., *ib.* 7723-7729——Increased size of the towns and villages, and improved character of the houses in Guzerat, Khandeish, &c., *ib.* 7723.

Reports, 1857-8—*continued.*

Bombay—continued.

There is no obstacle to the purchase by colonists of individual properties in Bombay, *Wingate* 7747, 7748——Inexpediency of the disallowance by the Supreme Government of expenditure required for proper roads in Bombay, *ib.* 7752. 7756——Bar to the efficient administration of the Bombay Presidency, through the control exercised by the supreme authority at Calcutta, *ib.* 7754-7761——Reference to the circumstance of Bombay not having yet paid its own expenses, *ib.* 7754-7761——Limited extent to which European settlement now exists in the Bombay Presidency; absence of European agricultural settlements, *ib.* 8124-8133. 8144, 8145.

British Manufactures. See *Manufactures.*

British Rule. The more commerce is extended in India the greater will be the security to British rule, *Waller* 5034-5036 —— Tendency of increased European settlement to produce indentity of interests between Europeans and natives, and to strengthen our hold over the country, *Ouchterlony* 5550——The security of our rule in India depends upon the natives' opinion of our power and justice, *Warden* 6049——Lower opinion entertained by the natives during the last fifteen or twenty years of our power or justice, *ib.* 6050, 6051——Tendency of increased settlement to strengthen our hold upon the country; line of demarcation now existing between the governing and the governed adverted to hereon, *Wingate* 8171-8175——If India is to be held by the English the natives must be excluded from any influential share of the government, *Landon* 8667. 8698. 8700. 8724.

Broach (*Guzerat*). Quiet, contented, and prosperous state of the people in the Broach district, *Landon* 8360-8362.

See also *Administration of Justice*, V. 3. *Guzerat.*

Building Sites (*Calcutta*). Statement as to the ryots' tenures, or pottahs, by which land in Calcutta, on building sites, is held; absence of any bar to settlement, through the indefinite right conveyed by the pottahs, *Baillie* 4573-4577.

Buller, Sir Arthur. Reference to the views of Sir Arthur Buller, in condemnation of the Black Acts, and of the proposed exemption of all government servants from their operation, *Freeman* 1559. 1826; *MacNair* 1983-1988——Misapprehension on the part of Sir Arthur Buller in regard to the exemptions contemplated under the proposed Black Act, *Hawkins* 4107-4112. 4256. 4372-4380.

C.

Calcutta Canals. Particulars relative to the Calcutta canals, their bad management, and utter inadequacy to accommodate the traffic, *Theobald* 989*-992.

Campbell, Dr. Energetic and successful exertions of Dr. Campbell, in developing the trade and resources of Sikkim, Darjeeling, &c., *Hooker* 562-565. 629. 688.

Canals. Bad state of the canals in witness's district in Eastern Bengal, *Wise* 2758——Absence of new canals in Lower Bengal, *ib.* 2923——Information relative to the canals of communication or navigable canals in the south of India; importance of a large sum of money being appropriated to this purpose, *Ouchterlony* 5374.

Proposition for the construction of canals to be used for purposes of navigation and irrigation, which, if carried out, will immensely facilitate successful colonization by Europeans, *Balston* 5921 *et seq.*——Goods might be carried on a large canal in India at one

Reports, 1857-8—*continued.*

Canals—continued.

one-tenth of the cost of conveyance on the Mississippi, *Balston* 5921, 5922——The capital expended would be covered by the profits arising from the charge for irrigation, *ib.* 5922. 5951——Calculation that by these canals goods might be drawn at the rate of 2 *s.* 11 *d.* per ton for a distance of 1,400 miles, *ib.* 5922——European skill and capital would be required in making the canals, *ib.* 5943, 5944.

Belief as to the facility in an engineering point of view, of constructing the required canals; their maintenance also would be very easy, *Balston* 5952-5966. 5986-5990——In the plains of Hindostan the canals might be made for 5,000 *l.* a mile, *ib.* 5953.

Great importance of canals as a means of navigation further adverted to; illustration in the case of grain and oil seeds, *Balston* 6328. 6332——A canal, even if it were to cost 50,000 *l.* a mile, would be more profitable to India than a railway at 15,000 *l.* a mile, *ib.* 6331.

Canals as a means of navigation and irrigation are of the utmost importance, *Onslow* 6517-6520. 6536-6538. 6649, 6650.

See also *Ganges Canal.* *Irrigation.*

Capital. See *European Capital and Skill.* *Hoarding.* *Native Capital.*

Cashmere. Very neglected state of Cashmere, *Hooker* 662, 663. 714-716——Cashmere is an exceedingly favourable place for European settlement, *H. and R. Schlagintweit* 6986, 6987——Importance of an improvement of the British trading relations with Cashmere; obstacles at present to European settlement there, *ib.* 7062-7064. 7084-7086.

Caste. Anticipation that in course of time, caste will, if not interfered with in any way, gradually disappear, *Waller* 5037-5041——Effect of caste in preventing the Hindoo from changing his views of life or his general conduct, *Landon* 8672, 8673.

Cauvery River. Extensive channels of irrigation in connexion with the River Cauvery, *Ouchterlony* 5371, 5372——There are many old channels and works on the Upper Cauvery which should be restored, *ib.* 5372——Particulars relative to the Neringepett Anicutt, an old work now in decay; means for restoring this work without any great expense, *ib.*

Central Asia. Principal articles of Central Asia and Tibet, which might be exported to India, *H and R. Schlagintweit* 7012, 7013. 7025-7031——Necessity of facility of transport in order that English goods may be substituted for Russian goods, such as cloth, &c., now supplied in Central Asia, *ib.* 7014-7020. 7070-7079——The people of the country carry on an extensive trade, *ib.* 7020. 7064——Indirect way in which British trade must take place with Central Asia, *ib.* 7064——Suggestions with a view to an improved communication with Central Asia, through Cashmere, *ib.* 7073-7079——The fact that the Hindoo commercial classes in India, have not established an extended trade with the regions north of the Himalayas is explained by the want of proper and safe communications, which want it is most expedient to supply, *ib.* 7087-7104.

See also *Bhutan.* *Cashmere.* *Sikkim.* *Tibet.*

Ceylon. Good effect of the Ceylon climate upon the European constitution, *J. R. Martin* 222, 223——Beneficial results of European colonization and capital in Ceylon, *Freeman* 1525-1527——There is no parallel between the settler in India and the settler in Ceylon, *Mackenzie* 3824. 4005——Witness has purchased the fee simple of land in Ceylon for a guinea an acre, *Fowler* 5695, 5696——Much higher cost of labour in Ceylon than in the Neilgherries; the former labour is supplied from India, *ib.* 5698-5706. 5715——The labour in Ceylon was the worst and dearest that witness had ever known, *ib.* 5715.

Failure of an attempt to form a colony at Newera Ellia, the great high central plain of Ceylon, *Mullens* 7125——Large increase of European settlers in Ceylon; causes thereof, *ib.* 7148-7152——Advantage of the system of selling the land out and out at a low price, *ib.* 7149, 7150. 7180——Advantage in the Ceylon Council, comprising non-official as well as official members, *ib.* 7172——The use of the English language in the courts, with interpreters, gives very great satisfaction, *ib.* 7273-7276——Particulars as to the European population, and the progress of settlement, *ib.* 7340.

Consideration of the circumstance of Ceylon being in a prosperous state under what may be termed the colonial form of government; grounds for concluding, nevertheless, that the same system of government is not applicable in the case of India, *Landon* 8614-8639. 8651. 8741-8758——Witness understands that the Cingalese are a more tractable people than the natives of India, *ib.* 8758.

Children of European Soldiers. Proposition that the children of European soldiers be removed from the plains to hill stations, and there trained at the cost of Government for different pursuits, *Tremenheere* 110 *et seq.*——Different places at which stations or asylums, like the Lawrence Asylum, might be formed for the reception of soldiers' children, *ib.* 110——Several ways in which the children thus trained in the country, might when grown up be most usefully employed, *Tremenheere* 110, 111. 137. 142-146. 149; *J. R. Martin* 260——Respects in which the cost of the proposed establishments would in a great measure be counterbalanced, *Tremenheere* 137-141. 502. 504.

Reports, 1857-8—*continued.*

Children of European Soldiors—continued.

Evidence as to the possibility of rearing European children, or of retaining European settlers, on the mountains without degeneration, *J. R. Martin* 218. 302-310. 326. 334, 335——Nature of the training institutions desirable in the case of young Europeans intended for the uncovenanted civil service, or for agricultural or other occupations, *Tremenheere* 361, 362. 389, 390. 455——Means by which the parents of children removed to the proposed training institutions on the hills might at times visit their children, *ib.* 398-400——Soldiers in India do not now educate or provide for their children, *ib.* 495——Advantage in a moral point of view, both as regards the parents and their children, in removing the latter to the proposed training asylums, *ib.* 495-498——Improvident marriages need not be increased under the contemplated scheme of dealing with the children, *ib.* 499, 500.

Ways in which soldiers' children reared and trained in the hills would be exceedingly useful auxiliaries in spreading European commerce and enterprise throughout the country, *Tremenheere* 504-508; *Ouchterlony* 5538-5542; *Bidwell* 9270——The staff of the establishments should comprise natives as well as Europeans, *Tremenheere* 503——There should be a proper separation of the different religious denominations, *ib.* 509, 510.

Strong approval of well organised institutions on the hills for the education and practical training of the sons of soldiers, *Wise* 2717-2720——Doubt as to whether European soldiers' children, reared in the hills, can stand the climate of the plains, and so be introduced into the police, *Hawkins* 4283-4286——Advantage in training European children in the hill districts for situations under Government, that is, provided their health does not suffer, *ib.* 4350-4355. 4395-4397.

Importance of establishing a school in the Neilgherries for the education of the children of European soldiers in the Presidency; Government should take part in the matter, *Ouchterlony* 5298-5302——Obstacles unduly raised by a religious section of the community to a proposition by the late Sir Henry Lawrence, for the establishment of a school in the Neilgherries for soldiers' children, *ib.* 5299-5302. 5458-5460——Facilities would soon arise in the hills for the care of settlers' children during the absence of the parents, *ib.* 5435——The removal of soldiers' children to the hills would be a most humane measure, and would not be likely to produce any injurious effect upon the parents' character, *ib.* 5454, 5455. 5518. 5537——Impression that there will be no material deterioration so long as settlers' children in Madras are removed, when young, to a hill station, *ib.* 5487-5489.

Some colonists may be obtained from the rearing of soldiers' children on the hills, *Mutlens* 7132——Localities on the east of the line of ghauts in Bombay might be fixed upon as favourable places for asylums for European children; the Mahableshwar hills are too wet for the purpose, *Wingate* 7906-7911——The children of Anglo-Indians are generally delicate, *Bidwell* 9270——Sundry advantages to be derived from an education in the hills of the children of soldiers, *ib.*

See also *Climate.* *Degeneracy of Europeans.* *Dum Dum.* *Lawrence Asylums.*

Chittagong. More healthy character of Silhet and Cachar than of Chittagong, *Hooker* 637-641——Oppression of the ryots in Chittagong by the zemindars, whilst in the neighbouring province of Arracan their position is immensely improved, *Marsham* 9771.

Christianity. There are very few native Christians in India, *Mackenzie* 3723. 3779-3782——Importance of neutrality on the part of Government and its officials towards missionary action, *ib.* 3724-3726——The people do not object to the operations of the missionaries, so long as they are unconnected with Government, *ib.* 3724——Non-opposition by Government to the employment of native Christians, *ib.* 3872-3880——Government do not in any way oppose the operations of the missionaries, *ib.* 3905, 3906——Number of native Christians in India further adverted to; doubt as to there being 400,000 altogether, *ib.* 3990-3993——The native Christians should be as eligible as other natives for public employment, *Mackenzie* 3994, 3995; *Waller* 4960. 4966. 4999. 5054, 5055. 5214, 5215. 5217-5220.

Upon the general question of upholding in India the institutions and religion of our country witness considers that we have rather failed in doing so, *Hawkins* 4502-4504.

Advantage if Government had taken an open and plain course in regard to Christianity; instead of professing to be hostile to its introduction, they should be perfectly neutral in the matter, *Waller* 4960. 4965. 4974. 4997-5001. 5112-5114——There are a great many coloured Christians in Bengal, *ib.* 4966. 5212, 5213——Degraded condition of the coloured Christians or Eurasians; they are unjustly held in much contempt, *ib.* 4967-4971. 5071-5073——The lower orders of natives who turn Christians are not considered very trustworthy, *ib.* 4972——More better feeling of the Mahomedans than of the Hindoos against Christians and Christianity, *ib.* 4975. 5031-5034——The Hindoos believe the Christian religion to be a true religion, and consider that its progress will be great if not forced in any way, *ib.* 5042——Advantage if the Church were entirely disconnected from the State in India, *ib.* 5043-5047.

Reports, 1857-8—*continued.*

Christianity—continued.

In India and Ceylon there are now 112,000 natives converted by the Protestant missionaries, *Mullens* 7187-7189. 7194——Belief as to the more moral and industrious character of the converts as a whole than of the natives; many of the nominal converts have however been a scandal to the natives, *ib.* 7190-7196. 7335-7338——The Hindoos are much more open than the Mahomedans to the arguments of the missionaries, *ib.* 7350-7352——Belief as to the probability of an increased number of Eurasians in India, and as to their fitness as colonists, *Wingate* 7869-7871——Suggestion that our Government in India should be publicly declared a Christian government, but with perfect liberty of conscience to every individual, *Marsham* 9711.

See also *Missionaries.*

Churrah Poonjee (*Assam*). Objection to the hill station of Churrah Poonjee as being situated in a very wet country, *J. R. Martin* 300——Immense fall of rain annually at the hill station of Churrah Poonjee; the place is not unhealthy, *Hooker* 632-636——Explanation as to the failure of an attempted agricultural settlement near Churrah Poonjee, *ib.* 645-647.

Civil Jurisdiction (*Mofussil Courts*). See *Administration of Justice.*

Civil Service:

1. *Generally as to the Qualifications of the Civil Servants.*
2. *Whether conversant with the Native Languages.*
3. *Examination before Appointment or Promotion.*
4. *Number; Increase recommended.*
5. *Inability of the Civil Servants to hold Land.*
6. *System of Furlough.*
7. *Practice as regards Uncovenanted Servants.*
8. *Evidence in favour of an Abolition or Modification of the Covenanted System.*
9. *Evidence opposed to the foregoing Proposition.*
10. *Proposition for a Mixed System of Competition and Nomination.*
11. *Social distinction between the Civil Servants and the Settlers.*
12. *Question as to the Civil Servants having opposed Settlement.*

1. *Generally as to the Qualifications of the Civil Servants:*

Reference to the large number of young men sent out from Haileybury in 1853, and to the probable cause thereof; their inexperience as magistrates, &c., *Theobald* 942-949; 1221-1227——Witness has found efficiency and inefficiency in the covenanted officers; some have been ignorant of the languages, *Auld* 1427——Youth and inefficiency of the Company's judicial officers in Bengal, more especially of late years, *MacNair* 2426-2433; *Wise* 2645-2647. 2933-2936; *Dalrymple* 3209, 3210; *Mackenzie* 3587. 3602, 3603. 3703-3705. 3881-3884. 3898-3900. 3940-3950——There was no change of system being adopted when witness left India in 1857, *MacNair* 2443-2445——Great evil of the present system of the covenanted civil service in its leading to the appointment of magistrates and judges exceedingly inexperienced and inefficient, *Waller* 4840. 4873, 4874.

When in India, witness imbibed the general prejudice that the civil service, as a body, was not efficient; but since his return to England, and his experience of English officials, he has quite changed his opinion, *Mackenzie* 3697, 3698. 3702, 3978-3982——The superior servants of the Company are as a body most efficient. *ib.* 3697——Necessity of the employment of late years of younger men as magistrates, *Hawkins* 4154-4158; *Mills* 8814.

Belief as to the excellence personally, of the civil servants in Madras, *Ouchterlony* 5511——Strong testimony to the efficiency of the civil service of Madras, and of all India, *Onslow* 6795——There are doubtless some members of the civil service in Bombay, who are not efficient, but the body is on the whole a zealous and efficient one, *Wingate* 7852——Good conduct of the European portion of the uncovenanted service in Bombay *Landon* 8459——Inexpediency of the practice of occasionally placing civil servants in responsible positions before they have acquired due experience, *ib.* 8725, 8726.

Witness considers that the civil service as an administrative body has improved every year, *Bidwell* 9302. 9328-9333——The efficiency of the civil service has been very greatly improved since Lord William Bentinck's time, *Marsham* 9425——Much greater confidence of late years by the natives in the civil servants, owing very much to the better control exercised over the latter by Government, *ib.* 9451. 9453——Illustration of the improper and unjust conduct of the civil servants some thirty years ago, *ib.* 9453, 9454.

2. *Whether conversant with the Native Languages:*

Inadequacy of the attainments of the civil servants of Bengal in the native languages adverted to in connexion with the examinations which they undergo, *Theobald* 1056-1066; *Freeman* 1720-1723; *Mac Nair* 2200-2209——With some few exceptions, the civil servants as judges, are far from familiar with the languages in which the evidence

Reports, 1857-8—*continued.*

CIVIL SERVICE—continued.

2. *Whether conversant with the Native Languages*—continued.

is given, *Freeman* 1775-1777. 1787——Means for procuring Europeans in India competent as judges on the score of a knowledge of the languages, *ib.* 1778-1780——Statement as to the general inability of the civil servants to keep up conversations in the native language considered in connexion with their extent of intercourse with the natives in making revenue settlements and on other occasions, *ib.* 1843-1849. 1854-1863——An intimate knowledge of the native language is essential in the judge who presides where such language is used *ib.* 1864——When witness left India the real fact was that the civil officers were very unfit to read or speak the languages, *ib.* 1865. 1872.

In exceptional cases only can the European magistrates and judges converse or deliver judgments in the native language, *Wise* 2899. 3006-3009. 3109-3114——Inefficiency of the great majority of the European magistrates in the Mofussil, more especially in their want of a practical knowledge of the native languages, *Dalrymple* 3226-3232. 3371-3375. 3414——Concurrence in the evidence as to the difficulties experienced by the English magistrates and judges through their imperfect acquaintance with the native language, *Waller* 4840——Passages in certain petitions from Calcutta and Madras, as to the very imperfect knowledge of the judges in the native languages, *ib.* 5149. 5153——As regards the imperfect acquaintance of the civil judges with the native language the fault is in the system, *ib.* 5150.

Inability at present of the judges in Madras to comprehend the native witnesses, *Ouchterlony* 5551——Obstacle to the satisfactory administration of justice by European judges in the Mofussil in Western India on account of the several native languages spoken, and which they do not perfectly understand, *Warden* 6081-6083. 6090. 6249, 6250.

Witness entirely dissents from the evidence of Messrs. Theobald, Freeman, Mac Nair and Wise, that the civil servants are, as a rule, ignorant of the native language, *Mackenzie* 3783. 3912, 3913——Occasional instances of suitors suffering through the civil servants not being properly conversant with the native language, *Hawkins* 4147. 4152, 4153——By sending the civil servants occasionally to a police tannah they would soon become conversant with the language, *ib.* 4153——Belief that the civil servants generally understand Bengalee, *ib.* 4424-4426——Fitness, generally, of the European judges to carry on conversations with the vakeels, and to make themselves understood by the native juries, *ib.* 4462-4469.

Opinion that the use of the native language in the Zillah courts does not tend to the perversion of justice; in witness's time, at least, the judges were sufficiently acquainted with the language, *Baillie* 4563. 4580. 4621, 4622——Different native languages spoken in Bombay, *Wingate* 7853-7855——Efficiency of the Bombay civil servants generally, in regard to the native languages, *ib.* 7853-7856——Proficiency in the native languages of the great majority of the civil servants in Guzerat, *Landon* 8728, 8729——Inaccuracy of the evidence that few of the civil servants can converse with natives; the test to which they are submitted necessitates a knowledge of the languages, *Mills* 8794-8809——Further evidence relative to the knowledge of the European judges as regards the native language, more especially in the case of native documents, *ib.* 8938-8953.

The civil servants in Bengal, in witness's time, were efficient in their knowledge of the native language, *W. H. Martin* 9158——Witness was conversant with Bengalee and Hindostanee, *ib.* 9159-9162. 9230-9238——The experience of witness shows that the civil servants in the Mofussil in Bengal are quite conversant with the language of the natives, *Bidwell* 9270; *Marsham* 9426-9428.

3. *Examination before Appointment or Promotion:*

Nature of the examinations undergone by the civil servants adverted to, in connexion with their imperfect acquaintance, as magistrates, with the native language; whatever the examination there is inadequacy on this score, *Theobald* 1056-1066; *Freeman* 1720-1723; *MacNair* 2200-2209——Instances of inefficient young men having passed examinations, *Theobald* 1056——Advantage of some system of examination of civil servants before each promotion; witness has not heard of any recent regulations to this effect, *Freeman* 1785. 1865. 1872——As regards a certain test of late years in the reading of native documents, witness, who was not aware that such test was applied, admits that officers could not go through the same without a very great knowledge of the native languages, *ib.* 1865-1872.

Examination and training now undergone, so that magistrates soon become properly acquainted with the language, *Hawkins* 4147. 4149. 4153——Disapproval of the present system of competitive examination as not supplying the qualifications most required; this matter rests with the Board of Control, *ib.* 4271, 4272. 4300-4302. 4342-4344——Objection to a system of competitive examination in India, before promotion to the superior grades, *ib.* 4305, 4306. 4383, 4384——Necessary qualification before appointment to any district, in a knowledge of the vernacular used there, *ib.* 4485-4487.

Entire

Reports, 1857-8—*continued.*

Civil Service—continued.

3. *Examination before Appointment or Promotion*—continued.

Entire failure of the present system of competitive examination to secure the most efficient men for India, *Waller* 4869, 4870——Further statement as to the unsuitable test to which the candidates for the civil service are subjected, *ib.* 5002–5007. 5085–5087——Higher test, and further examination proposed, with a view to greater proficiency in the native languages, *Warden* 6083. 6249, 6250——Civil servants are not always examined with reference to the language of the district to which they are appointed, *ib.* 7478.

Witness, who was one of the board for conducting the examinations in the native languages, shows that the examinations were very strict, and that those who passed them must have had a thorough knowledge of the languages, *Mills* 8794-8805——Stringent examination undergone by the civil servants in the native languages, *Bidwell* 9270. 9306, 9307——Reference to the stringent examinations established by Mr. Grant for the civil service, as showing the impossibility of the judges being now unacquainted with the native languages, *Marsham* 9426——Slight use of the education in this country in the native language, *ib.* 9681. 9685——The knowledge of the oriental languages is the least qualification brought from Addiscombe or Haileybury, *ib.* 9681. 9785.

Copies of the revised rules for the examination of assistants in the lower provinces of the Bengal Presidency, *App.* (*Fourth Rep.*) *p.* 258–261.

4. *Number; Increase recommended:*

There are about 800 civil servants in the three Presidencies; there should be 1,200, *Hawkins* 4303, 4304——Advantage if the districts in charge of the civil servants were largely reduced, *Onslow* 6797–6799.

5. *Inability of the Civil Servants to hold Land:*

Prohibition of the civil servants in India from holding land; propriety of re-considering the same, *Theobald* 872–875. 1195, 1196.

6. *System of Furlough:*

Greater number of civil servants absent on leave since the opening of the overland route, *Theobald* 1278–1282——Mischievous effect upon the civil service of the new regulation of permitting furlough at the end of seven years, *ib.* 1283.

7. *Practice as regards Uncovenanted Servants:*

Action respectively of the Indian and Home authorities in regard to the appointment of uncovenanted servants in lieu of covenanted servants, *Theobald* 1142–1152——Belief that the exclusion of uncovenanted servants from certain judicial offices rests entirely upon custom, *ib.* 1151, 1152——The uncovenanted service has greatly increased, but chiefly as regards natives, *Wise* 2920–2922——Illustration, in the case of a relative of witness, of the undue preference given to the covenanted over the uncovenanted servants; improper action of the home authorities in the case in question, *Ouchterlony* 5525–5534——Reference to the exclusion from high office of a person who was formerly a domestic servant; the appointment conferred upon him by Lord Dalhousie was disallowed by the home government, *Warden* 6202, 6203. 7497, 7498.

Inability of Government to employ uncovenanted servants in certain offices; a revision is very desirable on this point, *Marsham* 9475–9479. 9482–9485——Modification of the civil service of late years, more especially in the Punjaub, inasmuch as several offices formerly held always by civil servants are now in the non-regulation provinces held by military servants, *ib.* 9485–9489——Further statement as to the employment of military servants as well as of civil servants in the administration of the Punjaub; success of the plan, *ib.* 9670–9680.

8. *Evidence in favour of an Abolition or Modification of the Covenanted System:*

Approval of an extension of the uncovenanted service, and of an abolition of the social and pecuniary distinction between uncovenanted and covenanted judicial officers, *Theobald* 1153–1156——The civil service should be re-cast, but not abolished, *ib.* 1157——The revenue and judicial services should be thrown open to all competent Englishmen in India, *ib.* 1277.

Prejudicial operation of the exclusive system of the civil service, *Mac Nair* 2000. 2058——Advantage if judicial and other appointments were open equally to the uncovenanted and covenanted services, *ib.* 2000. 2004, 2005. 2484——Check upon abuse of patronage if the uncovenanted servants were eligible for all public offices; efficiency thus to be obtained, *ib.* 2092–2095. 2256–2261. 2434–2440——Means by which a newly appointed Governor-general might select the most fitting settlers for judicial offices, &c., *ib.* 2530——Incentive to official exertion and efficiency if the civil service were thrown open, *ib.* 2561–2564.

Improvement in the conduct of the civil service towards the settlers if some of the higher appointments were open to uncovenanted servants, *Dalrymple* 3476–3482——Effects of the exclusive system of the civil service in deterring well educated and profes-

Reports, 1857-8—*continued.*

Civil Service—continued.

8. *Evidence in favour of an Abolition, &c.*—continued.

sional men from going out from this country, *Waller* 4840——Evil at present through the series of antagonisms in the judicial and other services, *ib.* 4842——Necessity of throwing the service entirely open in order to obtain efficiency, *ib.* 4870——Absence of difficulty in finding members of the uncovenanted service to fill positions previously occupied by covenanted servants at much larger salaries, *ib.* 4875——Further statement as to the expediency of abolishing the present exclusiveness of the civil service, *ib.* 4898. 4919-4924. 5006, 5007. 5223, 5224——Evil in the necessity, under the present system, of keeping incompetent men in the service and of promoting them, *ib.* 4948-4951. 5087——Way in which the patronage should be administered, with a view to efficient appointments, if the civil service were thrown entirely open; checks upon jobbery under this system, *ib.* 5006-5025. 5102-5109. 5164-5188.

Greater countenance should be given to the uncovenanted service, *Ouchterlony* 5524——The abolition of the covenanted civil service would not have any effect in deterring European settlement, *Warden* 6198, 6199——Advantage if uncovenanted servants of tried efficiency were eligible for offices now held exclusively by the covenanted servants; it would, in fact, be well to abolish the covenanted system, *ib.* 6200-6205. 6275-6278——Decided approval of the abolition of the exclusiveness of the covenanted service, *Onslow* 6801——With reference to a strong statement by Lord Macaulay, in the House of Commons, in 1853, in opposition to throwing open the public appointments, the same does not alter witness's opinion on the subject, *Warden* 7495, 7496.

9. *Evidence opposed to the foregoing Proposition:*

Grounds for objecting to a power in the Governor-General to appoint gentlemen of the uncovenanted service in offices hitherto appointed to the covenanted service, *Hawkins* 4159. 4270. 4273-4277——The Indian civil service has always been very free from jobbery, *ib.* 4278, 4279——Approval of the present system of appointment to civil offices rather than of throwing the service open; the latter plan cannot co-exist with the former, *Mills* 8876-8880.

Advantages of the present plan of training the civil servants in India for the higher appointments, *Marsham* 9455-9463——Inexpediency of interference with the prospects of the civil servants by the appointment of those who may be termed "outsiders" to the higher offices; the integrity of the present system should be strictly upheld, *ib.* 9476-9478. 9483, 9484——Apprehended jobbery if the civil service be thrown open, *ib.* 9490, 9491. 9623——Doubt as to the expediency of opening any of the higher offices, even to such men as Mr. Venables, *ib.* 9624-9626. 9637——Origin of the introduction of the covenant into the civil service, *ib.* 9663——Beneficial operation of the covenanted service further adverted to; witness does not see any substitute for it, *ib.* 9665 *et seq.*

Although the employment in greater numbers of competent Europeans is very desirable, witness does not consider it expedient to throw open the civil service, or to select Europeans in India for any of the higher offices, *Saunders* 10162-10184. 10224.

10. *Proposition for a Mixed System of Competition and Nomination:*

Suggestions with a view to providing a really efficient service from this country; proposition for a mixed system of competition and nomination, *Hawkins* 4271-4273. 4308, 4309. 4381, 4382——Concurrence in Mr. Hawkins' suggestions as to the best means of improving the civil service, *Mills* 9113.

11. *Social distinction between the Civil Servants and the Settlers:*

Evil of the wide line of social distinction drawn between the civil servants and the indigo planters, *Hawkins* 4310——Evil of the constant antagonism between the official and non-official Anglo-Indian communities, *Waller* 4840, 4841——Causes of the antagonism between the settlers and the civil servants, *ib.* 4891-4893. 4946, 4947. 5081, 5082——Means suggested for putting an end to the antagonism between the official and non-official community, *ib.* 4898. 4930-4934.

The local authorities should be enjoined to extend something of their countenance to settlers of good character, *Ouchterlony* 5522, 5523——Higher social position of the civil servants than of the settlers; the civil service is in fact a caste, *Warden* 6190-6193——Social distinction between the civil servants and the settlers, *Marsham* 9585. 9684-9687——Removal since the mutiny of the feeling of antagonism existing between the civil servants and the settlers, *ib.* 9585.

12. *Question as to the Civil Servants having opposed Settlement:*

Evidence to the effect that the civil servants have discouraged settlers by their cold or hostile treatment of them, *Theobald* 976-980; *Mac Nair* 2589, 2590; *Ouchterlony* 5522. 5577; *Saunders* 9815-9830——Prejudicial action of the European magistrates towards European planters, &c.; cause of this, *Theobald* 976——Witness did not personally experience any hostility from the local authorities, but doubts whether settlers were equally unimpeded in other districts, *Auld* 1338-1343. 1349-1354. 1373-1377. 1429, 1430—

Reports, 1857-8—*continued.*

Civil Service—continued.

12. *Question as to the Civil Servants having opposed Settlement*—continued.

1430——Denial that the civil servants have treated the settlers in a spirit of hostility, *Mackenzie* 3922, 3928. 3938; *Hawkins* 4325-4328; *Fowler* 5732, 5733. 5821-5824. 5894; *Warden* 6189. 6194; *Onslow* 6726-6728. 6860. 6879-6884; *Wingate* 7834-7839. 7913, 7914.

See also *Administration of Justice* (*Mofussil*), XI. 4. *European Superintendence* (*Native Officials*). *Haileybury. Judicial Service* (*European Judges*). *Magistrates. Patronage. Public Appointments. Revenue Service. Salaries.*

Climate. Obstacle on the score of climate to the permanent settlement of Europeans and their families in India, *Tremenheere* 110. 413, 414. 460-469; *Mullens* 7119, 7120; *Marsham* 9759. 9763. 9765. 9767, 9768——Principle diseases produced by residence in the plains of India, *J. R. Martin* 201——The alluvial plains are the most unhealthy, *ib.* 202——The amount of heat is less injurious than long residence in it, *ib.* 220. 225——Importance of previous soundness of constitution in the case of Europeans settling in India, *ib.* 293——Greater unhealthiness of Bengal proper than of the plains of Hindostan, *ib.* 299.

The climate in the different parts of India is now fairly understood, *Hooker* 642——Examination on the question of the climate of Bengal, to the effect that it is less unhealthy and less deteriorating than is generally supposed, *Theobald* 858. 1026-1032——Good health enjoyed by the European planters and settlers in the Mofussil in Bengal; illustration in the case of witness, *Theobald* 1028, 1029. 1294-1296; *Freeman* 1552-1554; *MacNair* 2064, 2065; *Wise* 2686-2688. 2852-2856; *Dalrymple* 3548——Laxity of discipline to which witness attributes the bad health of the soldiers in India, *Freeman* 1555——The deleterious nature of the climate is exaggerated, *Wise* 3167.

Europeans may, by proper precautions, enjoy good health in Bengal, *Mackenzie* 3985-3989——Temporary settlers may repair to India, but the climate is an insuperable bar to colonization, *Hawkins* 4356——The climate does not offer any serious impediment whatever to settlement by Europeans, *Waller* 4837——In the plains, settlement, as distinct from colonization, may be carried out notwithstanding the climate, *ib.* 5204.

Families or generations of Europeans could not, generally, exist on the plains of India, *Ouchterlony* 5254——The suitableness of the climate for purposes of colonization refers only to settlers of abstemious, or rather of temperate habits, *ib.* 5428-5431——Practicability by the removal of certain obstacles of colonization of the plains as well as of the hills, *ib.* 5560-5562——The plains of India are decidedly hotter than the West Indies, *Fowler* 5592.

Witness considers that the climate of India, so far as it affects the health, is no obstruction to the settlement of Europeans who intend eventually to leave the country, *Balston* 5898——The climate, however, as affecting the productive power of the soil, is the chief obstacle to extensive settlement, *ib.*——The climate in Bombay need not prevent colonization by Europeans, that is, as capitalists or superintendents of native labour, *Warden* 6028——Illustration of the effects of the climate as shown by an examination of the lives and services of 250 missionaries; inference that where Europeans live moderately the climate does not very rapidly injure them, *Mullens* 7133, 7134. 7299-7301.

The repugnancy of the climate to the European constitution will prevent European families from taking root in the country, as in Australia, &c., *Wingate* 7915; *Bidwell* 9270——Good health enjoyed by witness at Broach; in Guzerat generally Europeans might, by proper precautions, live for many years in fair health, *Landon* 8377-8382. 8680——Better climate in the North Western Provinces than in Bengal, *Saunders* 9902——Witness and his relations in the Doab have not found the climate unhealthy, *ib.* 10130, 10131. 10135-10137.

See also *Children of European Soldiers. Darjeeling* (*Bengal*). *Degeneracy of Europeans. Hill Districts. Mortality. Mysore*, 7. *Neilgherry Hills* (*Madras*), 9.

Coal. Particulars as to the available supplies of coal in Bengal; the coal of Burdwan and of the Nerbudda is the best adapted for commercial purposes, *Tremenheere* 19-24——Different places in Bengal where coal exists; its character, *Theobald* 878-882——Successful development by Europeans of the coal mines in Bengal, *Theobald* 883-885; *Freeman* 1541——Very good steam coal procurable in the Nerbudda valley, *Ouchterlony* 5401, 5402——Difficulty as regards the transit of the Nerbudda coals, *ib.* 5402, 5403.

See also *Bengal Coal Company.*

Cochin. Great increase in the trade of the port of Cochin; it should, instead of Beypoor, have been the terminus of the Madras railway, *Ouchterlony* 5278——Further evidence relative to the advantages of Cochin over Beypoor as the terminus of the Madras Railway, and the importance of Government outlay on the former harbour, *ib.* 5374-5378

Reports, 1857-8—*continued.*

Cochin—continued.

——It is not yet too late to convert the line to Beypoor into a branch, and to make that to Cochin the trunk line, *Ouchterlony* 5374——Belief that Government have done but little towards improving the harbour, *ib.* 5378.

Explanation as to the measures taken for improving the harbour of Cochin, *Onslow* 5609.

Code of Laws. See *Administration of Justice,* XI. 2. 8. *Law Commission. Penal Code.*

Coffee. Instance of successful colonisation brought about by Europeans in the cultivation of coffee in a tract of forest land in the Malabar district, *Ouchterlony* 5303-5307—— Instances of intended taxation of coffee plantations procured from the native proprietors, and which, till they came into the possession of the settlers, had been exempt from taxation, *ib.* 5446-5449——All coffee pays an export duty, *Fowler* 5670——Lands with dense forests, as in Coorg, are very suitable for coffee plantations, *ib.* 5680. 5687, 5688. 5736-5739——Necessity of scientific as well as practical men, in order to grow coffee successfully, *ib.* 5886.

See also *Mysore,* 10. *Neilgherry Hills* (*Madras*), 3.

Coilamully Hills (*Salem*). Particulars as to the climate and resources of the Coilamulley hills in Salem, *Ouchterlony* 5278.

Coimbatore. Character of the country comprised in the Barahmahl and northern part of Coimbatore; imperfect survey of this tract, *Ouchterlony* 5278——There are not many native agriculturists in Coimbatore who are possessed of large capital, *ib.* 5482-5484 ——The land in Coimbatore is not sufficiently fertile to be favourable to the investment of European capital, *Fowler* 5595-5600.

Coleroon Anicut (*Madras*). Incalculable benefit of the Coleroon anicut to the adjacent district, *Ouchterlony* 5372.

Commerce. See *European Capital and Skill. Mercantile Operations.*

Communication, Means of. The want of proper means of intercommunication throughout the country is the first and chief obstacle to European settlement, *Tremenheere* 14-17, 404-412. 422-424——Importance of facilities for the transit of the products of the country from one district to another, *ib.* 17. 20, 21——Enhanced value of products if there are increased facilities of export, *ib.* 404-406——The want of roads and railroads must be supplied before Europeans can properly penetrate and develope the country, *Theobald* 877, 886.

The want of proper means of communication has operated very much against settlement, *Freeman* 1510, 1511; *Waller* 4381——Check upon the development of the agricultural resources of the country through the want of means of transit, *Freeman* 1519, 1520——Very slow travelling formerly in India by dawk, as compared with travelling by horse carriages or railways, *ib.* 1535-1540——Excellent effect of the improved means of communication with this country further adverted to, *ib.* 1817, 1818.

Great want of improvement by Government as regards roads, rivers, and canals in Lower Bengal, *MacNair* 2519-2522——Statement showing the exceedingly low value of cotton, wheat, &c. in the interior as compared with the value at the place of export, on account of the difficulties of transit, *Balston* 5904-5906——Great importance to the settlers as well as to the natives of improved means of transit, *Onslow* 6944-6950; *Wingate* 7730——Of all classes of the community the agriculturist will be most benefited by improved means of communication, *Wingate* 7699——Roads and railways are essential in order to attract settlers to the interior, and to facilitate the transfer of produce, *Landon* 8286.

See also *Bridges. Canals. Cotton,* I. 4; II. *East Indian Railway. Famines. Grand Trunk Road. Railways. Rivers. Roads. Steam Communication. Transit Duties.*

Contract Law. A law is much wanted for the enforcement of contracts, and for the regulation of proceedings with the natives; reference hereon to a repealed law of Lord W. Bentinck on the question of indigo contracts, *Theobald* 958-964——Importance of a proper law of contract applicable to Europeans and natives, *MacNair* 2001. 2096-2107. 2459-2467; *Dalrymple* 3222-3225——Alterations in the law of contract, or in the sale law should not be made merely for the benefit of Government without reference to the planters, *Dalrymple* 3469-3472——The natives are very unpunctual in their money engagements, *Mackenzie* 3627. 3641.

A contract is under no law in the Mofussil; great want of a written law on this subject, *Hawkins* 4162. 4166. 4345-4349——Respects in which a decree in the hands of a zemindar against a ryot, for breach of contract, may be used as an instrument of oppression, *ib.* 4188-4193——Different provisions in the former Opium Contracts Act, and in the present one as regards the means given to Government for enforcing their claims, *ib.* 4203-4210——It would never do to give the indigo planters a Contract Act, similar to the Government Act in the case of opium contracts, *ib.* 4211-4213——Decrees in cases of contract

Reports, 1857-8—*continued.*

Contract Law—continued.

contract should stand over for not more than six, instead of twelve years, before execution, *Hawkins* 4225-4230.

Particulars as to the operation of the coercive legislation relative to advances by the planters to the ryots; necessity of a summary remedy in the hands of the planters, *Baillie* 4546-4549. 4555——Respect in which the process against defaulting cultivators may be said to be more stringent in the case of opium than of indigo, *ib.* 4628——Practice as regards the application of the English law where the Hindoo or Mahomedan laws of contract do not apply, *ib.* 4702-4705——Instance of extreme dilatoriness and of injustice before the final settlement of a suit instituted by witness against a native for breach of contract, *Landon* 8400, 8401. 8405-8414——Weakness of the law in enforcing contracts or agreements, *Bidwell* 9270.

Contractors (*Public Works*). A class of European contractors in India would be found most useful as regards public works, *Ouchterlony* 5383——Absence of encouragement to contractors to go from this country to Madras, *ib.* 5384-5387.

Coolie Emigration. The migration eastward from the Coromandel coast is ascribed by witness to the ryotwar settlement, *Theobald* 888-890. 1080-1082——Stop to emigration from Madras if there were works of irrigation as a means of developing the resources of the country, *Onslow* 6861, 6862.

Coompta Harbour (*Madras*). Importance of an improvement of the harbour of Coompta, *Onslow* 6826-6832.

Coorg. Witness has some land in Coorg, which he got from Government for nothing, but he pays a duty of four annas per maund on all the coffee raised; exception taken to this duty, *Fowler* 5655-5669. 5688-5693——Coorg province is very small, *ib.* 5694——System as regards the tenure of land under Government, the natives paying a small tax for permission to collect cardamoms, *ib.* 5756-5760. 5798——Facilities given by Government to European settlement in Coorg; the land is all being taken up, *ib.* 5759. 5763. 5797. 5825-5828——Witness has not more than 250 or 300 acres of land in Coorg; circumstances under which he obtained it, *ib.* 5761-5763.

Reference to the possibility of Coorg being restored to native government, as operating against European settlement, *Onslow* 6396-6399. 6672-6674. 6771——Explanation that the tenure of land, as in Mysore, does not apply to Coorg, *ib.* 6520.

See also *Coffee. Mysore.*

Copper. Copper exists in the Himalayas, but has not yet been profitably worked, *Tremenheere* 26—— Particulars as to the copper mines in Singbhoom and Beerbhoom, in Bengal, *Theobald* 878. 885——Copper is rather brought to than from the Himalayas, *H. and R. Schlagintweit* 7031.

Coringa (*Madras*). Character of Coringa as a port, *Ouchterlony* 5287, 5288——Considerable works have been carried on for the improvement of the port, *ib.* 5378.

Coromandel Coast Canal. Reference to the Coromandel Coast Canal, and the objections formerly urged by witness against the large outlay upon it, *Ouchterlony* 5374.

Cost of Production. The cost of production in India is less than one-half the cost in America, *Balston* 6332.

COTTON:

I. *As to Production generally:*
1. Natural facilities for increasing the Produce and improving the Quality.
2. Importance of European Superintendence and Preparation.
3. Improvement by the use of the American Saw-gin.
4. Advantages from increased means of Irrigation and Transport.

II. *As to Production in particular Districts:*
1. Lower and Eastern Bengal.
2. Dharwar and Belgaum, &c.
3. Guzerat.
4. Khandeish.
5. Mysore.
6. North-Western Provinces.

I. *As to Production generally:*

1. Natural facilities for increasing the Produce and improving the Quality.

Excellent natural facilities for the production of cotton in India, *Wise* 2679——Probability of procuring cotton more cheaply from India than from the United States, *ib.* 2915, 2916——Ample supply of labour for collecting a largely increased cultivation, *Balston*

Reports, 1857-8—*continued.*

Cotton—continued.

I. *As to Production generally*—continued.

1. Natural facilities for increasing the Produce, &c.—*continued.*

6013-6016——Opinion that cotton in India, though it may be much improved, can never be brought to equal American cotton, *Warden* 6178-6183——Probability of the deterioration of improved cotton seeds, as not being indigenous to the soil, *ib.* 6178-6180. 6183.

Question as to the necessary degeneracy in India of the Mexican or American cotton seed, *Onslow* 6704-6707——Effect of the market price of cotton upon the quantity grown in India, *ib.* 6905; *Landon* 8326-8329——Belief that although cotton may be very extensively cultivated in India, a sufficient quantity cannot at any time be relied upon to make this country independent of American cotton; the price, in fact, will govern the production in India, *Wingate* 7924-7932. 8176-8185.

Cotton can be cultivated only once in three years advantageously on the same land, *Landon* 8326——Inferior quality of the Indian to the American cotton, *ib.* 8330, 8331——Large crops and inferior quality of the cotton grown upon those moist soils, where the land is allowed to lie fallow; a rotation of crops is not, however, largely practised, *ib.* 8514-8526——Remunerative price of cotton at the present time, *ib.* 8527-8530——The ryots are fully alive to the cultivation of that crop which yields most profit, *ib.* 8713-8715.

2. Importance of European Superintendence and Preparation:

Great importance of European superintendence in the production and preparation of Indian cotton, *Tremenheere* 50-52. 176-179——Probability of cotton being cultivated with the same success as indigo, if the same energy be applied thereto by settlers, *Freeman* 1929-1936——Objection to a system of purchasing cotton from the natives, *Ouchterlony* 5485, 5486.

Improved character of the cotton, accordingly as it is cultivated or picked with care, *Onslow* 6407——Illustration of the improvements which may be carried out in the cultivation and cleaning of cotton, *ib.* 6701-6704——Opening to European capitalists in buying up and preparing native cotton, *ib.* 6701, 6702. 6740*——Tricks played by the natives with the cotton in order to add to its weight, *ib.* 6702.

Advanced price obtained for the cotton cleaned by natives, as compared with that cleaned by the native process, *Landon* 8565——Tendency of the natives to tamper with the cotton, *ib.* 8556-8563.

3. Improvement by the use of the American Saw-gin:

Great advantage in Dharwar, &c., from the use of the American gins, *Onslow* 6701, 6702——Particulars as to the increased use of saw-gins in cleaning cotton; great importance of these machines, *Wingate* 7733-7744——Considerable advantage derived by witness in Guzerat from the use of the American saw-gin, *ib.* 8337-8341——Circumstance of the native producers not using the saw-gin, save by occasionally sending their cotton to witness's establishment, and having the use of his machinery, *ib.* 8342-8348.

4. Advantages from increased Means of Irrigation and Transport:

Very low price of cotton in the interior as compared with the price at the place of export, *Balston* 5904——Immense improvements effected by irrigation in the quality and produce of the cotton plant; grounds for this statement, *ib.* 5967-5980. 5997-6006——Calculation that by means of the proposed canals a bale of 400 lbs. of cotton may be produced per acre, and delivered at the seaport in India at a total cost of 2*l.* 8*s.* 6*d.*, which bale would be worth 10*l.*, and the seed 18*s.*, leaving a profit of 8*l.* 9*s.* 6*d.* per acre, *ib.* 5984-5996——Anticipation that in the course of time the proposed canals would result in driving the American cotton out of the English market, *ib.* 6007-6018——In order to encourage the cultivation of cotton in India, irrigation is wanted more than railways or other works, *ib.* 6018.

Witness is confident that irrigation would greatly improve the growth of cotton, *Onslow* 6609-6611——Necessity of irrigating cotton on a different system from sugar, rice, &c., *ib.* 6740——Enhancement in the market price of cotton through the cost of transit, *Wingate* 8100-8113——In several districts of India the cultivation of cotton cannot be further increased, but in many districts railway communication will lead to a considerable development of cotton and other produce, *Landon* 8710-8718.

II. *As to Production in particular Districts:*

1. Lower and Eastern Bengal:

Reasons to which the non-cultivation of cotton in Lower Bengal is to be attributed, *MacNair* 2348-2361. 2468. 2534-2543——The main difficulty is on the score of inland transport *ib.* 2539-2543.

Cotton is grown in large quantities on the Tipperah hills, *Wise* 2679——Large crops of very good cotton grown by witness near Dacca, *ib.* 2679, 2680. 2735——Experiment by the Government in cotton cultivation in Dacca; causes of its failure, *ib.* 2683, 2684. 2742-2757——Further particulars relative to the cultivation of cotton in Dacca, and the reasons

Reports, 1857-8—*continued.*

Cotton—continued.

II. *As to Production in particular Districts*—continued.

1. Lower and Eastern Bengal—*continued.*

reasons why it has not been more extensively purchased, *Wise* 2729-2766. 2742-2757. 2790-2793. 2803-2807. 2908-2916.

2. Dharwar and Belgaum, &c.:

Greatly increased growth of Mexican cotton in the Dharwar country, *Onslow* 6703——Large growth of New Orleans cotton in the South Mahratta country, where it was first introduced in 1845, *Wingate* 7733——Tabular statements delivered in showing the extent of cotton cultivation in the collectorates of Belgaum and Dharwar, for a series of years between 1841 and 1857, *ib.* 7916——Further reference to the successful cultivation of New Orleans cotton in Dharwar, although in adjacent districts the experiment has failed, *ib.* 8194-8200.

3. Guzerat:

Grounds for concluding that by means of canals of irrigation and navigation cotton of improved quality may be produced in Guzerat, &c., and exported in an immensely increased quantity, and at a low price, *Balston* 5904. 5967 *et seq.*——The present cost of Guzerat cotton in Bombay may be taken at 3*d.* per pound, of which the cultivator gets only 33 per cent., *ib.* 5981-5983.

Witness has resided as a cotton merchant for eleven years in Bombay and Guzerat; has a cotton factory and other interests in Guzerat, *Landon* 8274-8282——In the Broach and Kattwar districts of Guzerat a full proportion of the soil is under cotton cultivation, *ib.* 8325, 8326——Increased value of the Guzerat cotton through the increased care of the natives in packing and cleaning, *ib.* 8332-8336——There is one native establishment on the same principle as witness's for purchasing and cleaning cotton, *ib.* 8493-8496——Witness's establishment when in full work can turn out about 25,000 lbs. of clean cotton daily, *ib.* 8497.

Practice in regard to the packing and screwing of the cotton cleaned by witness, *Landon* 8498-8500——Distinguishing mark put by witness on all cotton sent by him to market, *ib.* 8501, 8502——Export by witness of large quantities of native cleaned cotton, *ib.* 8502-8504——Varying yield per acre of cotton in Guzerat, *ib.* 8506-8517——In the Broach districts an increased quantity cannot advantageously be grown, *ib.* 8531, 8532. 8691, 8692.

Varying quality of the Guzerat cotton in different seasons, *Landon* 8537, 8538——Value respectively of the best Broach cotton and of the American upland cotton, *ib.* 8539——Failure of the application of irrigation in growing cotton in Guzerat, *ib.* 8540-8544——Further reference to the native establishment similar to witness's; fraudulent character of the native at the head of it, *ib.* 8546-8557——Expense incurred by Government in encouraging and improving cotton cultivation in the Broach district, *ib.* 8683-8690——Failure of the New Orleans seed in Guzerat, *ib.* 8685, 8686.

4. Khandeish:

Witness has estimated that there are 5,000,000 acres of waste lands in Khandeish, upon the greater part of which cotton or other produce might be grown, *Wingate* 7653, 7654. 7667-7669——Considerations as to the probable amount of cotton which, by means of European capital, may be produced in Khandeish; opinion that it is not possible to produce a crop at all approaching to that of the United States, *ib.* 7654 *et seq.*——Calculation showing that Khandeish may produce about one-eighth of the United States production, *ib.* 7655, 7656. 7926.

Cotton is now extensively grown in Khandeish, and its cultivation is increasing very rapidly, *Wingate* 7656, 7657——Doubt as to any particular improvement in the mode of cleaning cotton in Khandeish, *ib.* 7685-7688——Very superior quality of the Khandeish cotton as compared with that of Broach or Surat, *Landon* 8533-8538.

5. Mysore:

Very excellent cotton grown upon an experimental farm which witness had charge of in the Nugger district in Mysore, *Onslow* 6363-6366. 6425-6430——The experiment of witness did not pay its expenses, but it was on a very small scale, and was not intended to do so, *ib.* 6877, 6878.

6. North Western Provinces:

Falling off in the cultivation of cotton in the Doab for export; causes thereof, *Saunders* 10132-10134. 10225-10229——The cultivation of cotton in the North-west Provinces may be increased and improved by means of irrigation, but its competition with American cotton must be very uncertain, *ib.* 10230-10240——The cotton of the Doab, &c., is inferior to all the Bombay cottons, *ib.* 10250.

Craufurd, Capt. H. W. Proposition by Captain Craufurd on the subject of Government sales of land for arrears of revenue, *App.* (*Fourth Rep.*), *p.* 328-332.

Criminal Jurisdiction (*Mofussil Courts*):

1. *Strong Objections to the contemplated "Black Act."*
2. *Explanation on the part of the Law Commission.*
3. *Mode of Introduction of the Act in the Legislative Council.*
4. *Views expressed in the Council by Sir Arthur Buller.*
5. *Proposed exemption of Government Officials.*
6. *Present State of the Criminal Law in the Mofussil; Amendment required.*

1. *Strong Objections to the contemplated "Black Act:"*

Reasonableness of the objections of the Europeans to be placed under the Black Acts; that is, Acts placing them indiscriminately with the natives of the country under the same local tribunals, *Theobald* 968——Belief that the Act of 1833 does not enjoin the same law for natives and Europeans, and offers no proper foundation for the threatened Black Act, *ib.* 1034, 1035——Witness further contends that it is essential to have one law for the natives and another for the Europeans, *ib.* 1112-1119——False charges would constantly be brought against Europeans if liable to be tried by the local tribunals for capital offences, *ib.* 1140——Defence of the principle upon which witness contends that Europeans in the Mofussil should be subject to the jurisdiction of the Supreme Courts alone, until a system of courts can be devised with which they may reasonably be satisfied, *ib.* 1248-1263——Witness does not wish to look upon the Europeans in any way as the dominant class, *ib.* 1258. 1263.

Deterrent effect upon settlement in consequence of the threatened enactment from time to time of measures subjecting Europeans to the jurisdiction of the natives, *MacNair* 1981-1988. 2213-2216. 2341-2346——The Europeans must not be under the same laws as the Hindoos and Mussulmans, *ib.* 2002——If the Black Act be passed, many indigo planters will leave the country, and there will be a great depreciation and loss of property, *ib.* 2569-2575——Repetition of objections to the proposition for putting Europeans in the Mofussil under the jurisdiction of the native courts and juries, *ib.* 2611-2620.

Strong complaints against the threatened enactment of measures for subjecting European settlers to the criminal jurisdiction of native judges and native juries, *Wise* 2637. 2645. 2647. 2650; *Dalrymple* 3310-3327——Very limited number of European judges required in the Mofussil in order to exercise jurisdiction over the planters, *Wise* 3069-3080——With competent English judges in the Mofussil to try European cases, the proposed Black Acts would not be objected to, *Dalrymple* 3328-3335——The planters would most probably be willing to pay for the expense of English criminal judges, *ib.* 3503——Illustration of the evil of a power in the native judges to imprison Europeans, *ib.* 3558.

Witness disapproves of European settlers or East Indians being tried criminally before the native judges; grounds for the objection, *Mackenzie* 3772. 3773. 3832; *Hawkins* 4083-4086. 4088-4092. 4261; *Baillie* 4525. 4586. 4738, 4739; *Waller* 4878, 4879; *Mills* 8863, 8864. 9086-9090; *Marsham* 9431. 9555. 9557——Objection to Europeans being subject to the Company's courts in the interior presided over by Europeans, *Waller* 4881——Approval of the exemption for the present of Englishmen from native criminal jurisdiction, *W. H. Martin* 9167, 9168——Objection by the Europeans in the North Western Provinces to be placed under the jurisdiction of native judges in criminal cases, *Saunders* 9800-9803.

Petitions from planters, merchants, and British subjects generally, in Bengal, in opposition to the proposed jurisdiction in criminal matters, *App.* (*Fourth Rep.*), *p.* 233-238.

2. *Explanation on the part of the Law Commission:*

Passage in the Law Commission Criminal Procedure Code, relative to the last proposed Black Act, *Hawkins* 4059——Foundation of all the Black Acts of late years upon the Act 3 & 4 Will. 4 c. 85, the inference drawn from such Act, having been that Europeans should be made liable to the criminal courts in the Mofussil, but not punishable capitally by them, *ib.* 4063-4065——Instructions to the Law Commissioners under which they could not have felt empowered in making courts from which Europeans should specially be exempt, *ib.* 4065-4069——The main objection by Europeans in India to the Commissioners' scheme is to the provision making them liable, criminally to native jurisdiction, *ib.* 4070.

Nature of the jurisdiction proposed by the Black Act, in the case of the subordinate criminal courts of the first and of the second class; constitution of these courts, *Hawkins* 4071-4075——Except under a special order from Government the native judges could not, without a reference to a European magistrate, exercise criminal jurisdiction over Europeans; hence it was inferred by the Commissioners that Europeans would

Reports, 1857–8—*continued.*

Criminal Jurisdiction (*Mofussil Courts*)—continued.

2. *Explanation on the part of the Law Commission*—continued.

would not generally be brought before the native judges, *Hawkins* 4075–4082. 4087—— Outline of the system of criminal procedure as recommended by the Law Commissioners, *ib.* 4093–4099——Provision in the new code as regards the jurisdiction of the magistrate in cases of European criminal charges in the Mofussil, *ib.* 4251–4253.

3. *Mode of Introduction of the Act in the Legislative Council:*

Attempt of the Legislative Council to introduce at first a part only of the Law Commission, *Hawkins* 4257–4259.

Explanation as regards the introduction of the Black Act in the Legislative Council, that there was no attempt made to smuggle it through the Council without bringing in the whole as prepared by the Law Commission, *Hawkins* 4405.

4. *Views expressed in the Council by Sir Arthur Buller:*

Reference to the views of Sir Arthur Buller, member of the Legislative Council, against the contemplated Bill for making Englishmen in the Mofussil amenable to the Company's courts, and for exempting the civil servants therefrom, *Freeman* 1559. 1826–1829——Impression created by the views expressed by Sir Arthur Buller, relative to the Black Acts, *MacNair* 2453–2457.

Consideration of the views of Sir Arthur Buller, as expressed in the Legislative Council, relative to the proposed Black Act, and the exemptions contemplated in it as regards Government servants; misapprehension of Sir A. Buller, in supposing that native judges were not included in the exemption as regards trial only by the session court or the high court in Calcutta, *Hawkins* 4107–4112. 4256. 4372–4380.

5. *Proposed Exemption of Government Officials:*

Injustice in the proposed exemption of the company's officers from the operation of the Black Acts, *MacNair* 2237–2241——The clause exempting Government officials and soldiers and sailors from the Black Acts, was brought forward by Mr. Peacock, *ib.* 2529——Importance of distinguishing officials from settlers, and of exempting the former from the jurisdiction of the Mofussil criminal courts, *Hawkins* 4111. 4160. 4336, 4347.

6. *Present State of the Criminal Law in the Mofussil; Amendment required:*

Nature of the protection afforded by the existing criminal law in case of maltreatment of natives in the interior by Europeans; approval of other recourse in grave cases besides the Supreme Court, *Theobald* 1036–1039. 1137–1141——The present system of criminal jurisdiction does not give an impunity to Europeans, *ib.* 1141——Different ways in which Europeans are now amenable to the jurisdiction of the local magistracy, *ib.* 1228, 1229——Ample power at present of the country magistracy over Europeans, *Wise* 2649——Power at present of the native judges to fine, but not to imprison Europeans; witness has not known any grievance from this power, *Dalrymple* 3318–3327. 3446–3450.

In the Regulation Provinces, all criminal offences by natives are tried under the Mahomedan law, *Hawkins* 4238–4241——Englishmen charged with criminal offences in the Mofussil are sent to Calcutta for trial, frequently at very great inconvenience and expense, *ib.* 4242. 4249, 4250——In cases of petty assaults by Europeans in the Mofussil, the district or zillah magistrates may exercise jurisdiction, *ib.* 4242. 4250. 4252. 4254, 4255——Frenchmen in Calcutta are subject to the English law, and in the Mofussil to the modified Mohomedan law, *ib.* 4243–4248.

Limited jurisdiction of the English Mofussil magistrates over Europeans; advantage of some extension of this jurisdiction, *Baillie* 4623–4627——The criminal jurisdiction of the European magistrates might be enlarged, *Mills* 8865–8867——Great inconvenience of the present system of sending Europeans charged with crime to Calcutta, *ib.* 8868——Reference to a murder in Kishnaghur, about twenty-five years ago, when the Englishman concerned in it was acquitted by the Supreme Court, *W. H. Martin* 9169–9172.

See also *Administration of Justice* (*Mofussil*). *Penal Code.*

Crop-Assessment. Practice in regard to the assessment by the zemindars in Bengal, of the different descriptions of crops, *MacNair* 2037–2044——The system of Government assessment in Bombay, according to the crop, ceased several years since, *Wingate* 8085–8088. 8090.

Cuddalore (*Madras*). Failure of some works of improvement carried out at Cuddalore, contrary to witness's views, *Ouchterlony* 5378——Facilities of Cuddalore harbour for the export trade, *ib.*

Cultivation of the Soil. See *Agriculture.*

Reports, 1857-8—*continued.*

Currency. Evidence in favour of the introduction of a gold currency into India, and of the issue of Government paper bearing a certain rate of interest, and payable after twelve months, *Wise* 2689-2691. 2952-2962——Approval of the issue in India of a Government convertible paper, payable at terminable periods, *Mackenzie* 4001, 4002——Respects in which it is very desirable to restore the gold currency in India, *ib.* 4030-4036——Practice as to the gold circulation; its prohibition in 1853, *ib.* 4037-4042——Great inconvenience through the use of silver as the sole circulating medium, *Baillie* 4542-4544. 4740.

Very much larger metallic currency required under the British revenue system than under the native system; quotations hereon from an article by witness in the "Bombay Quarterly Review," *Wingate* 7707——Grounds for objecting to the substitution of a gold standard for a silver standard in India; reference hereon to witness's article in the "Bombay Review," *ib.* 7710-7714.

See also *Silver.*

Cutchery Compounds. Suggestions with a view to constituting every cutchery compound as a sort of fortress, *Ouchterlony* 5408.

Cuttack (Bengal). See *Land Revenue Settlement, &c.*, V.

D.

Dacca. Difficulty as regards water-communication between Dacca and Calcutta, *Wise* 2760-2769——Witness does not consider that the population of Dacca, &c. has retrograded during the last 50 years, *ib.* 2846-2848——There are many highly respectable and intelligent natives in Decca, but Europeans there would still like to be tried by a jury of their own countrymen, *ib.* 3081-3084.

Report of a meeting of Europeans to complain of disorders in the Dacca district, through the inefficiency of the deputy magistrate, *App.* (*Fourth Rep.*), *p.* 243, 244.

See also *Cotton*, II. 1.

Dacoitee. Improved practice in dealing with cases of dacoitee and thuggee, *Mackenzie* 3929, 3930.

Dalhousie, Lord. Considerable vigour and energy under Lord Dalhousie's Government in the way of improvement, *Marsham* 9660.

Dalrymple, James. (Analysis of his Evidence).—Has been upwards of thirty years in different parts of Lower Bengal; was in the management of the firm of J. & R. Watson, 3168-3174——There are upwards of fifty Europeans in Messrs. Watson's concerns; difficulty in keeping up the number, 3175-3177——Messrs. Watson have in their indigo, silk, and sugar concerns, a capital of about 300,000 *l.* in block, and expend about 200,000 *l.* annually, 3178-3187.

Concurrence generally in the evidence of Messrs. Freeman, MacNair, and Wise, in regard to the state of the law, police, and magistracy, 3188-3190——The police are extortioners, and constant instigators of quarrels, and are corrupt in every sense of the word; witness has known many instances of this, 3192-3297, 3466-3468. 3527-3534——It is very important to introduce European superintendence into the police, 3193. 3208-3215——Instance of corrupt and extortionate conduct on the part of a darogah; this case, in which witness was the victim, occurred about twenty years ago, and ended in the exculpation of the darogah by the magistrate, 3196-3205. 3466-3468.

The covenanted magistrates have not, as a body, improved since witness has been in India, 3209, 3210——The native deputy magistrates are very unfit for the police, 3211-3214——Efficient magistrates might, without difficulty, be found in the uncovenanted servants, 3216——Advantage if an increased number of Europeans could be procured for the concerns of Messrs. Watson, 3217-3221——The European settlers are much in want of a proper law of contract, 3222-3225.

Inefficiency of the great majority of the European magistrates in the Mofussil, more especially in their want of a practical knowledge of the native languages, 3226-3232. 3371-3375. 3414——Absence of increase in the number of Europeans in the Mofussil, notwithstanding the increase of factories; more Europeans and natives are employed than formerly, 3233-3235. 3277-3281. 3502——Witness attributes the non-increase of settlers mainly to the bad state of the laws, and of the police, and the general insecurity of person and property, 3236-3238. 3282-3293. 3352-3370. 3574, 3575.

Confirmation of the evidence of other witnesses as to the insufficient security, under the sale law, to the under-tenures, 3239-3244——Roads are much wanted in Bengal; there are very few there, 3245-3247——Advantage on the score of road-making if there were an increased number of settlers conjointly, with a system of local self-government, 3248-3257——Probability of the Europeans and natives maintaining the roads if made by Government, 3253-3255. 3391-3397——The natives understand road-making, and there is no want of labour, 3255. 3398-3401.

An improvement is urgently required in the state of the Nuddea rivers, but Government has not taken any effectual steps in the matter; the required improvement would be

Reports, 1857–8—*continued.*

Dalrymple, James. (Analysis of his Evidence)—*continued.*

expensive, but might be defrayed out of the tolls, 3258–3265. 3386–3390. 3436–3442. 3484–3495. 3559–3563. 3571–3573——Cultivation has been greatly improved and increased wherever there has been European settlement, 3266, 3267 —— Settlement has also greatly improved, and if extended, will further improve the physical condition of the natives, 3268–3270. 3402–3406——Increased native education if the settlers increase, 3270–3274——Assistance now given by the settlers towards native education; instance in the case of Messrs. Watson, 3271–3273. 3443. 3565–3567.

Suggestions with a view to the protection of the putneedars without prejudice to the security of the revenue, 3294–3309. 3462–3464. 3553–3557——Decided objection to Europeans being subject to the criminal jurisdiction of native judges, 3310–3327—— Approval of the retention of the native civil judges, 3312–3318——Power at present of the native judges to fine, but not to imprison Europeans; witness has not known any grievance from this power, 3318–3327. 3444–3450——With competent English judges in the Mofussil to try European cases, the proposed Black Acts would not be objected to, 3328–3335.

Difficulty in buying estates in Bengal, 3337. 3504–3506——Number of years' purchase fetched by the sale of zemindaries and putnees in Bengal, 3338–3343. 3451–3453—— Higher prices generally bid at sales by natives than by settlers, 3344–3346—— Difficulty as regards the rights of the ryots if the land were to be sold out and out, 3347–3351——Insufficiency of the inducement as regards the employment of European assistants adverted to as the cause of the insufficient number available for the factories, &c., 3360–3369. 3497–3413.

The behaviour of the civil servants towards Europeans has a deterrent effect upon settlement, and Government has, on the whole, become more despotic of late; grounds for this statement, 3370. 3380–3385. 3454–3457. 3469–3476. 3520–3526——Good conduct of the police, and excellent order in those districts where there happen to be competent magistrates, 3376–3379. 3527–3530——Reason why Government rather than the zemindars should make the roads; provision to that effect under the decennial settlement, 2391–3397. 3431–3433——Tendency of the ryots to become attached to the European settlers, 3402. 3576–3580——Increased consumption of English manufactures through the effects of settlement, 3404–3406. 3507.

The numerous forms proposed under Mr. Grant's sale law led to the planters' objections to it, 3415–3419——In making roads, bricks may be procured without any great expense; they are laid down broken, 3420. 3483–3487—— On the resumed lands in Bengal, but not in the zemindaries, the Government rent is, in many instance, high, 3421–3430——Want of proper funds and local committees for the formation of roads, 3434, 3435——Approval of a substitution of Europeans for natives in some of the higher public situations, 3458–3461.

The local authorities have of late years made much greater efforts than they did thirty years ago towards developing the resources of the country, 3465——Alterations in the law of contract, or in the sale law, should not be made merely for the benefit of Government without reference to the planters, 3469–3472——Approval of all revenue questions being tried in separate revenue courts, 3475——Improvement in the conduct of the civil service towards the settlers if some of the higher appointments were open to uncovenanted servants, 3476–3482.

The population of Bengal are not generally in want of rice, as food, but in winter are under-clothed, 3497–3499——The planters would most probably be willing to pay for the expense of English criminal judges, 3503——The magistrates often detain people in prison unlawfully, and witnesses are constantly detained in a very improper manner, 3508–3519——Approval of the operation of the Lawrence Asylum as a means of providing Europeans for factories, &c., 3535–3539——Advances to the ryots by the firm of Messrs. Watson have accumulated during the last thirty years to about a million sterling, of which about half has been remitted, 3540–3544.

Importance of the use of the English language in the courts instead of the Hindee, which is not the vernacular of the country, 3545–3547——Witness did not suffer from bad health in Bengal, 3548——Abundance of available labour in India, 3549, 3550—— With proper laws and police, and proper means of communication, there is no country more advantageous for settlement than Bengal, 3551, 3552——Illustration of the evil of a power in the native judges to imprison Europeans, 3558——Witness suffered through the operation of the resumption laws, 3564——Many cases of torture by the natives have come to witness's knowledge, 3568, 3569——Advantage if the agricultural and commercial interests were represented in the Legislative Council, 3570.

Darjeeling (Bengal). The Darjeeling station is very promising as a sanatarium, *J. R. Martin* 214. 233——Origin of the establishment of a sanatarium at Darjeeling about the year 1840, *Hooker* 528–531——Immense increase since 1840 in the population of Darjeeling, more especially as regards the natives, who flocked thither as to a new colony, *ib.* 532. 537–542——Exceedingly healthy climate of Darjeeling; the summers, however, are very rainy, and the winters rather cold, *ib.* 533. 536——The station of

Reports, 1857-8—*continued.*

Darjeeling (*Bengal*)—continued.

Darjeeling is between 7,000 and 8,000 feet high, which elevation is about the best in the Himalayas, *Hooker* 534, 535——Favourable character of Darjeeling as a station for troops, *ib.* 543, 544——Probable establishment in time of schools for the education of European children, *ib.* 545-547.

Evidence as to the great importance of Darjeeling as the basis for establishing a trade with Tibet and Central Asia, *Hooker* 548 *et seq.*——Darjeeling, which is now British territory, was purchased from the Rajah of Sikkim, who made a very good bargain in the matter, *ib.* 568, 654-656——Suitableness of Darjeeling for settlement and cultivation, *Hooker* 643, 644. 664, 665; *Waller* 5200, 5201.

Opinion that settlers' children or grandchildren would not degenerate in Darjeeling, *Waller* 5202, 5203——The annual fall of rain exceeds 120 inches, *H. and R. Schlagintweit* 6984——Difficulty of access to Darjeeling from Calcutta, from which it is about 300 miles distant, *Mullens* 7123, 7124.

II. *Civil Service:*

1. Evidence as to Discouragement by the Civil Servants.
2. Evidence to a contrary purport.

I. *Government:*

1. Evidence as to Discouragement by Government:

Check to settlement through the spirit of Government opposition, *Theobald* 976-980——Respects in which the policy of the East India Company has always been opposed to the settlement of Englishmen in India, *MacNair* 1979 *et seq.*——Advantage to the country if the former policy of the East India Company had encouraged English settlement, *ib.* 2210-2212——Except as regards the wish to enforce the Black Acts, witness does not complain more of the present Government of India than of the Government in former years, *ib.* 2417-2423.

Constant hostility displayed by the Indian Government, through its laws, towards European settlement, *Wise* 2630. 2647. 2650-2653. 2877-2885. 2984, 2985——The behaviour of the civil servants towards Europeans has a deterrent effect upon settlement, and Government has, on the whole, become more despotic of late; grounds for this statement, *Dalrymple* 3370. 3380-3385. 3454-3457. 3469-3476. 3520-3526——Argument that the real impediment to the colonisation of India is to be found in the exclusive policy of the system under which the country has been governed, *Waller* 4840.

2. Evidence to a contrary purport:

Impression that there is not on the part of Government any obstacles to settlement, *Tremenheere* 379, 380. 410. 413. 420, 421——Absence of discouragement or prejudice on the part of the Government against European settlement, *Auld* 1329-1331; *Mackenzie* 3922. 3928. 3938; *Hawkins* 4325-4328; *Bidwell* 9270.

Emphatic

Reports, 1857-8—*continued.*

Discouragement of Settlement—continued.

I. *Government*—continued.

2. Evidence to a contrary purport—*continued.*

Emphatic denial of the statement that Government and its officials show a marked hostility to, and jealousy of European settlers; in Mysore, at least, every encouragement has been given, *Onslow* 6726-6728. 6860. 6879-6884——Statement, based on an experience of twenty-five years in Bombay, that the general tendency of Government and its officers is, not in any way to thwart or discourage, but in every way to promote and encourage European settlement, *Wingate* 7834-7839. 7913, 7914.

Government has done everything it could to encourage European settlement, *Mills* 8810-8813——Greater favour shown by Government of late years than previously towards European settlement, *ib.* 9107-9111——Absence of discouragement to settlers by the Government when witness was in India, *W. H. Martin* 9164——Since 1833 there has been an entire absence of any hostility on the part of Government towards European settlement; witness has never heard any one complain that such hostility existed, *Marsham* 9497-9502. 9657. 9659. 9758.

II. *Civil Service:*

1. Evidence as to Discouragement by the Civil Servants:

Cold treatment experienced by the European inhabitants from the upper ranks of the civil service, and from the Government; instances of this, *Theobald* 976-980——As manager of the estates of Messrs. Watson & Co., witness did not experience any hostility from the local authorities; doubt as to Englishmen being equally unimpeded in other districts, *Auld* 1338-1343. 1349-1354. 1373-1377. 1429, 1430——Impression that the civil service is somewhat jealous of the public employment of settlers, *MacNair* 2589, 2590——Respects in which the settlement of Europeans in the Neilgherries, &c., is discouraged by the Government functionaries; a sort of cold shade is thrown over them, *Ouchterlony* 5522. 5577——Unfriendly disposition of the majority of the Government officials in the Allygurh district towards the settlers, *Saunders* 9815-9830.

2. Evidence to a contrary purport:

Absence of obstruction or hostility on the part of Government or the civil service towards European settlement, *Mackenzie* 3922. 3928. 3938; *Hawkins* 4325-4328; *Onslow* 6726-6728. 6860. 6879-6884; *Wingate* 7834-7839. 7913, 7914——The Government officials showed witness every attention and encouragement as a settler; he never heard of any opposition to settlement, *Fowler* 5732, 5733. 5821-5824. 5894——Impression that there is no disinclination among the civil servants in Bombay to encourage European settlers, *Warden* 6189. 6194——There are very few settlers in Bombay, but those who have gone there have received every encouragement from the Government officers, *Wingate* 7835.

Drought. The drought prevents the land from producing enough to support any cultivator except the Hindoo or Mussulman, who lives on less than 2*d.* a day, *Balston* 5898. 5935.

Dum Dum. Advantage if the 900 children at Dum Dum were removed to Darjeeling, *J. R. Martin* 301.

E.

East Indian Railway. Statement as to the East Indian Railway being more on the line of commerce than on the line of production, *Tremenheere* 343-345——Great importance of numerous branches to the railway adverted to, in connexion with the delay in sanctioning lines into Oude and Rohilcund, *ib.* 483-486——Blame attributed to Government as regards the delay in the progress of the railway, *Freeman* 1945-1949; *MacNair* 2544, 2545——The railway to Rajmahal will in some respects be better than a canal, *MacNair* 2299, 2300.

East Indians. Reference to the plan several years ago for East Indian colonisation in the Bombay Presidency, which was encouraged by Sir John Malcolm, but was disapproved of by the Court of Directors, *Theobald* 868-870——Right of East Indians, and of children born in India of European parents, to hold land without restriction, *ib.* 876——There are very few East Indians in the lower parts of Bengal, *Mackenzie* 3996, 3997——Unsuitableness of the East Indians as materials for colonisation, *Mullens* 7127-7129.

See also *Lex Loci.*

Eastern Bengal Railway. Benefit anticipated when the Eastern Bengal Railway from the Ganges to Calcutta is completed, *Theobald* 882; *MacNair* 2015.

Education of Natives. The attention of the planters, &c. has not been particularly given to the providing of schools; assistance given in some cases; *Freeman* 1556-1558. 1724, 1725——Increased assistance given of late years by the settlers and by Government

Reports, 1857-8—*continued.*

Education of Natives—continued.

towards the establishment of schools, *MacNair* 2066-2069——Efforts by Government to extend education, *MacNair* 2525; *Wise* 2926——Increased native education if the settlers increase, *Dalrymple* 3270. 3274——Assistance now given by the settlers towards native education; instance in the case of Messrs. Watson, *Dalrymple* 3271-3273. 3443. 3565-3567.

Improvement anticipated in the natives from increased means of education, the means now afforded them working very advantageously, *Ouchterlony* 5519——Witness kept up a school at his own expense, but is not aware of other planters having done so, *Fowler* 5780-5783——Education must go hand in hand with the reforms contemplated by witness in the courts of justice, *Warden* 7486. 7503——Witness had no personal knowledge of any young men educated at the Elphinstone College, but he fully believes that English education will vastly improve the native mind, and that properly educated natives may be largely made use of for Government employment, *Wingate* 7954-7965——Education is sought by the natives solely as an avenue to public employment, *Landon* 8669-8671.

Elphinstone College (*Bombay*). Examination as to the deficiencies of students educated at the Elphinstone College, *Warden* 6105-6108. 6262-6264. 7449-7461. 7514-7527——The students at the college are all natives, without reference to caste or religion, *ib.* 7561-7563——The college was principally founded by the natives of Bombay in honour of Mr. Elphinstone, *ib.* 7563.

Emigration. See *European Capital and Skill.*

Enam Commission (*Bombay*):

1. *Origin and Constitution of the Commission.*
2. *Complaint as to the Practice in dealing with Claims.*
3. *Injustice and Impolicy involved in the Resumptions.*
4. *Slow Progress of the Investigation.*
5. *Parliamentary Return, containing certain Particulars.*
6. *Tendency of the Resumptions to deter Settlement.*
7. *Popular Feeling produced by the Commission.*
8. *Contemplated Extension of the Investigation to Guzerat.*
9. *Propriety of the Commission being revoked, and of there being a proper Appeal from its Decrees.*
10. *Information generally relative to Enams in Bombay.*

1. *Origin and Constitution of the Commission:*

Explanation of the origin of the Enam Commission, *Warden* 6062——Impropriety in the Commission being composed of inexperienced and unqualified men, *ib.* 6075——Further reference to the members of the Enam Commission, as not the most competent men for the office; Mr. Hart is a very able man, of some twenty-three years' standing in the service, but Captain Cowper is probably under thirty years of age, *ib.* 6233-6242——Age and experience of Captain Cowper further adverted to, *ib.* 7438-7445——Judges of Her Majesty's courts would have made most efficient members of the Commission, *ib.* 7466.

2. *Complaint as to the Practice in dealing with Claims:*

Hardship of the exclusion of enamdars from the right of supporting their claims in a court of justice, *Warden* 6066-6068. 6129-6134——Impropriety of the *onus probandi* being thrown upon the enamdar, *ib.* 6074, 6075. 6138, 6139——Impropriety of the final appeal being only to the Governor in Council, and in the claimant not being allowed to support such appeal in a proper manner, *ib.* 6074, 6075. 6129-6134——If it be the fact that a large proportion of the land in Western India is alienated and held by fraudulent titles, the proper way to test such titles is through the courts of law, *ib.* 6075.

Further evidence in confirmation of the statement that the *onus probandi* is improperly thrown upon the claimant or defendant, *Warden* 7370 *et seq.* 7528, 7529——If Government have reason to believe that lands are held by fraudulent titles, the adjudication of such titles should be delegated to a properly constituted court, founded on recognised principles of justice, and carrying out the general provisions of the law, *ib.* 7387-7394. 7424. 7578——Want of a proper appeal in Indiaa gainst the decision of the Commissioners further adverted to, *ib.* 7419-7422. 7530-7535——Origin of the law by which in the Deccan enamdars were unable to sue the Company in courts of justice, *ib.* 7462, 7463.

Grounds for the statement that the *onus probandi* really rests with the Commissioners, *Wingate* 7933-7937.

3. *Injustice and Impolicy involved in the Resumptions:*

The Commission has disturbed Mr. Elphinstone's settlement, and has unduly interfered with the rights of the Peishwa's subjects, *Warden* 6062 *et seq,*——Main objection to the operation of the Commission on the ground that active steps were not taken until

1852,

ENAM COMMISSION (BOMBAY)—continued.

3. *Injustice and Impolicy involved in the Resumptions*—continued.

1852, twenty-five years after the abdication of the Peiswah, when many prescriptive titles had been established by the mere lapse of time, and that then sixty instead of thirty years' possession before the abdication should be shown, or ninety-five years' possession altogether, *Warden* 6068-6075, 6126-6128. 6138, 6139. 6211, 6212. 6219. 6223. 6225. 6229. 6248——Deprivation by the Act of 1852 of the right of female succession to enams; belief that under the native system such succession was unquestioned, *ib.* 6069. 6071. 6247——Confirmatiun by Mr. Elphinstone of all grants or promises of enam, where the right was properly shown, *ib.* 6165-6167.

Examination with reference to certain statements (put forward by Mr. Mangles) in justification of the principle of a resumption of rent-free tenures; witness repeats his objections to the practice pursued in the matter, *Warden* 6209-6232——Instead of reassessing the lands held in enam, it would have been better to have levied some new tax on the enamdars, *ib.* 6216-6219. 6226, 6227. 6230.

The main objection of witness to the Enam Commission is, that time alone had established prescriptive titles, and that whatever was done under the Commission was done too late, a period from 1817 to 1852 having been allowed to elapse, *Warden* 7363-7365. 7389-7395——Certain provisions in the Act XI. of 1852 adverted to, as professing to acknowledge titles confirmed by British authority, or declared hereditary under a sunnud; the Commission is nevertheless the opposite of protection, *ib.* 7365 *et seq.*——Less trustworthy evidence now procurable from the Peishwa's dufter at Poonah than in Mr. Elphinstone's time, *ib.* 7425-7430.

Practice under the native Governments always, on receipt of a nuzzer, to grant the right to convey to an heir by adoption any interest in the public revenue, *Warden* 7431. 7581——Witness fully believes that whatever may have been the orders of the Court of Directors, adoptions to enams are disallowed by the Enam Commission, *ib.* 7432-7437——Probability of Mr. Elphinstone having contemplated extensive resumptions, but not at so distant a period as 1853, *ib.* 7446-7448——Although Government cannot be said to have altered the law of prescription in the Deccan, they instituted a rigorous and unjust law there as compared with the law in other parts of the Peishwa's dominions, *ib.* 7468-7472.

Explanation, by reference to Mr. Elphinstone's History of India, of the practice in regard to the succession of females, *Warden* 7511——Where the emander is ousted, the sub-tenures are not disturbed, *ib.* 7571-7573——Further reference to the interference by Government with the system of adoption, *ib.* 7581, 7582. 7588, 7589——The practice of adoption was general under the Peishwa and the Hindoo rajahs, *ib.* 7585-7587.

The Enam Commission, if instituted at all, should have been carried into operation before the mutiny, *Marsham* 9613, 9614.

4. *Slow Progress of the Investigation:*

Grievance in the slow progress of the Commission; particulars hereon, *Warden* 6075. 6146-6153——Probable necessity of a long delay before the settlements of the numerous claims to be investigated, *ib.* 7389-7395. 7423, 7424.

5. *Parliamentary Return, containing certain Particulars:*

Reference to the information contained in a certain return to the House of Commons relative to the different ways in which the cases before the Enam Commission have been decided, *Warden* 6146-6153. 7405-7418.

6. *Tendency of the Resumptions to deter Settlement:*

As an obstacle to European colonisation, the Enam Commission has not attracted that notice in this country which it should have done, *Warden* 6061, 6062——Excellence of the tenure of enamdars under the native rule and at the time of Mr. Elphinstone's settlement; enams, in fact, offered the best investment for European colonists, *ib.* 6062. 6073. 6075——The liability of enamdars to be called upon to prove their titles for a period extending back sixty years before the abdication of the Peishwa occasionally operates in deterring settlers from investment in the security of enams, *ib.* 6062-6077. 6143-6145.

Rare instances of any grants by Government, either in jagheer or enam, *Warden* 6140, 6141——Gradual disappearance of enamdars in Bombay, under the present system of resumption as pursued by Government, and growing obstacles thereby to European settlements, *ib.* 6142-6145. 6154-6156. 6168, 6169——Difficulty in Europeans settling in Bombay by the purchase of land from the enamdars, *ib.* 7579-7584.

7. *Popular Feeling produced by the Commission:*

Disaffection and symptoms of rebellion through the operation of the Commission, *Warden* 6075. 6243-6246——Circumstance of its having been said by some one in the Bombay Council, that the introduction of the Act of 1852 into Guzerat would produce a rebellion,

Reports, 1857-8—*continued.*

ENAM COMMISSION (BOMBAY)—continued.

7. *Popular Feeling produced by the Commission*—continued.

a rebellion, *Warden* 7399. 7403. 7404. 7467——Tendency of the Commission to produce disquiet and rebellion on the part of the natives in Bombay, *ib.* 7575-7577.

The establishment of the Commission was by no means calculated to create a rebellion in the country, *Wingate* 7939, 7940.

8. *Contemplated Extension of the Investigation to Guzerat:*

Impression as to its having been contemplated to extend the Act XI. of 1852 to Guzerat, *Warden* 7396-7404. 7467.

9. *Propriety of the Commission being revoked, and of there being a proper Appeal from its Decrees:*

As the operation of the Commission involves a violation of public faith, and a rigorous and partial administration of the laws, the Commission should at once be revoked, *Warden*, 6075——All decrees passed by the Commission should be declared open to appeal to the Sudder Courts and Her Majesty in Council, *ib.* 6075——Witness repeats that the Commission should be revoked; his opinion is fortified by a reference to Mr. Elphinstone's proclamation, *ib.* 7569.

10. *Information generally relative to Enams in Bombay:*

Distinction between an enam and a jagheer or serinjaum; an enam is hereditary, and is in fact a grant of land in fee simple, *Warden* 6136, 6137——Belief that under the native Governments, enams were not saleable, *ib.* 7441-7445——Enam means literally a gift, *ib.* 7570——The enams are principally in the Deccan and the South Mahrattan country, *ib.* 7574.

Very large proportion of land in Dharwar and Belgaum which is alienated in the shape of enams, &c., from the Government assessment, *Wingate* 7840——Enamdars possess an exemption from taxation rather than a property in the land, *ib.* 7841——Reasons why enamdars are not generally cultivators of their enams, *ib.* 7842-7844——Impression that the rent-free land in Bombay amounts to a third of the entire revenue of the Presidency, *ib.* 7845-7849——Only a small portion of the property held under free grants is appropriated to religious purposes, *ib.* 7850, 7851——The general impression of witness was, that a great many of the enams were held on imperfect or fraudulent titles, *ib.* 7872.

Engineers. Want of engineering skill for the proper prosecuting of public works, *MacNair* 2002——Considerable advantage if there were a proper number of civil engineers in the service of Government; qualifications of the military engineers adverted to hereon, *ib.* 2108-2114. 2262-2277——Approval of the establishment in India of a school of civil engineers, although it might interfere with the prospects of the military engineers, *Ouchterlony* 5321. 5325——Circumstance of a number of civil engineers having lately been sent out by Government, *ib.* 5322-5324——There is not one-third of the number of engineers in Madras that are required, *ib.* 5381——Suggestion as to the best means for providing an increase of engineers for civil duties, *ib.* 5388.

English Language. Importance of encouraging the spread of the English language; the natives are very desirous to learn it, as a qualification for employment, *Bidwell* 9383-9389——An extension of the English language throughout the country is very desirable, *Marsham* 9783.——*See* also *Administration of Justice (Mofussil)*, V.

Eurasians. See *Christianity.*

EUROPEAN CAPITAL AND SKILL:

1. *Opening in India for Capitalists and Directors of Native Labour, but not for European Labourers.*
2. *Great Importance of Capital and Skill as a means of developing the Resources of the Country.*
3. *Benefits conferred or to be conferred upon the Natives by European Capital and Settlement.*

1. *Opening in India for Capitalists and Directors of Native Labour, but not for European Labourers:*

Necessity of colonisation in India springing from the capitalist instead of from the labourer, *Tremenheere* 4-6——Capital is indispensable in colonists, *ib.* 16——The true function of the European in India is, not as a labourer, but as a director of native labour, *ib.* 110. 162-179 — Impracticability of a settlement of India by European emigrants in large numbers, *Theobald* 877 — Belief that, although colonisation, as in America or Australia, may not be practicable even on the hills of India, colonists may, with success, go to India in much greater numbers, *ib.* 1033.

Necessity of European example and superintendence in order to induce native enterprise and labour, *Freeman* 1532-1534——Only the middle or upper class of Europeans would

Reports, 1857-8—*continued.*

European Capital and Skill—continued.

1. *Opening in India for Capitalists, &c.*—continued.

would settle as planters, &c., *MacNair* 2503——Young Englishmen, well acquainted with the native language, are much wanted in the service of the planters, *Wise* 2716, 2717. 2720——A small capital is of little use in India, *Dalrymple* 3413.

One of the greatest wants of India is that of capital, *Baillie* 4538. 4540, 4541. 4556——Different sense in which colonisation can take root in India, as compared with other colonies, *Waller* 5078–5080; *Ouchterlony* 5461–5464; *Wingate* 7866–7868; *Landon* 8374. 8465——Mechanics and skilled labourers would be of the greatest use in India, *Waller* 5228——In a political sense, it is better that colonisation should be confined to those above the labouring class, *Ouchterlony* 5464——Europeans cannot successfully compete with the natives as actual tillers of the soil, *Ouchterlony* 5512, 5513; *Warden* 6028. 6047, 6048; *Onslow* 6601, 6602; *Wingate* 7689——The claims of India upon settlers cannot compete with those of the United States or Canada, or of Australia, *Mullens* 7119, 7120.

European capitalists or colonists can most advantageously operate by setting in motion labour, and by purchasing and preparing native produce, *Wingate* 7689, 7690. 7749, 7750——The direct, as opposed to the indirect, cultivation of the land by Europeans is not likely to be profitable, *ib.* 7866–7868. 7887–7890——The inducements to settlement offered by Canada, the United States, and Australia, and the unhealthy climate of India, sufficiently account for the non-settlement of the latter country by the masses, *Wingate* 7915; *Bidwell* 9270.

2. *Great Importance of Capital and Skill as a means of developing the Resources of the Country:*

European supervision is most essential in the care of all vegetable or agricultural productions in India, *Tremenheere* 50 *et seq.*——English settlement and English capital will assuredly increase the prosperity of India, *Freeman* 1518——Enumeration of sundry matters of great moment in connexion with India which have been introduced or developed by European energy and skill, *ib.* 1541——People of skill and capital are required to develope the resources of the country, *MacNair* 2005–2007——Great importance of European superintendence in cultivation; it is largely resorted to by native proprietors, *ib.* 2018, 2019. 2080.

Enhanced value of indigo, silk, sugar, &c., when produced under European superintendence, *Wise* 2696–2699——Vast increase of production through the extended settlements of Europeans, *ib.* 2702–2704——Advantage of an increased introduction of capital as a means of adjusting the balance of trade, which under the present system continues much against this country, *ib.* 2709–2713——Cultivation in Lower Bengal has been greatly improved and increased wherever there has been European settlement, *Dalrymple* 3266, 3267——Importance of capital in order to develope the resources of the country, *Baillie* 4760–4763.

The European settler has in India all the inducements that a rich and fertile country, with an abundance of cheap labour, can offer to skill, capital, and enterprise, *Waller* 4836——European settlement would be most beneficial to India; it would effect more than any number of legislative enactments, *ib.* 4839——Great value of European colonisation on the score of the investment of capital in the soil, *Ouchterlony* 5303——Advantage of European colonists or capitalists in being able to introduce science in cultivation, *Onslow* 6601. 6603——Benefit to Government through the settlement of witness, *Fowler* 5745–5747.

Sundry advantages anticipated as regards the natives, the European community, and the Government from an increased settlement of Europeans in India, *Mullens* 7115–7118——More energetic, skilful, and enterprising character of the European settlers than of the natives, *ib.* 7143——The commerce of the country would doubtless be increased by the settlement of Europeans in the interior, *Landon* 8375——Too much European capital and skill cannot be introduced into India, *Marsham* 9593. 9658.

3. *Benefits conferred or to be conferred upon the Natives by European Capital and Settlement:*

Beneficial effect upon the natives through the introduction of European skill and capital, *Theobald* 1187, 1188; *MacNair* 1974, 1975. 2046–2049; *Wingate* 7893, 7894——Effect of the increased number of Europeans in Calcutta in improving the native character, *Freeman* 1516, 1517——The great improvement in the value and cultivation of land in Bengal, and in the condition of the natives, is owing to the settlers and not to Government, *MacNair* 2328–2333——Twofold advantage to the natives by the increase of Europeans, *ib.* 2605. 2609.

Marked improvement in the condition of the people of India wherever Europeans have settled, *Wise* 2630. 2637——Sundry respects in which the presence of the settler has benefited the material condition of the native, and protected him from oppression, *ib.* 2637, 2643. 2777–2786. 2858, 2859——Increased benefit to the native accordingly as settlement is extended, *ib.* 2638–2642. 2713, 2714. 2776. 2963, 2964——Settlement has

Reports, 1857-8—*continued.*

EUROPEAN CAPITAL AND SKILL—continued.

3. *Benefits conferred or to be conferred upon the Natives, &c.*—continued.

has greatly improved, and, if extended, will further improve the physical condition of the natives, *Dalrymple* 3268-3270. 3402-3406——The estates are better managed, and the cultivators are better off where there is European superintendance in management, *Mackenzie* 3692-3696——Better position of the ryot if capital were more abundant, *Baillie* 4545——Beneficial effect of increased European settlement upon the moral and social condition of the people, *Wingate* 8167-8170——Beneficial effect upon the natives by the employment of European capital, and the settlement of Europeans amongst them, as illustrated in witness's case, *Landon* 8349-8359.

European Superintendence (*Native Officials*). Importance of a large increase of Europeans in the uncovenanted service, *Tremenheere* 339-341. 449-451; *Theobald* 951-954——Great importance of an extension further downwards of European agency in India, *Theobald* 937-941; *Auld* 1390. 1393. 1418. 1455; *Wingate* 7775-7779; *Marsham* 9776——With more efficient European superintendence the native material would work much better, *MacNair* 2576, 2577——European superintendence generally would be appreciated by the mass of the people, and would strengthen rather than weaken our influence in the country, *Landon* 8667. 8698. 8700——Paramount importance of increased European supervision generally of all departments in India, *Saunders* 9896-9899. 10108-10112——Much less bribery if there were Europeans in every department, *ib.* 10201-10206.

See also *Administration of Justice* (*Mofussil*). *Native Officials. Police*, VII.

European Troops. Particulars as to the large mortality of English soldiers in India, *Tremenheere* 107-109——As part of witness's scheme for increasing European settlement, he proposes that an increased proportion of married soldiers be taken to India with their wives; objections to this suggestion considered; slight increase of cost in consequence, *ib.* 110. 112-122.

Grounds upon which witness has on more than one occasion advocated the removal of European troops from the plains to the hilly districts, *J. R. Martin* 199 *et seq.*——Varying mortality of European soldiers and children at different times, *ib.* 220——The periodical if not the permanent removal of the European soldiers to the hills has become a State necessity, *ib.* 232——Much better health in the Bengal army than in the Madras army, *ib.* 243, 244——Belief that by removing the soldiers to the mountains the mortality may be reduced to the level of England; experience of the West Indies adverted to hereon, *ib.* 255-257.

Advantage of a larger proportion of the soldiers being allowed to bring wives from England, *J. R. Martin* 258, 259. 294. 314-316. 320-324——Effect of the climate respectively upon the European soldiers or officers and upon their wives, *ib.* 311-313——Circumstance of the European soldiers in the Company's service not generally returning to this country, *ib.* 316; 317. 336——Better sanitary arrangements generally in the case of the Company's troops than of the Queen's troops, *ib.* 317, 318——Witness hopes and believes that in a very few years the great bulk of the European soldiers will be permanently located in the mountains, *ib.* 319——Advantage of some system of employment of the Europeans when not in active service, *J. R. Martin* 332, 333; *Ouchterlony* 5547——Amount of additional expense in the event of increasing the proportion of married soldiers further adverted to, *Tremenheere* 395-397.

Great saving of life and of expense if all recruits for the Madras artillery or engineers were at once sent direct to the Neilgherries, *Ouchterlony* 5296——Illustration of the importance of locating and training the soldiers in the Neilgherries, instead of near Madras, *ib.* 5296, 5297.——Except at the Neilgherries there should be no European troops in Madras, save at a few stations, *ib.* 5297——Doubt as to the expediency of encouraging an undue amount of marriage among the soldiers unless located permanently on the Neilgherries, *ib.* 5453. 5518——Wretched condition and demoralising habits of the soldier in many parts of the low country, *ib.* 5453, 5454.

See also *Children of European Soldiers. Hill Districts.*

Examinations (*Civil Service*). See *Civil Service*, 3.

Reports, 1857-8—*continued.*

Exchange (*Monetary*) *Operations.* Exceptions to the general dishonesty of the natives in the faithfulness of their monetary or exchange operations, *Landon* 8727——Greater honesty on the part of natives of the banking class than of any other class, *Saunders* 10116, 10117.

Exports and Imports. Statistics as to the great increase of the exports and imports of India in different periods since 1824, *Freeman* 1560, 1561——For the three years ending 1856 the imports and exports amounted to 124,000,000 *l.* as compared with 58,000,000 *l.* in 1832, *ib.* 1561. 1810——The introduction of British capital is the cause of the greatly increased export of produce, *ib.* 1562——Effect of the increased prices of Russian produce during the Russian war upon the increased export of Indian produce, *ib.* 1562. 1602-1610——With proper means of transport and a proper system of administration there is no reason why India should not be able to export certain produce as cheaply as Russia, *ib.* 1611, 1612——Capacity of India to extend its export of many valuable articles to an unlimited extent, provided settlement increases and proper means of communication be provided, *ib.* 1811-1814. 1819.

Statement to the effect that the general products of Bengal and of the North Western Provinces have no exportable value on account of the great difficulty and cost of carriage by the Indus and Ganges, *Balston* 5908-5921.

See also *Coffee. Cotton. Jute. Linseed.*

F.

Famines. Great importance in times of famine of facilities for the transport of produce, *Tremenheere* 60——The famines which now occur occasionally would be entirely prevented by a system of irrigation and navigation, *Onslow* 6632-6634. 6965.

Fee Simple of Land. See *Land Revenue Settlement and Tenure and Sale of Land,* VI. *Redemption of Land Tax.*

Five per Cent. Loan. Distrust of the natives through the reduction in 1854 of the interest on the 5 per cent. loan, *MacNair* 2061——Examination as to the existence of proper grounds for complaint in regard to the reduced interest on the 5 per cent. loan, *ib.* 2368-2387.

Foreign Settlers. Statement as to some foreign planters in the Mofussil in Bengal having carried on business successfully under the system of the Mofussil courts, *Mills* 8784-8793; *Marsham* 9503-9506. 9512——Instances in the cases of Mr. Laruletta, Count de Framont, and M. Courjon, of success on the part of foreign indigo planters subject to the jurisdiction of the Mofussil courts in Bengal, *W. H. Martin* 9122-9131. 9137, 9138. 9205-9209; *Bidwell* 9271-9282. 9335-9341.

Explanation relative to the success of M. Courjon and Mr. Laruletta as indigo planters in the Mofussil, although subject to native jurisdiction; it is several years ago since these gentlemen were in business, *Theobald* 9392-9396.

Forests (*Madras*). Neglected state formerly of the public forests in Madras; of late years a Government supervision has been strictly carried out, *Ouchterlony* 5278-5280.

Fowler, Alfred Grant. (Analysis of his Evidence.)—Has lived on the Neilgherry Hills, about twenty-four miles from Ootacamund; has also been in Ceylon and Malabar, 5578-5582——Had a coffee plantation on the Neilgherries, 5583——From about 2,500 to 4,000 feet above the level of the sea is the best elevation for the growth of coffee, 5584——Considers the climate of the Neilgherries to be exceedingly healthy, 5585-5591. 5770-5774. 5861——The plains of India are decidedly hotter than the West Indies, 5592.

Witness first went to the Neilgherries with a view to the cultivation of cotton, 5594, 5595. 5601——The land in Coimbatore is not sufficiently fertile to be favourable to the investment of European capital, 5595-5600——Witness commenced on the Neilgherries with about 100 acres, and has now 600 or 700 acres, 5602——He has no tenure of land and does not pay any land-tax, but is threatened with one; the land was originally purchased at a very low rate from the Rajah of Nellumboor, 5603-5615. 5785-5796. 5862-5867.

Gradual increase of coffee planters on the Neilgherries; at first the cultivation was unsuccessful but now it is very profitable, and, in witness's case, has been extremely so, 5616-5621. 5729-5731. 5752, 5753——British capital may be very profitably invested in coffee growing on the Neilgherries, 5622, 5623. 5708-5717. 5734, 5735——Propriety of the non-payment of a land-tax; witness pays an export duty and expends large sums on labour, 5624-5631. 5752-5754. 5785-5796——Great want of roads from the Neilgherries to the coast; survey by Government of a road from Ootacamund, 5632-5654. 5766. 5803.

Witness has some land in Coorg, which he got from Government for nothing, but he pays a duty of four annas per maund on all the coffee raised; exception taken to this duty, 5655-5669. 5688-5693——The duty levied on coffee in Mysore has deterred many

Reports, 1857-8—*continued.*

Fowler, Alfred Grant. (Analysis of his Evidence)—*continued.*

persons, including witness, from cultivating it there, 5665. 5674-5676. 5688——All coffee pays an export duty, 5670——Suitableness of the Mysore country for an extended cultivation of coffee, 5677-5686——Land with dense forests, as in Coorg, is very suitable for coffee cultivation, 5680. 5687, 5688. 5736-5739.

Witness has purchased the fee-simple of land in Ceylon for a guinea an acre, 5695, 5696——Encouragement to settlement in the Neilgherries, and throughout India, if there were a power of acquiring the land in fee, 5697. 5713. 5716. 5766, 5767. 5868-5880. 5885——Much higher cost of labour in Ceylon than in the Neilgherries; the former labour is supplied from India, 5698-5704. 5715——Average produce and value per acre of coffee in the Neilgherries; both produce and quality are equal to the Ceylon coffee, 5708-5710. 5717. 5800-5802——Besides the forest land there is not much other land in the Neilgherries, &c. available for coffee cultivation, 5718-5721.

Witness never came in contact with the police in the Neilgherries, and never felt the want of police; nor was he ever in a court of justice, 5722-5728. 5775-5779. 5831-5834. 5894—— The Government officials showed witness every attention and encouragement as a settler; he never heard of any opposition to settlement, 5732, 5733. 5821-5824. 5894 —— Improvement in the condition of natives by the employment given by witness, 5740, 5741——After a time witness never had the slightest trouble with the natives, 5742-5744. 5784——He never made an advance for produce, which system he considers to be the curse of India, 5742——Benefit to Government through the settlement of witness, 5745-5747.

Witness has never been in Coorg, 5755——System in Coorg as regards the tenure of land under Government, the natives paying a small tax for permission to collect cardamoms, 5756-5760. 5798——Facilities given by Government to European settlement in Coorg; the land is all being taken up, 5759. 5763. 5797. 5825-5828——Witness has not more than 250 or 300 acres of land in Coorg; circumstances under which he obtained it, 5761-5763——Witness's children thrive very well in the Neilgherries, 5770-5774——He kept up a school at his own expense, but is not aware of other planters having done so, 5780-5783.

Practicability of obtaining large tracts of uncultivated land in fee without interference with any existing rights, 5807-5820——The cultivated lands are mostly worn out soils, 5818. 5835-5839. 5844-5847——Varying character of the soil on the Neilgherries; that which has been cultivated by the natives requires renovation by manuring, 5840-5860 —— Witness cleared very large timber off his land, and brought it into bearing for 16 *l.* an acre, 5852-5854——Importance of British capital and science in order to improve the worn out soils, 5882-5886——Necessity of scientific as well as practical men in order to grow coffee successfully, 5886.

Free Grants of Land. See *Retired Officials.*

Freeman, John. (Analysis of his Evidence.)—Has spent about twenty-five years in India, and has resided in most of the districts in Bengal, where he is largely interested as a zemindar and an indigo planter, 1456-1460——Different reasons which tend to make the land tenures in Bengal very insecure, 1462, 1463. 1476, 1477. 1505——Witness wishes to preface his evidence by stating that his complaints against the mode of administration of justice, &c., are against the system, and not against individuals, 1463.

In illustration of the corrupt state of the police, witness gives the particulars of a false accusation of murder, as brought against a European in Rajshaie in 1826; great indignities and violence manifested towards this gentleman by the darogah and other native officials, previously to his exoneration, 1464-1473——Statement as to witness having been obliged by false charges against him, and a mal-administration of justice to quit an estate near Calcutta, for which he gave 20,000 *l.*, and to employ a manager over it at a salary of 500 rupees a month, 1473-1475. 1478-1481.

Incompetency in many instances of the civil servants in the Mofussil courts to interpret the laws, 1477. 1479——The corrupt state of the omlah is a main cause of the insecurity of property, 1477, 1478——Witness has generally managed to get redress in cases of attempted injury to him, but it has often been at considerable trouble, expense, and demoralization, 1482.

Way in which the Sale Law in Bengal operates very injuriously and unjustly, more especially as regards the rights of the different lessees under the zemindars, 1483-1497 ——Forfeiture of the interest of the putneedars, or perpetual leaseholders, in the event of their own default, or the default, real or pretended, of the zemindars to pay up the revenue; instance of stratagem on the part of the latter to the injury of the former, 1484-1497——Reference to Mr. Grant's Bill for an amendment of the Sale Law, as comprising many suggestions made by witness before leaving India; the Bill is still under discussion, 1498-1503.

Injurious consequences to purchasers of estates, owing to the preliminary formalities connected with the sale being frequently improperly carried out by the revenue authorities,

Reports, 1857-8—*continued.*

Freeman, John. (Analysis of his Evidence)—*continued.*

rities, 1503-1508——Opinion that the adoption of the English language in the courts of law would be the greatest beneficial reform that could be introduced into India, 1509. 1563——The want of proper means of communication has operated very much against settlement, 1510, 1511.

Great increase of Europeans in Calcutta, and almost total absence of increase in the Mofussil, attributed to the mal-administration of justice, and the insecurity of property in the latter place, as compared with the operation of the Queen's courts in the former, 1512-1517——Circumstance of planters, &c., in the Mofussil, being obliged to pay as much as 15 per cent., and even more, for loans from capitalists in Calcutta, 1515——Effect of the increased number of Europeans in Calcutta in improving the native character, 1516, 1517——English settlement and English capital will assuredly increase the prosperity of India, 1518.

Check upon the development of the agricultural resources of the country through the want of means of transit, 1519, 1520——Hardship of the great difference in the price of salt in different parts of Bengal, 1521——Great adulteration of the salt by the native traders; how Government might prevent this, 1521. 1599——Successful introduction of European vegetables and fruits, through English settlement, 1522-1524——Beneficial results of European colonization, and capital in Ceylon, 1525-1527——Opinion that the climate of India need not prevent small colonies of Europeans from settling on the hills, 1528——Successful French colonization in Algeria, 1528, 1529——Steam communication and the overland route have led to great progress in the commercial habits of the natives, 1530-1532.

Necessity of European example and superintendence, in order to induce native enterprise and labour, 1532-1534——Very slow travelling formerly in India by dawk, as compared with travelling by horse-carriages or railways, 1535-1540——Enumeration of sundry matters of great moment in connexion with India, which have been introduced or developed by European energy and skill, 1541——Coarse character of the wool produced in India; it may easily be improved, 1542-1545——Explanation as to the higher price fetched by indigo produced by Europeans than by that produced by the natives, 1546-1551.

Good health of the planters in the Mofussil, 1552-1554——Witness has reason to consider the country most healthy; during sixteen years on one stay, he never took any medicine, or consulted a doctor, 1552——Laxity of discipline to which witness attributes the ill-health of the soldiers in India, 1555——The attention of the planters, &c., has not been particularly given to the providing of schools, 1556-1558.

Quotation of the views of Sir Arthur Buller in favour of the remonstrances of the British settlers against the Black Act, 1559——Statistics as to the great increase of the exports and imports of India in different periods since 1824; 1560, 1561——The introduction of British capital is the cause of the greatly increased export of produce, 1562——Supply from India during the Russian war of many articles previously obtained from Russia, *ib.*

Great improvement in the administration of justice, if special education were required in the judicial officers, 1563——It is considered that the only means of improving the police is by a further introduction of the European element, 1564——Great pecuniary losses to the indigo planters when, through false charges brought against them, their business operations are necessarily suspended, 1565, 1566.

Anticipation that the transfer of Government from the East India Company to the Crown, will lead to many reforms, which will tend to increase colonization, 1567——The reform of Government most needed, is a re-casting of the constitution of the Legislative Council, by the introduction of the commercial and agricultural elements, 1567-1573——Incompetent practical knowledge of the existing Legislative Council, 1567. 1572.

Evidence relative to the great want of roads, and the exceedingly bad condition of the existing roads in different parts of India, 1574-1596——Illustration of the loss to the producer through the badness of the roads, 1584-1596——There are a few good roads near Calcutta, 1597, 1598——Enhanced grievance in the case of salt, through the difficulties of transit, 1599-1601.

Effect of the increased prices of Russian produce during the Russian war upon the increased export of Indian produce, 1602-1610——With proper means of transport, and a proper system of administration, there is no reason why India should not be able to export certain produce as cheaply as Russia, 1611, 1612——Great importance of a system of irigation in Lower Bengal: much larger crops of indigo, &c., thereby, 1613-1616——The Ganges, though requiring improvement, may be used as it is, 1617——An improvement of one of the Nuddea rivers would be very beneficial, but less so in consequence of the railways, 1618-1623.

Way in which efficient interpreters might be provided, in the event of the use of the English language in the Mofussil courts, 1624-1629——Nature of the qualifications desirable in the case of European judges, 1630-1632——Expediency of an additional

Reports, 1857-8—*continued.*

Freeman, John. (Analysis of his Evidence)—*continued.*

number of judges, 1633——The introduction of the English language in the courts would cut at the root of the present corruption, and do away with the native omlah, 1634-1636.

Suggestions for improving the police, as regards the number, character, and expense of European superintendents, 1637-1640——Improper way in which darogahs are often appointed, 1642, 1643——Suggestion with a view to the darogahs speaking English, 1644. 1652——Bad material from which the police in Bengal are selected, 1645-1648——Advantage if the police in any locality were brought from a distance, 1650——Darogahs should not be allowed to examine witnesses, 1651——Pay per month of the darogahs, peons, and jammadars, 1653.

Improvement in the tenure of land by some security to the perpetual leaseholder, in the event of the sale of the zemindary, 1654, 1655——Litigation and loss under the present system of the indigo planters in renting the land from numerous small tenants, 1655-1658——Where the village system prevails, witness suggests that estates be sold out and out, with a view to the creation of a proprietary class, 1659-1663——Reference to the rights of the tenants or ryots, under the village system and under zemindars; how these should be dealt with, 1662, 1663. 1671——Advantages of a permission to zemindars to redeem the tax assessed under the permanent settlement; the sum required would, however, probably deter redemption, 1664-1678.

[Second Examination.]—Witness went to India as a settler in 1825; he first went into an indigo factory, 1679-1682——Notwithstanding the insecurity of property, he has been enabled by experience to invest profitably large sums in land, indigo, factories, coal mines, &c., 1683, 1684.

Further evidence as to the practice under the present law of sales for arrears of revenue whereby the zemindar, by making sudden default, may deprive the putneedar of his under-tenure, 1685-1691——Any surplus beyond the Government claims is paid over by Government to the proprietor, 1686——Failure in practice of any attempt or theory in law for the protection of the rights of the putneedars, 1687-1691——Further complaint in regard to the cancelling of purchases of estates through certain formalities not having been observed by the revenue collectors; instances in witness's experience, 1691-1703.

Although it is provided that objections to purchases at auction sales should be made within a month of the sale, it frequently happens that purchases are cancelled after two or three years' possession, 1697-1699——Those who make the laws are unacquainted with their practical working, 1700——The theory of the law of sale may be good in many instances, but it is badly construed, and frequently misapplied by the Mofussil authorities, 1700-1703——System of compulsory registration of putnees, and of inquiry by the collectors, suggested as a means of protection to the under-tenures, without prejudice to the security of the revenue, 1704-1706. 1805.

Nature of the rights of the cultivators of the soil in Bengal, and means by which those rights might be extinguished; difficulty hereon, 1707-1713——Further statement as to the greatly enhanced rate of interest which planters are obliged to pay for loans of money for Mofussil purposes, 1714-1719. 1820-1823——Inadequacy of the attainments of the civil servants in the native languages further adverted to in connexion with the examinations which they undergo, 1720-1723——Further reference to the assistance given by the planters towards the establishment of schools, 1724, 1725.

Further evidence strongly in favour of introducing the English language into the courts of justice; it would give satisfaction to the natives, and would benefit them in a still greater degree than the Europeans, 1726. 1731-1735——Importance of introducing English agency into the police, as at Calcutta, further adverted to, 1727, 1728——Further reference to the importance of special training in the English judges, 1728, 1729——In all important cases Europeans should have full opportunity to employ English advocates, 1728——English law has been administered satisfactorily in Calcutta for eighty years, 1730.

Particulars as to the languages now used in the Mofussil courts in Bengal; the official language is the Persian, 1732, 1733. 1781-1783——Advantages to be derived from requiring a knowledge of the English language in the darogahs, 1736——Evils of the present system of interpreters in there not being a proper check upon them; how this might be remedied by a proper system of advocates, 1737-1744——Numerous appeals from the decisions of the native magistrates and judges, 1745-1749.

Facilities for colonization respectively in India and Algeria, 1750-1752——General concurrence by witness in the evidence of Mr. Theobald, as to the inefficiency of the administration of justice up to a recent period, 1753-1757——An increase recently made in the salaries of the darogahs has been detrimental rather than otherwise, 1757, 1758——Instance of resort to torture, about twenty months ago, by a darogah at Pubna, near Calcutta; particulars of this case, and of the action of the magistrate in the matter; the darogah received only a slight reprimand and a caution to be more careful in future,

1759-

Reports, 1857-8—*continued.*

Freeman, John. (Analysis of his Evidence)—*continued.*

1759-1762. 1766. 1852——Instance of delinquency, about two years ago, on the part of a moonsiff in Jessore; slight punishment awarded to him, 1762-1766.

The mal-administration of justice in the Mofussil, has been a matter of common notoriety ever since witness went to India, thirty-three years ago; it is the permanent state of things, 1765-1767. 1773——Absence of complaint by natives or others against the operation of the Supreme Court at Calcutta, 1768-1770——The way in which justice is administered deters not only European settlement, but native enterprise, 1771——Further reference to the circumstance of witness having been compelled by false accusation to leave one of his estates, 1772. 1774.

With some few exceptions the civil servants, as judges, are far from familiar with the languages in which the evidence is given, 1775-1777. 1787——Means for procuring Europeans in India competent as judges on the score of a knowledge of the languages, 1778-1780——Satisfaction to be felt by the natives with the extended employment of competent European judges, 1784——Advantage of some system of examination of civil servants before each promotion; witness has not heard of any recent regulations to this effect, 1785, 1865. 1872——Suggestion that before appointment to the judicial office, the civil servants should undergo a certain practical ordeal in the courts, 1786. 1866. 1870, 1871.

Further reference to the effect of the uncertainty of the tenure of land in deterring settlement, 1788. 1806-1810——Although witness and many others have contrived to be successful as settlers under the badness of the laws or of their administration, numbers have been unsuccessful or have been afraid to settle, 1788. 1806-1810. 1903-1907——Insecurity of the putneedars under the practice as regards sales further adverted to; the regulation for the protection of the putneedars applies only in theory, 1789-1799——Further reference to the disadvantages under which purchasers labour; they know scarcely anything of the boundaries of the estates, 1800-1805.

Capacity of India to extend its export of many valuable articles to an unlimited extent, provided settlement increases and proper means of communication be provided, 1811-1814. 1819——Almost total absence of provision by Government of roads, canals, or other beneficial public works in Bengal, 1815, 1816——Excellent effect of the improved means of communication with this country further adverted to, 1817, 1818——No improvement arises from the initiative of the native, 1818——The Government of India does not appear to progress unless forced on by Parliament, *ib.*

Frequency in some parts of Bengal of sales of land for arrears of revenue, many of the defaults being for fraudulent purposes, 1824, 1825——Further reference to the views of Sir Arthur Buller, member of the Legislative Council, against the contemplated Bill for making Englishmen in the Mofussil amenable to the Company's courts, 1826-1829——Absence or difficulty of redress in the event of planters being aggrieved by the civil servants, 1830-1834. 1841.

Lateeals or bludgeon-men, are not, to witness's knowledge, kept in pay by the Bengal planters, 1835. 1840——Circumstances under which the planters in Bengal are constantly brought into contact with the zemindars, and find it necessary to bring numerous cases into the courts, 1836, 1837——The planters in Tirhoot are no healthier than those in Bengal, 1838, 1839——Too much indulgence is often given to defaulting zemindars by the collectors, 1842——Statement as to the general inability of the civil servants to keep up conversations in the native language, considered in connexion with their extent of intercourse with the natives in making revenue settlements and on other occasions, 1843-1849. 1854-1863.

Further reference to the improper way in which darogahships, &c. are often filled up, 1850——Contrast between the proper treatment of the mooktears or vakeels, in the Sudder court at Calcutta, and their improper treatment in the Mofussil courts, 1851——Witness absolves all gentlemen in the civil service from a disposition to encourage torture, 1852——He repeats that he has no ill feeling or prejudice of any kind against the gentlemen of the civil service, 1853.

An intimate knowledge with the native language is essential in the judge who presides where such language is used, 1864——As regards a certain test of late years in the reading of native documents, witness, who was not aware that such test was applied, admits that officers could not go through the same without a very great knowledge of the native languages, 1865-1872——When witness left India the real fact was that the civil officers were very unfit to read or speak the languages, 1865. 1872.

Objectionable system in the administration of the Sale Law previously to the modifications in 1841 and 1845; fewer reversals of sales of late years, 1873, 1874——Further evidence as to the defect of the present Sale Law in its abandonment, in practice, of the interests of the putneedars, and as to the actual extent of injury thereby, 1874-1884——Circumstances under which, notwithstanding the risk of loss under the Sale Law, fines are paid for under tenures, instead of small annual rents, 1875-1882.

Further statement as to the difficulties experienced by witness from the under-tenants on the estate purchased by him in the Hooghly district for 20,000 *l.*; 1885. 1890-1897

 ——Doubt

Reports, 1857-8—*continued.*

Freeman, John. (Analysis of his Evidence)—*continued.*

——Doubt as to the Government survey of the Bengal and Berar districts being yet brought into practical use in remedying the difficulty, through the absence of settled boundaries to estates, 1886-1890——Sum realised by witness on the sale of the Hooghly estate, 1898-1902.

Grounds for the statement that those who enact the laws are not practically acquainted with their working, 1908-1920——Consideration of the extent to which Government assisted in the cultivation of tea in Assam and Kumaon, 1921-1925——Complaint as to Government withholding from the Bengal Coal Company, the services of a scientific overseer in the case of the erection of blast furnaces for iron ore, 1926-1928——Probability of cotton being cultivated with the same success as indigo, if the same energy be applied thereto by settlers, 1929-1936.

Further evidence as to the degree of blame attaching to Government for the non-formation of roads in Bengal, 1937-1944——Advantage if the mouth of one of the Nuddea rivers were kept always open, 1938, 1939——Facility for procuring bricks in Bengal, for roads or railways, 1942-1944——Blame attributed to Government as regards the delay in the progress of the East Indian Railway, 1945-1949——Very slight Government works in improving the state of the Nuddea rivers; shifting course of these rivers adverted to hereon, 1950-1958.

Further statement that the increased salaries of the darogahs have operated mischievously, they now require larger bribes, 1959-1962——Nothing but a proper European superintendence can really improve the native police, 1963.

"Friend of India" Newspaper. Witness was for twelve years the Bengalee translator to the Government, and his newspaper was frequently designated the mere organ of Government, but the latter report was altogether a fabrication, *Marsham* 9573-9580.

Fuel. Great importance of branch railways in Bengal, as a means of remedying the want of wood-fuel in different districts, *Tremenheere* 343. 345.

Furlong, Mr. Benevolence and popularity of Mr. Furlong, an indigo planter in the Kishnagur district, Bengal, *Marsham* 9434. 9586.

Furreedpore (*Bengal.*) Sufficient communication in Furreedpore by means of the numerous rivers, *W. H. Martin* 9139, 9140.

G.

Ganges Canal. The Ganges Canal has cost much too small a sum of money to be a good canal, *Balston* 5929, 5930.

Ganges River. Want of a better police for the protection of the Ganges traffic, *Theobald* 988——Want also of engineering appliances for deepening part of the Ganges, *ib.*——Long period now taken in the transit of goods by the Ganges, &c., from Calcutta to Delhi, *ib.* 1288, 1299-1302——The Ganges, though requiring improvement, may be used as it is, *Freeman* 1617——Impracticability of improving the navigation of the river, *Balston*, 5934.

Ganges Valley. Very fertile character of the great plain of the Ganges, *Mullens* 7175.

Godavery River. Extensive irrigation works in connexion with the River Godavery, *Ouchterlony* 5371——Benefits stated by Colonel Cotton to result from the improvement of the Godavery, *Onslow* 6538.

Gold. Grounds for concluding that there are large quantities of gold in the soil in parts of India, *Hooker* 585. 590-596——Gold has been obtained in the Neilgherries and Malabar, and is reported to exist in other districts, but it has been concluded that it does not exist to any extent which would repay the cost of mining, *Ouchterlony* 5355-5364.——*See* also *Currency.*

GOVERNMENT:

1. *Approval of a Transfer of the Government to the Crown.*
2. *Objection to an Administration on the Colonial System.*
3. *Proposition for a largely increased Power in each Presidency.*
4. *Improvement, if the Non-Regulation System were adopted generally.*
5. *Action of the Government towards European Settlers.*
6. *Character generally of the Government of late Years.*

1. *Approval of a Transfer of the Government to the Crown:*

Anticipation that the transfer of Government from the East India Company to the Crown will lead to many reforms which will tend to colonization, *Freeman* 1567——India should be governed more as an English colony, *MacNair* 2004. 2278-2286——Approval

Reports, 1857-8—*continued.*

GOVERNMENT—continued.

1. *Approval of a Transfer of the Government to the Crown*—continued.

Approval by the settlers of the transfer of Government to the Crown, *MacNair* 2581——General belief amongst the cultivators in Lower Bengal that the East India Company are lessees under the Government, *Mackenzie* 3716-3719——Decided approval of the transfer of Government from the Company to the Queen, *ib.* 3720-3722. 3977.

Immense importance of a transfer of authority from the Company to the Crown; the change would be very popular with the natives, *Waller* 4842, 4843.

2. *Objection to an Administration on the Colonial System:*

Advantages of the present local administration of the affairs of India over a system of direct administration by the Crown on the colonial principle, *Landon* 8482-8487. 8564, 8565.

Examination with reference to former statement that the colonial system of Government is not applicable to India; further argument to a similar purport, *Landon* 8612 *et seq.* 8738-8758——If the colonial system were introduced, witness would be anxious to withdraw his property from the country as soon as possible, *ib.* 8637——Witness does not make any objection to the colonial system as applied to the colonies, *ib.* 8639.

3. *Proposition for a largely increased Power in each Presidency:*

Suggested re-constitution of the Legislative Council, by the formation of a separate Council for each Presidency, and by the infusion of unpaid non-official Europeans and natives, *Waller* 4843-4851. 4933-4939. 4955-4958. 5048-5051——Each Presidency should enact its own laws, and should act as far as possible, subject to the imperial authority of this country, instead of to the authority of the Governor-general, *ib.* 5110, 5111. 5155-5163. 5189-5191.

There should be a greater freedom of action and power of legislation in the local Government, and the superintending authority over each Presidency should be in England rather than Calcutta, *Wingate* 7762-7772——Witness does not directly recommend the abolition of the office of Governor-general, *ib.* 7764. 7767. 7770. 7773, 7774——Political danger in the present system of centralization on account of the community of feeling throughout all India, to which it leads, *ib* 7769-7772.

Improvement, if the present system of administration of the several Presidencies were more independent of the Supreme Government, *Landon* 8487-8491.

Approval of a centralization of the legislative power, rather than of a power in each Presidency to legislate for itself, *Mills* 8963-8976; *Marsham* 9566.

4. *Improvement if the Non-Regulation System were adopted generally:*

Improved administration if the system of the non-regulation provinces were adopted generally, *Landon* 8566——From all that witness knows of the Punjaub system of government, he fully approves of it on the score of its simplicity, *Saunders* 10103.

5. *Action of the Government towards European Settlers:*

Evidence to the effect that hostility is or has been displayed by the Government towards European settlement, *Theobald* 976-980; *MacNair* 1979. *et seq.* 2210-2212. 2417-2423; *Wise* 2630. 2647. 2650-2653. 2877-2885. 2984, 2985; *Dalrymple* 3370. 3380-3385. 3454 *et seq.*; *Waller* 4840——Statement that Government have not shown any hostility or disinclination to settlement; they have, on the contrary, displayed a willingness to encourage it; *Tremenheere* 379, 380. 410. 413. 420, 421; *Auld* 1329-1331; *Mackenzie* 3922. 3928. 3938; *Hawkins* 4325-4328; *Onslow* 6726-6728. 6860. 6879-6884; *Wingate* 7834-7839. 7913, 7914; *Mills* 8810-8813. 9107-9111; *W. H. Martin* 9164; *Bidwell* 9270; *Marsham* 9497-9502. 9657. 9659. 9758; *Saunders* 9831——The knowledge that Government wished to encourage settlement is much required, *Saunders* 10257, 10258.

6. *Character generally of the Government of late Years:*

The Government of India does not appear to progress unless forced on by Parliament, *Freeman* 1818——Approval of the principle of the Europeans, or the small minority making the laws for the government of the great majority, *MacNair* 2278-2286——Sundry respects in which it may be said that reforms or improvements have of late years been introduced by the Indian Government, *Wise* 2920-2926.

The local authorities have of late years made much greater efforts than they did thirty years ago towards developing the resources of the country, *Dalrymple* 3465——Steps taken by Government in developing the resources of the country, *Mackenzie* 3931-3936 Belief that good faith exists on the part of the Government of India towards its subjects, and that in course of time the many causes of complaint on the part of the latter will be remedied, *Wingate* 8201-8204——Considering the character of the people the wonder is, not that Government has done so little, but that it has done so much, *Landon* 8721, 8722.

Reports, 1857-8—*continued.*

GOVERNMENT—continued.

6. *Character generally of the Government of late Years*—continued.

Within the last ten years there has been a vast improvement in the character and spirit of the Government of India, *Marsham* 9650. 9660, 9661——Causes of the great improvements effected in India within the last thirty years, *ib.* 9650-9662, 9664——The greater development of the country during the last thirty years has been owing to measures that have been pressed upon the Company, *Saunders* 10197-10200.

See also *Administration of Justice* (*Mofussil*). *Civil Service.* *Dalhousie, Lord.* *Enam Commission* (*Bombay*). *European Superintendence* (*Native Officials*). *Legislative Council.* *Municipal Government.* *Public Opinion.*

Grand Trunk Road (*Calcutta to Lahore*). Want of bridges on the Grand Trunk Road, *Waller* 4840. 5238——Particulars as to the present state of the trunk road from Calcutta to Lahore; it is excellently metalled nearly the whole way, and is completed between Calcutta and Delhi save that about eight bridges are yet to be made, *Thornton* 8208-8215——Use of kunkur for metalling the road, *ib.* 8208, 8209——Perfect character of the road where completed, *ib.* 8209. 8257——Explanation relative to the bridges, more especially as to those yet to be built; stupendous character of some of these works; the delay in the construction of which is by no means to be wondered at, *ib.* 8209-8216. 8223-8227. 8232-8234. 8255-8259. 8271-8273.

Great length and excellent character of the road, *Marsham* 9516-9521——Explanation as to the non-bridging of several rivers on the road; immense width of some of these rivers, and approval of non-bridging them, as the Great Indian Railway will provide the required accommodation, *ib.* 9521-9528. 9539, 9540. 9729-9734——Good state of the portion of the trunk road in the Doab; it is well bridged, *Saunders* 9929-9934.

Grant, J. P. See *Land Revenue Settlement, and Tenure and Sale of Land*, V.

Greek Merchants. Great increase of Greek traders in India; explanation of this, *Mackenzie* 3738-3740. 3764-3766. 3998-4000.

Dissent from Mr. Mackenzie's evidence in regard to the number and success of Greek houses in India, *Waller* 5216.

Guntoor District. Statement by Colonel Cotton as to the evils consequent upon the neglect of public works in the district of Guntoor, *Onslow* 6538.

Guzerat. Statistics connected with the province of Guzerat; it is the most favoured district of India, but even there, no European paying the wages of labour could cultivate the land to a profit, *Balston* 5898-5903——In the case of cotton in Guzerat, the land tax comes to 52 per cent. of the value, *ib.* 5898——Want of irrigation for cotton, wheat, &c., *ib.* 5938. 5972-5980——Witness did not consider the climate in Guzerat unfavourable to European settlement, *ib.* 6299-6302——Further statement as to the large amount of the land tax in Guzerat in proportion to the value of the crop, *ib.* 6303-6305.

Fine breed of cattle in Guzerat, but not in the Deccan, *Wingate* 7706——The productions of Guzerat, which are principally cotton and grain, have not much increased in witness's memory, *Landon* 8317-8324——Instance of injustice on the part of a sudder ameen in Guzerat whose conduct in the matter was not inquired into, *ib.* 8387-8395. 8398——In Guzerat the Government is undoubtedly well disposed towards European settlement, *ib.* 8464. 8676, 8677——Except in purchasing the produce of the soil, there is no field for European settlement, *ib.* 8492——There are no Europeans in Guzerat engaged in the same way as witness, *ib.* 8493——Witness might readily acquire land in Guzerat, but has not considered it advantageous to do so, *ib.* 8606-8611——The condition of the people in the districts of Broach, &c., is one of comparative prosperity, *ib.* 8695.

See also *Broach.* *Cotton*, I. II. 3. *Enam Commission* (*Bombay*) 8. *Irrigation*, 3. *Police*, III.

H.

Haileybury. A most excellent education was acquired at Haileybury, *W. H. Martin* 9252.

Half-Castes. Objections to half-castes being received in the proposed asylums for soldiers' children; degeneracy consequent upon the mixture of races, *Tremenheere* 112. 123-136——Every precaution should be taken to prevent the European soldiers from marriage with natives, *ib.* 112. 116. 150, 151——Varying degrees of degeneracy of half-castes, according to the race and the locality from which the mother comes, *J. R. Martin* 295-298——The natives, as a class, despise the mixed race, *Mackenzie* 3771——Obstacles to settlement through means of the families of the pensioners who intermarry with the natives, *Mullens* 7206-7208——Suitableness of the half-caste population for employments under Government; the natives, however, occasionally hold them in contempt; *Saunders* 10064-10070.

Reports, 1857-8—*continued.*

Halliday, F. J. Minutes by Mr. Halliday on the subject of sales of land for arrears of revenue, *App.* (*Fourth Rep.*) *p.* 332-340.

Harbours. On the south-eastern coast there are no sheltered ports, *Ouchterlony* 5286——Great want of harbours on the western coast for facilitating the export of Mysore products, *Onslow* 6509-6512——Further statements as to the importance of an outlay in improving the harbours on the western or Malabar coast, *ib.* 6665-6670. 6741-6751. 6887-6891——Ships do not often touch at Cochin or Mangalore, *ib.* 6903, 6904——Inefficient state of the harbours along the Bombay coast, *Wingate* 7729——Number and character of the principal ports of Guzerat; their improvement would not have any great effect upon the interests of European settlers, *Landon* 8311-8316.

Hawkins, John Abraham Francis. (Analysis of his Evidence.)—Went to India in 1822, and returned in 1849; filled several magisterial and judicial offices in Calcutta and elsewhere, and was also a commissioner and collector of revenue, 4051-4055. 4058——Was for a period one of the Law Commissioners in this country, and subsequently was secretary to the Commission, 4056. 4060, 4061——Is now in the examiner's office in the India House, 4057.

Passage in the Law Commission Criminal Procedure Code relative to the last proposed Black Act, 4059——Names of the Law Commissioners; several of them had served in India, 4060. 4062——Foundation of all the Black Acts of late years upon the Act 3 & 4 Will. 4, c. 85, the inference drawn from such Act having been that Europeans should be made liable to the criminal courts in the Mofussil, but not punishable capitally by them, 4063-4065.

Instructions to the Law Commissioners, under which they could not have felt empowered in making courts from which Europeans should specially be exempt, 4065-4069——The main objection by Europeans in India to the Commissioners' scheme is to the provision making them liable, criminally, to native jurisdiction, 4070——Nature of the jurisdiction proposed by the Black Act in the case of the subordinate criminal courts of the first and of the second class; constitution of these courts, 4071-4075.

Except under a special order from government, the native judges could not, without a reference to a European magistrate, exercise criminal jurisdiction over Europeans; hence it was inferred by the Law Commissioners that Europeans would not generally be brought before the native judges, 4075-4082. 4085. 4087——Witness disapproves of European settlers or East Indians being tried criminally before the native judges; grounds for the objection, 4083-4086. 4088-4092. 4261.

Outline of the system of criminal procedure, as recommended by the Law Commissioners, 4093-4099——Alteration by the new code as regards the system of appeal in criminal cases; practice hitherto in such cases, 4098-4106——Expediency of a power of appeal in each case to the superior court in Calcutta, 4106.

Consideration of the views of Sir Arthur Buller, as expressed in the Legislative Council, relative to the proposed Black Act, and the exemptions contemplated in it as regards government servants; misapprehension of Sir A. Buller in supposing that native judges were not included in the exemption as regards trial only by the sessions courts, or the High Court in Calcutta, 4107-4112. 4256. 4372-4380——Importance of distinguishing officials from settlers, and of exempting the former from the jurisdiction of the Mofussil criminal courts, 4111. 4260. 4336, 4337.

Regulations in the new code as regards the constitution of the jury by which Europeans are to be tried in criminal cases, 4113, 4114——Explanation of the main points of procedure in civil cases under the new code; great improvement to be effected thereby, 4115-4144——Inaccuracy of certain statements by Mr. Theobald, wherein he takes exception to the civil procedure under the new code, 4124-4144.

Evidence strongly opposed to the introduction of the English language into the courts; the natives would not feel confidence in its use, and would labour under a feeling that injustice was being done to them, 4145, 4146. 4148. 4262-4268. 4293. 4338-4341. 4391-4393——Occasional instances of suitors suffering through the civil servants not being properly conversant with the native language, 4147. 4152, 4153——Examination and training now undergone, so that magistrates soon become properly acquainted with the language, 4147. 4149. 4153.

Means by which the Persian language, when used in the courts, was rendered intelligible to the suitors, 4148——The Hindee language is not used in the courts in Lower Bengal, 4149——The language of the courts is Bengalee, and not Hindoostanee, but the latter is the *lingua franca* of India, 4150, 4151——Necessity of late years of employing younger magistrates, through the civil service not having been properly augmented, 4154-4158——Suggested union of the offices of magistrate and collector in Bengal, 4158. 4390——Grounds for objecting to a power in the governor-general to appoint gentlemen of the uncovenanted service in offices hitherto appropriated to the covenanted service, 4159.

Opinion that an amalgamation of the Supreme and Sudder courts is not either desirable or practicable at the present time, 4160, 4161——Suggestions with a view to a gradual

 approximation

Reports, 1857-8—*continued.*

Hawkins, John Abraham Francis. (Analysis of his Evidence)—*continued.*

approximation of the Queen's and Company's courts, so that in course of time an amalgamation may be effected, 4161——In the event of a Hindoo suing a Mahomedan, or *vice versâ*, the law of the defendant prevails both in Calcutta and the Mofussil, 4162-4164——A contract is under no law in the Mofussil; great want of a written law on this subject, 4162. 4166.

It is exceedingly important to enact a Mofussil substantive civil law; steps taken by the several Law Commissions with a view to supplying this want, 4166-4179——It is a very unfortunate thing tha tmore countenance has not been given to the Law Commissions, who have prepared two very superior codes for India, 4175-4181——Explanation as to the effect of the Act of 1850, giving protection to the company's judicial officers in the Mofussil; case of Calder *v.* Halkett adverted to hereon, 4182-4187.

Respects in which a decree in the hands of a zemindar against a ryot, for breach of contract, may be used as an instrument of oppression, 4188-4193——Explanation as to the means proposed, under Mr. Grant's Sale Law, with a view to the protection of undertenures, which now are unprotected, 4194-4202——Different provisions in the former opium contract Act and in the present one, as regards the means given to Government for enforcing their claims, 4203-4210——It would never do to give the indigo planters a contract Act, similar to the Government Act in the case of opium contracts, 4211-4213.

Witness sees no objection to a redemption of the land tax, but considers it quite hopeless to obtain twenty-five years' purchase, 4214, 4215——A proper survey of the land in Bengal would have saved a great deal of trouble and litigation, 4216——There have been no reports recently as to the progress of the survey, 4217——Dissatisfaction and alarm consequent upon the resumption laws, or the inquiry into the titles to hold lands rent free, 4218-4221.

Necessity of means for putting an end to the false claims which are made before decrees are executed, 4222-4224——Decrees in cases of contract should stand over for not more than six years, instead of twelve years, before execution, 4225-4230——There is now no legal maximum rate of interest in Bengal; until the last year or two, twelve per cent. was the maximum rate, 4231, 4232——The infusion of European superintendence is the best means for improving the bad state of the Bengal police, but the expense may be an obstacle, 4233-4237.

In the regulation provinces all criminal offences by natives are tried under the Mahomedan law, 4238-4241——Englishmen charged with criminal offences in the Mofussil, are sent to Calcutta for trial, frequently at very great inconvenience and expense, 4242. 4249, 4250——In cases of petty assaults by Europeans in the Mofussil, the district or zillah magistrates may exercise jurisdiction, 4242. 4250. 4252. 4254, 4255——Frenchmen in Calcutta are subject to the English law, and in the Mofussil to the Modified Mahomedan law, 4243-4248——Provision in the new code as regards the jurisdiction of the magistrate in cases of European criminal charges in the Mofussil, 4251-4253.

Attempt of the Legislative Council to introduce at first a part only of the scheme of the Law Commission, 4257-4259——Further objection to the civil service in India being thrown open to the European uncovenanted servants, 4270. 4273-4277——Disapproval of the present system of competitive examanation as not supplying the qualifications most required; this matter rests with the Board of Control, 4271, 4272. 4300-4302. 4342-4344——Suggestions with a view to providing a really efficient service from this country; proportion for a mixed system of competition and nomination, 4271. 4273. 4308, 4309. 4359-4363. 4381, 4382——The Indian civil service has always been very free from jobbery, 4278, 4279.

With a more efficient police, the duties of the civil service might be materially abridged, 4280-4282——Doubt whether European soldiers' children reared in the hills can stand the climate of the plains, and so be introduced into the police, 4283-4286——Objection to an extension of the Supreme Courts to the larger towns in the interior; the natives would strongly oppose it, 4287-4289——Less experience of the judicial authorities since the abolition of the office of registrar, 4290-4292. 4364, 4365——Success of the extended European agency in the Bombay police, 4294, 4295——The resumption laws are not now in force, 4296.

Numerous modifications of the Mahomedan law as now administered, 4297-4299——There are about 800 civil servants in the three presidencies; there should be 1,200; 4303, 4304——Objections to a system of competitive examination in India before promotion to the superior grades, 4305, 4306. 4383, 4384——Opinion that the increased pay of the darogahs is likely to improve them, 4307——Evil of the wide line of social distinction drawn between the civil servants and the indigo planters, 4310.

Objections urged by the settlers to the system of administration; how far a check to increased settlement, 4319-4323. 4329——Absence of discouragement or prejudice on the part of the East India Company or its civil servants against European settlement, 4325-4328——Political difficulties anticipated in the event of the natives being largely ousted

Reports, 1857-8—*continued.*

Hawkins, John Abraham Francis. (Analysis of his Evidence)—*continued.*

ousted from the soil by European colonization, 4326——Propriety of incurring the outlay necessary for an effectual improvement of the police in Bengal, 4330-4335.

Further statement as to the want of a written law, by which cases of contra., &c., in the Mofussil should be tried, 4345-4349—— Advantage in training European children in the hill districts for situations under government, that is, provided their health does not suffer, 4350-4355. 4395-4397——Temporary settlers may repair to India, but the climate is an insuperable bar to colonization, 4356——The best parts of India are now densely occupied, 4357.

Absence of any special judicial training before appointment to the office of civil judge, 4364-4366. 4385-4387. 4390—— Service of fifteen or sixteen years before promotion to the office of civil and sessions judge, 4365, 4366——Magistrates may be appointed after five or six years' service, 4367, 4368——The duty of the Law Commission was, by their instructions, confined to the preparation of a code of procedure, and rules for the amalgamation of the courts, 4369-4371——Expediency of the civil servants generally having an education in jurisprudence, 4388, 4389. 4394——Importance of the civil servants being strongly impressed with the expediency of treating the natives with kindness and consideration, 4395-4404.

[Second Examination.]—Explanation as regards the introduction of the Black Act in the Legislative Council that there was no attempt made to smuggle it through the Council without bringing in the whole code as prepared by the Law Commission, 4405.

Further statement that the language of record in the Mofussil courts is Bengalee, although the oral proceedings are generally in Hindoostanee, 4406-4416——Further evidence opposed to the introduction of the English language into the courts, 4414 *et seq.* 4487-4503——Belief that the civil servants generally understand Bengalee, 4424-4426—— Feeling among the natives in the Mofussil against an extension of the Supreme Court further adverted to, 4432-4447.

Importance of a special training for the judicial office further adverted to, 4457-4461 ——Fitness generally of the European judges to carry on conversations with the vakeels, and to make themselves understood to the native juries, 4462-4469——In Behar and the North-West Provinces of Bengal Proper, the Hindee, and not the Bengalee, is the language of the courts, 4477-4479.

Non-objection to the appointment of one or two English barristers as judges in the Sudder Court; an amalgamation of the Supreme and Sudder Court would not necessarily follow from this plan, 4480, 4481——Witness infinitely prefers the Punjaub non-regulation system to the present tedious system in Bengal, 4482, 4483——The best system of procedure is that provided by the code framed by the Law Commission, 4483.

Witness delivers in the rules for the examination of the civil servants, 4484——Necessary qualification, before appointment to any district, in a knowledge of the vernacular used there, 4485-4487——Witness does not object to the gradual introduction of the English language among the people by means of extended education; and the time may come when its introduction into the courts may be advisable, 4490-4497. 4501—— Upon the general question of upholding in India the institutions and religion of our country, witness considers that we have rather failed in doing so, 4502-4504.

Health. See *Climate. Degeneracy of Europeans. Hill Districts. Mortality.*

Hemp. Excellent hemp procurable in many parts of India, *Tremenheere* 471——Statement in letter from H. Williams, esq., as to the immense quantity of hemp which may be produced in the Saugor and Nerbudda territories, *App.* (*Fourth Rep.*) *p.* 261.

Hill Districts. It is most important, for several reasons, to make the hill stations accessible by railway from the plains, *Tremenheere* 98-110; *Ouchterlony* 5252. 5254. 5432-5435——Prevention, rather than cure, of disease, by removal to the mountain ranges, *J. R. Martin* 203. 205——Statement as to certain forms of bowel disorders being engendered in the elevated ranges, *ib.* 203. 206. 230, 231. 237-239——Witness has suggested to the Court of Directors the propriety of an inquiry into the respective climates of the medium ranges, and the high elevations, which inquiry has been ordered, *ib.* 203. 212, 213. 303, 304——Advantage of isolated mountains over mountain ranges, *ib.* 204. 229——Much greater advantage of a sea voyage than of a sojourn in the hills, *ib.* 207.

Consideration of the effect of the hill climates upon Europeans born and reared there; inadequacy at present of proper statistical information on this point, *J. R. Martin* 208-213. 246-249. 334, 335——Mention of different hill stations now resorted to for purposes of health, *ib.* 214, 215——Necessity of a proper inquiry, in order to decide upon the elevations most conducive to health; witness is in favour of medium elevations of from 3,000 to 4,000 feet, *ib.* 224, 225. 274-281——Considerable cold and damp where the elevations are 7,000 feet or more, *ib.* 234-239——The hills are likely to be more useful during education, or the restoration of health, than for cultivation; but there are large tracts which admit of cultivation, *ib.* 250-254. 261-265. 327, 328——Numerous mountains throughout India available as sanitariums, *ib.* 273, 274.

Reports, 1857-8—*continued.*

Hill Districts—continued.

Advantages anticipated from the settlement on the hills of European farmers as likely to lead to an interchange of the products of the hills and of the plains, *Tremenheere* 346-358——Unhealthiness of the hill climates in India where the elevation is below 3,500 feet, *Baikie* 735, 736——Exceedingly heavy falls of rain on the western ghauts in southern India, *ib.* 740-745——Opportunities of the Europeans in Bengal for change of air by journeys to the hills or by sea voyages, *Theobald* 859-864——Increased settlement in the interor when there is a readier access to the hills, and a speedier and cheaper means of return voyages to England, *ib.* 863-867——Opinion that the climate of India need not prevent small colonies of Europeans from settling on the hills, *Freeman* 1528——Natural facilities for the settlement of European troops and their families in the hill districts, *MacNair* 1978.

Mention of various hill districts in the south of India which are well known to witness, *Ouchterlony* 5247——Many of these hills have not been properly explored or surveyed, *ib.* 5248, 5249——An elevation of about 4,000 feet, if near the sea, gives a fair climate for Europeans, but in the interior an elevation of about 6,000 feet is required, *ib.* 5250——The several hill districts referred to are all adapted, in a greater or less degree, for European colonization, *ib.* 5252——If Europeans could, by means of railways, occasionally resort to hill stations in the south of India, they might, without any physical deterioration, superintend, and even initiate agricultural operations in the plains, *ib.* 5252. 5254. 5432-5435——Impression that Bengal comprises many more hill tracts than Bombay, *ib.* 5499——Favourable results anticipated from a system of military colonization in the hills, comprising free grants of land, *ib.* 5535, 5536.

From about 2,500 to 4,000 feet above the level of the sea is the best elevation for the growth of coffee, *Fowler* 5584——On part of the Mahableshur hills, and in other places in Bombay, depôts for the soldiers and asylums for their children may with great advantage be established, *Warden* 6037-6046——Drawbacks upon successful settlement in the hills, although on the score of climate they present far greater inducements than the plains, *Mullens* 7121-7126. 7135-7140——Liability to diarrhœa, on account of the large falls of rain on some of the hills, *ib.* 7122.

Europeans and their children might with much advantage be located on the Western Ghaut ranges in Bombay, *Wingate* 7648-7652——Although the hills may be advantageously used by Europeans, there are certain obstacles to European families taking root there, *Bidwell* 9270——Suitableness of the climate of the hill district of Mussoorie, Nynee Tal, &c. for the European constitution, *Saunders* 9944-9949——Unsuitableness of the land on these hills for European cultivation, *ib.* 9950-9953.

See also *Children of European Soldiers.* *Churrah Poonjee* (*Assam*). *Coilamulley Hills* (*Salem*). *Darjeeling* (*Bengal*). *European Troops.* *Himalaya Mountains.* *Mahableshwr Hills* (*Deccan*). *Neilgherry Hills* (*Madras*). *Nynee Tal* (*North Western Provinces*). *Pulney Hills* (*Madras*). *Terais.*

Himalaya Mountains. Limited extent to which the Himalayas are adapted to European colonization, *Tremenheere* 110——General absence of table land on the southern face of the mountains, *ib.*——The valleys are exceedingly hot, and not very healthy, *Tremenheere* 110. 352; *J. R. Martin* 253——Mention of several natural resources of the Himalayas, &c., *Tremenheere* 471——Supply of excellent timber in the Himalayas, *ib.* 471. 518, 519.

Nature of the facility of extended cultivation along the southern range of the Himalayas, *Hooker* 659-665. 673. 713-721——Different climates in different parts of the Himalayas; the north-western portion is most favourable for Europeans, *H. and R. Schlagintweit* 6983-6985——Character of the valleys, *ib.* 6989——Absence of dairy farms throughout the Himalayas, though some portions are exceedingly suitable for them, *ib.* 6991-6993.

See also *Copper.* *Tea.*

Hindoos. See *Christianity.* *Native Character.*

Hoarding. Practice of the natives to hoard their money, by burying it, in consequence of their dread of oppression and extortion, *Mackenzie* 3607-3613. 3677. 3677——A right to redeem the land tax would be the most efficient, or the only means for preventing hoarding, *ib.* 3675-3677——It is believed that immense quantities of money are lost by the burial of it, *ib.* 3677——Great importance of such measures as will impress the natives with a sense of security and will prevent hoarding, *ib.* 4016-4011. 4032.

Belief that the people of India are very poor, and that hoarding is not carried on to any extent, *Baillie* 4540. 4542——Absorption rather than hoarding of silver, *ib.* 4752-4759. 4822.

Hooker, Joseph Dalton, M.D., F.R.S. (Analysis of his Evidence.)—Extensive travels of witness in India in botanical pursuits, 522-527——Origin of the establishment of a sanitarium at Darjeeling about the year 1840; 528-531——Immense increase since 1840 in the population of Darjeeling, more especially as regards the natives who flocked thither as to a new colony, 532. 537-542——Exceedingly healthy climate of Darjeeling; the summers however are very rainy, and the winters are rather cold, 533. 536——The station

Reports, 1857-8—*continued.*

Hooker, Joseph Dalton, M. D., F. R. S. (Analysis of his Evidence)—*continued.*

station of Darjeeling is between 7,000 and 8,000 feet high, which elevation is about the best on the Himalayas, 534, 535.

Favourable character of Darjeeling as a station for troops, 543, 544——Probable establishment in time of schools for the education of European children at Darjeeling, 545-547——Evidence as to the great importance of Darjeeling as the basis for establishing a trade with Tibet and Central Asia, 548 *et seq.*——Great facilities for the cultivation of tea along the Himalayas, in Sikkim particularly, 551-557. 725-727——Growing trade of the natives for tea, 558-560——Good quality of the Assam tea, 561. 722-724.

Successful result of the fair established by Dr. Campbell about thirty miles from Darjeeling; numerous commodities brought thither from Tibet and the hills, 562-565——Impression that Sikkim is now an independent territory, 566——Darjeeling, which is now British territory, was purchased from the rajah of Sikkim, who made a very good bargain in the matter, 568. 654-656——Nature of the route to Tibet through Sikkim and Darjeeling, 569-575——Principal productions of Tibet; evidence hereon as to the attempts hitherto made, and as to the importance of further attempts to develop a trade between that country and India, 576 *et seq.*

Military and civil authority exercised by the Chinese in Tibet, 596, 597. 700-702——Statement as to the tea now used in Tibet and Central Asia; importance of some means for introducing tea from India, 598-617. 680-682——The frontier of Tibet is closed by the Chinese and Sikkim authorities against British trade from India; character of the communications or passes into the country adverted to hereon, 619-629. 666-668. 683-695——Energetic and successful exertions of Dr. Campbell in developing the trade and resources of Sikkim and Darjeeling, 629, 688.

Immense fall of rain annually at the hill station of Churrah Poonjee; the place is not unhealthy, 632-636——More healthy character of Silhet and Cachar than of Chittagong, 637-641——The climate in the different parts of India is now fairly understood, 642——Suitableness of Darjeeling for settlement and cultivation, 643, 644. 664, 665——Explanation as to the failure of an attempted agricultural settlement near Churrah Poonjee, 645-647——Increased cultivation in Silhet, Cachar, and the upper Gangetic delta, through the improved government in those districts, 648-652. 707-713——Nature of the facility for extended cultivation along the southern range of the Himalayas, 659-665. 673. 713-721——Very neglected state of Cashmere adverted to, 662, 663. 714-716.

Character of the government and nature of the soil in Bhotan, 669-674——Absence of restriction upon the purchase of land in Sikkim, 675-677. 717-721——Large fall of rain in Sikkim, 678, 679——Difficulty in procuring an indisputable legal title to land in India, 718-721——Reference to Assam as a very improving country generally, 722——Price of the tea now cultivated in the Upper Provinces, where Chinese labour is employed through British capital, 728-730——The people of Tibet are chiefly of the Mongolian race, 731.

Indapoor District. Letter from Mr. Frere in 1849, showing the immense benefit accruing in the Indapoor district from the re-assessment of the land revenue, *Wingate* 7626.

Indigo and Indigo Planters:
1. *Bengal.*
2. *North Western Provinces.*
3. *Western India.*

1. *Bengal:*

Strong illustration of the value of European enterprise and superintendence in the case of indigo, as in Bengal, *Tremenheere* 53-55——Higher price and better character of indigo when produced under Europeans, *Freeman* 1546-1551; *MacNair* 2019——Litigation and loss under the present system of the indigo planters in renting the land from numerous small tenants, *Freeman* 1655-1658——Statistics as to the indigo cultivation of Bengal, *MacNair* 2045——Alluvial soil required for indigo cultivation, *ib.* 2052——Immense property held by European settlers and capitalists in indigo cultivation, and immense value of the indigo produced annually by them, *Wise* 2692-2695——Witness has understood that 1,500,000 *l.* is invested in indigo factories in Bengal, *Mullens* 7144——Probable cause of the increased investments in indigo planting, *ib.* 7173——Undue extent to which indigo planting was forced in witness's time, *Martin* 9164-9166.

The indigo planters in Bengal are generally landlords; objects in their becoming so, *Theobald* 922, 923——Imperfect security of the planters even as landlords, *ib.* 924——

Reports, 1857-8—*continued.*

Indigo and Indigo Planters—continued.

1. *Bengal*—continued.

Nature of the security of the indigo planters previously to 1837, when they could only go into the country by licence, *Theobald* 925-931——Disposition among the planters to encourage the establishment of schools and the moral welfare of those about them, *ib.* 1024, 1025——Circumstances under which the planters in Bengal are constantly brought into contact with the zemindars, and find it necessary to bring numerous cases into the courts, *Freeman* 1836, 1837——Reasons why the European indigo planters generally become zemindars, *MacNair* 2020-2027.

Many more planters have been unsuccessful than successful, *Dalrymple* 3410, 3411——Unsuccessful operations generally of the indigo houses, in consequence mainly of the system of advances to cultivators, *Baillie* 4553-4555——Further statement as to the ill success generally of indigo speculations; belief that there has on the whole been a loss, *ib.* 4629-4631. 4736, 4737. 4804-4810. 4832——Dissent from Mr. Baillie's statement that the business of indigo planters has on the whole been a losing one, *Waller* 4894-4896.

Reference to a strong complaint by certain ryots in Bengal as to the evil operation of the indigo houses; weight attached to this complaint, *Mullens* 7154-7166——Reference to the testimony of other parties besides the ryots as to the evils of the indigo planting system, *ib.* 7168——Belief that many of the evils charged against the planters are forced upon them for want of a proper administration of justice, *ib.* 7168, 7169. 7211.

General complaints in Furreedpore and Kishnagur, when witness was there, of the conduct of the European, that is, of the English indigo planters towards the natives, *W. H. Martin* 9117-9119. 9127. 9210, 9211——Probability of arbitrary and unpopular conduct on the part of some indigo planters, whilst others have high characters for fairness and benevolence, *Bidwell* 9270——The indigo planter is very much at the mercy of his native *employés*, *ib.* 9270.

Evidence on the subject of the state of feeling existing in Bengal, more especially in Lower Bengal, between the European indigo planters and the zemindars, and the ryots; the planters in many instances bear the character of violent and oppressive men, though there are doubtless many who are exceedingly benevolent and popular, *Marsham* 9432-9444. 9586-9591——Witness expresses his dissent from much of the evidence of Mr. Freeman and Mr. Theobald; he concurs generally with Mr. Hawkins and Mr. Baillie, *ib.* 9583, 9584. 9714-9716. 9788——Benefit to the country through the pressure of the indigo planters, *ib.* 9589-9592——Considerable improvement in the character of the planters during the last thirty years; *ib.* 9777.

Petition of the Indigo Planters' Association in Bengal on the state of the magistracy law courts and police, and praying for certain reforms therein, *App.* (*Fourth Rep.*) *p.* 229-233.

2. *North Western Provinces:*

Diminution in the indigo trade and in the number of indigo planters in the North Western Provinces in consequence, principallly, of the increased cultivation of a better quality of indigo in Bengal, *Saunders* 9797-9799. 9804-9807. 10080. 10084. 10132, 10133. 10146, 10147—— Opportunity, by means of irrigation from the Great Ganges Canal, of improving the indigo cultivation in the Allygurh district, *ib.* 9808-9812. 10082, 10083. 10126-10129——Increased crops of indigo by means of irrigation; the quality can hardly be further improved, *ib.* 10245. 10251-10253——The indigo of the North West Provinces fetches a lower price by twenty-five or thirty per cent. than the Bengal indigo, *ib.* 10254-10256.

3. *Western India:*

Difficulty as regards the claims of the ryots which render the Bengal system of indigo planting inapplicable to Western India, *Landon* 8733-8737.

See also *Administration of Justice* (*Mofussil*). *Affrays, and Affray Bill* (*Bengal*). *Civil Service*, 11, 12. *Climate. Contract Law. Criminal Jurisdiction* (*Mofussil Courts*). *Foreign Settlers. Furlong, Mr. Irrigation. Magistrates*, 2. 4. *Police*, 1. *Recognizances to keep the Peace. Watson, J. and R.*

Intemperance. Obstacle to successful settlement on the score of liability to intemperate habits, intemperance now being the besetting sin of European soldiers, pensioners, and others in subordinate capacities on the railroads, &c., *Mullens* 7120. 7296-7298.

Interest on Loans. Circumstance of planters, &c. in the Mofussil being obliged to pay as much as fifteen per cent., and even more, for loans from capitalists in Calcutta, *Freeman* 1515. 1714. 1719. 1820-1823——Easier access to loans if there were more European capital, *Wise* 2710-2713. 2776——Great evil to the cultivators through the usurious and oppressive rates required by money-lenders, *Mackenzie* 3626. 3636——There is now no legal maximum rate of interest in Bengal; until the last year or two twelve per cent. was the maximum rate, *Hawkins* 4231, 4232.

Great

Reports, 1857-8—*continued.*

Interest on Loans—continued.

Great evil of the high rate of interest; way in which this is aggravated by Government operations and by speculative indigo contracts, *Baillie* 4539. 4557. 4567. 4572.

Frequency of natives in Mysore charging as much as thirty-six and fifty per cent. interest for loans to cultivators, *Onslow* 6766-6768——Advance by a European settler in Mysore of large sums at twelve per cent. on the mortgage of coffee plantations, *ib.* 6766-6769——High rates of interest, but not so high as fifty or sixty per cent., paid for loans by the ryots in Bombay, *Wingate* 8014-8017——The rate of interest on mortgage in the North West Provinces is usually twelve per cent., *Saunders* 10120, 10121.

Iron. Several parts of India in which iron exists abundantly, *Tremenheere* 25, 26. 33——Available supplies of wood fuel in Kumaon for the smelting of the iron of that district, *ib.* 26-30——Vicinity of coal, iron and lime on the Nerbudda River, *ib.* 33, 34——Considerable production of iron in the district near Monghyr; coal and lime are near at hand, *ib.*——Want of lime in many parts of India; available supply near Sylhet, as a flux for iron, *ib.* 36. 39, 40——Existence of deposits of kunkur, which is an impure carbonate of lime, and is hardly available as a flux for iron, *ib.* 36-38. 41.

Abundant existence of excellent iron in the Madras Presidency, *Ouchterlony* 5326. 5333-5335——Simple process by which the most ductile wrought iron is produced by the natives from the raw iron, *ib.* 5326-5328——Particulars as to an iron company which has been in operation in Madras for nearly twenty-five years, and has very exclusive privileges from Government, but has hitherto been most unsuccessful; witness attributes this failure to bad management, *ib.* 5329-5333. 5502-5504——Means by which iron may be profitably produced, *ib.* 5333——Facilities in Madras for smelting the iron, *ib.* 5336-5341.

The iron in Mysore is of very fine quality; difficulty hereon through the want of fuel for smelting, *Onslow* 6451-6461.

Statement in letter from H. Williams, esq., as to the great resources of the district round Jubulpore for the production of iron, *App.* (*Fourth Rep.*) *p.* 262.

IRRIGATION:

1. *Mysore and Southern India.*
2. *North Western Provinces.*
3. *Guzerat and Western India.*
4. *Generally as to the immense Advantages to be derived from increased Irrigation.*
5. *Expediency of private Enterprise, aided by Government.*
6. *Scheme for an Irrigation and Canal Company in Madras.*

1. *Mysore and Southern India:*

Information relative to the canals for purposes of irrigation in Southern India; more has been done by Government in this respect than seems generally understood or admitted in this country, *Ouchterlony* 5370-5374——Probability of many of the ruined tanks or reservoirs in Southern India having never been completed as means of irrigation, *ib.* 5470-5476.

The effects of irrigation in Mysore are absolutely prodigious, *Onslow* 6464——Information relative to the irrigation tanks in Mysore; immense number of these works; their size, state of repair, &c., *ib.* 6465-6475——In 1854 there were 8,607 tanks in use, besides a large number out of order, *ib.* 6465. 6475——The tanks in ruins, were found in ruins when British Government was introduced, *ib.* 6467. 6469, 6470——The Soolikerry tank in witness's division was nearly forty miles round, *ib.* 6470——Many of the tanks are less than a mile round, *ib.* 6473, 6474.

Means of irrigation in Mysore, &c. besides tanks, *Onslow* 6475-6477——Varying practice as regards the charge for irrigation, *ib.* 6478——Statement by Colonel Cotton that the average return on all the new irrigation works in the Madras Presidency for the last fourteen years is seventy per cent. per annum, *ib.* 6537, 6538——Number and condition of the tanks further adverted to; the tank system can hardly be extended, *ib.* 6638, 6639. 6643. 6648——Certain crops for which irrigation is indispensable in Mysore, *ib.* 6657, 6658.

2. *North Western Provinces:*

The best crops in the North West Provinces are now irrigated, *Saunders* 10243.

3. *Guzerat and Western India:*

Particulars as to the very slight extent, and the very imperfect means of irrigation in Guzerat, &c. at the present time, *Balston* 5936-5942. 5950. 5972-5979——Great cost of irrigation as at present provided; evidence of a charge of 5 *l.* per acre for irrigated land, *ib.* 5942. 5946-5949——Grounds for former statement as to the exceedingly heavy cost of irrigation in Western India, *ib.* 6308-6317——Opinion that in a great part of Guzerat it would be practicable to supply irrigation at a charge of from 2 *s.* to 4 *s.* an acre, *ib.* 6318-6321——Number and depth of the rivers and nature of the levels of the

Reports, 1857-8—*continued.*

IRRIGATION—continued.

3. *Guzerat and Western India*—continued.

country considered in reference to the practicability of the proposed canals of irrigation and navigation; witness is not minutely informed on these points, *Balston* 6321-6339.

Limit to the extent to which irrigation may probably be employed in Guzerat, *Landon* 8288-8290.

4. *Generally as to the immense Advantages to be derived from increased Irrigation:*

Great importance of a system of irrigation in Lower Bengal, &c., *Tremenheere* 80, 81; *Freeman* 1613-1616——Great profit anticipated from an outlay on works of irrigation of portion of the money acquired as proposed, by a redemption of the tax, *Mackenzie* 3681, 3682. 3751-3753——Approval of the present system of defraying the cost of works of irrigation, that is by a water rate, *Mackenzie* 3749, 3750. 3901-3904; *Wingate* 8086 —— Extent of Government outlay in irrigation; doubt as to any outlay by individuals, *Mackenzie* 3754, 3755——Immense importance of a large extension of works of irrigation as a means of increasing cultivation to an almost unlimited extent, *Ouchterlony* 5370-5372——Government outlay is urgently required on works of irrigation, and would be a most prudent and economical expenditure, *ib.* 5372.

By means of ample supplies of water, the European of small capital may cultivate land more profitably in India than elsewhere, *Balston* 5920——Calculation that by means of canals, as proposed, irrigation may be provided at from 2 *s.* to 4 *s.* per acre, and that such charge would yield a return of ten per cent. on the cost of the canals, *ib.* 5942. 5951-5953 ——Enormous advantage of irrigation to the cultivators, *ib.* 5942. 5945, 5951——The effect of irrigation on grain and oil seeds is to double the crop, and even to produce two crops in the year, instead of one, *ib.* 6286.

Irrigation is the great desideratum in India; it is, combined with internal communication, the *sine quâ non* of cultivation and progress, *Onslow* 6464. 6536-6538 ——Extract from Colonel Cotton's book on public works in India, relative to the great benefits conferred and the large revenue returned by works of irrigation, *ib.* 6537, 6538——There are millions and millions of cubic feet of water running to waste, while drought is destroying all vegetation, *ib.* 6537. 6631, 6632——Irrigation is a matter of science in cultivation, and is the one thing wanted to renovate India, *ib.* 6611-6613. 6632-6634——Advantage of canals over tanks in their being easily made to retain the water better, *ib.* 6655, 6656 ——Much larger and more valuable produce per acre by means of irrigation, *ib.* 6659—— Great virtue of irrigation in the alluvial deposit it leaves upon the land, *ib.* 6660-6664 ——Great benefit to native capitalists if they had opportunities of investing in works of irrigation, *ib.* 6764, 6765. 6810.

5. *Expediency of private Enterprise, aided by Government:*

Works of irrigation may well be undertaken by private enterprise, *Tremenheere* 80, 81; *Onslow* 6537——Advantage to private companies undertaking canals of irrigation, for which small tolls might be charged; advantage also to the cultivators, *Ouchterlony* 5373. 5415-5421——Necessity of Government aid in connexion with private enterprise in carrying out works of irrigation; private enterprise being most important as a means of introducing capital and energy in the execution of the works, *Onslow* 6623-6630. 6810-6817. 6951, 6952. 6961——Obstacles to Government undertaking all the necessary works, *ib.* 6958-6961.

6. *Scheme for an Irrigation and Canal Company in Madras:*

Reference to a scheme with which witness is connected for getting up an irrigation company; the Court of Directors have offered every encouragement in the matter, *Onslow* 6537. 6539-6541——Grounds upon which a Government guarantee of five per cent. is sought for in connexion with the proposed irrigation works in Madras, *ib.* 6623-6630. 6810-6817. 6951, 6952——Grounds for estimating an immense profit on the proposed works of irrigation; net profit of sixty-nine and a half per cent. on all the outlay of the East India Company on irrigation works, *ib.* 6953-6957. 6962-6964.

J.

Jafur Alee. Letter from Jafur Alee, a landowner in Bombay, to Sir Erskine Parry, complaining generally of the proceedings of Government, and especially of their disregard of native rights in land, *Warden* 6136.

Jessore. Instance of delinquency about two years ago on the part of a moonsiff in Jessore; slight punishment awarded to him, *Freeman* 1762-1766——A road is under construction to Jessore, *Thornton* 8246.

Report, dated 13th May 1857, of meeting of the Indigo Planters' Association respecting an outrage on an European in the Jessore district, *App.* (*Fourth Rep.*) *p.* 244, 245.

Joint-Stock Companies. Facility for the formation of joint-stock companies in India, *Theobald* 1303-1306.

Reports, 1857-8—*continued.*

Jubbulpore. Letter from H. Williams, Esq., to the Rev. F. A. Dawson, dated 3d May 1858, relative to the great resources of the districts round Jubbulpore, *App.* (*Fourth Rep.*) *p.* 261, 262.

Judicial Service (European Judges):

1. *Qualifications of the European Judicial Officers.*
2. *Objection to the Exclusiveness of the present System.*
3. *Whether desirable to separate the Judicial from the Revenue Service.*
4. *Consideration of Suggestions for improved Qualifications.*

1. *Qualifications of the European Judicial Officers:*

Incompetency in many instances of the civil servants in the Mofussil courts to interpret the laws, *Freeman* 1477. 1479——Young and inexperienced civilians appointed to judicial offices, *MacNair* 2000. 2058——The experience in the magistrates' courts is by no means of a nature useful to him on promotion to the offices of collector and of civil judge, *Mackenzie* 3703. 3744-3748. 3784-3794——Less experience of the judicial authorities since the abolition of the office of register, *Hawkins* 4290-4292. 4364, 4365; *Mills* 8904-8916; *W. H. Martin* 9183. 9189.

Absence of any special judicial training before appointment to the office of civil judge, *Hawkins* 4364-4366. 4385-4387. 4390——Service of fifteen or sixteen years before promotion to the office of civil and sessions judge, *ib.* 4365, 4366——Disadvantage in the limited means of experience of the judges since the alterations introduced by Lord William Bentinck, *Baillie* 4612, 4613——Practical experience and general competency of all English judges appointed to the Sudder Courts before 1844, *ib.* 4725-4730.

Evidence as to the deficient training of the civil judges, *Waller* 4890. 5002-5006. 5085-5089. 5134. 5199——Instances of the promotion of utterly inefficient men to the bench, *ib.* 4951-4954——Concurrence in the statement of Mr. Campbell that the more incompetent a man is the more sure is he of a judgeship, *ib.* 4951-4954——Passages in certain petitions from Calcutta and Madras as to the want of efficiency in the Company's judges, *ib.* 5149. 5153——Impression that the judicial officers in the south of India are not sufficiently judicially educated, *Ouchterlony* 5410-5412*.

Good training for the office of judge in Bengal in the experience acquired in the revenue branch of the service, *Mills* 8909. 9022-9032. 9093-9099; *W. H. Martin* 9182-9189, 9217-9228; *Marsham* 9463-9470. 9630-9632.

2. *Objection to the Exclusiveness of the present System:*

Exclusive character of the civil service system in the distribution of judicial offices between the covenanted and the uncovenanted services; instances of this, *Theobald* 1000-1002——A worse judicial system than the present could hardly be devised, *Waller* 4898, 4899——Views of the Marquis of Hastings in 1819 as to the evil operation of the judicial system, *ib.* 4898.

3. *Whether desirable to separate the Judicial from the Revenue Service:*

Improvement if the judicial administration were separated from the revenue service, *MacNair* 2135-2139; *Ouchterlony* 5412, 5412*; *Warden* 6094, 6095. 6276. 6278. 7480-7485.

In the perpetually settled districts a union of the offices of magistrate and collector would be better than the present system, *Mackenzie* 3705-3707. 3790. 3951-3955——Statements in favour of uniting the offices of collector and magistrate in Bengal, *Hawkins* 4158. 4390; *Marsham* 9630-9636.

There would be no practical difficulty in a distinct judicial service, *Warden* 7543. 7550. 7551——Approval, as far as possible, of a separation of the judicial from the revenue service, *Wingate* 7857-7859——In Bombay, promotion in the judicial branch is confined to the officers of that branch, *ib.* 7858——Expediency of continuing the employment of any civilian in the same branch of the service as that which he first enters, *Landon* 8727.

Advantages of the union of the offices of collector and magistrate; its popularity with the natives, *Mills* 8815-8820——Approval of a separation, if practicable, of the judicial and revenue services; it may be carried out if the civil servants are increased, *ib.* 9018, 9019. 9100——As regards a separation of the judicial and revenue services, much that is useful in the one is useful in the other, *W. H. Martin* 9259-9261——Disapproval of a separation of the judicial and revenue services, on the score that the training in the latter is very useful in the former, *Bidwell* 9315-9318——Advantage in the North-west Provinces of the junction of the offices of collector and magistrate, *Saunders* 9901.

4. *Consideration of Suggestions for improved Qualifications:*

Qualifications suggested as indispensable before admission to the judicial office, *Theobald* 998, 999; *Freeman* 1630-1632——Better qualifications for the judicial office of barristers after short experience in India, than of the ordinary civil servants after many years' experience, *Theobald* 1047-1052——Way in which witness would provide for proper qualifications in judicial officers as a separate service; barristers should be

Reports, 1857-8—*continued.*

Judicial Service (*European Judges*)—continued.

4. *Consideration of Suggestions for Improved Qualifications*—continued.

largely resorted to, and the more fitting members of the civil service selected, after superadding the legal education required, *Theobald* 1120-1136. 1137-1139——Importance of utilising the local knowledge obtained by revenue or judicial officers in any district, *ib.* 1274-1276.

Great improvement in the administration of justice if legal education and training were required in the judicial officers, *Freeman* 1563. 1728, 1729; *Hawkins* 4388, 4389. 4394. 4457-4461; *Baillie* 4527, 4528——Suggestion that, before appointment to the judicial office, the civil servants should undergo a certain practical ordeal in the courts, *Freeman* 1786. 1866. 1870, 1871.

It would not answer to select the zillah judges in the same way as native judges; but they might with advantage be selected from the gentlemen practising at the bar of the Sudder Dewanny Adawlut and the Supreme Court, *Baillie* 4526——With a substantive law, previous legal training in the judge would not be essential *ib.* 4527——Doubt as to whether a system of legal training in this country would provide the most efficient kind of judges for the Mofussil, *ib.* 4711-4725——A knowledge of the native language, and of the customs and habits of the people is essential in the English judges, *ib.* 4775. 4780.

Education in jurisprudence is essential in any one appointed to the judicial office, *Waller* 4872, 4873; *Warden* 6087-6092. 6114-6118. 6204, 6252-6255. 7541——Necessity of the introduction of professional judges independent of the Government, *Waller* 4899——Explanation as to the qualifications or professional training desirable in the case of every person appointed to a judgeship; how such qualification might in practice be secured, *ib.* 5016-5021. 5102-5109. 5135. 5192——Mixed system of native judges and of European and native Christian judges, comprised in witness's plan of an improved judicial system, *ib.* 5057-5069. 5074-5077.

Advantage if barristers in the Supreme Courts were appointed to judgeships; illustration of their fitness for such position, *Warden* 6082-6089. 6251——Witness considers it very important that the European judges should have a practical knowledge of the character and habits of the people, but they should have as well a legal education; means by which both qualifications may be secured, *ib.* 6252-6261——An examination in Mahratta should be sufficient for barristers, the evidence being conveyed through interpreters, *ib.* 7477——System of education and training suggested in the case of judges, supposing the service to be thrown open, and the judicial service separated from the revenue service, *ib.* 7542-7550——Legal training for judgeships should be acquired in India rather than in this country, *Wingate* 7858.

Advantage in judicial offices in the Mofussil being filled by persons trained in the country in the Company's service rather than by barristers appointed direct from England, *Mills* 8874-8878. 8917-8937. 9007-9017. 9022-9032. 9093-9101.

Advantage in employing as judges civil servants trained in India rather than barristers from this country, *W. H. Martin* 9174-9189——Usefulness to judges of a previous education in jurisprudence; this was, to a certain extent, gained at Haileybury, *ib.* 9177-9180. 9213-9216. 9253-9257——Improvement if the civil servants before going to India were more directed to the study of the principles of the law, *Bidwell* 9315. 9318; *Marsham* 9785——Objection to the appointment of barristers from England as judges on account of the interference thereby with the exclusiveness of the civil service, *Marsham* 9455 *et seq.* ——Approval of the appointment of Europeans in India, or East Indians, to the uncovenanted judicial service, *ib.* 9561.

Juries. See *Administration of Justice*, IX.

Jute. The export of jute to England has increased from 3,000 bales in 1836, to nearly 250,000 bales, *Wise* 2702.

K.

Khan Bahadoor Khan. The conduct of Khan Bahadoor Khan does not alter witness's opinion that the character of the native judges generally has much improved of late years, *Mills* 9001-9005.

Khandeish. Considerable facilities for irrigation in Khandeish; it is, however, found more profitable to extend dry-crop cultivation than to irrigate, *Wingate* 7655-7663. 7673-7684——Bar to settlement through the unhealthiness of the climate, *ib.* 7678, 7679——Want of population in Khandeish, and unhealthiness of the district, *ib.* 7678, 7679——The removal of the jungle would obviate the ill effects on the score of the climate, *ib.* 7825, 7826.

Wild and uninhabited state of large portions of the province during the unsettled period preceding our occupation of it; reference hereon to witness's Khandeish Report of

Reports, 1857-8—*continued.*

Khandeish—continued.

of March 1852; *Wingate* 7895-7897, 7898——Witness has recently heard from the present collector in Khandeish that within the last seven years the cultivation has increased by about 400,000 acres, *ib.* 7895, 7896——Unhealthiness of the jungles and paucity of the population further adverted to as a bar to European colonisation, *ib.* 7899 7901.——*See* also *Cotton*, I. II. 4.

Knowledge of the Country. Among other reasons for non-emigration to India, one is that the country is not properly known, *Ouchterlony* 5575.

Kumaon. See *Tea.*

L.

Labour. Abundance and cheapness of native labour, *Tremenheere* 110; *Dalrymple* 3549, 3550——Advantage rather of European agency in superintending cultivation by native labour than of direct European cultivation, *Tremenheere* 110. 162. 179; *Wingate* 7866-7868. 7887-7890——Witness considers it impossible that Europeans can work as labourers on farms in the low country, *Ouchterlony* 5512, 5513——Although the southern parts of India are thinly populated labour is absurdly cheap, *ib.* 5515, 5516.

The exceedingly low cost of native labour, about eight shillings a month, must always, irrespective of the climate, prevent the successful settlement of Europeans as manual labourers, *Warden* 6028. 6047, 6048——Impossibility of a European labourer competing successfully with a native labourer, *Onslow* 6601, 6602; *Wingate* 7689——Value of labour in India in proportion to its price; witness believes that on the whole the former bears as great a proportion to the latter as it does in this country, *Landon* 8467.

Land Revenue Settlement, and Tenure, and Sale of Land:

I. *Bengal:*

1. Approval of the Principle of the Permanent Settlement or Zemindary System.
2. Disapproval of the Permanent Settlement, as being a Spoliation of the Cultivators.
3. Insecurity of Under-tenures, and Obstacle to European Settlement through the System of Sales of Land for Arrears of Revenue.
4. Measures required for the Protection of Under-tenures.
5. Mode of dealing with Land which reverts to Government.
6. Variety of Proprietary Rights in the Soil.
7. Amount of the Government Assessment.
8. Absence of Legislative Restrictions upon the Purchase of Land.

II. *Bombay:*

1. Character of the Settlement under Mr. Elphinstone's Administration.
2. Originators of the present Settlement.
3. Progress of the New Settlement.
4. Rules for the Administration of the New System.
5. Liability to Re-assessment after Thirty Years; Effect thereof.
6. Separate Assessment upon each Field.
7. Careful Practice in carrying out the System.
8. Amount of the Assessment.
9. Improvement upon the Ryotwarree System.
10. Effect as regards existing Rights.
11. Advantage of the Facilities for the Sale or Letting of separate Fields.
12. Favourable Effect upon the Condition of the Ryots.

III. *Madras.*

IV. *North Western Provinces.*

V. *Sale Law Improvement Bill, and Under-tenures generally:*

2. Explanation by Mr. Grant in introducing the Bill.
3. Copy of the Bill.
4. Petition and Report by the Indigo Planters' Association.
5. Petition of Protestant Missionaries.
6. Correspondence representing the Views of the Government of Bengal.
7. Correspondence on the part of the Board of Revenue, Lower Provinces; Views of the Members of the Board.
8. Minute representing the Views of Mr. Halliday.
9. Views of the Lieutenant-governor and Sudder Board of Revenue, North Western Provinces.

Reports, 1857-8—*continued.*

Land Revenue Settlement, &c.—continued.

V. *Sale Law Improvement Bill, and Under-tenures generally*—continued.

10. Proposition by Captain H. W. Craufurd on the subject of Government Sales.
11. Petitions of Rajah Sutt Shurn Ghosaul.
12. Petition of Zemindars in Tirhoot.
13. Petition of Zemindars of Zillah 24-Pergunnahs.
14. Letters expressing the Views of various Revenue Officers in Bengal.
15. Minute by Mr. Raikes, Judge of the Sudder Dewanny Adawlut at Calcutta.
16. Letter from Mr. Currie, Member of the Legislative Council.
17. Particulars relative to the Under-tenures in Bengal, and the effect upon them of Sales for Arrears of Revenue.

VI. *Generally as to the want of a better Title to Land, and of a Power to acquire Land in fee.*

I. *Bengal:*

1. Approval of the Principle of the Permanent Settlement or Zemindary System:

Origin of the permanent settlement of Bengal; its wisdom in a political point of view, *Theobald* 891. 901, 902. 1083–1086——Public merits of the permanent settlement as opposed to its serious defects, *ib.* 901, 902——Approval of the principle of the zemindary system and of the perpetual settlement, *Mullens* 7219. 7259-7267——Witness prefers the perpetual settlement, as keeping up the class of zemindars, to Mr. Bird's system in the North-western Provinces, *Saunders* 10097–10099.

2. Disapproval of the Permanent Settlement as being a Spoliation of the Cultivators:

The perpetual settlement did the greatest injustice; it effected a complete spoliation of the people by a transfer of the proprietary rights from the cultivators to the zemindars, *Mackenzie* 3686-3688——The great interference under the perpetual settlement with the the rights of village communities was a great mistake, *ib.* 3867.

3. Insecurity of Under-tenures, and Obstacle to European Settlement through the System of Sales of Land for Arrears of Revenue:

The grievance of the present settlement system in Bengal lies mainly in the fact that the rights of the zemindars may peremptorily be sold in default by the revenue collectors, and that the rights or vested interests of the putneedars, izaradars, and ryots may thereby be swept away, *Theobald* 886. 891–895. 905–921. 1073–1075——Injurious operation of the system as regards European enterprise and the security of property, *ib.* 891 *et seq.*——Exceptional class of cultivators whose interests are protected by the Permanent Settlement Act, *ib.* 903–905.

Different reasons which tend to make the land tenures in Bengal very insecure, and thus to deter settlement, *Freeman* 1462, 1463. 1476, 1477. 1505 *et seq.* 1788. 1806. 1810; *Wise* 2632–2636. 2657; *Waller* 4882. 4903–4905; *Mullens* 7142. 7169. 7177–7180. 7304, 7305. 7339——Way in which the revenue settlement and sale law in Bengal operates very injuriously and unjustly, more especially as regards the rights of the different lessees under the zemindars, *Freeman* 1483–1497——Forfeiture of the interest of the putneedars, or perpetual leaseholders, in the event of their own default, or the default, real or pretended, of the zemindars to pay up the revenue; instance of a stratagem on the part of the latter to the injury of the former, *ib.* 1484–1497——Injurious consequences to purchasers of estates owing to the preliminary formalities connected with the sale being frequently improperly carried out by the revenue authorities, *ib.* 1503–1508.

Further evidence as to the practice under the present law of sales for arrears of revenue whereby the zemindar by making sudden default may deprive the putneedar of his under-tenure, *Freemon* 1685–1691——Any surplus beyond the Government claims is paid over by Government to the proprietor, *ib.* 1686——Insecurity of the putneedars under the practice as regards sales further adverted to; the regulation for the protection of the putneedars applies only in theory, *ib.* 1687–1691. 1789–1799——Further complaint in regard to the cancelling of purchases of estates through certain formalities not having been observed by the revenue collectors; instances in witness's experience, *ib.* 1691–1703——Although it is provided that objections to purchases at auction sales should be made within a month of the sale, it frequently happens that purchases are cancelled after two or three years' possession, *ib.* 1697–1699——Those who make the laws are unacquainted with their practical working, *ib.* 1700——The theory of the law of sale may be good in many instances, but it is badly construed and frequently misapplied by the Mofussil authorities, *ib.* 1700–1703.

Further reference to the disadvantages under which purchasers labour; they know scarcely anything of the boundaries of the estates, *Freeman* 1800–1805——Frequency in some

Reports, 1857-8—*continued.*

Land Revenue Settlement, &c.—continued.

I. *Bengal*—continued.

3. Insecurity of Under-tenures, &c.—*continued.*

some parts of Bengal of sales of land for arrears of revenue, many of the defaults being for fraudulent purposes, *Freeman* 1824, 1825——Objectionable system in the administration of the sale law previously to the modifications in 1841 and 1845; fewer reversals of sales of late years, *ib.* 1873, 1874——Further evidence as to the defect of the present sale law in its abandonment, in practice, of the interests of the putneedars, and as to the actual extent of the injury thereby, *ib.* 1874-1884——Circumstances under which, notwithstanding the risk of loss under the sale law, fines are paid for under-tenures, instead of small annual rents, *ib.* 1875-1882.

Want of protection in the case of under-tenures, more especially of putnees and izaras, *MacNair* 1992. 2028-2033; *Dalrymple* 3239-3244——Probability of putneedars paying higher terms if they were not subject to risk, as at present, *MacNair* 1996-1999——Feeling of necessity under which putnees are purchased, notwithstanding the risk of loss by sale, *ib.* 2334-2340——Circumstances under which a certain sale was reversed after seventeen years' purchase, *Wall* 2634. 2886-2895. 3121-3126——Particulars as to witness having been unjustly dispossessed of an estate which he had legally purchased; it was re-purchased and held by Government. *ib.* 2654. 2917. 2940-2943——Explanation as to witness not having taken any steps as regards an appeal or a re-purchase in the matter of the property which he had bought, and which was re-purchased by Government, *ib.* 3138, 3139.

Misapprehension as regards English law in India in applying it to the regulation of sales of land, *Baillie* 4675-4680——Disadvantage to settlers, as putneedars, in their liability to be dispossessed of their tenures, *ib.* 4743-4745——Difference between a talook and putnee, *Waller* 4883, 4884——Improvement of late years through the more stringent operation of the sale laws, *Bidwell* 9304, 9305——The non-protection of under-tenures in the event of the zemindars making default is a decided obstacle to the investment of British capital and should be remedied, *Marsham* 9760-9762.

4. Measures required for the Protection of Under-Tenures:

Improvement in the tenure of land by some security to the perpetual leaseholder in the event of the sale of the zemindary, *Freeman* 1654-1655——System of compulsory registration of putnees, and of inquiry by the collectors, suggested as a means of protection to the under-tenures without prejudice to the security of the revenue, *ib.* 1704-1706. 1805——Suggested compulsory registration of putnees, and other leases, as affording a means of protection against fraudulent sales by zemindars, *MacNair* 1992-1995——Necessity of greater precautions as regards definition of boundary, &c., before sales of land for arrears of revenue, *ib.* 2506-2509——Outline of measures necessary in order to facilitate the investment of capital in zemindaries and under-tenures, without impairing the security of the revenue, *Wise* 2635, 2636; *Dalrymple* 2394-3309. 3462-3464. 3553-3557.

There would be the greatest difficulty, if not impossibility, in altering the sale law for the better protection of the under-tenures, without at the same time prejudicing the Government revenue, *Mackenzie* 3659, 3660——Disapproval of new legislation on the subject of land sales, *ib.* 3663-3666. 3774-3776——In cases of land sales, all claims of interest in under-tenures should be made before instead of after the sale, and there should be no subsequent appeal against the purchaser, *ib.* 3839-3844——Grounds for concluding that it would be highly inexpedient to sustain a putnee against a purchaser of an estate sold for arrears of revenue, *Baillie* 4550-4552——Protection already, under the Act of 1845, of leasehold tenures for terms not exceeding twenty years, *ib.* 4551-4632.

Concurrence in the evidence as to the expediency of protecting the putnee tenures in cases of sale, *Marsham* 9584. 9588——It would be well if there were a partition of Government revenue on each portion of an estate, *ib.* 9779.

5. Mode of dealing with Land which reverts to Government:

Practice as regards leases and management in the case of property which has reverted to Government in respect of arrears of revenue, *Wise* 2660-2669. 2944-2951.

6. Variety of Proprietary Rights in the Soil:

There is a great variety of proprietary rights in the soil in Bengal; enumeration of these, *Mackenzie* 3867-3871.

7. Amount of the Government Assessment:

The rent levied on the land in Bengal is moderate, *MacNair* 2518——On the resumed lands, but not on the zemindaries, the Government rent is in many instances high, *Dalrymple* 3421-3430——The Government revenue in Lower Bengal is about one-sixteenth or one-twentieth of the value of the produce, *Mackenzie* 3658——Opportunity for increasing the revenue by expanding the area of cultivation, but not by an increase of assessment, *ib.* 3708-3710. 3713——The rent is exceedingly small in Bengal, and cannot operate to deter settlement, *ib.* 3891-3893——Grounds for the statement that the Government tax on the land in Bengal is very high, *Mullens* 7177, 7181-7186. 7312, 7313.

Reports, 1857-8—*continued.*

Land Revenue Settlement, &c.—continued.

I. *Bengal*—continued.

8. Absence of Legislative Restrictions upon the Purchase of Land:

Facilities at present for purchasing land in Bengal, *Tremenheere* 171-175——Effect of the Acts of 1853 and 1857 in regard to the previous restrictions upon the tenure of land, *Theobald* 1192, 1193——There is no difficulty in purchasing land in the Mofussil, save that the part of any zemindary purchased is liable for the revenue of the whole, *ib.* 1264-1270——Tenure of land in Midnapore and Rajshaie; there is no obstacle to purchase by Europeans, *Auld* 1431-1439.

II. *Bombay:*

1. Character of the Settlement under Mr. Elphinstone's Administration:

Reference to Mr. Elphinstone's proclamation in 1818, declaring the principles in which the presidency should be settled, and promising that private rights should be treated with generosity, *Warden* 6057, 6058. 6062——Excellent progress of the settlement of the country under Mr. Elphinstone's administration, *ib.* 6059, 6060.

2. Originators of the present Settlement:

The present revenue settlement was first tried on the recommendations of Mr. Frere, Mr. Goldsmid, and Mr. William Ramsay, *Wingate* 7626.

3. Progress of the New Settlement:

The present system was commenced in 1835, and finally settled in 1847, *Wingate* 7618——The settlement is not completed throughout Bombay; the surveys are still going on in Guzerat and Khandeish, *ib.* 8089. 8091-8093——Although the present assessment was first tried in 1835, it was not carried out vigorously until within the last five years, *ib.* 8190, 8191——In the collectorate of Broach and other old assessed districts, the assessment has been reduced without a survey, *ib.* 8192, 8193.

4. Rules for the Administration of the New System:

Witness reads to the Committee the rules under which the revenue survey settlements of Bombay are now administered, *Wingate* 7891, 7892.

5. Liability to Re-assessment after Thirty years; Effect thereof:

The assessment is for thirty years, at the end of which period there may be a general re-assessment, *Wingate* 7606. 7608, 7609. 7621——Objection to a permanent assessment on financial grounds, *ib.* 7618, 7619——Grounds for the conclusion that the liability to a re-assessment at the end of thirty years does not and ought not in any way to deter European settlement, *ib.* 7621-7624. 7641, 7642. 7883-7886——Save by an increased or reduced land tax the position of the landowner will not be affected at the end of the thirty years, *ib.* 7632. 8094-8096——The tax may be viewed as the interest of a mortgage, or as a rentcharge, *ib.* 7641. 7647.

Advantageous position in which the ryot is placed by his occupancy being permanent for thirty years without liability to an increased assessment, whilst he has it in his power to cultivate as much or as little as he pleases, *Wingate* 7876-7882——There is nothing to prevent the assessment being lowered if circumstances should arise to show it had been erroneously fixed, *ib.* 7877.

Witness conceives that there will be quite as great a commerce in land under the thirty years' assessment as under a perpetual assessment, or under a right to acquire the fee simple; examination hereon with reference to some offers which have been made for the purchase of lands, provided the assessment on such lands were not permanent, *Wingate* 7979-8029——There is nothing in the present tenure to prevent the land from being fairly saleable, or to prevent a rise in its value, *ib.* 7979. 7983. 8005——The assessment is in fact only a portion of the rent, *ib.* 7981. 8084——The liability to increase of assessment may probably detract to some slight extent from the saleable value, *ib.* 7983.

Reasons other than the thirty years' assessment to which may be attributed the absence of investment in land by Bombay capitalists, *Wingate* 7984 *et seq.*——Further evidence to the effect that the liability to increased assessment at the end of thirty years, is not calculated to deter European investment or settlement, *ib.* 8109-8123.

Nature of the land assessment of the Broach district; the people are perfectly satisfied with it, and have full confidence in the matter in Government, *Landon* 8362-8373.

6. Separate Assessment upon each Field:

The revenue settlement is a field settlement, a separate assessment being fixed on each field as recognised by means of boundary marks, *Wingate* 7596——The system differs from the Bengal and Madras system very materially, in the fact that in Bombay the holder of each field is simply responsible for the assessment of each field, *ib.* 7597-7600.

7. Careful Practice in carrying out the System:

Practice under the survey, in regard to the ascertainment or the capabilities of the soil on which the assessment was fixed, *Wingate* 7873-7875——Careful manner in which the assessment has been carried out; re-assessment has not been necessary in any district, *ib.* 8104-8108.

8. Amount

Reports, 1857-8—*continued.*

Land Revenue Settlement, &c.—continued.

II. *Bombay*—continued.

8. Amount of the Assessment:

Except the enam lands, the lands in Bombay have not generally a saleable value, on account of being too heavily assessed, *Warden* 6157-6164——Considerable reduction of the rent of the Government land in the Presidency, *ib* 7487-7490.

Greatly reduced assessment as compared with the ryotwarree system, *Wingate* 7602. 7604——Evidence showing that the land assessment at Dharwar, and throughout Bombay, is anything but burdensome, *ib.* 7695-7697——Reference to the views of Mr. Green, formerly professor of literature in Poonah College, as to the liberal policy of the Bombay Government in matters of land revenue, *ib.* 7697, 7698——Under the present revenue settlement, the ryots may be said to be untaxed, *ib.* 8074-8079——Improbability of the agreement ever being reduced below the present limits, *ib.* 8186——Any further reduction of the assessment would be a loss of revenue as, all the valuable land is now cultivated and assessed, *ib.* 8117-8189.

9. Improvement upon the Ryotwarree System:

Important respects in which the present settlement differs from, and is an improvement upon the old ryotwarree system, upon which it is founded, *Wingate* 7601-7605——Heavy and uncertain amount of the tax under the ryotwarree system, which prevented the people from prospering, *ib.* 7629-7631.

10. Effect as regards existing Rights:

Object of the settlement to recognise all existing rights, and to confer them where they do not already exist, *Wingate* 7604-7608——The position of the landowner can only be affected by an increased or reduced land tax at the end of thirty years, *ib.* 7632. 8094-8096——The expiry of the term of thirty years for which the assessment is fixed does not affect the title of the occupant, *ib.* 7876-7882. 8094-8096.

11. Advantage of the Facilities for the Sale or Letting of separate Fields:

Important advantages of the regulation that the holder of land may sell or under-let as many fields as he pleases by giving certain notice; objection hereon to the late Mr. Mackay's proposition of a compulsory lease of the entire holding, *Wingate* 7610-7620——Belief that the present system is highly favourable to the investment of European capital in land and agricultural works, *ib.* 7610-7612. 7620. 7639, 7640——Great extension of cultivation in consequence of the re-assessment, *ib.* 7697——There have been several instances of sale of land, as well as of sub-letting, under the new assessment, but not many years' purchase have as yet been obtained, *ib.* 7966-7978. 8023, 8024.

12. Favourable Effect upon the Condition of the Ryots:

Exceedingly favourable effect of the present assessment upon the condition of the agricultural population; letter in 1849 from the present Commissioner of Scinde in corroboration of this statement, *Wingate* 7625, 7626——The security of tenure, directly under Government, and the reduction and certainty of the assessment are the causes of the improved state of the ryots, *ib.* 7627-7631——Favourable operation of the settlement in checking pauper holdings, *ib.* 7633-7637——Absence of greater tendency to subdivision of occupations under the Bombay revenue settlement than under that in the other Presidencies, *ib.* 7638——The increased cultivation has more than compensated for the reduced assessment, so that Government have lost nothing, whilst the people have gained enormously, *ib.* 7831-7833.

III. *Madras*

Way in which the land revenue system in Madras and part of Bombay, as comprising the employment of a most unprincipled police force, deters capitalists from investing in the land, *Theobald* 886-890——Reference to the revenue system as the probable cause of the migration from the Coromandel coast, *ib.* 888-890. 1080-1082——Obstacle to the investments of European capital in Madras, on account of the ryotwarree system, further adverted to, *ib.* 1076-1079—— Witness cannot suggest any remedy for the ryotwarree system, *ib.* 1197, 1198——Evils of the ryotwarree system further adverted to; the ryot fares worse at the hands of the police or agents of Government, than at the hands of the agents of the zemindars, *ib.* 1198-1204.

Discouragement to European settlement by the system of tenure on puttah, or of tenancy at will, in the Neilgherries and other districts, *Ouchterlony* 5413, 5414——Good faith with which those holding lands under the Government are treated, *ib.* 5442, 5443. 5467, 5468. 5481—— Discouragement to the cultivation of cotton, &c., in the south of India on account of the defective tenure of land, and the liability to undue taxation, *ib.* 5444-5449. 5468, 5469——Evil of the practice of issuing new papers in puttahs to the ryots in Madras every year, *ib.* 5478-5481.

Great importance, as an encouragement to settlement in Madras, of means to confer the land in fee simple; suggestion hereon, and examination upon the question of inter-

Reports, 1857-8—*continued.*

Land Revenue Settlement, &c.—continued.

III. *Madras*—continued.

ference thereby with the right of the present cultivators, *Ouchterlony* 5500, 5501. 5563-5576; *Fowler* 5697. 5713. 5716. 5766, 5767. 5807-5820. 5868-5880. 5885.

IV. *North Western Provinces:*

Doubt as to the beneficial results of the thirty years' settlement in the North-western Provinces, *Theobald* 1086.

Grounds for objecting to the revenue settlement in the North-western Provinces; the result has mainly been to transfer the land from the talookdars to merchants or other capitalists, and to destroy the influence and interest of the former in the management of the country, *Saunders* 9834 *et seq.*——Plan of the arrangement of the revenue under the new settlement, *ib.* 9842——The settlement is not excessive, but full, *ib.* 9858-9860. 9995, 9996——Beneficial operation of the settlement in a commercial point of view owing to the investments of traders in the land, *ib.* 9862-9869——Way in which the new settlement has affected the European planters, *ib.* 9865-9873——Varieties of tenure open to the European in the North-western Provinces, *ib.* 9874.

Further explanation as to the new settlement; the talookdars received eighteen per cent. of the revenue as a sort of retiring pension, *Saunders* 9958-9964——Operation of the settlement further objected to, as regards more especially the talookdars and the smaller class of cultivators among the newly-recognised proprietors, *ib.* 9965-9968. 9994-9997——Apparent benefit of the new system in giving merchants or money-lenders, as capitalists, a vested interest in the soil, *ib*, 9969, 9970. 10033. 10035——Dissatisfaction among the natives in consequence of the new system, *ib.* 9970, 10010-10020. 10092——Violence arising out of the settlement during the rebellion; the new proprietors have been ousted or murdered, *ib.* 9971, 9972. 9998-10000. 10037-10039.

Further examination relative to Mr. Bird's revenue settlement, and further objection to it, on the ground of its having dispossessed those who were the old proprietors according to the native system, *Saunders* 9994 *et seq.* 10101——Circumstance of witness having expressed his objections to the system in an interview with Mr. Bird, *ib.* 10022. 10025——Statement by Mr. Bird, that his object was to clear the titles and to make the land more readily transferable and saleable, *ib.* 10022——The protection of the ryot rather than the improvement of the revenue was the object of the settlement, *ib.* 10023, 10024.

The new settlement had appeared to Government, up to the time of the outbreak, to have worked well, *Saunders* 10026. 10029, 10030. 10100, 10101——The revenue might have been collected still more readily under the old than the new system, *ib.* 10027, 10028——Opinion that it would be wise even now to take steps for restoring the proprietorships to men of influence in the country, *ib.* 10031——Experience of witness as a mortgagee in the case of land under the new settlement; great litigation and expense in the enforcement of his claims in the native courts, *ib.* 10040-10055——There is a very general absence of zemindars under Mr. Bird's system, *ib*, 10099.

V. *Sale Law Improvement Bill, and Under-tenures generally:*

1. Evidence relative to the Object of Mr. Grant's Bill, and its non-adoption:

Reference to the circumstance of Mr. J. P. Grant, a member of the Government, having brought in a Bill for the purpose of improving the revenue settlement law; explanation as to its not having passed into a law, *Theobald* 893. 896-898——Explanation as to the objections of the indigo planters to Mr. Grant's Bill, *ib.* 1205-1209. 1271. 1297, 1298——Value of the Bill of Mr. Grant in proposing to divide zemindaries, and to apportion the revenue among the different co-sharers, *ib.* 1269. 1271.

Reference to Mr. Grant's Bill for an amendment of the sale law, as comprising many suggestions made by witness before leaving India; the Bill is still under discussion, *Freeman* 1498-1503——Statement as to the non-adoption of the amended sale law proposed by Mr. Grant; it did not go far enough in protecting the under-tenures, *MacNair* 2510-2512——The numerous forms proposed under Mr. Grant's sale law led to the planters' objections to it, *Dalrymple* 3415-3419——Explanation as to the means proposed under Mr. Grant's sale law, with a view to the protection of under-tenures, which now are unprotected, *Hawkins* 4194-4202——It is a great pity Mr. Grant's sale law was not tried, *Bidwell* 9303.

2. Explanation by Mr. Grant in introducing the Bill:

Statement by Mr. Grant in the Legislative Council in moving the first reading of the Bill "to improve the Law relating to Sales of Land for Arrears of Revenue in the Bengal Presidency," *App.* (*Fourth Rep.*), *p.* 297-300——Explanation by Mr. Grant as to the proposition for dispensing with the sanction of the Board of Revenue before the sale of any estate, for arrears of revenue in the province of Cuttack, *ib.* 297——Statement by Mr. Grant, dated 22 December 1855, of the objects of the Bill, and of the reasons for certain of the provisions therein, *ib.* 309, 310.

3. Copy

V. *Sale Law Improvement Bill, and Under-tenures generally*—continued.

3. Copy of the Bill:

Copy of the Sale Law Improvement Bill (as read a first time on the 22d December 1855), *App.* (*Fourth Rep.*), *p.* 301–309.

4. Petition and Report by the Indigo Planters' Association:

Petition of members of the central committee of the Indigo Planters' Association, on behalf of themselves and the said association, relative to Mr. J. P. Grant's Bill, *App.* (*Fourth Rep.*), *p.* 245, 246. 343, 344,——Report of the secretary of the association on the proposed Bill, dated 10 June 1856, *ib.* 246–251. 344–349——Extracts from correspondence in the office of the Indigo Planters' Association, containing objections to sundry provisions of the Bill, *ib.* 349–351.

5. Petition of Protestant Missionaries:

Petition of Protestant Missionaries residing in or near Calcutta, in approval of Mr. Grant's Bill, *App.* (*Fourth Rep.*), *p.* 290–293. 419–423.

6. Correspondence representing the Views of the Government of Bengal:

Letter from the secretary to the Government of Bengal to the officiating secretary to the Government of India, dated 24 October 1855, relative to the proposition of Mr. Grant for altering the practice of sales in the province of Cuttack; approval in this letter of an abolition of the process of issuing districts for recovery of arrears, *App.* (*Fourth Rep.*), *p.* 310–313.

Note by Mr. Officiating Secretary Plowden, dated 28 February 1854, referring to the views of the Bengal Government, relative to the process in regard to sales of land in Cuttack, and in favour of the abolition of the dustuck system, *App.* (*Fourth Rep.*), *p.* 320, 321.

Extract from letter from the Government of Bengal to the Government of India, dated 15 September 1853, suggesting a certain provision in carrying out laws already proposed on the subject of sales, *App.* (*Fourth Rep.*), *p.* 322.

7. Correspondence on the part of the Board of Revenue, Lower Provinces; Views of the Members of the Board:

Letter from the officiating secretary to the Board of Revenue, Lower Provinces, to J. P. Grant, Esq., Secretary to the Government of Bengal Revenue Department, dated 9 December 1851, together with minutes by Mr. Ricketts, Mr. Gordon and Mr. Currie, relative to the revenue settlement in Cuttack, and the propriety of a different practice in regard to sales, &c., *App.* (*Fourth Rep.*) *p.* 314–320.

Extract of letter from the secretary to the Board of Revenue, Lower Provinces, to the Government of Bengal, dated 20 August 1852, containing the views of the Board as to the measures desirable for the protection of under-tenures in cases of sale; extract from draft Act proposed by the Board hereon, *App.* (*Fourth Rep.*), *p.* 322–325.

Minutes respectively by Mr. Ricketts, Mr. Dunbar, and Mr. Dampier, members of the Board of Revenue, containing their views relative to Mr. Grant's Bill, *App.* (*Fourth Rep.*), *p.* 361–366.

Further minutes by Mr. Dampier and Mr. Stainforth, dated respectively 31 October 1856 and 17 November 1856, *App.* (*Fourth Rep.*), *p.* 415–417.

Letter from the officiating secretary to the Board of Revenue, Lower Provinces, to the secretary to the Government of Bengal, dated 25 June 1856, containing the views of Mr. Stainforth and the other members of the Board, as to the measures necessary for recovering arrears in the district of Sylhet, *App.* (*Fourth Rep.*), *p.* 357.

8. Minute representing the Views of Mr. Halliday:

Minute by Mr. Halliday, dated 2 September 1856, in explanation of his sentiments upon the Sale Law Improvement Bill, and upon the legislation most desirable upon the subject of under-tenures, *App.* (*Fourth Rep.*), *p.* 332–340. 353–361.

9. Views of the Lieutenant-Governor and Sudder Board of Revenue, North Western Provinces:

Letter from the Secretary to the Government of the North Western Provinces to the clerk of the Council, dated 27 May 1856, relative to the Sale Law Improvement Bill, and conveying the objections of the Lieutenant-Governor to the extension of the Bill to the North West Provinces, *App.* (*Fourth Rep.*),*p.* 340, 341.

Notes by G. A. Reade, Esq., and C. C. Jackson, Esq., Members of the Sudder Board of Revenue, North Western Provinces, on the Sale Law Improvement Bill, *App.* (*Fourth Rep.*), *p.* 341–343.

Reports, 1857-8—*continued.*

V. *Sale Law Improvement Bill, and Under-tenures generally*—continued.

10. Proposition by Captain H. W. Craufurd, on the subject of Government Sales:

Letter from Captain H. W. Craufurd to the clerk of the council, dated Calcutta, 26 May 1856, with reference to a petition presented by him to the council, on the 10th May, on the subject of Government sales, and explaining in detail, his proposition on the subject, *App.* (*Fourth Rep.*), *p.* 328-332.

11. Petitions of Rajah Sutt Shurn Ghosaul:

Petition of Rajah Sutt Shurn Ghosaul, zemindar in Bengal, dated 19 September 1856, objecting to certain clauses in the Bill, *App.* (*Fourth Rep.*), *p.* 351, 352——Further petition by Rajah Sutt Shurn Ghosaul, dated 19 November 1856, *ib.* 414.

12. Petition of Zemindars in Tirhoot:

Petition of about 245 zemindars in the district of Tirhoot, dated 26 November 1855, praying that the shares of those parties only who neglect to pay the Government revenue shall be sold, *App.* (*Fourth Rep.*), *p.* 326.

13. Petition of Zemindars of Zillah 24-Pergunnahs:

Petition of certain zemindars, twenty-five in number, of Zillah 24-Pergunnahs, *App.* (*Fourth Rep.*), *p.* 417-419.

14. Letters expressing the Views of various Revenue Officers in Bengal:

Letter from G. F. Brown, Esq., Commissioner of Revenue for the Bhaugulpore division, dated 6 November 1855, approving of the principle of confining sales to the portions of land in arrear of revenue, *App.* (*Fourth Rep.*), *p.* 327.

Letter from Mr. H. Stainforth, late commissioner of Bhaugulpore, dated 4 June 1856, containing his views on the subject of Mr. Grant's Sale Law Improvement Bill, *App.* (*Fourth Rep.*), *p.* 367-370.

Letter on the same subject from Mr. G. F. Lautour, collector of Tirhoot, in explanation of his sentiments relative to the Bill; views expressed therein of Mr. Davies, deputy collector, *App.* (*Fourth Rep.*), *p.* 370-372.

Letter expressing the views of Mr. W. Tucker, officiating collector of Monghyr, *App.* (*Fourth Rep.*), *p.* 372.

Letter expressing the views of Mr. E. Russell, officiating collector of Bhaugulpore, *App.* (*Fourth Rep.*), *p.* 373, 374.

Letter expressing the views of Mr. J. H. Young, officiating commissioner of Burdwan, *App.* (*Fourth Rep.*), *p.* 374-377.

Letter expressing the views of Mr. H. M. Reid, officiating collector of Burdwan, *App.* (*Fourth Rep.*), *p.* 377-380.

Letter expressing the views of Mr. C. Steer, officiating commissioner of Chittagong, *App.* (*Fourth Rep.*), *p.* 380-382.

Letter expressing the views of Mr. J. S. Spankie, officiating collector of Chittagong, *App.* (*Fourth Rep.*), *p.* 383, 384.

Letter expressing the views of Mr. F. B. Simson, officiating deputy collector of Bullooah, *App.* (*Fourth Rep.*), *p.* 384-388.

Letter expressing the views of Mr. E. A. Samuells, commissioner of Cuttack, *App.* (*Fourth Rep.*), *p.* 388-393.

Letter expressing the views of Mr. H. V. Schalch, officiating collector of Balasore, *App.* (*Fourth Rep.*), *p.* 393-395.

Letter expressing the views of Mr. R. N. Shore, collector of Cuttack, *App.* (*Fourth Rep.*), *p.* 395, 396.

Letter expressing the views of Mr. A. Grote, officiating commissioner of Nuddea, *App.* (*Fourth Rep.*), *p.* 396-399.

Letter expressing the views of Mr. E. H. Lushington, officiating collector of Nuddea, *App.* (*Fourth Rep.*), *p.* 399, 400.

Letter expressing the views of Mr. F. A. Lushington, officiating collector of twenty-four pergunnahs (Nuddea), *App.* (*Fourth Rep.*), *p.* 400-404.

Letter expressing the views of Baboo Sibchunder Deb, deputy collector, Nuddea, *App.* (*Fourth Rep.*), *p.* 404, 405.

Letter expressing the views of Mr. R. F. Hodgson, collector of Behar, *App.* (*Fourth Rep.*), *p.* 405-409.

Letter expressing the views of Mr. F. A. E. Dalrymple, collector of Dinagepore, *App.* (*Fourth Rep.*), *p.* 410, 411.

Letter expressing the views of Mr. E. C. Craster, officiating deputy collector of Maldah, *App.* (*Fourth Rep.*), *p.* 411-414.

Letter expressing the views of Mr. J. H. Young, officiating commissioner, Burdwan division, *App.* (*Fourth Rep.*), *p.* 428.

Letter expressing the views of Mr. G. U. Yule, commissioner of revenue, Bhaugulpore division, *App.* (*Fourth Rep.*), *p.* 428.

Letter expressing the views of Mr. W. Taylor, commissioner of revenue, Patna division, *App.* (*Fourth Rep.*), *p.* 430.

Letter expressing the views of the commissioner of Nuddea, *App.* (*Fourth Rep.*), *p.* 430.

Letter expressing the views of Mr. C. Steer, commissioner of revenue, 16th division, *App.* (*Fourth Rep.*), *p.* 430-432.

15. Minute by Mr. Raikes, Judge of the Sudder Dewanny Adawlut at Calcutta:

Minute by Mr. H. T. Raikes, judge of the Sudder Dewanny Adawlut, at Calcutta, dated 13 March 1857, *App.* (*Fourth Rep.*), *p.* 432, 433.

16. Letter from Mr. Currie, Member of the Legislative Council:

Letter from Mr. E. Currie, member of the Legislative Council, to the junior secretary to the Government of Bengal, dated 3 September 1856, with reference to the Sale of Under-tenures Bill, in connexion with the Select Committee upon the Sale Law Improvement Bill, *App.* (*Fourth Rep.*), *p.* 433, 434.

17. Particulars relative to the Under-tenures in Bengal, and the Effect upon them of Sales for Arrears of Revenue:

Abstract of returns from Commissioners to circular, dated 17 September 1856, on the subject of the number and condition of under-tenures in Bengal, and the mode in which they are affected by the sale of the parent estate for arrears of revenue, *App.* (*Fourth Rep.*), *p.* 434-442——Particulars relative to the under-tenures in the districts of Balasore and Pooree, *ib.* 442——Letter from the commissioner of Rajshahye, dated 31 December 1856, on the subject of the tenures and under-tenures of the Zillah Maldah, *ib.* 443, 444.

VI. *Generally as to the want of a better Title to Land, and of a Power to acquire Land in Fee:*

Difficulty in procuring an indisputable legal title to land in India, *Hooker* 718-721—— Where the village system prevails, witness suggests that estates be sold out and out, with a view to the creation of a proprietary class, *Freeman* 1659-1663——Considerations relative to the rights of the occupiers or ryots in Bengal, in connexion with the question of transferring the land in fee, *Freeman* 1662, 1663. 1671. 1707-1713; *MacNair* 2498-2501. 2504, 2505. 3034-3038; *Wise* 2929, 2930. 3155-3157; *Dalrymple* 3347-3351.

Evidence in favour of the zemindars being permitted to purchase the fee-simple of the government revenue; opportunity thereby to the cultivator or settler to secure land in perpetuity, *Mackenzie* 3667-3682. 4012-4021. 4043——Explanation that on account of the occupancy of the ryots, the fee-simple of the land cannot be obtained by a capitalist by a redemption of the land tax, *Baillie* 4558——Grounds for concluding that the redemption of the land tax would be a great evil to the interest of agriculture in India, *Wingate* 7643——A system of registration, and a proper survey of the country, are essential under a permission to hold the land in fee-simple, *Waller* 4909, 4910.

Requirement of a better tenure of land, that is, of a tenure in fee, as an encouragement to settlement, *Ouchterlony* 5413. 5422. 5563, 5564. 5576 —— Encouragement to settlement in the Neilgherries, and throughout India, if there were a power of acquiring the land in fee, *Ouchterlony* 5413. 5422. 5500, 5501. 5563-5576; *Fowler* 5697. 5713. 5716. 5766, 5767. 5868-5880. 5885——Means by which the land might be conveyed in fee-simple to capitalists; the ryots must be consulted in the matter, *Ouchterlony* 5565-5569—— Practicability of obtaining large tracts of uncultivated land in fee, without interference with any existing rights, *Fowler* 5807-5820.

The main obstacle to settlement in Bombay is the difficulty of procuring land with a proper title, *Warden* 6174. 6176, 6177—— Reduced revenue if Government were to give up uncultivated lands to settlers, without any assessment, *Onslow* 6900, 6901—— Encouragement to settlement if Government would sell the fee-simple in the case of uncultivated lands, *Marsham* 9786, 9787.

Reports, 1857-8—*continued.*

Landon, James. (Analysis of his Evidence.)—Has resided as a cotton merchant for 11 years in Bombay and Guzerat; has a cotton factory and other interests in Guzerat, 8274–8282——Mercantile men are the only class of settlers that can find profitable employment in Western India, 8283, 8284——Settlers can best operate by purchasing produce and improving its preparation, 8284, 8285. 8465, 8466——Roads and railways are essential in order to attract settlers to the interior, and to facilitate the transport of produce, 8286.

Limit to the extent to which irrigation may profitably be employed in Guzerat, 8288–8290——Evidence as to the character of the roads in Guzerat, more especially in the Broach and Surat districts; considerable improvements within the last seven or eight years, 8291-8308——The roads in Guzerat are now sufficient for local purposes, but are insufficient for external trade, 8291. 8309, 8310——Practice as regards the appropriation of government money in repairing the roads, 8296-8300.

Number and character of the principal ports of Guzerat; their improvement would not have any great effect upon the interests of European settlers, 8311-8316——The productions of Guzerat, which are principally cotton and grain, have not much increased in witness's memory, 8317-8324——In the Broach and Kattwar districts a full proportion of the soil is under cotton cultivation, 8325, 8326.

Effect of the market price of cotton upon the quantity grown in India, 8326-8329——Inferior quality of the Indian to the American cotton, 8330, 8331——Increased value of the Guzerat cotton through the increased care of the natives in packing and cleaning, 8332-8336—— Considerable advantage derived by witness from the use of the American saw-gin in cleaning the native cotton, 8337-8341——Circumstance of the native producers not using the saw-gin save by occasionally sending their cotton to witness's establishment, and hiring the use of his machinery, 8342-8348.

Beneficial effect upon the natives by the employment of European capital and the settlement of Europeans amongst them, as illustrated in witness's case, 8349-8359 —— Quiet, contented and prosperous state of the people in the Broach district, 8360-8362—— Nature of the land assessment of the Broach district; the people are perfectly satisfied with it, and have full confidence in the government, 8362-8373.

Concurrence in the opinion that colonization, in the usual sense of the word, is not to be contemplated in India, 8374. 8465——The commerce of the country would doubtless be increased by the settlement of Europeans in the interior, 8376——Good health enjoyed by witness at Broach; in Guzerat, generally, Europeans might by proper precautions live for many years in fair health, 8377-8382. 8680.

As regards the administration of justice in the Mofussil, witness believes that the native courts are scandalously corrupt, and are calculated to shield rogues and thieves rather than to secure justice, 8383 *et seq.*——Instance of injustice on the part of a sudder ameen in Guzerat, whose conduct in the matter was not inquired into, 8387-8395. 8398——Instance of extreme dilatoriness and of injustice before the final settlement of a suit instituted by witness against a native for breach of contract, 8400, 8401. 8405-8414.

Great improvement if there were a summary process by which judgment and execution could be speedily obtained, 8402-8406——Considerable advantage to Europeans and natives if all the Mofussil courts were presided over by Europeans, 8415 *et seq.*—— Trustworthy interpreters might be obtained under European judges, but the latter would not, generally, require interpreters, 8416-8421.

In criminal, as well as in civil cases, the native courts are most corrupt, and the entire system is such that gross injustice is committed and grievous crimes are unpunished, 8422-8434——A more summary system is required in criminal as well as in civil cases, 8428——Bribery is equally rife among the officials of the criminal and of the civil courts, 8431-8434——Exoneration of the European judges from the charge of bribery, 8435, 8436——Attempts have been made to bribe European judges, 8436——Attempt on one occasion to bribe witness as a witness in a case of adoption, 8437.

Constant practice of the natives of India to resort to bribery, falsehood and perjury; these practices are considered meritorious rather than otherwise, and form a general rule from which there are but few exceptions, 8438–8446——Invaluable advice given to witness on going to India, viz., never to trust a native out of his sight, 8446. 8456——The native judges are entirely unfit for the impartial administration of justice, 8447, 8448——Preference of the natives for European judges, 8449-8452.

Expediency of confining the employment of natives to subordinate positions in the several departments, and of placing a European at the head of every department, 8453–8458—— Approval of native subordinate officials; they are efficient when overlooked, 8453, 8454. 8697. 8701——Good conduct of the European portion of the uncovenanted service, 8459——The native uncovenanted servants are in every department morally unfit for their position, notwithstanding their education, 8460-8463——In Guzerat the Government are, undoubtedly, well disposed towards European settlement, 8464. 8476, 8477.

Value of labour in India in proportion to its price; witness believes that on the whole the former bears as great a proportion to the latter as it does in this country, 8467——

Good

Reports, 1857–8—*continued.*

Landon, James. (Analysis of his Evidence)—*continued.*

Good character of the police in Guzerat; great importance of the European superintendence over them, 8468–8481——Advantages of the present local administration of the affairs of India over a system of direct administration by the Crown on the colonial principle, 8482–8487——Improvement of the present system of administration if the several Presidencies were more independent of the Supreme Government, 8487–8491.

Except in purchasing the produce of the soil there is no field for European settlement in Guzerat, 8492——There are no Europeans in Guzerat engaged in the same way as witness, 8493——There is one native establishment, on the same principle as witness's, for purchasing and cleaning native cotton, 8493–8496——Witness's establishment, when in full work, can turn out about 25,000 lbs. of clean cotton daily, 8497——Practice in regard to the packing and screwing of the cotton cleaned by witness, 8498–8500.

Distinguishing mark put by witness on all cotton sent by him to market, 8501, 8502——Export by witness of large quantities of native-cleaned cotton, 8502–8504——Advanced price obtained for the cotton cleaned by witness as compared with that cleaned by the native process, 8505——Varying yield per acre of cotton in Guzerat, 8506–8517——Large crops and superior quality of the cotton grown upon those moist soils where the land is allowed to lie fallow; a rotation of crops is not however largely practised, 8514–8526.

Remunerative price of cotton at the present time, 8527–8530——In the Broach district an increased quantity cannot advantageously be grown, 8531, 8532. 8691, 8692——Very inferior quality of the Khandeish cotton as compared with that of Broach or Surat, 8533–8538——Varying quality of the Guzerat cotton in different seasons, 8537, 8538——Value respectively of the best Broach cotton and of the American upland cotton, 8539.

Failure of the application of irrigation in growing cotton in Guzerat, 8540–8544——Further reference to the native establishment similar to witness's; fraudulent character of the native at the head of it, 8546–8557——Tendency of the natives to tamper with the cotton, 8556–8563.

Further approval of the present system of Government as administered by the East India Company, 8564, 8565——Improved administration if the system of the non-regulation provinces were adopted generally, 8566——Efficiency of the Guzerat police further adverted to in connexion with the employment of European superintendents, 8568–8575——Evidence in further disapproval of the employment of natives in offices of trust or as heads of any departments whatsoever, 8576-8591. 8652, 8653. 8666–8673. 8696-8701.

Great impediments to successful European settlement by reason of the false and dishonest character of the natives; illustration of this in witness's case, 8592-8605. 8678, 8679. 8706–8709——Witness might readily acquire land in Guzerat, but has not considered it advantageous to do so, 8606–8611——Examination with reference to former statement that the colonial system of Government is not applicable to India; further argument to a similar purport, 8612 *et seq.* 8738–8758.

Consideration of the circumstance of Ceylon being in a prosperous state under what may be termed the colonial form of Government; grounds for concluding, nevertheless, that the same system of Government is not applicable in the case of India, 8614–8639. 8651. 8741-8758——Witness on first going to India held an appointment for a time under the Company, 8648–8650

As regards the condition of the native states any prosperity or wealth is limited to the governing and upper classes whose aggrandisement is the effect of the oppression and spoliation of the great mass of the people, 8654-8665. 8730——Further statement that native dishonesty is by no means confined to the lower classes, 8655–8658——Witness has a cotton spinning establishment in Broach as well as a cotton ginning establishment, but the former is still an experiment, 8674, 8675.

Want of materials for road-making in Guzerat, 8681——State of repair of the road from Broach to Baroda, 8682——Expense incurred by Government in encouraging and improving cotton cultivation in the Broach district, 8683-8690——The condition of the people in Broach, &c. is one of comparative prosperity, 8695——An abrogation of the regulations, and the employment exclusively of European judges are the best remedy for the evil operation of the courts, 8696. 8702——The use of the English language and of English barristers as judges, with English modes of procedure would be the very worst thing that could be introduced into the Broach district, 8703-8705.

Witness has been successful in overcoming the numerons obstacles to profitable settlement, and success is equally possible in all men of energy and perseverance, 8706–8709. 8719, 8720——In several districts of India, the cultivation of cotton cannot be further increased, but in many districts, railway communication will lead to a considerable development of cotton and other produce, 8710-8718——The ryots are fully alive to the cultivation of that crop which yields most profit, 8713-8715.

Considering the character of the people the wonder is, not that Government has done so little, but that it has done so much, 8721, 8722——Natives cannot be fitted for the higher offices until after the lapse of a very considerable time, 8723——If India is to be

Reports, 1857-8—*continued.*

Landon, James. (Analysis of his Evidence)—*continued.*

held by the English, the natives must be excluded from any influential share of the Government, 8724.

Inexpediency of the practice of occasionally placing the civil servants in responsible position, before they have acquired due experience, 8725, 8726——Expediency of continuing the employment of any civilian in the same branch of the service as that which he first enters. 8727——Exceptions to the general dishonesty of the natives in the faithfulness of their monetary or exchange operations, 8727——Proficiency, in the native languages, of the great majority of the civil servants in Guzerat, 8728, 8729——Difficulty as regards the claims of the ryots which render the Bengal system of indigo planting inapplicable to Western India, 8733-8737.

Language of the Courts. See *Administration of Justice*, V.

Law Commission. Names of the Indian Law Commissioners; several of them had served in India, *Hawkins* 4060. 4062——It is a very unfortunate thing that more countenance has not been given to the Law Commissioners who have prepared two very superior codes for India, *ib.* 4175-4181——The duty of the Commissioners was, by their instructions confined to the preparation of a code of procedure and rules for the amalgamation of the courts, *ib.* 4369-4371.

See also *Administration of Justice* (*Mofussil*) XI. 8. *Criminal Jurisdiction* (*Mofussil Courts*). *Lex Loci.* *Penal Code.*

Law Reform. See *Administration of Justice* (*Mofussil*). *Contract Law.* *Criminal Jurisdiction* (*Mofussil Courts*). *Land Revenue Settlement, and Tenure and Sale of Land.* *Law Commission.* *Lex Loci.* *Penal Code.*

Lawrence Asylums. Considerable success of the two asylums founded by Sir H. Lawrence for the children of soldiers, *J. R. Martin* 219——Approval of the operation of the Lawrence asylums as a means of providing Europeans for factories, &c., *Dalrymple* 3535-3539——Explanation as to the failure of an attempt by Sir Henry Lawrence to establish a school in the Neilgherries, *Ouchterlony* 5299-5302. 5458-5460.

Leasehold Property. See *Land Revenue Settlement, and Tenure and Sale of Land.*

Legislative Council. Feeling of the commercial body in Bengal that they should be represented in the Legislative Council, *Theobald* 898-900——Inadequacy of the representation in the Council of interests which ought to be represented, *ib.* 1180-1186. 1292, 1293. 9397, 9398——Expediency of a representation in the Council of the mercantile and agricultural interests, *Theobald* 1013. 1015. 1016; *Freeman* 1567-1573; *MacNair* 1989, 1990. 2446-2451. 2582; *Dalrymple* 3570——Non-objection to natives being qualified for admission to the Council, *Theobald* 1017; *MacNair* 1991; *Mills* 8991. 9063. 9071——The Council is comprised entirely of official persons, *Theobald* 1185. 1292.

Incompetent practical knowledge of the existing Council, *Freeman* 1567, 1572——Grounds for the statement that those who enact the laws are not practically acquainted with their working, *ib.* 1908-1920——Respects in which witness considers the judges of the Supreme Courts who are members of the Legislative Council, to be government servants, *MacNair* 2242-2248——Less partial views of the judges of the Supreme Courts than of the other members of the Legislative Council in regard to the Black Acts, *ib.* 2249-2251——The Council should comprise men who have more at stake in the country than their salaries, *Wise* 2635——Improvement if some British merchants were unpaid members of the Council, *Mackenzie* 4003-4005.

Radically defective constitution of the Legislative Council, *Waller* 4840. 4843-4845. 5092-5097. 5221——Evidence in favour of a separate Legislative Council for each Presidency, and of its comprising non-official Europeans and natives, *ib.* 4843-4851. 4933-4939. 4955-4958. 5048-5051——The introduction of natives would, politically, be a very wise measure, *ib.* 4938——There are many natives fully qualified for the Legislative Council who are well-affected to English rule, *ib.* 4939. 4955-4958.

Great obstacle to settlement through the want of a proper tribunal or Legislative Council fairly open to the complaints of the settlers, *Mullens* 7142. 7169——Evil in the exclusively official constitution of the Council, *ib.* 7172.

Witness does not object to opening the Council to non-official members, *Mills* 8982-8984. 8990. 8995——Present constitution of the Council; there are eleven members, all official men, *ib.* 8985-8989——Difficulty in the way of introducing commercial men and natives into the Legislative Council; independent action of the Council as at present constituted, *Marsham* 9563-9572——Impression that the country is not exactly prepared for a separate Legislative Council for each Presidency, to comprise merchants, &c., *ib.* 9566.

Legislative Restrictions (*European Settlement*). Permission given to British subjects under the Acts of 1833 and 1837, to purchase and cultivate land in India, *Tremenheere* 11-13——Obstacle to European settlement previously to 1833, on account of the license system,

Reports, 1857-8—*continued.*

Legislative Restrictions (*European Settlement*)—continued.

system, *Theobald* 870. 1087, 1088——Belief that all legislative restrictions upon settlement have been removed by Act IV. of 1837; doubt held by some on this point, *ib.* 871——Lessees as well as proprietors have extended rights under the Act of 1837, *ib.* 932——There are no legal obstacles to settlement in India any more than in any other dependency of the Crown, *ib.* 1307——Since Act IV. of 1837, Europeans may settle in every part of the country without a license, *ib.* 1308.

Explanation that the Act IV. of 1837 does not appear to have removed the restriction in the statute of 1834, as to the necessity of license before settlement in provinces acquired during the present century, *Theobald* 2986, 2987.

Impression that by the regulation of 1834 the requirement of a license before settlement was entirely removed, *Baillie* 4786-4791——Largely increased investments by Europeans in land since the removal of certain restrictions in 1833, *Mullens* 7144. 7176.

Lex Loci. Grounds for the statement that there is a pressing want of a *lex loci* for Europeans and East Indians, *Theobald* 886. 956, 957——Weight of authority in favour of such law, *ib.* 956, 957. 1007——Further evidence relative to the question of a *lex loci*; propriety of acceding to the wishes of the East Indians in the matter, *ib.* 1006-1011——Feeling of Mr. Cameron in favour of a *lex loci*, *ib.* 1007——The want of a *lex loci* is established by the Indian Law Commissioners, *ib.* 1213——The introduction of the English law as a *lex loci* need not injuriously affect the natives as regards their employment in judicial offices, *ib.* 1230, 1231.

Licence to Settle. See *Legislative Restrictions.*

Limestone. Different places in Bengal where limestone may be procured, *Theobald* 878, 879.

Linseed. Witness was the first person who brought linseed from the interior to Calcutta, *Freeman* 1562——In 1856, Bengal exported upwards of 60,000 tons, *ib.*

M.

Mackenzie, James Thompson. (Analysis of his Evidence.)—Was for eleven years in Lower Bengal, where he was largely interested in indigo factories and zemindaries; returned to England six years ago, but still keeps up his connexion with India, 3581-3586——Outline of the main defects of the Criminal Courts throughout Bengal, 3587——Expensiveness of suits in the criminal courts, 3587. 3591——Useless forms required, 3587——Multiplication of appeals from the courts, *ib.*——Corrupt character of the native officials; corruption, in fact, is looked upon as a perquisite of authority, and is not viewed as a disgrace, 3587. 3593-3595. 3508.

Unreliable nature of the native evidence in the criminal courts; it is, as a rule, hired and false, 3587. 3592——Youth and inexperience of many of the European magistrates, and consequent evil, 3587. 3602, 3603——Utterly inefficient and grievously oppressive character of the police; there would be less crime without them altogether, 3587. 3604-3606——Justice is not expected in the criminal courts, and is not obtained; in fact, of those convicted of minor offences from one-third to one-half are innocent, whilst in heinous cases it is difficult to get a conviction, 3588-3590. 3596-3601.

Practice of the people to hoard their money by burying it, in consequence of their dread of oppression and extortion, 3607-3613. 3676, 3677——Increased consumption of British goods if by reason of a feeling of security, hoarding were not practised, 3613. 3969-3972——The system of police in Scinde and the Punjaub should be introduced into Bengal, together with superintendence through means of European serjeants of regiments, 3614. 3838——The expense and delay are much greater in the civil courts than the criminal courts; numerous sources of such delay and expense, 3615-3623.

The great majority of the small actions in the civil courts are false or extortionate; they are mainly actions by the money-lenders and zemindars against the ryots, 3624-3636. 3885-3888——Great evil to the cultivators through the usurious and oppressive rates required by money-lenders, 3626-3636——The natives are very unpunctual in their money engagements, 3627. 3641.

The better class of farmers are being impoverished, and live in less comfort than under the Hindoo and Mahomedan dynasties, 3630——Unduly large power of the zemindars, who constantly exercise them to the oppression of the ryots, 3638-3646——The principal reform required as regards the revenue laws is in their administration, 3643-3649.

The cultivators' farms in Bengal vary much in size, but average about twelve acres each, 3650——The farmers pay about 4 *s.* of rent and 2 *s.* of illegal exaction per English acre, 3651, 3652——Constant practice of the zemindars, their servants and the police to enforce illegal exactions from the ryots, 3653-3656——The gross produce per acre throughout Bengal is about 32 *s.*, money value, 3657——The Government revenue is about one-sixteenth or one-twentieth of the value of the produce, 3658.

Reports, 1857–8—*continued.*

Mackenzie, James Thompson. (Analysis of his Evidence)—continued.

There would be the greatest difficulty if not impossibility in altering the Sale Law for the better protection of the under-tenures, without, at the same time prejudicing the Government revenue, 3659, 3660——Suggested modification of the Sale Law as regards the duration of leases in the case of date plantations, 3661. 3662. 3966–3968——Disapproval of new legislation on the subject of land sales, 3663–3666. 3774–3776——New laws or constant changes in existing laws are altogether inexpedient; the main want being a summary and a proper administration of the law so as to give justice without litigation, 3663–3666. 3774. 3973. 3975, 3976.

Evidence in favour of the zemindars being permitted to purchase the fee simple of the Government revenue; opportunity thereby to the cultivator or settler to secure land in perpetuity, 3667–3682——Calculation that from twenty-five to thirty years' purchase would be given in redemption of the land revenue, 3670–3672——Means of the people of India for redeeming the land tax, 3673–3677. 3895.

The money acquired by a redemption of the land tax should go towards paying off the Government debt, and towards works of irrigation, 3681. 3962–3965——Gain to the Government and to the people by a redemption of the land tax, 3681——Great profit anticipated from an outlay on works of irrigation of portion of the money acquired by a redemption of the tax, 3681, 3682. 3751–3753.

The zemindars in Bengal are nearly all new men; their hereditary rights formerly were merely as tax-gatherers, 3683–3689——The perpetual settlement did the greatest injustice; it effected a complete spoliation of the people by a transfer of the proprietary rights from the cultivators to the zemindars, 3686–3688——The zemindaries very seldom change proprietorship, 3690——The laws since 1840, have induced considerable absenteeism on the part of the zemindars, 3691. 3939——The estates are better managed, and the cultivators are better off where there is European superintendence in management, 3692–3696.

When in India, witness imbibed the general prejudice that the civil service, as a body, were not efficient, but since his return to England, and his experience of English officials, he has quite changed his opinion, 3697, 3698. 3702. 3978–3982——The younger magistrates in India, those of two or three years' standing, are, through their inexperience of the native character, and its falseness, inefficient and partial in the administration of justice, but those of older standing are perfectly efficient in conducting the proceedings in the native languages, and in giving just decisions, 3699–3702. 3783. 3819, 3820.

Great fault of the system, whereby the most inexperienced, instead of the most experienced, men are appointed as magistrates, 3703–3705. 3881–3884. 3898–3900. ——The experience in the magistrate's courts is by no means of a nature useful to him on promotion to the offices of collector and of civil judge, 3703. 3744–3748. 3784–3794 ——In the perpetually settled districts a union of the offices of magistrate and collector would be better than the present system, 3705–3707. 3790. 3951–3955.

Opportunity for increasing the revenue by extending the area of cultivation, but not by an increase of assessment, 3708–3710. 3713——Much better roads throughout the country during the Hindoo and Mahomedan dynasties than at present, 3711, 3712—— Necessity of an efficient magistracy and of police, and of a short and simple system in the courts as means towards increasing the revenue, 3713–3715——A summary system in the courts, such as the Punjaub, or non-regulation system, unfettered by forms or rules, would be far preferable to the tardiness, costliness, and injustice of the present system, 3714, 3715. 3795–3801——Appeals, as at present, should be almost entirely disallowed, 3715. 3795–3801. 3812–3817.

General belief amongst the cultivators in Lower Bengal that the East India Company are lessees under the Government, 3716–3719——Decided approval of the transfer of Government from the Company to the Queen, 3720–3722. 3977——There are very few native Christians in India, 3723. 3779–3782——The people do not object to the operations of the missionaries so long as they are unconnected with Government, 3724—— Importance of neutrality on the part of Government and its officials towards missionary action, 3724–3726.

Particulars relative to the cultivation of date-sugar in Bengal; cost, quantity produced, and means of extending the production, 3727–3737. 3756–3763——Great increase of Greek traders in India; explanation of this, 3738–3740. 3764–3766——Right of continued occupancy of the soil in India if previously held for ten years, 3741, 3742. 3871——Approval of the present system of defraying the cost of works of irrigation, that is, by a water rate, 3749, 3750. 3901–3904——Extent of Government outlay on irrigation; doubt as to any outlay by individuals, 3754, 3755.

More partial and prejudiced action of Mahomedans than of Hindoos as judges, 3767–3770——The natives, as a class, despise the mixed race, 3771——Europeans and East Indians should not be subject, in any way, to the native criminal courts, 3772, 3773. 3832——Impossibility of finding native Christians in sufficient numbers for a police force,

Reports, 1857–8—*continued.*

Mackenzie, James Thompson. (Analysis of his Evidence)—*continued.*

force, 3777-3782——Witness entirely dissents from the evidence of Messrs. Theobald, Freeman, MacNair, and Wise, that the civil servants are, as a rule, ignorant of the native language, 3783. 3912, 3913.

There are but few very intelligent and advanced-minded natives in India, 3802–3805——The zemindars, European as well as native, find it necessary to protect themselves, and occasionally to collect their rents by force, 3807. 3889, 3890——The native sudder ameens and moonsiffs are, as lawyers, competent, but are open to corruption, 3808——The salaries of the sudder ameens are sufficient to induce Europeans to take the office, 3809–3811.

Evidence opposed to the proposition for the introduction of the English language into the Mofussil courts; the natives would never have confidence in the administration of justice under such system, 3818–3831. 3845–3866. 3919–3921——Natives should be judges in civil cases only, with an appeal to a European judge, 3832–3835——The great defect in the civil courts is the great multiplication of suits and appeals after decrees are obtained, 3835, 3836——In cases of land sales all claims of interest in under-tenures should be made before instead of after the sale, and there should be no subsequent appeal against the purchase, 3839–3844.

The European judges in Lower Bengal administer justice entirely in the Bengalee language, 3845–3851——There is a great variety of proprietary rights in the soil in Bengal, 3867–3871——The great interference, under the perpetual settlement, with the rights of village communities was a great mistake, 3867——Non-opposition by Government to the employment of native Christians, 3872–3880——Evil in the great power exercised under the laws of 1840 and 1849 by the young and inexperienced magistrates, 3881. 3940–3943.

The Government rent on the land is exceedingly small in Bengal, and cannot operate in deterring settlement, 3891–3893——There is less comfort among the better class of farmers in Bengal than there used to be in former times, 3894——Civil cases are often brought successfully against Government, 3896, 3897——Government do not in any way oppose the operations of the missionaries, 3905, 3906——Decrease of European settlers in Kishnagur, Jessore, and other districts, chiefly through the failure, in 1848, of the Union Bank at Calcutta, 3907, 3908——Mismanagement of the Union Bank, adverted to, 3909-3911.

Good roads may be made in Bengal without any great expense, 3914——There is a toll and ferry fund established by Government, and managed by a local body, for the maintenance of the roads, 3915–3918——Absence of obstacles or hostility, on the part of Government or the civil service, towards European settlement, 3922. 3928. 3938——As a rule, settlers do not go to India to remain there, 3923——Witness was fortunate as a settler, 3924——Settlers' children are always sent to England; they degenerate, both physically and morally, by remaining in India, 3925–3927.

Improved practice in dealing with cases of dacoitee and thuggee, 3929, 3930——Steps taken by Government in developing the resources of the country, 3931–3936——A number of practical reforms are required in the administration of justice, which witness considers to have been worse in 1850 than when he went to India in 1838; 3937–3940——Inefficiency of the young magistrates of late years further adverted to; suggestions for their proper training and experience, 3944-3950.

Summary mode of administration of justice under which the ryots were better off in former times, although they then paid larger rents for the land, 3956–3961——Probable extent to which British manufactures may be consumed in India if the necessary reforms are carried out, 3969–3972——Every civility is shown by the higher officials in Calcutta to settlers preferring complaints or remonstrances, 3973, 3974——Witness is a director and proprietor in two Indian railways, 3983. 3984.

[Second Examination.]—Europeans may, by proper precautions, enjoy good health in Bengal, 3985–3989——Number of native Christians in India further adverted to; doubt as to there being 400,000 altogether, 3990–3993——The native Christians should be as eligible as other natives for public employment, 3994, 3995——There are very few East Indians in the lower parts of Bengal, 3996, 3997——Further reference to the large trade carried on by Greek houses in India, 3998–4000.

Approval of the issue in India of a Government convertible paper payable at terminable periods, 4001, 4002——Improvement if some British merchants were unpaid members of the Legislative Council, 4003–4005——Further reference to the great importance of such measures as will impress the natives with a sense of security, and will prevent hoarding, 4006–4011. 4032.

Further evidence as to the several advantages, respectively, as regards Government, the natives, and the settlers, to be derived from a commutation of the land tax, 4012–4021. 4043——Importance of a complete survey of the country, and of the registration of every tenure, 4022——Improvement in the condition of the people and in the Government revenue would be the combined result of an improved administration, 4023–4026.

Reports, 1857-8—*continued.*

Mackenzie, James Thompson. (Analysis of his Evidence)—*continued.*

Better state of the roads under former dynasties further adverted to; in Shah Jehan's time the country was covered with roads, 4027. 4049, 4050——Additional roads will be required as feeders to the railways, 4028——Until the police is improved there can be no security for property, 4029. 4032——Respects in which it is very desirable to restore the gold currency in India, 4030-4036——Former practice as to the gold circulation; its prohibition in 1853; 4037-4042——Grounds for concluding that zemindars would be willing to redeem the land tax at from twenty-five to thirty years' purchase, 4046-4048.

MacNair, George. (Analysis of his Evidence.)—Has resided as an indigo planter for about twenty years in different parts of Lower Bengal; returned to England last year, 1964-1967. 1973——Fully concurs in the evidence of Mr. Freeman, relative to the inefficient state of the law, the police, and the magistracy, 1968-1972——Considers that European settlement in India is of the greatest importance, not only to the Europeans themselves, but to the natives also, 1974, 1975——Sir Charles Metcalfe strongly expressed the opinion that our hold of India would always be very precarious, unless a considerable European population were attached to our Government by common interests and sympathies, 1975——Lord William Bentinck also was very favourable to settlement, 1975-1978.

Respects in which the policy of the East India Company has always been opposed to the settlement of Englishmen in India, 1979 *et seq.*——There are numerous Government situations which had better be filled by Europeans than untrustworthy natives, 1979——Natural facilities for the settlement of European troops and their families in the hill districts, *ib.*——Considerable mineral resources of the country, *ib.*——Deterrent effect upon settlement, in consequence of the threatened enactment from time to time of measures subjecting Europeans to the jurisdiction of natives, 1981-1988——There are now fewer European settlers in the interior than there were twenty years ago, 1981.

Suggested representation of the mercantile and agricultural interests in the Legislative Council, 1989, 1990. 2446-2451——Witness would not exclude natives from the Legislative Council, 1991——Inability of the settlers to be heard orally before the Legislative Council; they can, however, be heard by petition or memorial, 1992. 2252-2255——Insufficient protection of property under the present sale laws and laws of land tenures, 1992——Suggested conpulsory registration of putnees, and other leases, as affording a means of protection against fraudulent sales by zemindars, 1992-1995——Probability of putneedars paying higher terms if they were not subject to risk, as at present, 1996-1999.

Prejudicial operation of the exclusive system of the civil service, 2000. 2058——Young and inexperienced civilians appointed to judicial offices, 2000. 2058——Very corrupt character of the native omlah, 2000. 2004, 2005. 2481——Advantage if judicial and other appointments were open equally to the uncovenanted and covenanted services, *ib.*——Explanation of the system of advances to native cultivators, 2000, 2001. 2096-2105——Importance of a proper law of contract, applicable to Europeans and natives, 2001. 2096-2107——The Europeans must not be under the same laws as the Hindoos and Mussulmans, 2002.

Want of engineering skill for the proper prosecution of public works, 2002——Very neglected and corrupt state of the native police; they are considered a curse to the population, *ib.*——Corrupt system of taking evidence in the Mofussil courts, *ib.*——The administration of justice in the Mofussil is altogether a lottery; the best chances of which are with the criminal, and yet nothing is being done to remedy this state of things, *ib.*

India should be governed more as an English colony, 2004. 2278-2286——People of skill and capital are required to develop the resources of the country, 2005-2007——Very neglected state of the Nuddea rivers and great impediment and abuse thereby, as regards the transit of commerce, 2008-2010. 2297, 2298——Great risk in the approach to Calcutta, through the Sunderbunds, 2010——Bad state of the roads in Bengal, so much so, that the planters find it necessary to make roads themselves, 2010-2014——Benefit anticipated when the Eastern Bengal Railway, from the Ganges to Calcutta, is completed, 2015.

The police should be improved by an extension of European superintendence, and the introduction of the English language, 2016——Principal products of Lower Bengal, 2017——Great importance of European superintendence in cultivation; it is largely resorted to by native proprietors, 2018, 2019. 2080——Mistrust of the zemindars in the native character, 2019-2080——Higher price, and better character of indigo when produced under Europeans, 2019——Illustration of the general dishonesty of the native character, *ib.*

Reasons why the European indigo planters generally become zemindars, 2020-2027——Further reference to the want of protection in the case of under-tenures, more especially of putnees and izaras, 2028-2033——Nature of the occupation rights of the ryots in Bengal 2034-2038——Practice in regard to the assessment by the zemindars of the different descriptions of crop 2037-2044——Statistics as to the indigo and silk cultivation

Reports, 1857-8—*continued.*

MacNair, George. (Analysis of his Evidence)—*continued.*

cultivation in Bengal, 2045——Beneficial effect upon the natives through the introduction of European skill and capital, 2046-2049.

Explanation as to the native zemindars being mostly absentee landlords, 2050, 2051——Alluvial soil required for indigo cultivation, 2052——Witness attributes the non-increase of Europeans in the Mofussil to the unsettled state of the laws and the want of protection for life and property, 2053-2055——Respects in which the use of the English language in the Mofussil courts would be of the greatest benefit, 2056-2058——Natives would readily qualify themselves in the English language, 2056. 2060.

Different departments of Government in which Europeans might be substituted for natives, 2059——Great distrust in the natives adverted to as an obstacle to a commutation of the payment of the land revenue, 2061, 2062——Distrust through the reduction in 1854 of the interest on the Five per cent. Loan, 2061——Distrust through the resumption laws some twenty years ago; case of the Rajah of Burdwan adverted to hereon, 2062, 2063——Witness had very good health in India, 2064——Good health generally of the European settlers, 2065——Increased assistance given of late years by the settlers and by Government towards the establishment of schools, 2066-2069.

Consideration of objections to the suggestion that certain offices now filled by natives should be bestowed upon Europeans, 2070-2086. 2317-2327——Further statement as to the dishonesty of the natives, more especially in Bengal, and their consequent unfitness generally for offices of trust, 2074-2087. 2404-2407. 2480-2483——Views of sundry high authorities in favour of the principle of throwing open higher appointments to the natives, 2080-2087. 2388-2396——Reference to the inquiry now going on into the state of public appointments in India, 2088-2091——Check upon abuse of patronage if the uncovenanted servants were eligible for all public offices; efficiency thus to be obtained, 2092-2095. 2256-2261. 2434-2440.

Considerable advantage if there were a proper number of civil engineers in the service of Government; qualifications of the military engineers adverted to hereon, 2108-2114. 2262-2277——Improvement if a system of oral evidence were introduced into the courts, 2115-2118——Advantage of a system of assessment upon zemindars, planters, &c., with a view to proper roads being formed, 2119-2125. 2303, 2304——The increase in the pay of the darogahs has not improved them, 2126, 2127. 2325——Increased pay of late years of different native officials, 2128-2130——Facility for false swearing and corruption under the present procedure of the courts, 2131, 2132.

Instead of uniting the offices of magistrate and collector, it would be better to have separate officers for magistrates, 2135-2139——Increased value of late years of estates in Bengal, 2140-2146——Rate of wages in Bengal; system of monthly payment, 2147-2152——Benefit anticipated from the survey in Bengal, 2153-2155——Advantage if there were an increased number of European superintendents over the conduct of the survey, 2156-2160.

Further reference to the question of resumptions as having been considered very unjust; examination as to the existence of grounds for this view of the question, 2161-2199. 2473-2478——Very imperfect acquaintance of the covenanted servants with the native languages, notwithstanding the examinations through which they have passed, 2200-2209——Advantage to the country if the former policy of the East India Company had encouraged English settlement, 2210-2212.

Tendency of the threatened Black Acts to deter settlement further adverted to, 2213-2216. 2341-2346——Operation of English law, as in the Supreme Court at Calcutta, compared with the operation of the Mofussil courts, 2217-2236——Injustice of the proposed exemption of the Company's officers from the operation of the Black Acts, 2237-2241——Respects in which witness considers the judges of the Supreme Court, who are members of the Legislative Council, to be Government servants, 2242-2248——Less partial views of the judges of the Supreme Court than of the other members of the Legislative Council in regard to the Black Acts, 2249-2251.

Approval of the principle of the Europeans or the small minority making the laws for the governance of the great majority in India, 2278-2286——Success, notwithstanding the present laws, of the more skilful and persevering settlers, 2287, 2288——Character of the Nuddea rivers as regards their size and shifting channels, 2289-2296——The railway to Rajmahal will in some respects be better than a canal, 2299, 2300——The roads in Bengal might, without any great expense, be made passable throughout the rainy season; bricks might readily be procured, 2301-2309.

The use of the English language in the courts would be a great benefit to the natives, who would learn it more quickly than the civil servants learn the native language, 2310-2316——The corrupt and oppressive character of the police shows the necessity of increased European superintendence, 2317-2327——The great improvement in the value and cultivation of land, and in the condition of the natives, is owing to the settlers and not to Government, 2328-2333.

Reports, 1857-8—*continued.*

MacNair, George. (Analysis of his Evidence)—*continued.*

Feeling of necessity under which putnees are purchased, notwithstanding the risk of loss by sale, 2334-2340——Explanation as to the non-increase in the number of settlers, notwithstanding the success of settlement, 2341-2347——Reasons to which the non-cultivation of cotton in Lower Bengal is to be attributed, 2348-2361. 2468——A better class of persons might be obtained as interpreters under English judges than as darogahs, 2362-2367——Examination as to the existence of proper grounds for complaint in regard to the reduced interest on the Five per cent. Loan, 2368-2387.

The natives have more confidence in the decision of English judges than of native judges, 2397-2400——More bribery is necessary in the courts of the native judges than of the English judges, 2401-2403——Great improvement if well-qualified Englishmen were sent out to fill the positions of moonsiffs and sudder ameens, 2406-2411——Good pay at present of the sudder ameens and moonsiffs, 2410. 2412-2414.

Except as regards the wish to enforce the Black Acts, witness does not complain more of the present Government of India, than of the Government in former years, 2417-2423——Witness confirms the views of Mr. Theobald and Mr. Freeman, and his opinions are those of the settlers generally, 2424, 2425. 2441, 2442——Further reference to the youth and inefficiency of the Company's judicial officers, more especially of late years, 2426-2433——There was no change of system being adopted when witness left India in 1857; 2443-2445——Impression created by the views expressed by Sir Arthur Buller, relating to the Black Acts, 2453-2457.

An efficient European magistracy would greatly improve the state of the police, 2458——Want of an improved law of contract further adverted to, 2459-2467——Extent to which the survey in Bengal had proceeded when witness left India, 2479——Natives should not preside in the criminal courts at all; they are not fitted for the position either by moral character or legal training, 2482-2488.

[Second Examination.]—Witness further repeats his concurrence in the evidence of Mr. Freeman, 2489, 2490——Different districts in which Europeans might advantageously settle as overseers and capitalists, 2491-2493——Fewer disputes and affrays of late years than formerly between the European zemindars and the ryots respecting the rights of property, 2495-2497——Under a system of fee-simple or of extended European settlement the rights of the ryots may be protected by a fixed rate, beyond which their rents should not be raised, 2498-2501. 2504, 2505.

There is scarcely any opportunity at present for an increase of European planters in the districts in Lower Bengal, 2502——Only the middle or upper class of Europeans would settle as planters, &c., 2503——Necessity of greater precautions as regards definition of boundary, &c., before sales of land for arrears of revenue, 2506-2509——Reference to the non-adoption of the amended sale law proposed by Mr. J. P. Grant; it did not go far enough in protecting the under tenures, 2510-2512.

Further statement in favour of substituting Englishmen for natives in certain Government situations, and of confining the employment of the latter to the inferior appointments, 2513-2517——The rent levied by Government on the land in Bengal is moderate, 2518——Great want of improvement by Government as regards roads, rivers, and canals in Lower Bengal, 2519-2522——The police in the Mofussil have not yet been reorganised, 2523, 2524——Effort by Government to extend education, 2525——Advantage of the recent investment, since the mutiny, of some planters with magisterial powers, 2526, 2527. 2578-2580.

Further evidence in favour of substituting English for native judges in the Mofussil, and the English language for the vernacular, 2528. 2617-2619——The clause exempting Government officials and soldiers and sailors from the Black Acts was brought forward by Mr. Peacock, 2529——Means by which a newly appointed Governor-general might select the most fitting settlers for judicial offices, &c., 2530——Probable causes of the zemindaries in Bengal being so valuable, 2531. 2565——Doubt as to Government being liable to be sued in the Mofussil courts, 2532, 2533.

Difficulty as regards the profitable cultivation of cotton farther adverted to, 2534-2543——Undue delay in the progress of railways in Bengal, 2544, 2545——Numerous advantages anticipated from the spread of railways, 2546-2553——Disposition of the natives to use European goods, 2552, 2553. 2607, 2608——More costly and ruinous result of proceedings in the Mofussil courts than in the Supreme Court, 2554-2560——Incentive to official exertion and efficiency if the civil service were thrown open, 2561-2564——Great loss to the putneedars if Rammohun Roy had failed some years ago in paying the Government revenue, 2566-2568.

If the Black Act be passed, many indigo planters will leave the country, and there will be a great depreciation and loss of property, 2569-2575——With more efficient European superintendence the native material would work much better, 2576, 2577——Approval by the settlers of the transfer of Government to the Crown, 2581——Further reference to the importance of a re-constitution of the Legislative Council, 2582——Corrupt conduct of the surveys or taking of boundaries so far as the natives have to do with

Reports, 1857-8—*continued.*

MacNair, George. (Analysis of his Evidence)—*continued.*

with them, 2583-2585——Witness prefers the employment of Europeans to natives, chiefly on the score of their greater morality, 2586-2588.

Impression that the civil service is somewhat jealous of the public employment of settlers, 2589, 2590——Objection to Sikhs as policemen in Bengal, 2591, 2592——A proper police would be exceedingly acceptable to the natives, 2593, 2594——In the interior, the natives are not of a class fit for Government employment, 2595——Oppressions to which the ryots in Bengal are subject by the native zemindars, but not by the European zemindars or planters, 2596-2605.

Twofold advantage to the natives by the increase of Europeans, 2605. 2609——Further reference to the state of the laws and of the police as an impediment to settlement, 2606——Evil through public works not having been prosecuted long ago, 2610——Repetition of objections to the proposition for putting Europeans in the Mofussil under the jurisdiction of the native courts and juries, 2611-2620.

Madras (Presidency). Obstacles to cultivation by any large number of European emigrants in Southern India, *Baikie* 749-757. 785——Facility and advantage of cultivation in the Neilgherries, Mysore, &c., by a higher class of settlers, who should direct native labour, *ib.* 749-760. 784-789. 836-845——Obstacle to European colonisation in Southern India, on account of its being a thinly peopled country; colonisation would, however, check the present immigration from Malabar, &c., *Ouchterlony* 5307-5310——Poverty generally of the population of Madras; probable causes, *ib.* 5505-5507——Calculation that, irrespective of irrigated lands, the acreage value of produce on the cultivated lands in Madras is only 5 *s.* 4½ *d.*, *Balston* 5906-5908——There are certainly as many as twenty European settlers in the Madras Presidency, *Onslow* 6729, 6730. 6860. 6872.

4. *Suggestions for improving the Magistracy.*

1. *Qualifications of the Covenanted Magistrates:*

Grounds for the statement that the covenanted or European magistrates are very inexperienced and inefficient, and are altogether too small a number; views of Mr. Halliday to a similar effect, *Theobald* 942-949——Increasing inexperience of the European magistrates, on account of the increased number of young men sent out lately from Haileybury, *ib.* 942-945——Witness has not seen a certain despatch from the Court of Directors, ordering that the magistracy be placed in the hands of older men, *ib.* 1053-1055——By the rules of the service, a young man ought not to be a magistrate until he has been ten years in the service, *ib.* 1066.

Very little power of the sessions judge over the magistrates, *Wise* 2643. 2896——Want of training and experience in the magistrates, *ib.* 2645. 2647——Entire inadequacy of the European magistrates in the Bengal districts to see to the proper administration of justice, *ib.* 2645. 2647——When witness went to India, thirty years ago, the magistrates were more efficient than at present, *ib.* 2933-2936——The covenanted magistrates have not, as a body, improved since witness has been in India, *Dalrymple* 3209, 3210——Good conduct of the police, and excellent order in those districts where there happen to be competent magistrates, *ib.* 3376-3379. 3527-3530.

Youth and inexperience of many of the European magistrates, and consequent evil, *Mackenzie* 3587. 3602, 3603——The younger magistrates in India, those of two or three years' standing, are, through their inexperience of the native character and its falseness, inefficient and partial in the administration of justice, but those of older standing are perfectly efficient in conducting the proceedings in the native languages, and in giving just decisions, *ib.* 3699-3702. 3783. 3819, 3820——Great fault of the system, whereby

Reports, 1857-8—*continued.*

MAGISTRATES—continued.

1. *Qualifications of the Covenanted Magistrates*—continued.

the most inexperienced instead of the most experienced men are appointed as magistrates, *Mackenzie* 3703-3705. 3881-3884. 3898-3900——Evil in the great power exercised under the laws of 1840 and 1849, by the young and inexperienced magistrates, *ib.* 3881. 3940. 3943.

Necessity of late years of employing younger magistrates through the civil service not having been properly augmented, *Hawkins* 4154-4158; *Mills* 8814——Magistrates may be appointed after five or six years' service, *Hawkins* 4367, 4368——Belief as to the efficiency generally of the European magistrates, up to 1844, *Baillie* 4731. 4824, 4825——Disadvantage in the young and inexperienced men who are made magistrates in Bengal; this is unavoidable under the present system, *Marsham* 9631. 9636. 9688-9692. 9753.

2. *Honorary Magistrates:*

Approval of a recent proposition on the part of Government for the employment of planters and other European residents as instruments in carrying out the public laws, *Theobald* 1001-1004. 1219, 1220.

Witness was for a short period before leaving India, an honorary assistant magistrate, *Auld* 1315. 1320——Written opinion given by witness in India as to the benefits to be derived from appointing planters, &c. in the mofussil as magistrates, and as to the powers to be vested in them, *ib.* 1316. 1318, 1319——Position and duties of the honorary magistrates, *ib.* 1317. 1321. 1420, 1421——Great usefulness of the appointments in question; favourable feeling of the natives on the subject, *ib.* 1322-1328——The appointment of honorary magistrates had reference to the heavy business devolving upon the paid magistrates, *ib.* 1355-1358——Advantage of honorary magistrates in their local knowledge, *ib.* 1378-1382——Appointment recently of honorary magistrates further adverted to; probability of the appointments having resulted through the mutiny, *ib.* 1422-1426. 1440-1454.

Advantage of the recent investment since the mutiny of some planters with magisterial powers, *MacNair* 2526, 2527. 2578-2580——Efficient magistrates might without difficulty be found in the uncovenanted servants, *Dalrymple* 3216——Witness has always felt that European settlers should be invited to act as justices of the peace, *Marsham* 9623. 9683.

3. *Native Magistrates:*

Very inefficient and prejudicial character of the uncovenanted class of magistrates, who are mostly natives, and are appointed by the local government, *Theobald* 947——Probable causes of the frequent selection of incompetent natives as magistrates, *ib.* 1067-1072——Failure of the appointment of natives as deputy magistrates, *Wise* 2647——The Lieutenant-Governor of Bengal appoints the native magistrates, *ib.* 2865.

4. *Suggestions for Improving the Magistracy:*

Sundry measures suggested for the reform of the magistracy, *Theobald* 995; *Wise* 2647; *Waller* 4898——Suggestions for the proper training and experience of the civil servants as magistrates, *Mackenzie* 3944-3950——More European magistrates are most decidedly wanted, *Mullens* 7167.

See also *Administration of Justice* (*Mofussil*). *Civil Service.* *Judicial Service* (*European Judges*).

Mahableshur Hills (*Deccan*). Reference to the plateau in the neighbourhood of the Mahableshur Hills as a very favourable place for settlement by Europeans, *Warden* 6029-6034. 7353-7358. 7536-7540——Europeans may live permanently, and their race may be continued there, *ib.* 6029-6034——Heaviness of the monsoon in some parts of the Mahableshur Hills, *ib.* 6030. 6038, 6039.

Mahomedans. See *Christianity.* *Native Character.*

Mahratta Country. See *Cotton*, II. 2. *Enam Commission* (*Bombay*).

Malabar. Considerable sanitary advantage to be derived from clearing the dense jungles in the Malabar district, and cultivating coffee, &c. on the soil, *Ouchterlony* 5307.

See also *Coffee.* *Gold.*

Malavelly Station (*Bengal*). Unhealthiness of the Malavelly station during the rainy season, *J. R. Martin* 270-272.

Manufactures. Disposition of the natives to use European goods, *MacNair* 2552, 2553. 2607, 2608——Increased consumption of English manufactures, through the effects of settlement, *Dalrymple* 3404-3406. 3507——Increased consumption of British goods if by reason of a feeling of security hoarding were not practised, *Mackenzie* 3613. 3969-3972——Probable extent to which British manufactures may be consumed in India if the

Reports, 1857-8—*continued.*

Manufactures—continued.

the necessary reforms are carried out, *Mackenzie* 3969-3972——Effect of a large reduction in the price of cotton to enable the European manufacturer to compete successfully with the Eastern manufacturer, and to increase the consumption in India of British made goods, *Balston* 6019.

European capital and skill may, with excellent prospects of success, be employed in manufacturing processes, the native processes being very defective, *Wingate* 7689——Increased use of British as well as of native manufactures in the Presidency; effects of competition upon the latter, *ib.* 7714-7723.

Further statement relative to the effect upon native manufactures, and the condition of the natives, of the increased import of European manufactures, *Wingate* 7917-7921——Opinion that the future wealth of India will depend upon the developement of her manufacturing powers, as well as of her productive powers, *ib.* 7922, 7923——Prospects of India as a manufacturing country further considered; success anticipated, *ib.* 8134-8143.

Witness has a cotton spinning establishment in Broach, as well as a cotton ginning establishment, but the former is still an experiment, *Landon* 8674, 8675.

Manures. Great want of a proper economy by the natives of the available resources of manure; illustration hereon of the beneficial results of a proper use of manure in developing the soil, *Tremenheere* 70-79. 393, 394——Course desirable in order to supply the present want of manures, *Ouchterlony* 5261——Great advantage of colonization in leading to the proper use of manures in cultivation, *ib.* 5310, 5311——Neglect, at present, of the use of manures, *ib.* 5310, 5311——Great want of manure in Mysore; means of remedying this, *Onslow* 6617-6622——Explanation as to the use of manure on land in Bombay; its value is well known, *Wingate* 7703, 7704.

Marsham, John. (Analysis of his Evidence.)—Was more than thirty years in India, chiefly in Bengal, 9399——Established, in 1818, the first native newspaper, in Bengalee, and was for eighteen years the editor of the "Friend of India," 9399-9401——Understands the Bengalee language as well as the English, 9402-9404.

Dissent from the evidence of Messrs. Freeman, Mackenzie, and Theobald, that the native judges are universally corrupt, 9405——Since 1831, when the native judges were exceedingly deficient in all judicial qualifications, Government has done everything in its power to improve the body, and with considerable success, 9405-9408. 9417-9419——It might be well to increase the pay of principal sudder ameens to 1,000 rupees a month, 9408.

Impolicy and injustice of any attempt to rule 150,000,000 of people without opening to them some offices of distinction and responsibility in their own land, 9409, 9410. 9414. 9423——Failure of the former system of exclusive employment of European agency, which led Lord William Bentinck to introduce, in 1831, the system of employing natives in offices of trust and responsibility, 9409, 9410——Approval of the present plan of employing European judges as supervisors of the native judges, and of training and improving the latter by actual employment under due supervision, 9411-9424.

Witness cannot say that the moral condition of the people has very much improved since 1831; 9418——Higher and better educated class of society from which the native judges are now selected, than on the introduction of the system, 9419——Great difficulty of Government, as regards native agency, on account of the utter want of morality which pervades all classes of natives, 9420-9422.

The efficiency of the civil service has been very greatly improved since Lord William Bentinck's time, 9425——Reference to the stringent examinations established by Mr. Grant, for the civil servants, as showing the impossibility of the judges being now unacquainted with the native languages, 9426——The experience of witness shows that the civil servants in the Mofussil are quite conversant with the language of the natives, 9426-9428——Belief that in civil cases Europeans are dealt with impartially by the native judges, 9429, 9430——In criminal cases it is not at all desirable to subject Europeans to the jurisdiction of natives, 9431. 9555. 9557.

Evidence on the subject of the state of feeling existing in Bengal, more especially in Lower Bengal, between the European indigo planters and the zemindars and ryots; the planters, in many instances, bear the character of violent and oppressive men, though there are, doubtless, many who are exceedingly benevolent and popular, 9432-9444. 9586-9591——Entire inadequacy of the police in Lower Bengal, so that the planters and zemindars resort to means for their own protection, and disgraceful and violent affrays are frequently the result, 9435-9440. 9777-9781——Peculiarly disorganised and demoralised state of the lower parts of Bengal, 9440-9442. 9595-9597.

Grounds for strenuously objecting to the introduction of the English language into the Mofussil courts; opinion that it would be unpopular to the last degree among the people, would not lead to any improvement in the administration of justice, and would in fact be one of the greatest misfortunes that could happen to the country, 9445-9449. 9693-9703. 9782-9784.

Reports, 1857-8—*continued.*

Marsham, John. (Analysis of his Evidence)—*continued.*

High opinion of the natives in the integrity of the European judges, 9450——Much greater confidence felt of late years by the natives in the civil servants, owing very much to the better control exercised over the latter by Government, 9451-9453——Illustration of the neglectful and unjust conduct of the civil servants some thirty years ago, 9453, 9454——Objection to the appointment of barristers from England as judges on account of the interference thereby with the exclusiveness of the civil service, 9455 *et seq.*

Approval of the present plan of training the civil servants in India for the higher appointments, 9455-9463——Valuable experience of a judicial character gained in the office of collector in Bengal before appointment to judgeships, 9463-9470. 9630-9632——Inaccuracy of the statement that collectors in Bengal get through their work in about two hours a day, 9471-9474——Inability of Government to employ uncovenanted servants in certain offices; a revision is very advisable on this point, 9475. 9479-9482. 9485.

Inexpediency of interference with the prospects of the civil servants by the appointment of those who may be termed "outsiders" to the higher offices; the integrity of the present system should be strictly upheld, 9476-9478. 9483, 9484——Modification of the civil service of late years, inasmuch as several offices formerly held always by civil servants are now, in the non-regulation provinces, held by military servants, 9485-9489 —— Apprehended jobbery if the civil service be thrown open, 9490, 9491. 9623.

Footing of perfect equality upon which the Government of India have placed themselves with the natives in the courts of law, 9492-9496——Since 1833 there has been an entire absence of any hostility on the part of Government towards European settlement; witness has never heard any one complain that such hostility existed, 9497-9502. 9657. 9659. 9758——Evidence in disproof of the assertion that the state of the police and of the courts in the Mofussil is an obstacle to the increase of European enterprise, 9503-9512.

Strong repugnance on the part of many natives to any extension of the jurisdiction of the Supreme Court, 9513-9515——Great length and excellent character of the Grand Trunk Road from Calcutta, 9516-9521——Explanation as to the non-bridging of several rivers on the Grand Trunk Road; immense width of some of these rivers, and approval of not bridging them, as the East Indian Railway will provide the required accommodation, 9521-9528. 9539, 9540. 9729-9734——General feeling in India that for many years the expenditure on roads was altogether inadequate, 9532, 9533——There is a great want of roads in Bengal; names and condition of some of the roads adverted to hereon, 9534-9546. 9717-9719.

As regards the increased pay of the darogahs the measure was forced upon Government, but it is a difficulty to say whether it has resulted in improvement or otherwise. 9547——Belief that the resumption laws have not had the effect of damaging the value of landed property, 9548——Absence of breach of faith by the carrying out of the resumption laws; much dissatisfaction has, however, resulted from them, 9548-9552. 9608-9611.

Preference, as regards public employment, should be given to Hindoos as compared with Mahomedans; concurrence hereon in the views of Mr. Charles Raikes as to the faithless and disloyal character of the latter, 9553-9559——Sufficiently qualified men would not be induced to leave this country for situations as moonsiffs or sudder ameens, 9560, 9561——Approval of the practice of appointing Europeans in India, or East Indians, to the uncovenanted judicial service, 9561——Difficulties in the way of introducing commercial men and natives into the Legislative Council; independent action of the Council as at present constituted, 9563-9572.

Witness was, for twelve years, the Bengalee translator to the Government, and his newspaper was frequently designated as the mere organ of Government, but there was no truth in the latter report, 9573-9580——Improvement upon the public administration in India, through the reaction of the public opinion of this country, 9581, 9582. 9661-9664——Unduly rapid outlay upon roads in consequence of representations from the Home Government, 9582. 9754-9757.

Witness concurs in several points in the evidence of the indigo planters, 9583, 9584. 9788——Concurrence in the evidence as to the expediency of protecting the putnee tenures in cases of sale, 6584. 9788——Removal, since the mutiny, of the feeling of antagonism existing between the civil servants and the settlers, 9585——Benefit to the country through the presence of the indigo planters, 9589-9592——Too much European capital or skill cannot be introduced into India, 9593. 9658.

State of the police in Lower Bengal further adverted to; nature of the steps taken to improve them, 9595-9603 —— Doubt as to the policy of a general redemption of the land-tax in Bengal, 9604-9607. 9787——Witness regrets that the resumptions were ever attempted, 9612, 9613——As regards the enam lands, the Enam Commission, if instituted at all, should have been carried into operation before the mutiny, 9613, 9614——Complete surprise with which every one in India was taken by the mutiny; witness had not the remotest apprehension of an outbreak, 9615-9618. 9638-9649.

Numerous

Reports, 1857-8—*continued.*

Marsham, John. (Analysis of his Evidence)—*continued.*

Numerous opportunities of the European magistrates and of the collectors, as well as of the settlers, for becoming acquainted with the character and habits of the people, 9618-9622——It is scarcely possible for any European in India to shake off the influence of the natives around him, 9620, 9621——Witness has always felt that European settlers should be invited to act as justices of the peace, 9623. 9683——Doubt as to the expediency of opening any of the higher offices even to such men as Mr. Venables, 9624-9626. 9637——Great improvement if one or two barristers were appointed to the Sudder Court at Calcutta, 9627-9629.

Statement in favour of uniting the offices of collector and magistrate in Bengal, 9630-9636——Disadvantage in the young and inexperienced men who are made magistrates in Bengal; this is unavoidable under the present system, 9631. 9636. 9688-9692. 9753——Within the last ten years there has been a vast improvement in the character and spirit of the Government of India, 9650. 9660, 9661——Further statement as to the development of native employment by Lord W. Bentinck; the experiment has been anything but a failure, 9651-9656.

Causes of the great improvements effected in India within the last thirty years, 9650-9662. 9664——Origin of the introduction of the covenant into the civil service, 9663——Beneficial operation of the covenanted service further adverted to; witness does not see any substitute for it, 9665 *et seq.*——Further statement as to the employment of military servants as well as of civil servants in the administration of the Punjaub; success of the plan, 9670-9680——Slight use of the education in this country in the native languages, 9681. 9785——Social distinction between the civil servants and the settlers further adverted to, 9684-9687.

The system of legal proceedure in Bengal is most unpopular with the natives, and it is of urgent importance to introduce a summary and inexpensive system, as in the Punjaub, 9702-9708—— Impression that the mutiny was not owing in any way to our system of law, to the investigation into titles, or to any interference with religion, 9708-9710. 9712, 9713——Suggestion that our Government in India should be publicly declared a Christian Government, but with perfect liberty of conscience to every individual, 9711.

Witness further expresses his dissent from much of the evidence of Mr. Freeman and Mr. Theobald; he concurs generally with Mr. Hawkins and Mr. Baillie, 9714-9716. 9788—— Reference to the washing away of the Mugra bridge, about forty miles from Calcutta, and to the levy of a toll there, and the inconvenience in crossing the river 9720-9728——The emoluments of the native judges should be increased, but it is not necessary to give them the same salaries as the European judges, 9735-9746——Corruption among the Company's European officers when they were underpaid, 9745, 9746.

Kind treatment experienced generally by the natives at the hands of the Europeans; the feelings of the latter have however undergone a complete change since the mutiny, 9748-9752—— Obstacle on the score of climate to the permanent settlement of Europeans and their families in India, 9759. 9763. 9765. 9767, 9768——The non-protection of putnee tenures, in the event of the zemindars making default, is a decided obstacle to the investment of British capital, and should be remedied, 9760-9762——There is no scope for the capitalist in the Upper Provinces, 9764.

Great importance of removing the surplus population from Bengal to Assam, Tenasserim, and Pegu; this would effect a greater improvement in the condition of the ryot than all the laws we could make, 9766. 9769-9774——Further expression of the opinion that the natives should not be debarred from employment in offices of responsibility, 9775——A judicious infusion of European superintendence generally is most expedient, 9776.

Considerable improvement in the character of the planters during the last thirty years; there were ten times as many affrays formerly, 9777——The affrays between the planters have been largely owing to the want of a definite boundary of estates, 9778. 9780——It would be well if there were a partition of Government revenue on each portion of an estate, 9779.

Importance of an extension of the English language throughout the country, 9783——The language now used in the courts in Bengal is understood by the people, 9784——Advantage if the civil servants had an education in jurisprudence before leaving this country, 9785——Encouragement to settlement if Government would sell the fee-simple in the case of uncultivated lands, 9786, 9787.

Martin, James Ranald, F.R.S. (Analysis of his Evidence.)—As surgeon in the Bengal army, has had very considerable experience on the subject of climate in India, 195-198——Grounds upon which witness has on more than one occasion advocated the removal of European troops from the plains to the hilly districts, 199 *et seq.*——Principal diseases produced by residence in the plains of India, 201——The alluvial plains are the most unhealthy, 202.

Reports, 1857-8—*continued.*

Martin, James Ranald, F.R.S. (Analysis of his Evidence)—*continued.*

Prevention rather than cure of disease by removal to the mountain ranges, 203. 205——Statement as to certain forms of bowel disorders being engendered in the elevated ranges, 203. 206. 230, 231. 237-239——Witness has suggested to the Court of Directors the propriety of an inquiry into the respective climates of the medium ranges and the high elevations, which inquiry has been ordered, 203. 212, 213. 303, 304——Advantage of isolated mountains over mountain ranges, 204. 229——Much greater advantage of a sea voyage than of a sojourn in the hills, 207.

Consideration of the effect of the hill climates upon Europeans born or reared there; inadequacy at present of proper statistical information on this point, 208-213. 246-249. 334, 335——Mention of different hill stations now resorted to for purposes of health, 214, 215——The Darjeeling station is very promising as a sanatarium, 214. 233——Necessity of a proper inquiry, in order to decide upon the elevations most conducive to health; witness is in favour of medium elevations of from 3,000 to 4,000 feet. 216. 224, 225. 274-281——Greater facilities in course of time for rearing soldiers' children in the hills, 218——Considerable success of the two asylums founded by Sir H. Lawrence, 219.

Varying mortality of European soldiers and children at different stations, 220——The amount of heat is less injurious than long residence in it, 220. 325——Increased duration of life when railways are established, 221. 227, 228——Good effect of the Ceylon climate, 222, 223——Extremely unhealthy character of the terais, or plains leading to the base of the mountains; particulars hereon, 226-228. 266-269. 282-284.

The periodical, if not the permanent removal, of the European soldiers to the hills has become a State necessity, 232——Considerable cold and damp where the elevations are 7,000 feet or more, 234-239——Relative value of native life and European life in India, 241, 242——Much better health in the Bengal army than the Madras army, 243, 244——European life and vigour may be preserved much longer in the hills than in the plains; in the plains of Bengal a third generation of Europeans is not to be found, 245-249. 290-292——The hills are likely to be more useful during education or the restoration of health than for cultivation, but there are large tracts which admit of cultivation, 250-254. 261-265. 327, 328.

Belief that by removing the soldiers to the mountains the mortality may be reduced to the level of England; experience of the West Indies adverted to hereon, 255-257——Advantage of a larger proportion of the soldiers being allowed to bring wives from England, 258, 259. 294. 314-316. 320-324——Soldiers' children reared in the hills might be trained so as to be available in different capacities, 260——Unhealthiness of the Malavelly station during the rainy season, 270-272——Numerous mountain ranges throughout India available as sanatariums, 273, 274.

More healthy character of some of the districts in Bombay than of Bengal or the Carnatic, 285-289. 329. 331——Importance of previous soundness of constitution in the case of Europeans settling in India, 293——Varying degrees of degeneracy of half-castes, according to the race and the locality from which the mother comes, 295-298——Greater unhealthiness of Bengal Proper than of the plains of Hindustan, 299——Objections to the hill station of Cherrah-Ponjee in Bengal, 300——Advantage if the 900 children at Dum Dum were removed to Darjeeling, 301.

Further evidence as to the possibility of rearing European children, or of retaining European settlers in the mountain ranges without degenerating, 302-310. 326. 334, 335——Effect of the climate respectively upon the European soldiers or officers, and upon their wives, 311-313——Circumstance of the European soldiers in the Company's services not generally returning to this country, 316, 317. 336——Better sanitary arrangements generally in the case of the Company's troops than of the Queen's troops, 317. 318——Witness hopes and believes that in a very few years the great bulk of the European soldiers will be permanently located in the mountains, 319——Advantage of some system of employment of the Europeans when not on active service, 332, 333.

Martin, William Henry. (Analysis of his Evidence.)—Services of witness in the judicial and revenue branches in different parts of Bengal; he was eventually the special judge for the trial of Thugs, and was a civil judge for a short time before leaving India in 1845; 9114-9116. 9120, 9121——General complaint in Furreedpore and Kishnagur, when witness was there, of the conduct of the European, that is, of the English indigo planters, towards the natives, 9117-9119. 9127. 9210, 9211——Instances in the cases of Mr. Laruletta, Count De Framont, and M. Courjon, of success on the part of foreign indigo planters, subject to the jurisdiction of the Mofussil courts, 9122-9131. 9137, 9138. 9205-9209.

Illustration of the strong complaints made by English settlers against the Supreme Court and its expense; such settlers having been also opposed to the jurisdiction of the Mofussil courts, 9132-9136——Sufficient communication in Furreedpore by means of the numerous rivers, 9139, 9140——In witness's time all was done that could be done to deepen the Nuddea rivers, 9141——The character of the native judges varied very considerably, but on the whole witness was not satisfied with them, 9142, 9143.

Reports, 1857-8—*continued.*

Martin, William Henry. (Analysis of his Evidence)—*continued.*

In Kishnagur and other districts the police were not, in witness's time, so bad as they are now represented to be, 9144-9147. 9190-9202——Success of witness in procuring the conviction of river Thugs; means other than the ordinary police employed for this purpose, 9148-9152. 9203, 9204——Dissent from the statement that the darogahs are worse since the increase of their salaries, 9153——Difficulty, through the native character, in organising an efficient police, 9153, 9154——Improvement if the expense of European serjeants in the police be incurred, 9155-9157.

The civil servants in witness's time were efficient in their knowledge of the native language, 9158——Witness was conversant with Bengalee and Hindostanee, 9159-9162. 9230-9238——Hasty way in which the evidence is taken down in extra-judicial cases before the collector; difficulty in reading it, 9160, 9161. 9220-9223——Use formerly of Persian as the language of the courts, 9163. 9233. 9237——Absence of discouragement to settlers by the Government when witness was in India, 9164——Undue extent to which indigo planting was forced in witness's time, 9164-9166.

Approval of the exemption, for the present, of Englishmen from native criminal jurisdiction, 9167, 9168——Reference to a murder in Kishnaghur about twenty-five years ago, when the Englishman concerned in it was acquitted by the Supreme Court, 9169-9172——The natives would never feel confidence in the use of the English language in the courts, 9173. 9243-9245——Advantage in employing as judges civil servants trained in India rather than barristers from this country, 9174-9189——Usefulness in judges of a previous education in jurisprudence; this was, to a certain extent, gained at Haileybury, 9177-9180. 9212-9216. 9253-9257.

Good training for the office of judge in the experience acquired in the revenue branch of the service, 9182-9189. 9217-9228——Advantage of the experience gained through the former office of registrar, 9183. 9189——Mr. Halliday's description of the police may correctly apply to the present time, but they were not so bad during witness's experience, 9190-9202——Practice as regards the taking of written or oral evidence in revenue cases; language used, 9219-9240.

Greater faith of the natives in European than in native judges, 9242——Witness was never dependent on his omlah, 9246——Practice as regards appeals from witness's decisions as judge, in the Mofussil, 9247-9250——A most excellent education was acquired at Haileybury, 9252——As regards a separation of the judicial and revenue services, much that is useful in the one is useful in the other, 9259-9261.

Medical Aid. Great want of European medical men in Mysore, and throughout India; difficulty in remedying this want, *Onslow* 6333-6335.

Mercantile Operations. Respects in which a European is a better trader than a native, *Onslow* 6604——Great intelligence of some of the native merchants, *ib.* 6708, 6709——Mercantile men are the only class of settlers that can find profitable employment in Western India, *Landon* 8283, 8284——Settlers can best operate by purchasing produce and improving its preparation, *ib.* 8284, 8285. 8465, 8466.

Metcalfe, Lord. Views of Lord Metcalfe as to the great importance of colonisation, *Theobald* 1290, 1291——Views of Lord Metcalfe as to the discontentment of the European settlers and the East Indians with the Company's government, *ib.* 1291——Sir Charles Metcalfe strongly expressed the opinion that our hold of India would always be very precarious, unless a considerable European population were attached to our Government by common interests and sympathies, *MacNair* 1975——Largely increased revenue if settlement had been encouraged, as recommended by Sir C. Metcalfe, *Wise* 2630. 2657.

Migration of Native Labourers. Tendency of the want of roads to check migration to the unpopulous districts, *Wingate* 8165, 8166——Great importance of removing the surplus population from Bengal to Assam, Tenasserim, and Pegu; this would effect a greater improvement in the condition of the ryot than all the laws we could make, *Marsham* 9766. 9769-9774——Government should establish an emigration agency for a transfer of the surplus population, *ib.* 9774.——*See* also *Coolie Emigration.*

Mills, Andrew John Moffatt. (Analysis of his Evidence.)—Filled sundry judicial and revenue offices in the Bengal civil service, between 1826 and 1855; became in 1854 a member of the Legislative Council, 8759-8765——In 1853 made a tour of the north-eastern part of Bengal, and found the condition of the people to be, on the whole, good, 8766-8769——The mode of administration of justice and the state of the police in the Mofussil, though defective, were not such as to deter Europeans from settling as indigo planters, 8770-8773. 8782, 8783.

In witness's experience life and property were safe in the Mofussil, 8772, 8773——Frequent affrays between indigo planters and zemindars, about thirty years ago; various causes of these affrays, 8774-8781——Of late years affrays between planters and zemindars have greatly decreased, 8774. 9102-9106——Mention of some foreign planters

Reports, 1857-8—*continued.*

Mills, Andrew John Moffatt. (Analysis of his Evidence)—*continued.*

in the Mofussil who carried on business successfully under the system of the Mofussil courts, 8784-8793.

Witness, who was one of the Board for conducting the examinations in the native languages, shows that the examinations were very strict, and that those who passed them must have had a thorough knowledge of the languages, 8794-8805——Inaccuracy of the evidence that few of the civil servants can converse with natives, 8806-8809——Government has done everything it could to encourage European settlement, 8810-8813.

Employment of late years of younger men as magistrates, 8814——Approval of the union of the offices of collector and magistrate; its popularity with the natives, 8815-8820——Particulars relative to the Assam country and the impediments to increased settlement and cultivation therein; reference to an official report by witness on this subject, in 1853; 8821-8836——Great want of labour in Assam, 8822* 8823. 8833——Expediency of greater liberality in granting land in Assam; witness mentioned in his report that it would be better to sell the waste land, 8822*-8833. 8954-8962——Terms of the grant to the Assam Tea Company; operations of the company up to 1853; 8825, 8826. 8832-8836.

The character of the native judges has improved of late years, owing to their increased pay, education, and supervision, 8837-8839. 9001-9005. 9064-9072——Disapproval of any greater exclusion, than at present, of natives from offices of trust, 8840-8843——Europeans of good character might, with advantage, be introduced into the preventive police, but the detective police is better without them, 8842. 8853-8862——Approval of the employment of natives as sudder ameens, &c., as the only means of fitting them for office, 8844-8846.

Better conduct of the darogahs since the increase in their pay, 8847——Appointment by the magistrates of the most efficient persons they can get as darogahs, &c. 8848-8851——Increased employment lately of the modern-educated natives, 8852——Objection to Europeans being subject in criminal matters to native jurisdiction, 8863, 8864. 9086-9090——The criminal jurisdiction of the European magistrates might be enlarged, 8865-8867——Great inconvenience of the present system of sending Europeans charged with crime to Calcutta, 8868——Objection to Supreme Courts in the chief provincial cities, 8869, 8870.

Difficulty at present of an amalgamation of the Sudder and Supreme Courts, 8871——Strong objection to the introduction of the English language into the Mofussil courts, 8872, 8873. 9009-9017——Advantage in judicial offices in the Mofussil being filled by persons trained in the country in the Company's service, rather than by barristers appointed direct from England, 8874-8878. 8917-8937. 9007-9017. 9022-9032. 9093-9101——Approval of the present system of appointment to civil offices, rather than of throwing the service open; the latter plan cannot co-exist with the former, 8876-8880.

Objection of the natives in the Mofussil to an extension to them of the system of the Supreme Court, 8881-8884——In Calcutta the natives are well satisfied to be under the Supreme Court, to which they have become habituated, 8885——Several points in which the Company's regulations and the laws in India are equal or superior to the laws of England, 8886-8897——There is a great want of roads in Bengal, 8898, 8899——The rivers in Bengal are very numerous, and are the highways during the rains; Government has taken every measure to keep them open, 8898. 8900-8902.

Experience upon which witness grounds the opinion that the native judges, on the whole, perform their work well, 8903——Less judicial training before appointment to judgeships in Bengal since the abolition of the office of registrar, 8904-8916——Experience of a judicial character acquired in the revenue department before promotion to the judicial bench, 8909. 9022-9032. 9093-9099——Further evidence relative to the knowledge of the European judges as regards the native language, more especially in the case of native documents, 8938-8953.

Approval of a centralisation of the legislative power rather than of a power in each Presidency to legislate for itself, 8963-8976——With reference to the Black Act, it did not emanate from the Legislative Council, but from the Law Commission in this country, 8977-8981——Witness does not object to opening the Council to non-official members, 8982-8984. 8990. 8995——Present constitution of the Council; there are eleven members, all official men, 8985-8989——Non-objection to a native member in the Council, 8991. 9063. 9071.

As regards the Punjaub Code, witness is not prepared to give it his entire approval, but considers that the practice of the courts should be made more simple and rapid, 8992-9000——Greater confidence of the natives in the decision of a European than of a native judge, 9006. 9073——Influence of the native omlah equally in the case of judges appointed from this country as of judges appointed from the service in India, 9010-9012——In the Supreme Courts the judges are not influenced by the omlah in the same way as in the Company's courts, 9013-9017.

Approval

Reports, 1857-8—*continued.*

Mills, Andrew John Moffatt. (Analysis of his Evidence)—*continued.*

Approval of a separation, if practicable, of the judicial and revenue services; it may be carried out if the civil servants are increased, 9018, 9019. 9100——Assam is a fine field for the employment of European capital, but not for colonisation, 9020——Witness does not know any part of Bengal where colonisation is practicable, 9021——Practice as regards juries in the trial of criminal cases in the Mofussil; the system might with advantage be extended, 9033-9044. 9061, 9062 —— Practice as regards the Mahommedan law officer whom the English judge may call in to sit with him as assessor; the judge is not dependent upon the assessor in arriving at a decision, 9041-9060.

Witness believes that the native character generally is improving, 9064, 9065——It is not the universal opinion of the Europeans in India that the employment of natives in offices of trust has been altogether a failure, 9066-9069——Expediency of continuing the employment of natives in responsible offices, 9070-9072——Dissent from the statement that the civil servants generally are more or less under native influence, 9074-9079.

Opportunities of the judge for arriving at a just decision from the nature of the native evidence; this is frequently of a circumstantial character, 9079-9085——Greater favour shown by Government of late years than formerly towards European settlement, 9107-9111——The use of tea is likely to increase among the natives, 9112——Concurrence in Mr. Hawkins' suggestions as to the best means of improving the civil service, 9113.

Minerals. The chief mineral resources of India are coal, iron, copper, and tin, *Tremenheere* 18——Particulars as to the mineral resources of different parts of Bengal; these are very great, *Theobald* 878-885; *Mac Nair* 1798——How far the mineral resources have been developed, *Theobald* 883-885——Grounds for concluding that copper and minerals generally, except diamonds and iron, cannot be profitably produced in Southern India, *Ouchterlony* 5326.

See also *Coal. Copper. Gold. Iron. Mysore*, 9. *Tin.*

Missionaries. Respect entertained by the natives for the missionaries, *Waller* 4962-4964.

Reference to certain memorials and petitions from missionaries and others, in the preparation of which witness has taken part, *Mullens* 7111-7114——Instances of unsuccessful attempts at colonisation and missionary settlements in different parts of India, *ib.* 7125. 7291-7293——There are 105 missionaries in Bengal, and 450 in all India, *ib.* 7343——The missionaries never interfere in regard to the administration of justice, but take an interest in the question of improvement, *ib.* 7344, 7345——The missionaries are on good terms with the civilians, who often attend their stations for Divine worship, *ib.* 7346-7348.

Great respect with which the missionaries have been treated during the mutiny, *Marsham* 9713.

Petition of Protestant missionaries residing in or near Calcutta relative, more especially, to Mr. Grant's Bill for improving the law relating to sales of land for arrears of revenue, *App.* (*Fourth Rep.*) *p.* 290-293.

See also *Christianity.*

Mofussil. See *Administration of Justice* (*Mofussil*). *Affrays, and Affray Bill* (*Bengal*). *Bengal. Criminal Jurisdiction* (*Mofussil Courts*). *European Capital and Skill. Foreign Settlers. Land Revenue Settlement, and Tenure and Sale of Land. Police. Ryots. Zemindars.*

Money Lenders. The great body of the people have not derived due advantage from the increase of production, as the advantages go rather to the money lender, *Wise* 2707, 2708. 2711. 2775.——*See* also *Interest on Loans.*

Moonsiffs. See *Administration of Justice.*

Mortality. Relative value of native life and European life in India, *J. R. Martin* 241, 242——Slightly increased mortality of civilians in India as compared with this country, *Waller* 5025-5027.

Mugra Bridge (*Bengal*). Reference to the washing away of the Mugra bridge, about forty miles from Calcutta, and to the levy of a toll there, and the inconvenience in crossing the river, *Marsham* 9720-9728.

Mullens, Rev. Joseph. (Analysis of his Evidence).—Has been above fourteen years in India, as a missionary of the London Missionary Society; resided chiefly in Calcutta, but travelled also very much in the interior, 7105-7109——Has written some works on India, and has largely studied the general questions affecting the welfare of the community, 7110, 7111——Refers to certain memorials and petitions from missionaries and others, in the preparation of which he has taken part, 7111-7114.

Sundry advantages anticipated as regards the natives, the European community, and the Government, from an increased settlement of Europeans in India, 7115-7118——Better character of the press if there were more Europeans; it has hitherto remained very defective in many respects, 7115, 7116——There are many obstacles to successful

Reports, 1857-8—*continued.*

Mullens, Rev. Joseph. (Analysis of his Evidence)—*continued.*

colonisation by the masses, the chief obstacle being the climate, 7119, 7120——Obstacle to successful settlement on the score of liability to intemperate habits, intemperance being now the besetting sin of European soldiers, pensioners, and others in subordinate capacities on the railroads, &c., 7120. 7294-7298.

Drawbacks upon successful settlement in the hills, although on the score of climate they present far greater inducements than the plains, 7121-7126. 7135-7140——Instances of unsuccessful attempts at colonisation and missionary settlements in different parts of India, 7125. 7291-7293——Unsuitableness of the East Indians as materials for colonisation, 7127-7129——Reference to the discharged soldiers, or pensioners, as a very low and intemperate class, the result very much of their idle life, 7130, 7131. 7203-7205. 7294. 7329-7334——Suggested removal of the pensioners to the hills, 7131——Some colonists may be obtained from the rearing of soldiers' children in the hills, 7132.

Illustration of the effect of the climate as shown by an examination of the lives and services of 250 missionaries; inference that where Europeans live moderately, the climate does not very rapidly injure them, 7133, 7134. 7299-7301——Indirect obstacle to settlement through the very bad law courts of the country, 7142. 7169——Also through the state of the land tenures, *ib.*——Also through the want of a proper tribunal or Legislative Council fairly open to the complaints of the settlers, *ib.*——More energetic, skilful, and enterprising character of the European settlers than of the natives, 7143.

Largely increased investments by Europeans in land since the removal of certain restrictions in 1833; 7144-7176——Number of settlers outside the Presidency towns, and altogether in Bengal and Agra, 7144-7147——Large increase of European settlers in Ceylon, and causes thereof, 7148-7152——Discouragement to settlement in India through the long delays in remedying many of the defects of which settlers and planters have complained, 7153.

Reference to a "Statement of the Ryots in the Zillah Nuddea," complaining of the oppression and injustice experienced by them, and by the Bengal ryots generally, at the hands of the native and European zemindars and indigo planters; witness believes that this document emanated directly and entirely from the natives themselves, that there is a great deal of truth in it, and that it is well worthy of the consideration of the Committee, 7154-7166.

More European magistrates are decidedly wanted, 7167——Reference to the testimony of other parties besides the ryots as to the evils of the indigo-planting system, 7168——Belief that many of the evils charged against the planters are forced upon them for want of a proper administration of justice, 7168, 7169. 7211——The inefficiency of the police has for years been a general source of complaint, yet little if anything has been done in the way of reform, 7170, 7171. 7307-7311.

Evil in the exclusively official constitution of the Legislative Council, 7172——Probable cause of the increased investments in indigo-planting, 7173——If capital and labour were properly applied to the soil, very remunerative results would follow, 7174, 7175——Increase of wages through the increased employment of capital, 7176. 7214——Respects in which the tenure of land is very insecure, operating thereby as a bar to settlement, 7177-7180. 7304, 7305. 7339——Grounds for the statement that the Government tax on the land in Bengal is very high, 7177. 7181-7186. 7312, 7313.

Advantage if opportunity were given to redeem the land tax, 7180. 7302, 7303——In India and Ceylon there are now 112,000 natives converted by the missionaries, 7187-7189. 7194——Belief as to the more moral and industrious character of the converts, as a whole, than of the natives; many of the nominal converts have, however, been a scandal to the natives, 7190-7196. 7335-7338——The general treatment of the natives by the Europeans has not presented Christianity to them in a very favourable light, whereas by kind treatment and Christian example they may be very greatly and favourably influenced, 7197-7202.

Obstacle to settlement through means of the families of the pensioners who intermarry with the natives, 7206-7208——Further statement in confirmation of the truth of the complaints of the ryots against the zemindars, 7209-7218——Injurious operation of the system of advances to the ryots, and of the forced cultivation comprised therein, so that the increased rate of wages is not so much benefit to the cultivators, 7212-7218. 7314-7319——The condition of the ryots on an estate depends greatly on the individual character of the zemindar, many of the English zemindars being very just, 7212-7214. 7316, 7317.

Means of the zemindars for exacting undue payments from the ryots, 7215. 7217-7223, 7224——Approval of the principle of the zemindary system, and of the perpetual settlement in Bengal, 7219. 7259-7267——The zemindars should be properly checked by law against unduly increasing the ryots' rent, or making other exactions, 7219-7224——Further evidence upon the subject of the English press and its defects; disapproval of its restriction by Government, 7225-7227. 7232-7254. 7322-7325——Operation of the native press; approval of some restriction upon it, 7228-7231. 7255-7258.

The

Reports, 1857-8—*continued.*

Mullens, Rev. Joseph. (Analysis of his Evidence)—*continued.*

The language of the courts in Bengal is, to a great extent, Hindostanee, which is not intelligible to the great mass of the Bengalese, 7268–7272——In Ceylon the use of the English language in the courts, with interpreters, gives very great satisfaction, 7273–7276——The introduction of the English language and of proper interpreters into the Mofussil courts would be an immense blessing, 7277——A large number of European officers would be required in order to carry out the use of the English language, 7277. 7288, 7289——Satisfaction rather than dissatisfaction on the part of the natives if the English language be introduced, 7278–7290.

Approval of a summary system of justice in the Mofussil upon the principle of the Small Cause Court at Calcutta, 7282–7289——The police should be under military organisation, 7306——The cess now paid by the zemindars towards the police should be administered in a different way, 7310, 7311——Necessity, if the English language be introduced into the courts, of a knowledge of the native language in the judges, in order that they may check the interpreters, 7326–7328.

[Second Examination.]—Particulars as to the English and East Indian population in Calcutta and throughout Bengal before the rebellion broke out; rapid advance of late years, 7340——Particulars as to the European population in Ceylon, and the progress of settlement there, *ib.*——Witness delivers in a petition by the missionaries to the Legislative Council relative to Mr. Grant's Sale of Land Bill, *ib.*

There are 105 missionaries in Bengal, and 450 in all India, 7343——The missionaries never interfere in regard to the administration of justice, but take an interest in the question of its improvement, 7344, 7345——The missionaries are on good terms with the civilians, who often attend their stations for Divine service, 7346–7348——The Hindoos are much more open than the Mahomedans to the arguments of the missionaries, 7350–7352.

Municipal Government. Advantage if the principle of municipal government or local self-government in certain matters were encouraged, *Theobald* 1019–1021.

Mutiny. The promotion of natives to high offices should not be encouraged until the mutiny is entirely over, *Waller* 4959——Complete surprise with which every one in India was taken by the mutiny; witness had not the remotest apprehension of an outbreak, *Marsham* 9615–9618. 9638–9649——Numerous opportunities of the European magistrates and of the collectors, as well as of the settlers, for becoming acquainted with the habits of the people, *ib.* 9618–9622——Impression that the mutiny was not owing in any way to our system of law, to the investigation into titles, or to any interference with religion, *ib.* 9708–9710. 9712. 9713——Opinion that the mutiny has been owing to a combination of causes, our social reforms having been a main cause, *Saunders* 10092–10095.

Mysore:

1. *Size and Population.*
2. *Great and growing Prosperity under British Government.*
3. *Obstacle to Settlement through Fear of Native Government.*
4. *Encouragement now given to European Settlers.*
5. *Tenure of Land.*
6. *Administration of Justice.*
7. *Climate.*
8. *Pre-eminent Claim of the Country upon the Settler.*
9. *Numerous Agricultural and other Resources.*
10. *Coffee.*
11. *Sugar.*
12. *Extent of European Settlement and Population.*

1. *Size and Population:*

Mysore is about the size of Ireland, and contains about 4,000,000 people, *Onslow* 6347——The population is less than 150 to the square mile, *ib.* 6867–6869.

2. *Great and growing Prosperity under British Government:*

Witness was for fourteen years in the Mysore Commission, *Onslow* 6340–6344——Sir M. Cubbon has been a Commissioner ever since 1832; he has lived in India for fifty-eight years, *ib.* 6359——Rapidly increasing population in consequence of the improved government, and the prosperity of the country, *ib.* 6479–6485. 6496——Illustration of the advantage of European example upon the natives; willingness generally of the latter to adopt improvements, *ib.* 6496. 6498, 6499——Instance of the people being obliged to import articles of consumption where, before European settlement, the people used to export their produce, *ib.* 6496, 6497. 6654.

Colonel Wilks as resident, and subsequently, General Cubbon as governor, have been very successful in their improvement of the country, *Onslow* 6507, 6508——Independent action of Sir Mark Cubbon as Commissioner; he is subject only to the Governor-general

Reports, 1857-8—*continued.*

MYSORE—continued.

2. *Great and growing Prosperity under British Government*—continued.

general in Council, *Onslow* 6521-6532——Further reference to the prosperous condition of Mysore, with a statement of the causes which have led to it, *ib.* 6542-6550——A main cause of the prosperity has been the formation, as in witness's district, of roads and bridges, in conjunction with the abolition or reduction of the excise duties, *ib.* 6547-6549.

Peace, prosperity, and order on the establishment of the Government in 1831 or 1832, as compared with the anarchy and misrule under the rajah's sway, *Onslow* 6549, 6550——Witness was at first one of four superintendents of division; he joined the Commission in 1840, *ib.* 6551——Oppressive taxes under the native governments, *ib.* 6485-6489——Abolition under the present system of Government of above 600 different taxes; ultimate rise, nevertheless, in the total revenue, *ib.* 6485-6492——Absence of thuggee in Mysore, *ib.* 6554——Large trade carried on; there are many native capitalists, *ib.* 6579-6582——Course pursued in exporting produce, *ib.* 6696-6698.

Prosperous condition of the ryots throughout Mysore; less destitution than in European countries, *Onslow* 6906-6909—— Great increase of revenue notwithstanding the abolition of numerous taxes adverted to as a proof of good administration, *ib.* 6910, 6911——The revenue system is the ryotwarree system; its satisfactory operation, *ib.* 6912. 6921——Further particulars as to the numerous taxes abolished and the great boon conferred thereby, *ib.* 6913-6918. 6923——System of Government hospitals and dispensaries in salutary operation, *ib.* 6919. 6920——Causes of the great progress in Mysore as compared with other parts of India; the fact of the Company's exchequer not being liable for improvements did not unduly influence the Commission, *ib.* 6936-6940.

3. *Obstacle to Settlement through Fear of Native Government:*

Bar to European settlement in Mysore or Coorg if they were restored to native government, or to the Mysore or Coorg rajahs, *Onslow* 6396-6399——Further reference to the possibility of Mysore being restored to native government as operating against European settlement, *ib.* 6672-6674. 6685. 6771——Some arrangement might be made with the Mysore rajah with a view to securing the rights of settlers, but witness would never feel safe under a native government, *ib.* 6928-6935.

4. *Encouragement now given to European Settlers:*

Witness, as a landholder and coffee planter, has perfect confidence in the present Government, under which no obstructions whatever are offered to settlers, *Onslow* 6677. 6682-6692. 6734-6739——Encouragement given by Government to settlement, *ib.* 6726-6728. 6860. 6879-6884.

5. *Tenure of Land:*

A proper title to land and immunity from arbitrary taxation should be secured to the colonists in Mysore, *Ouchterlony* 5283——Right of the Indian Government over the tenure of land, *ib.* 5495-5497. 5520.

Inducement to coffee cultivation through the power to hold the land in fee, *Onslow* 6035, 6036——Way in which coffee land in Mysore is obtained; it may be called a fee-simple tenure, *ib.* 6381——Liability to the land-tax in the case of all land where othe products than coffee are cultivated, *ib.* 6391-6394——Absence of obstacle to settlement in Mysore (supposing the present Government to be permanent), save on the score of the difficulty of acquiring land if held by the natives, *ib.* 6677-6695. 6735-6739——Absence of obstacle to native cultivation in Mysore, *ib.* 6735-6739——Statement of the terms on which witness holds his land; they are the same terms as any native gets, *ib.* 6925-6928. 6941-6943.

6. *Administration of Justice:*

Simple and satisfactory system of administering justice; employment in each case of a punchayet or jury of free natives, *Onslow* 6567-6572. 6576——Doubt whether the present system of judicature would be satisfactory in the event of a large immigration of European settlers, *ib.* 6567. 6575-6579——Practice of witness, as a judicial officer, to write all his decrees in English, *ib.* 6574——The language of the courts was a corrupt Hindostanee, which is not the vernacular of the country and is not understood by the natives generally; means for checking deception hereon on the part of the interpreters, *ib.* 6583-6600.

Witness further approves of the system of administration of justice in Mysore; the non-regulation system is adopted, *Onslow* 6786. 6839-6850. 6966-6970——There are no revenue cases tried, *ib.* 6787-6790——Illustration of the success of the non-regulation system, as in Mysore, *ib.* 6966-6970——Power of the Commissioner to inflict capital punishment; it was rarely exercised, *ib.* 6971-6975.

7. *Climate:*

Reports, 1857–8—*continued.*

MYSORE—continued.

7. *Climate:*

Very agreeable climate during eight or nine months of the year, *Ouchterlony* 5283–5284——Prevalence of fever at Seringapatam and other places; the fever is at times very destructive, but Bangalore and many parts of the country are on the whole very healthy, *Onslow* 6352–6359——The present Commissioner of Mysore has lived in India for fifty-eight years, *ib.* 6359, 6360——Cool and pleasant climate in Mysore, especially at Bangalore; the country is very high, *ib.* 6400–6403——Amount of rainfall in Mysore, *ib.* 6440——Range of the thermometer, *ib.* 6441–6443.

Further particulars relative to the climate; it is very delightful and salubrious in some parts, but on the whole it is not suitable for the permanent settlement of Europeans, *Onslow* 6772–6785.

8. *Pre-eminent Claim of the Country upon the Settler:*

The Mysore country might, under certain conditions, become one of the most popular in India for emigration and permanent settlement, *Ouchterlony* 5285——Mysore is peculiarly well adapted for European colonisation, that is, for temporary colonisation, *Onslow* 6345–6351——Wages are very low, and there is a great want of capital, so that European capital would be a great benefit, *ib.* 6348–6351——The character of the people is very good; they are well disposed towards European settlers, *ib.* 6493–6495, 6500–6502——By paying wages of 3 *d.* a day, labour may be had in abundance, *ib.* 6760–6763——Opinion that Mysore and Coorg are the two most attractive districts in India, as regards settlement, *ib.* 6770, 6771. 6806.

9. *Numerous Agricultural and other Resources:*

Enumeration of some of the chief agricultural resources of the country; these are very numerous, *Ouchterlony* 5283.

In the cultivation of coffee and sugar more especially, but also in that of cotton, tobacco, silk, &c., European capital may find a profitable investment in Mysore, *Onslow* 6363–6371. 6395——A great part of Mysore is very fertile, *ib.* 6367——The chief grain produced is ragi, but wheat and rice are also grown, *ib.* 6368, 6369——Varying character of the soil, *ib.* 6404–6406——Enumeration of the chief products of country, in addition to coffee and sugar, *ib.* 6408–6412. 6422. 6444–6463.

Excellent breed of cattle in Mysore; particulars hereon as to a large Government farm where there have been as many as 30,000 head of cattle, which are largely used in the Madras army, *Onslow* 6411–6421——Very pure wool produced, the merino breed of sheep having been introduced by Sir Mark Cubbon, *ib.* 6422–6425——Manufacture of cumlies, which are a sort of blanket or camlet, *ib.* 6437——Excellent carpets manufactured at Bangalore, *ib.* 6437–6439——Variety of fine timber in the country, *ib.* 6444——There are cocoa nuts in abundance; they are very valuable, *ib.* 6444. 6446, 6447——There are large forests of excellent gamboge, which only requires proper preparation, *ib.* 6445.

There are many kinds of European vegetables and fruits, *Onslow* 6448——Very fine breed of horses, *ib.* 6448, 6449.——The mineral products are iron, earth-salt, and saltpetre; gold dust is also found in small quantities, *ib.* 6450——The iron is of very good quality, but there is a great want of fuel for smelting, *ib.* 6451–6461.

There is a great deal of waste land which might be brought into cultivation by the removal of certain impediments, *Onslow* 6614–6616——The real resources of Mysore are not generally known to merchants, *ib.* 6671——Further statement that there is a large quantity of fertile land in Mysore which may be colonised, in a qualified sense, by Europeans, *ib.* 6863–6867——The grain used as food is as sustaining as rice, *ib.* 6870, 6871.

10. *Coffee:*

Facilities for the production of coffee, &c. under British superintendence, *Baikie* 756–760. 837–839——The duty levied on coffee has debarred many persons, including witness, from cultivating it there, *Fowler* 5667. 5674–5676. 5688——Suitableness of the Mysore country for an extended cultivation of coffee, *ib.* 5677–5686.

Number of Europeans and native cultivators of coffee in Mysore; witness has some coffee plantations there, *Onslow* 6371–6373. 6380——Excellent quality and high price of the Mysore coffee, *ib.* 6374–6376——Localities in which the coffee is principally grown, *ib.* 6377–6379——There is no land-tax in the case of coffee plantation, but there is an excise duty upon the produce; popularity of this duty, *ib.* 6382–6390. 6393–6394——Increased consumption of coffee by the natives and by the European troops, *ib.* 6431, 6432.

Increase of about 1,600 per cent. in the export of coffee from Mysore since 1834, *Onslow* 6433–6435——Effect of reducing the duty on coffee to increase the export, *ib.* 6435——Witness found the cost of production of coffee to be about 10 *s.* per cwt., *ib.* 6752–6755——The cost of transit to Bombay was about 4 *s.* 6 *d.* per cwt., *ib.* 6756–6758——Witness's estate is from 800 to 1,000 acres, *ib.* 6902.

 11. *Sugar:*

Reports, 1857-8—*continued.*

MYSORE—continued.

11. *Sugar:*

Successful cultivation of cane sugar on the lands irrigated by the tanks; large increase anticipated if the canal system of irrigation be introduced, *Onslow* 6635-6648. 6701. 6710-6717.

12. *Extent of European Settlement and Population:*

Already numerous Europeans have settled on coffee and sugar estates, *Ouchterlony* 5283——In witness's division there are five or six European or Eurasian cultivators of coffee, *Onslow* 6372, 6373——Very few instances of British settlement, notwithstanding that no obstacles are offered to settlement, *ib.* 6718, 6719——Large increase of European population, especially at Bangalore, where pensioners from European regiments have largely settled, *ib.* 6772-6774.

See also *Iron. Irrigation*, 1. 4. 6. *Police*, V.

N.

Native Army. Impolicy of keeping up a large native army in India, *Saunders* 10217, 10218——Suggestions for the attachment of a certain number of natives to the European regiments, in lieu of a native army, *Ouchterlony* 5548.

Native Capital. Large amount of native capital in India, which is absorbed in some way, and disappears from circulation, *Ouchterlony* 5466.

Native Character. General dishonesty of the native character, more especially in Bengal, *MacNair* 2019. 2074-2087. 2404-2407. 2480-2483——There are, however, many intelligent and trustworthy natives, *MacNair* 2404. 2481; *Wise* 3087——Witness has a better opinion of the moral character of the Hindoos than of the Mussulmans, *Wise* 3162, 3163——There are but few very intelligent and advanced-minded natives in India, *Mackenzie* 3802-3805——The Bengalee is not, either mentally or morally, in any way inferior to the native of the Upper Provinces, *Waller* 4838——Belief that the character of the natives is very favourable to European settlement; they are mild, docile, and gentle, and capable of being trained to everything that is good, *ib.* 4888. 4961——In a physical sense only are the Bengalese at all inferior to the people of Upper India, *ib.* 4978.

After a time witness never had the slightest trouble with the natives, *Fowler* 5742-5744, 5784——Greater deference and consideration shown by the natives to Europeans in proportion to their rank and wealth, *Warden* 6195-6197. 6206-6208——The natives of India always appreciate the settlement of just and well-conducted Europeans, but are quick to resent ill-treatment on the part of ignorant or oppressive settlers, *Onslow* 6501-6504——Witness considers that the natives possess powers of mind as great as are possessed by Europeans, *Warden* 7459——The natives in Bombay are patient, docile, and intelligent, with great aptitude for the mechanical arts, *Wingate* 7731——Readiness of the natives to adopt European improvements, *ib.* 7731-7738.

Constant practice of the natives of India to resort to bribery, falsehood, and perjury; these practices are considered meritorious rather than otherwise, and form a general rule from which there are few exceptions, *Landon* 8438-8446—— Invaluable advice given to witness on going to India; viz. never to trust a native out of his sight, *ib.* 8446. 8456——Great impediments to successful European settlement by reason of the false and dishonest character of the natives; illustration of this in witness's case, *ib.* 8592-8605. 8678, 8679. 8706-8709——Fraudulent conduct of some native brokers at Bombay in the matter of some cotton sent by witness from Guzerat, *ib.* 8596-8603——Further statement that native dishonesty is by no means confined to the lower classes, *ib.* 8655-8658.

Witness believes that the native character generally is improving, *Mills* 9064, 9065——Low standard of morality in the native character, and malpractices resorted to in order to evade the law, *Bidwell* 9270——Witness cannot say that the moral condition of the people has very much improved since 1831, *Marsham* 9418.

The natives in the North-western Provinces are naturally most corrupt and false, *Saunders* 9876, 9877. 10113-10115——Opportunity taken by native officials, in official correspondence, to insult Europeans through their position not being properly defined, *ib.* 9891-9895——Physical and moral superiority of the Hindoos in the North-west Provinces over the Bengalese, *ib.* 9901-9905——The Mahomedans have always been much more inimical than the Hindoos to British rule, *ib.* 10075. 10088, 10089——Fitness respectively of Mahomedans and Hindoos for employment by settlers, *ib.* 10076-10079. 10113-10115——Nothing is simpler than for the capitalist to be on good terms with the natives; the reception of Europeans going to re-settle would be favourable, save on the part of the Mahomedans, *ib.* 10259-10264.

See also *Administration of Justice* (*Mofussil*). *Education of Natives. Native Officials. Police.*

Native

Reports, 1857-8—*continued.*

Native Influence. The mischievous influence of the native official is exercised more or less over all European officers, however high their positions, *Warden* 6110-6113. 6272-6274. 7064-7097——Belief that the European officers in the Bombay Presidency are not generally under the influence or in the hands of the native officials, *Wingate* 7794*. 7818, 7819——Dissent from the statement that the civil servants generally are more or less under native influence, *Mills* 9071-9079——It is scarcely possible for any European in India to shake off the influence of the natives around him, *Marsham* 9620, 9621.

See also *Administration of Justice* (*Mofussil*), VIII.

Native Judges. See *Administration of Justice* (*Mofussil*). *Native Officials.*

Native Languages. See *Civil Service*, 2. 3.

NATIVE OFFICIALS:

1. *Improper Care in the Selection of Native Servants.*
2. *Unfitness generally of the Natives for Public Employment.*
3. *Recommended Substitution largely of Europeans for Natives.*
4. *Recommended Increase rather than Decrease of Native Employment.*

1. *Improper Care in the Selection of Native Servants:*

Expediency of greater care in the selection of native servants; the Government has not done justice in this respect, *Theobald* 951. 954, 955.

2. *Unfitness generally of the Natives for Public Employment:*

Evidence as to the want of morality and honesty in the native subordinate officials, and in the native character generally; argument therefrom in favour of the extended employment of Englishmen of good moral qualifications in the administration of justice, *Tremenheere* 341. 364, 365. 382-386. 401-403. 425-443. 452-459. 472-478. 487, 488——Difficulty in remedying the inefficiency of the police or of the judicial system on account of the badness of the tools with which the Government are obliged to work, *Auld* 1330-1337. 1390-1393. 1428——No improvement in administration arises from the initiative of the natives, *Freeman* 1818.

Statement as to the dishonesty of the natives, more especially in Bengal, and their consequent unfitness for offices of trust, *MacNair* 2019. 2074-2087. 2404-2407. 2480-2483——Mistrust of the zemindars in the native character, *ib.* 2019. 2080——Distrust of Mr. Halliday in the lower class of natives, *ib.* 2080. 2394, 2395——In the interior the natives are not of a class fit for permanent employment, *ib.* 2595.

Corrupt character of the native officials; corruption in fact is looked upon as a perquisite of authority, and is not viewed as a disgrace, *Mackenzie* 3587. 3593-3598. 3808——Statement by certain ryots in Bengal as to the bribery and corruption of the native officials, *Mullens* 7159——The native uncovenanted servants are in every department morally unfit for their position, notwithstanding their education, *Landon* 8460-8463——Evidence in further disapproval of the employment of natives in offices of trust, or as heads in any departments whatsoever, *ib.* 8567-8591. 8652, 8653. 8666-8673. 8696-8701——Disappointment felt generally with the result of the official advancement of natives, *ib.* 8589, 8590——Natives cannot be fitted for the higher offices until after the lapse of a very considerable time, *ib.* 8723.

3. *Recommended Substitution largely of Europeans for Natives:*

Improved administration if there were a greater number of European officials or superintendents, *Tremenheere* 339-341. 449-451; *Theobald* 937-941. 951-954; *Auld* 1390. 1393. 1418. 1455; *MacNair* 2576, 2577; *Wingate* 7775-7779; *Landon* 8667, 8698. 8700; *Marsham* 9776; *Saunders* 9896-9899. 10108-10112. 10201-10206.

Statement in favour of substituting Englishmen for natives in certain Government situations, and of confining the employment of the latter to the inferior appointments, *MacNair* 1979-2059. 2513-2517; *Wise* 2927, 2928——Consideration of objections to the suggestion that certain offices now filled by natives should be bestowed upon Europeans, *MacNair* 2070-2086. 2317-2327——Consideration of the views of sundry high authorities in favour of the principle of throwing open higher appointments to the natives, *ib.* 2080-2087. 2388-2396——Witness prefers the employment of Europeans to natives chiefly on the score of the greater morality, *ib.* 2586-2588——Approval of a substitution of Europeans for natives in some of the higher public situations, *Dalrymple* 3458-3461.

Expediency of confining the employment of natives to subordinate positions in the several departments, and of placing a European at the head of every department, *Landon* 8453-8458——Approval of native subordinate officials; they are efficient when overlooked, *ib.* 8453, 8454. 8697. 8701——The natives, although not fitted for judicial offices, might be employed in the management of estates and in customs appointments. *Saunders* 10090, 10091. 10111, 10112.

Reports, 1857-8—*continued.*

NATIVE OFFICIALS—continued.

4. *Recommended Increase rather than Decrease of Native Employment:*

Political grounds upon which witness objects to the appointment of natives to the higher offices, *Baillie* 4587, 4588——Objection on political grounds to the exclusion of natives from the office of sudder ameen, &c., *ib.* 4589-4594——Approval of the extended employment of natives and of opening some higher offices to them, *Waller* 4879. 5091——Witness considers that under a proper system, natives may be made very efficient public officers, *Wingate* 7776, 7777. 7780——The appointment to offices above that of the head karkoon should remain very much as at present, *ib.* 7782. 7785——Offices of high trust and emolument should be open to natives, if found qualified by examination, *ib.* 7860. 7864.

Disapproval of any greater exclusion, than at present, of natives from offices of trust, *Miles* 8840-8846——Increased employment lately of the modern-educated natives, *ib.* 8852——It is not the universal opinion of the Europeans in India that the employment of natives in offices of trust has been altogether a failure, *ib.* 9066-9069——Expediency of continuing the employment of natives as responsible officers, *ib.* 9070-9072.

Impolicy and injustice of any attempt to rule 150,000,000 of people, without opening to them some offices of distinction and responsibility in their own land, *Marsham* 9409, 9410. 9414. 9423. 9775——Failure of the former system of exclusive employment of European agency, which led Lord William Bentinck to introduce in 1831 the system of employing natives in offices of trust and responsibility, *ib.* 9409, 9410——Circumstance of the grandson of Tippoo Saib having applied for an appointment as deputy magistrate, *ib.* 9419——Great difficulty of Government, as regards native agency, on account of the utter want of morality which pervades all classes of natives, *ib.* 9420-9422.

Preference as regards public employment should be given to Hindoos as compared with Mahomedans; concurrence hereon in the views of Mr. Charles Raikes, as to the faithless and disloyal character of the latter, *Marsham* 9553-9559——Further statement as to the developement of native employment by Lord W. Bentinck; the experiment has been anything but a failure, *ib.* 9651-9656.

See also *Administration of Justice* (*Mofussil*). *Education of Natives.* *European Superintendence* (*Native Officials*). *Magistrates*, 3. *Police.* *Salaries.*

Native Pleaders and Attorneys. The native attorneys or mooktears should pass an examination in English, *Freeman* 1738. 1744——Contrast between the proper treatment of the mooktears or vakeels in the Sudder Court at Calcutta and their improper treatment in the Mofussil courts, *ib.* 1851——Respects in which the native advocates are chiefly inefficient, *Baillie* 4776-4779——Incompetent character of the native pleaders; they should undergo a short apprenticeship, *Waller* 4940-4942——Natives should be allowed to plead in the Supreme Court without first being called to the bar in England, *ib.* 4943-4945——Examination as regards the young men educated at the Elphinstone and Poonah colleges to the effect that some of them are equal to the civil servants from Haileybury, and possess proper qualifications for the office of pleader, *Warden* 6105-6108. 6262-6264. 7449-7461. 7514-7527.

Native States. In many of the native states the system of taxation is very oppressive, *Wingate*, 7701, 7002. As regards the condition of the native states any property or wealth is limited to the governing and upper classes, whose aggrandisement is the effect of the oppression and spoliation of the great mass of the people, *Landon* 8654-8665. 8730.

See also *Coorg.* *Mysore*, 3.

Natives, Treatment of. Importance of the civil servants being strongly impressed with the expediency of treating the natives with kindness and consideration, *Hawkins* 4395-4404——The general treatment of the natives by the Europeans has not presented Christianity to them in a very favourable light, whereas by kind treatment and Christian example they may be very greatly and favourably influenced, *Mullens* 7197-7202——Kind treatment experienced generally by the natives at the hands of the Europeans; the feelings of the latter have, however, undergone a complete change since the mutiny, *Marshaw* 9748-9752.

Reports, 1857-8—*continued.*

NEILGHERRY HILLS (MADRAS)—continued.

1. *Generally as to the Facilities for Settlement:*

The Neilgherries are between 700 and 800 square miles in extent, and some of the soil is very good, *Baikie* 746——Absence of any obstacles on the part of Government to European settlement, *ib.* 779-783——Facility for raising coffee in the Neilgherries; doubt whether other products can be raised with a commercial profit, *ib.* 836, 837. 844, 845.

Of all the hill districts in the south of India the Neilgherries are by far the most important and valuable; details hereon, *Ouchterlony* 5255 *et seq.*——Great attractions presented to the capitalist and the emigrant by the numerous agricultural resources of the Neilgherries, *ib.* 5255. 5261-5278—— Numerous articles already largely produced in the district, *ib.* 5265——These is in some parts cultivable soil fifteen feet thick, *ib.* 5277 ——There are about 200,000 acres of perfectly cultivable land, which are now waste, *ib.* 5278.

Great usefulness of the survey of the Neilgherries, *Ouchterlony* 5314——Witness produces a map of the Neilgherries, which exhibits all the features of the district, *ib.* 5400 ——Facility of cultivation by means of subsoil spade husbandry; abundance of labour available for the purpose, *ib.* 5450-5452——Witness anticipates that although many persons might retire with fortunes an equal number would remain and colonise, *ib.* 5462.

Witness never came in contact with the police in the Neilgherries, and never felt the want of police; nor was he ever in a court of justice, *Fowler* 5722-5728. 5775-5779. 5831-5834. 5894——Varying character of the soil; that which has been cultivated by the natives requires renovation by manuring, *ib.* 5840-5860.

2. *Beer:*

Particulars as to the good quality and low price of some beer brewed in the Neilgherries; statement hereon as to Government not having taken any steps to carry out a suggestion by witness for the establishment of a brewery, *Ouchterlony* 5268. 5271-5274. 5389, 5390. 5395-5395. 5543-5546.

3. *Coffee:*

Facilities for the production of large quantities of coffee with considerable profit to European cultivators; excellent coffee now produced, *Ouchterlony* 5262-5265.

Witness has a coffee plantation in the Neilgherries, *Fowler* 5583——He commenced with about 100 acres, and has now six or seven hundred acres, *ib.* 5602—— Gradual increase of coffee plantere in the Neilgherries; at first the cultivation was unsuccessful, but now it is very profitable, and in witness's case has been extremely so, *ib.* 5616-5621. 5729-5731. 5752, 5753——British capital may be very profitably invested in coffee-growing, *ib.* 5622, 5623. 5708-5717. 5734, 5735——Average produce and value per acre of coffee; both produce and quality are equal to the Ceylon coffee, *ib.* 5708-5710. 5717. 5800-5802—— Besides the forest land there is not much other land in the Neilgherries, &c., available for coffee cultivation, *ib.* 5718-5721——Witness cleared very large timber off his land and brought it into bearing for 16*l.* an acre, *ib.* 5852-5854.

4. *Cotton:*

Facilities for the cultivation, under European superintendence, of large cotton plantations, *Ouchterlony* 5261——Witness first went to the Neilgherries with a view to the cultivation of cotton, *Fowler* 5594, 5595. 5601.

5. *Fuel:*

Abundance of peat fuel now procurable in the Neilgherries, *Ouchterlony* 5258.

6. *Hops:*

Incomplete experiments by witness in hop-growing, *Ouchterlony* 5269, 5270—— Further reference to the experiment by witness in hop-growing; it was successful as far as it went, *ib.* 5391, 5392.

7. *Tea:*

Successful experiments of a tea plantation, *Ouchterlony* 5255-5258——Grounds for concluding that tea may be cultivated with commercial success, *ib.* 5436-5442.

8. *Timber:*

Rapid growth of peculiar kinds of trees, *Ouchterlony* 5265-5268.

9. *Particulars as to the Climate:*

Advantage of the Neilgherries on the score of temperature, and of the comparatively small fall of rain, *Baikie* 738-740—— Doubt whether Europeans can settle without deterioration in course of time, *ib.* 758. 771-774. 834. 835——There are three distinct climates; character of the climate as compared with England, *ib.* 763. 776-778——The Neilgherries are 7,365 feet above the level of the sea, *ib.* 775——There are diseases peculiar to the Neilgherries, *ib* 842, 843.

Reports, 1857-8—*continued.*

NEILGHERRY HILLS (*MADRAS*)—continued.

9. *Particulars as to the Climate*—continued.

The rains on the Neilgherries are not excessive *Ouchterlony* 5251. 5293——Excellence of the climate; it is superior to anything in England, and has, in fact, several distinct climates, *ib.* 5258. 5293, 5294——Witness would rather reside in the Neilgherries than in England, *ib.* 5462——Fall of rain respectively at Ootacamund and Kotergherry, *ib.* 5559.

The climate of the Neilgherries is exceedingly healthy, *Fowler* 5585-5591. 5770-5774. 5861——Witness's children thrive very well in the Neilgherries, *ib.* 5770-5774.

10. *Tenure of Land:*

Nature of the land tenure; rights respectively of Government and of the natives, *Baikie* 783. 786, 787. 790-794. 823-828——Objection to the acknowledgment by Government of the claims of the todars to an interest in the lands on the Neilgherries, *Ouchterlony* 5570-5574——Witness has no tenure of land, and does not pay any land-tax, but is threatened with one; the land was originally purchased at a very low rate from the Rajah of Nellumboor, *Fowler* 5603-5615. 5785-5796. 5862-5867——Propriety of the non-payment of land-tax; witness pays an export duty, and expends large sums in labour, *ib.* 5624-5631. 5752-5754. 5785-5796.

11. *Want of Railway and Road Communication:*

Considerable importance of branch lines of railway to the foot of the Neilgherries and other hill districts, *Baikie* 765, 766——Fertility of several districts within easy reach of the Neilgherries if branch lines of railway be constructed, *Ouchterlony* 5261——Reference to a recommendation by witness that the Madras Railway should be brought to the top of the Neilgherries, *ib.* 5296——Great want of roads from the Neilgherries to the coast; survey by Government of a road from Ootacamund, *Fowler* 5632-5654. 5766. 5803——Anticipated willingness on the part of successful capitalists in the Neilgherries to submit to a rate for making roads, *ib.* 5768, 5769.

12. *Progress of Settlement:*

Limited extent to which cultivation was carried in the Neilgherries when witness was last there, that is in 1842; *Baikie* 764. 790. 804-810——Immense increase of late years in the European and native population, *Ouchterlony* 5259-5261——Statement showing the great increase of emigrants to the Neilgherries between 1848 and 1856; *ib.* 5396-5399——Different causes to which may be attributed the limited settlement of Europeans, *ib.* 5521-5523.

13. *Schools:*

Excellent European schools in the Neilgherries, *Baikie* 761, 762——Explanation as to the failure of an attempt, by the late Sir H. Lawrence, to establish schools, *Ouchterlony* 5299-5302. 5458-5460.

14. *Advantages as a Military Station or Depôt:*

Great advantage if there were military stations in the Neilgherries, *Baikie* 747. 748——Selection of the Neilgherries by Government in 1819 as a sanitary station for officers, *ib.* 791-797——Favourable effect of the climate of these hills upon the officers and men under medical charge of witness; the latter, however, suffered from not being under proper discipline, *ib.* 811-817. 823——Eminent advantages of the Neilgherries, in a sanitary as well as a strategetical point of view, as a depôt for European troops, *Ouchterlony* 5255. 5295-5298.

15. *Advantages as the Seat of the Madras Government:*

Evidence in favour of removing the seat of government to the Neilgherries, and of establishing there the chief civil and military departments of the State, *Ouchterlony* 5295, 5296.

16. *Details in Statistical Memoir by Captain Ouchterlony:*

Statistical memoir by Captain Ouchterlony of a survey of the mountains; ample details therein as to the soil, climate, products, &c. of the district, *App.* (*Fourth Rep.*) *p.* 263-289.

See also *Gold.*

Nepaul. The valley of Nepaul is only about 4,000 feet above the level of the sea, *Hooker* 661——Obstacles to British trade with Nepaul through the exclusive character of Jung Bahadoor's government, *R. and H. Schlagintweit* 6998. 7054-7058.

Nerbudda Territory. Reference to a certain letter, dated Jubbulpore, 3d May 1858, which contains much valuable information regarding the resources of the Nerbudda Valley, *Ouchterlony* 5401——Failure of an attempt to establish a missionary settlement on the Nerbudda, *Mullens* 7125.——*See* also *Hemp. Iron.*

Nerinjepett Anicut (*Madras*). Particulars relative to the Nerinjepett anicut on the Upper Cauvery, an old work now in decay; means for restoring it, *Ouchterlony* 5372.

Non-Regulation

Reports, 1857–8—*continued.*

Non-Regulation Provinces. See *Administration of Justice* (*Mofussil*), IV., XI. 7. *Government*, 4.

North Western Provinces. Witness was in the North Western Provinces in the Allygurh district as an indigo planter and merchant from 1827 till 1852, *Saunders* 9789–9793. 9795——Very few European settlers in the North Western Provinces, *ib.* 9794. 9796——Advantage anticipated from the facility of transport to be afforded by the East Indian Railway, *ib.* 9813, 9814. 10084–10086. 10207–10211——The government at Agra have always shown a wish to encourage settlement, *ib.* 9831——Power of the natives to protect themselves from extortion and oppression, *ib.* 9862——Physical advantages of the North Western Provinces as compared with Bengal, *ib.* 9908–9910.

There is no uncultivated land where witness has been, *Saunders* 9955——Necessity of thorough experience in settlers before they can with safety make advances of capital, *ib.* 10118, 10119——Witness, though successful as a capitalist, would not advise other Europeans to embark their capital in the North West Provinces, *ib.* 10122–10125——The close and excellent superintendence carried out by the Lieutenant-governor has been productive of great advantage, *ib.* 10159–10161.

See also *Administration of Justice* (*Mofussil*). *Civil Service*, 7. *Climate. Cotton*, II. 6. *European Capital and Skill. Hill Districts. Indigo and Indigo Planters*, 2. *Irrigation*, 2. 4. 6. *Land Revenue Settlement, and Tenure and Sale of Land*, IV., VI. *Police*, VI. *Roads*, IV. *Ryots. Sugar. Tea. Wheat.*

Nuddea Rivers. Importance of proper measures being adopted for keeping one of the Nuddea rivers navigable throughout the year; steps taken on the subject, *Theobald* 989——An improvement of one of the Nuddea rivers would be very beneficial, but less so in consequence of the railways, *Freeman* 1618–1623. 1938, 1939——Very slight Government works in improving the state of the rivers; shifting course of these rivers adverted to hereon, *ib.* 1950–1958.

Very neglected state of the rivers, and great impediment, and abuse thereby, as regards the transit of commerce, *MacNair* 2008–2010. 2297,2298——Character of the Nuddea rivers as regards their size and shifting channels, *ib.* 2289–2296——An improvement is urgently required in the state of the rivers, but Government has not taken any effectual steps in the matter; the required improvement would be expensive, but might be defrayed out of the tolls, *Dalrymple* 3258–3265. 3386–3390. 3436–3442. 3484–3495. 3559–3563. 3571–3573——In witness's time all was done that could be done to deepen the Nuddea rivers, *W. H. Martin* 9141.

Number of Settlers. Very slight progress of British settlement in India, *Tremenheere* 7——Doubt as to there being any proper record of the number of British settlers, *ib.* 8–10——There are many more than 300 settlers altogether in India, *Dalrymple* 3331.

See also *Bengal. Bombay.*

Nynee Tal (*North West Provinces*). Advantage in point of health if a European regiment were stationed on the hills at Nynee Tal or Almorah; inconvenience in other respects, *Saunders* 10138–10145.

O.

Omlah. See *Administration of Justice* (*Mofussil*), VIII.

Onslow, Colonel William Campbell. (Analysis of his Evidence).—Was for twenty-eight years in different parts of the Madras Presidency; for fourteen years of that time was in the Mysore Commission, 6340–6344——Considers that Mysore is peculiarly well adapted for European colonisation, that is, for temporary colonisation, 6345–6351——Permanent settlement is not practicable in India, 6346——Mysore is about the size of Ireland, and contains about 4,000,000 people, 6347——Wages are very low, and there is a great want of capital, so that European capital would be a great benefit, 6348–6351.

Prevalence of fever in Mysore; at Seringapatam and other places the fever is at times very destructive; but Bangalore and many parts of the country are on the whole very healthy, 6352–6359——The present Commissioner of Mysore has lived in India for fifty-eight years, 6359, 6360——The railway will be of great use in developing the resources of the country, 6361, 6362—— In the cultivation of coffee and sugar more especially, but also in that of cotton, tobacco, silk, &c., European capital may find a profitable investment in Mysore, 6363–6371. 6395.

Very excellent cotton grown upon an experimental farm which witness had charge of in the Nugger district, 6363–6366. 6425–6430——A great part of Mysore is very fertile, 6367——The chief grain produced is ragi, but wheat and rice are also grown, 6368, 6369——Number of European and native cultivators of coffee in Mysore; witness has some coffee plantations there, 6371–6373. 6380——Excellent quality and high price of the

Reports, 1857-8—*continued.*

Onslow, Colonel William Campbell. (Analysis of his Evidence)—*continued.*

Mysore coffee, 6374-6376——Localities in which the coffee is principally grown, 6377-6379.

Way in which coffee land in Mysore is obtained; it may be called a fee-simple tenure, 6381——There is no land-tax in the case of coffee plantations, but there is an excise duty upon the produce; popularity of this duty, 6382-6390. 6393, 6394——Liability to the land-tax in the case of all land where other products than coffee are cultivated, 6391-6394——Bar to European settlement in Mysore or Coorg if they were restored to native government, or to the Mysore or Coorg rajahs, 6396-6399——Cool and pleasant climate in Mysore, especially at Bangalore; the country is very high, 6400-6403.

Varying character of the soil, 6404-6406——Improved character of the cotton accordingly as it is cultivated and picked with care, 6407——Enumeration of the chief products of the country, in addition to coffee and sugar, 6408-6412. 6422. 6444-6463——Excellent breed of cattle in Mysore; particulars hereon as to a large Government farm where there have been as many as 30,000 head of cattle, which are largely used in the Madras army, 6411-6421——Very fine wool produced in Mysore, the merino breed of sheep having been introduced by Sir Mark Cubbon, 6422-6425.

Successful experiment by witness in growing tea in his garden in Coorg, 6426——The natives would soon consume tea largely if it were produced in sufficient quantities, 6431——Increased consumption of coffee by the natives, and by the European troops, 6431, 6432——Increase of about 1,600 per cent. in the export of coffee since 1834; 6433-6435——Effect of reducing the duty on coffee to increase the export, 6435——Inducement to coffee cultivation through the power to hold the land in fee, 6435, 6436.

Manufacture in Mysore of cumlies, which are a sort of blanket or camlet, 6437——Excellent carpets manufactured at Bangalore, 6437-6439——Amount of rainfall in Mysore, 6440——Range of the thermometer, 6441-6443——The mineral products are iron, earth-salt, and saltpetre; gold dust is also found in small quantities, 6450——The iron is of very fine quality, difficulty hereon through the want of fuel for smelting 6451-6461.

The effects of irrigation in Mysore are absolutely prodigious, 6464——Irrigation is the great desideratum in India; it is, combined with internal communication, the *sine quâ non* of cultivation and progress, 6464. 6536-6538——Information relative to the irrigation tanks in Mysore; immense number of these works; their size, state of repair, &c., 6465-6475——The tanks in ruins were found in ruins when British government was introduced, 6467. 6469, 6470——Means of irrigation besides tanks, 6475-6477——Varying practice as regards the charge for irrigation, 6478.

Rapidly increasing population of Mysore, in consequence of the improved government and the prosperity of the country, 6479-6485. 6496——Oppressive taxes under the native governments, 6485-6489——Abolition, under the present system of government, of 600 different taxes; ultimate rise, nevertheless, in the total revenue, 6485-6492——The character of the people in Mysore is very good; they are very well disposed towards European settlers. 6493-6495. 6500-6502.

Illustration of the advantage of European example upon the natives; willingness generally of the latter to adopt improvements, 6496. 6498, 6499——Instance of the people being obliged to import articles of consumption where before European settlement the people used to export their produce. 6496, 6497——The natives of India always appreciate the settlement of just and well-conducted Europeans; but are quick to resent ill-treatment on the part of ignorant or oppressive settlers, 6501-6504.

Information relative to the extent and character of the roads in Mysore; very favourable testimony on this point, 6505, 6506. 6513-6517——Numerous and excellent bridges, 6506——Colonel Wilks as Resident, and General Cubbon as Commissioner, have been very successful in their improvement of the country, 6507, 6508——Great want of harbours on the western coast for facilitating the export of Mysore products, 6509-6512——Measures taken for improving the harbour of Cochin, 6509.

Canals, as a means of navigation and irrigation, are of the utmost importance, 6517-6520. 6536-6538——Explanation that the tenure of land, as in Mysore, does not apply to Coorg, 6520——Independent action of Sir Mark Cubbon as Commissioner; he is subject only to the Governor-general in Council, 6521-6532——Great want of European medical men in Mysore, and throughout India; difficulty in remedying this want, 6533-6535.

Works of irrigation should be carried out through means of private companies, 6537——Reference to a scheme, with which witness is connected, for getting up an irrigation company; the Court of Directors have offered every encouragement in the matter, 6537. 6539-6541——Extract from Colonel Cotton's book on public works in India relative to the great benefits conferred and the large revenue returned by works of irrigation, 6537, 6538.

[Second Examination.]—Further reference to the prosperous condition of Mysore, with a statement of the causes which have led to it, 6542-6550——A main cause of the prosperity has been the formation, as in witness's district, of roads and bridges, in conjunction

Reports, 1857-8—*continued.*

Onslow, Colonel William Campbell. (Analysis of his Evidence)—*continued.*

junction with the abolition or reduction of the excise duties, 6547-6549——Peace, prosperity, and order on the establishment of the Government in 1831 or 1832, as compared with the anarchy, poverty, and misrule under the rajah's sway, 6549, 6550——Witness was at first one of four superintendents of division; he joined the Commission in 1840; 6551.

Improved character of the police in Mysore through their better superintendence; they are, however, still very defective, especially as detectives, 6552-6566. 6720-6723——Native police always must be very defective, as they are not to be trusted, 6552. 6560, 6561. 6566——The best means of improving the police is by increasing the European superintendence, 6562, 6563. 6724, 6725.

Simple and satisfactory system of administering justice in Mysore; employment in each case of a punchayet or jury of five natives, 6567-6572. 6576——Doubt whether the present system of judicature would be satisfactory in the event of a large immigration of European settlers, 6567. 6575-6579——In all cases where natives are concerned it is very inexpedient to introduce the English language into the courts, 6573, 6574. 6596, 6597——Practice of witness as a judicial officer in Mysore to write all his decrees in English, 6574——Large trade carried on; there are many native capitalists, 6579-6582——The language of the courts was a corrupt Hindostanee, which is not the vernacular of the country and is not understood by the natives generally; means for checking deception hereon on the part of the interpreters, 6583-6600.

Impossibility of a European labourer competing successfully with a native labourer, 6601, 6602——Advantage of European colonists or capitalists in being able to introduce science in cultivation, 6601-6603——Respects in which a European is a better trader than a native, 6604——Effect of European settlement to make the natives better agriculturists, 6605-6613——Witness is confident that irrigation would greatly improve the growth of cotton, 6609-6611.

Irrigation is a matter of science in cultivation, and is the one thing wanted to renovate India, 6611-6613. 6632-6634——There is a great deal of waste land in Mysore which may be brought into cultivation by the removal of certain impediments, 6614-6616——Great want of manure; means of remedying this, 6617-6622——Necessity of Government aid in connexion with private enterprise in carrying out works of irrigation; private enterprise being most important as a means of introducing capital and energy in the execution of the works, 6623-6630. 6810, 6817. 6951, 6952. 6961.

Inexhaustible supply of water for irrigation, 6631, 6632. 6651——The famines which now occur occasionally would be entirely prevented by a proper system of irrigation and navigation, 6632-6634. 6665——Successful cultivation of sugar in Mysore on the lands irrigated by the tanks; large increase anticipated if the canal system of irrigation be introduced, 6635-6648——Number and condition of the tanks further adverted to; the tank system can hardly be extended, 6638, 6639. 6643. 6648.

Further reference to the importance of the canals being navigable as well as irrigating, 6649, 6650——By means of a certain proposed canal ten millions of acres in the Bellary district may be irrigated, a large proportion of which is now waste, and upon which cotton, sugar, wheat, &c. may be grown, 6651-6653——Instance of increased consumption of produce and of the necessity of importing produce further adverted to, 6654——Irrigation will largely increase the cultivation of wheat, 6655——Advantage of canals over tanks in their being easily made to retain the water better, 6655, 6656——Certain crops for which irrigation is indispensable in Mysore, 6657, 6658——Much larger and more valuable produce per acre by means of irrigation, 6659——Great virtue of irrigation in the alluvial deposit it leaves upon the land, 6660-6664.

Want of harbours and of means of communication by sea along the western coast further adverted to, 6665-6670——The real resources of Mysore are not generally known to merchants, 6671——Further reference to the possibility of Mysore being restored to native government as operating against European settlement, 6672-6674. 6685. 6771——Similar obstacle to settlement in the case of Coorg, 6672-6674. 6771——Except the difficulty in procuring land, there is no practical obstacle to settlement in the Bellary district, 6675-6682.

Witness as a landholder and coffee planter has perfect confidence in the present Government, under which no obstructions whatever are offered to settlers, 6677. 6682-6692. 6734-6739——Absence of obstacle to settlement in Mysore (supposing the present Government to be permanent), save on the score of the difficulty of acquiring land if held by the natives, 6677-6695. 6735-6739——Course pursued in exporting the produce of Mysore, 6696-6698——Want of better facilities for reaching the places of export, 6699, 6700, 6818-6825.

Opinion that a great deal may be done in the profitable cultivation of sugar, 6701——Illustration of the improvements which may be carried out in the cultivation and cleaning of cotton, 6701-6704——Opening to European capitalists in buying up and preparing native cotton, 6701, 6702. 6740*——Greatly increased growth of Mexican cotton in the Dharwar country, 6703——Question as to the necessary degeneracy in India of the

Reports, 1857-8—*continued.*

Onslow, Colonel William Campbell. (Analysis of his Evidence)—*continued.*

Mexican or American cotton seed, 6704-6707——Great intelligence of some of the native merchants, 6708, 6709——Increased export of sugar from Mysore, although the Indian export generally may have decreased of late, 6710-6713——The Mysore sugar is all extracted from the cane, 6714-6717.

Very few instances of British settlement in Mysore, notwithstanding that no obstacles are offered to settlement, 6718, 6719——Emphatic denial of the statement that Government and its officials show a marked hostility to and jealousy of European settlers; in Mysore at least every encouragement has been given, 6726-6728. 6860——There are certainly as many as twenty European settlers in the Madras Presidency, 6729, 6730. 6860. 6872——Person and property are perfectly secure in Mysore; witness never heard any complaint of insecurity in Madras, 6731-6733.

Absence of obstacle to native cultivation in Mysore, 6735-6739——Necessity of irrigating cotton on a different system from sugar, rice, &c., 6740——Further statement as to the importance of an outlay in improving the harbours on the western or Malabar coast, 6741-6751. 6887-6891——Witness found the cost of production of coffee in Mysore to be about 10*s.* per cwt., 6752-6755——The cost of transit to Bombay was about 4*s.* 6*d.* per cwt., 6756-6758——By paying wages of 3*d.* a day, labour may be had in abundance, 6760-6763.

Great benefit to native capitalists if they had opportunities of investing in works of irrigation, 6764, 6765. 6810——Frequency of natives charging as much as thirty-six and fifty per cent. interest for loans to cultivators, 6766. 6768——Advance by a European settler of large sums at twelve per cent. on the mortgage of coffee plantations, 6766-6769——Opinion that Mysore and Coorg are the two most attractive districts in India as regards settlement, 6770, 6771. 6806——Large increase of European population in Mysore, especially at Bangalore, where pensioners from European regiments have largely settled, 6772-6774——Further particulars relative to the climate of Mysore; it is very delightful and salubrious in some parts, but on the whole is not suitable for the permanent settlement of Europeans, 6772-6785.

Witness further approves of the system of administration of justice in Mysore; the non-regulation system is adopted, 6786. 6839-6850. 6966-6970——There are no revenue cases tried in Mysore, 6787-6790——Means by which European superintendence may be spread over the police, 6791-6794——Strong testimony to the efficiency of the civil service of Madras, and of all India, 6795——Advantage if the districts in charge of the civil servants were largely reduced, 6797-6799——Decided approval of an abolition of the exclusiveness of the covenanted service, 6801.

Grounds upon which a Government guarantee of five per cent. is sought for in connexion with the proposed irrigation works in Madras, 6810-6817. 6951, 6952——Importance of an improvement of the harbour of Coompta, 6826-6832——Great benefit of a subsidy from Government in aid of steam communication along the coast and in connexion with the interior, 6834-6838——Advantage of an extension of banking facilities in India; how it might be effected, 6851-6858.

Stop to emigration from Madras if there were works of irrigation, 6861, 6862——Further statement that there is a large quantity of fertile land in Mysore, which may be colonised, in a qualified sense, by Europeans, 6863-6867——The population is less than 150 to the square mile, 6867-6869——The grain used as food is as sustaining as rice, 6870, 6871——Several different languages which obtain throughout Madras; Hindostanee is not generally spoken, 6873-6876.

The experiment of witness in growing cotton did not pay its expenses, but it was on a very small scale, and was not intended to do so, 6877, 6878——Further reference to the encouragement given by Government to settlement in Mysore, 6879-6884——Seeds generally deteriorate in India, 6886——The European superintendents of police should have some kind of magisterial authority, 6892-6896——As regards the introduction of the English language into the courts, witness considers the proposition impracticable and absurd, 6897-6899.

Reduced revenue if Government were to give up uncultivated lands to settlers without any assessment, 6900, 6901——Witness's estate in Mysore is from 800 to 1,000 acres, 6902——Ships do not often touch at Cochin or Mangalore, 6903, 6904——Obstacle to the growth of cotton on account of the uncertainty of the market price, 6905——Prosperous condition of the ryots throughout Mysore; less destitution than in European countries, 6906-6909.

Great increase of revenue in Mysore notwithstanding the abolition of numerous taxes, adverted to as a proof of good administration, 6910, 6911——The revenue system is the ryotwarree system; its satisfactory operation, 6912. 6921——Further particulars as to the numerous taxes abolished and the great boon conferred thereby, 6913-6918. 6923——Advantage of the abolition of transit duties in India generally, 6915-6918——System of Government hospitals and dispensaries in salutary operation in Mysore, 6919, 6920.

Suggestion

Reports, 1857-8—*continued.*

Onslow, Colonel William Campbell. (Analysis of his Evidence)—*continued.*

Suggestion that retired officers of the several Indian services be offered some inducements to settle, 6923, 6924——Further statement of the terms on which witness holds his land; they are the same terms as any native gets, 6925-6928——Some arrangement might be made with the Mysore rajah with a view to securing the rights of settlers, but witness would never feel safe under a native Government, 6928-6935.

Causes of the great progress in Mysore as compared with other parts of India; the fact of the Company's exchequer not being liable for improvements did not unduly influence the Commissioner, 6936-6940——Witness's former position under Government did not give him any advantages as a settler, 6941-6943——Great importance of facilities of communication further adverted to, 6944-6950.

Grounds for estimating an immense profit on the proposed works of irrigation; net profit of sixty-nine-and-a-half per cent. on all the outlay of the East India Company on their works, 6953-6957. 6962-6964——Obstacles to Government undertaking all the necessary works of irrigation, 6958-6961——Illustration of the success of the non-regulation system, as in Mysore, 6966-6970——Power of the Commissioner to inflict capital punishment; it was rarely exercised, 6971-6975.

Opium. Considerable attention bestowed by the natives upon the cultivation of opium, *Tremenheere* 55——The improvement in the cultivation of opium has been owing solely or mainly to native labour, *ib.* 493, 494. 512.

Ouchterlony, Captain John. (Analysis of his Evidence.)—Has been in India since 1834; was in the Madras Engineers, and held also several civil appointments; has been all over the East, 5240-5246——Mention of various hill districts in the south of India, which are well known to witness, 5247——Many of these hills have not been properly explored or surveyed, 5248, 5249——An elevation of about 4,000 feet, if near the sea, gives a fair climate for Europeans, but in the interior an elevation of about 6,000 feet is required, 5250——The rains on the Neilgherry hills are not excessive, 5251. 5293.

The several hill districts referred to are all adapted, in a greater or less degree, for European colonisation, 5252——If Europeans could, by means of railways, occasionally resort to hill stations in the south of India, they might without any physical deterioration superintend, and even initiate agricultural operations in the plains, 5252. 5254——Numerous instances of European colonisation in different parts of the East without loss of health, 5252-5254——Families or generations of Europeans could not, generally, exist on the plains of India, 5254——Illustration in exception to the rule that Europeans degenerate in the second and third generation in India, *ib.*

Of all the hill districts in the south of India, the Neilgherries are by far the most important and valuable; details hereon, 5255 *et seq.*——Great attractions presented to the capitalist and the emigrant by the numerous agricultural resources of the Neilgherries, 5255. 5261-5278——Eminent advantages of the Neilgherries, in a sanitary as well as in a strategetical point of view, as a depôt for European troops, 5255. 5295-5298.

Successful experiment of a tea plantation in the Neilgherries, 5255-5258——Abundance of peat fuel now procurable in the Neilgherries, 5258——Excellence of the climate in the Neilgherries; it is superior to anything in England, and there are in fact several distinct climates, 5258. 5293, 5294——Immense increase of late years in the European and native population in the Neilgherries, 5259-5261——Fertility of several districts within easy reach of the Neilgherries if branch lines of railway be constructed, 5261.

Facilities for the cultivation, under European superintendence, of large cotton plantations in the districts around the Neilgherries, 5261——Impracticability of deep subsoil ploughing in India; alternative course advisable, *ib.*——Course desirable in order to supply the present want of manures, *ib.*——Facilities for the production on the Neilgherries of large quanties of coffee with considerable profit to European cultivators; excellent coffee now produced there, 5262-5265——Numerous articles already largely produced in this district, 5265——Rapid growth in the district of peculiar kinds of trees, 5265-5268——Excellent quality and low price of some beer made in the Neilgherries, 5268. 5271-5274——Incomplete experiment by witness in hop-growing, 5269, 5270.

The Pulney hills in Madura are south of the Neilgherries, and are not so lofty, but their climate is delightful, and they are much resorted to by Europeans, 5275. 5278——There is a considerable extent of cultivable land in the Pulneys, and when a railway is in communication with them, they will offer considerable facilities for the settlement or location of Europeans, 5278——Particulars as to the climate and resources of the Shevaroy hills in Salem, 5278——Also of the Coilamulley hills in Salem, *ib.*——Character of the country comprised in the Barahmahl and northern part of Coimbatore; imperfect survey of this tract, *ib.*

Belief as to the considerable resources of the Travancore hill districts, both as regards climate and agricultural capabilities; they are however but imperfectly known, 5278-5283——Importance of a proper development of the teak forests in Travancore, &c.,

Reports, 1857-8—*continued.*

Ouchterlony, Captain John. (Analysis of his Evidence)—*continued.*

5278–5283——Neglected state formerly of the public forests in Madras; of late years a Government supervision has been strictly carried out, 5278–5280——Great increase in the trade of the port of Cochin; it should, instead of Beypoor, have been the terminus of the Madras Railway, 5278.

Numerous agricultural resources, and excellent climate of the Mysore country, 5283–5285——A proper title to land and immunity from arbitrary taxation should be secured to the colonist in Mysore, 5283——On the south-eastern coast there are no sheltered ports, 5286——Character of Coringa as a port, 5287, 5288——Means for forming a harbour inside the Armogum Shoal; large amount estimated many years ago for the cost of this work, 5289–5292.

Evidence in favour of removing the seat of Government to the Neilgherries, and of establishing there the chief civil and military departments of the State, 5295, 5296——Reference to a recommendation by witness, that the Madras Railway should be brought to the top of the Neilgherries, 5296——Great saving of life and of expense if all recruits for the Madras artillery or engineers were at once sent direct to the Neilgherries, 5290——Illustration of the importance of locating and training the soldiers in the Neilgherries instead of near Madras, 5296, 5297.

Except at the Neilgherries there should be no European troops in Madras, save at a few stations, 5297——Importance of establishing a school in the Neilgherries for the education of the children of European soldiers in the Presidency; Government should take part in the matter, 5298–5302——Explanation as to the failure of an attempt by Sir Henry Lawrence to establish a school in the Neilgherries, 5299–5302.

Great value of European colonisation on the score of the investment of capital in the soil, 5303——Considerable improvement anticipated in the physical condition of the natives if by means of more liberal wages they were enabled to procure better food, *ib.*——Instance of successful colonisation brought about by Europeans in the cultivation of coffee on a tract of forest land in the Malabar district, 5303–5307——Considerable sanitary advantage to be derived from clearing the dense jungles in the Malabar district, and cultivating coffee, &c. on the soil, 5307.

Obstacle to European colonisation in Southern India, on account of its being a thinly-peopled country; colonisation would, however, check the present emigration from Malabar, &c., 5307–5310——Great advantage of colonisation in leading to a proper use of manures in cultivation, 5310, 5311——Advantages to be derived from the establishment of factories for spinning yarn from the raw cotton; successful operation of some of these factories, or "filatures," in Pondicherry, 5311–5314.

Statement as to the great importance of a proper survey being undertaken generally by Government, as a first step towards colonisation, 5314–5320——Great usefulness of the survey of the Neilgherries, 5314——Practice in regard to the employment of witness, and engineer officers generally, on surveys; inadequate number of officers for the purpose, 5314. 5316, 5317. 5320——Approval of the establishment in India of a school of civil engineers, although it might interfere with the prospects of the military engineers, 5321. 5325——Circumstance of a number of civil engineers having lately been sent out by Government 5322–5324.

Grounds for concluding that copper, and minerals generally, except diamonds and iron, cannot be profitably produced in Southern India, 5326——Abundant existence of excellent iron in the Madras Presidency, 5326. 5333–5335——Simple process by which the most ductile wrought iron is produced by the natives from the raw iron, 5326–5328——Particulars as to an iron company which has been in operation in Madras for nearly twenty-five years, and has very exclusive privileges from Government, but has hitherto been most unsuccessful; witness attributes their failure to bad management, 5329–5333——Means by which iron may be profitably produced, 5333——Facilities in Madras for smelting the iron, 5336–5341.

Evidence as to the probable existence of diamonds in a particular district, which witness believes to be the real Golconda, 5342–5354——Gold has been obtained in the Neilgherries and Malabar, and is reported to exist in other districts, but it has been concluded that it does not exist to any extent which would repay the cost of mining, 5355–5364.

Information relative to the principal trunk roads in the south of India; excellent manner in which many of these have been constructed and maintained, 5365——The cross or district roads are generally bad, 5365. 5367——Of late years, public money has been liberally voted for road purposes, 5365——Better management of the roads when under a distinct road department than since their transfer, in 1855, to the management of the several district engineers, 5365, 5366——Dislike of the natives to spend money on roads; they are all kept up by Government, 5368, 5369.

[Second Examination.]—Information relative to the canals for purposes of irrigation in Southern India; more has been done by Government in this respect than seems generally understood or admitted in this country, 5370–5374——Immense importance of a large extension of works of irrigation as a means of increasing cultivation to an almost unlimited extent, 5370–5372.

Particulars

Reports, 1857-8—*continued.*

Ouchterlony, Captain John. (Analysis of their Evidence)—*continued.*

Particulars relative to the Nerinjepett anicut, an old work now in decay; means for restoring this work without any great expense, 5372——There are many old channels and works on the Upper Cauvery, which should be restored, *ib.*——Government outlay is urgently required on works of irrigation, and would be a most prudent and economical expenditure, *ib.*——Approval of private companies undertaking works of irrigation, 5373.

Information relative to the canals of communication, or navigable canals in the south of India; importance of a large sum of money being appropriated to this purpose, 5374——Further evidence relative to the advantages of Cochin over Beypoor as the terminus of the Madras Railway, 5374-5378——Reference to the Coromandel Coast Canal, and the objections formerly urged by witness against the large outlay upon it, 5374——Statement as to Pondicherry being a favourite place of resort for traders, and as to there being a greater degree of commercial freedom there than in Madras, 5374. 5404-5406.

Failure of some works of improvement carried out at Cuddalore contrary to witness's views, 5378——Facilities of Cuddalore Harbour for the export trade, *ib.*——Requirement of a pier or jetty at Madras Harbour, *ib.*——Considerable works have been carried on for the improvement of Coringa port, *ib.*——Very defective system of administration of the rivers of Southern India; each important river, such as the Cauvery, should be placed entirely under one engineer officer, 5379-5380——There is not one-third the number of engineers in Madras that are required, 5381.

Advantage in there not being any tolls levied on the roads or canals of Southern India, 5382——A class of European contractors in India would be found most useful as regards public works, 5383——Absence of encouragement to contractors to go from this country to Madras, 5384-5387——Suggestion as to the best means for providing an increase of engineers for civil duties, 5388.

Further particulars as to the good quality and low price of some beer brewed on the Neilgherries; statement hereon as to Government not having taken any steps to carry out a suggestion by witness for the establishment of a brewery, 5389, 5390. 5393-5395——Further reference to the experiment by witness in hop-growing on the Neilgherries; it was successful so far as it went, 5391, 5392——Statement showing the great increase of emigrants to the Neilgherries between 1848 and 1856; 5396-5399——Witness produces a map of the Neilgherries, which exhibits all the features of the district, 5400.

Very good steam coal procurable in the Nerbudda valley, 5401, 5402——Reference to a certain letter, dated Jubbulpore, 3d May 1858, which contains much valuable information regarding the resources of the Nerbudda valley, 5401——Difficulty as regards the transit of the Nerbudda coals, 5402, 5403.

Excellent character of the municipal police at Madras, 5407——Excessively bad state of the Madras rural or mofussil police; steps, however, are being taken to reorganise this body, *ib.*——Necessity of European superintendence in order to make the rural police really useful and trustworthy, 5407, 5408——Suggestions with a view to constituting every cutcherry compound as a sort of fortress, 5408——The European element in the police should be taken from European regiments in India, 5409——The soldiers in the police should, on retiring, be entitled to liberal pensions, and to free grants of land in the hills, *ib.*

Impression that the judicial officers in the south of India are not sufficiently judicially educated, 5410-5412*——Opinion that the revenue and judicial branches should be kept quite distinct, 5412, 5412*——Discouragement to European settlement by the system of tenure on "puttah," or of tenancy at will, in the Neilgherries and other districts, 5413, 5414——Settlers should be enabled to hold land in fee-simple, 5413. 5422——Advantage to private companies undertaking canals of irrigation, for which small tolls might be charged; advantage also to the cultivators, 5415-5421.

Benefits resulting wherever European zemindaries are established in Madras; difficulty in extending the system, 5423-5427——The suitableness of the climate for purposes of colonisation refers only to settlers of abstemious, or rather of temperate habits, 5428-5431——Further statement as to the importance of railway communication between the plains and the hill districts as facilitating European settlement, 5432-5435——Facilities would soon arise in the hills for the care of settlers' children during the absence of the parents, 5435.

Grounds for concluding that tea may be cultivated on the Neilgherries with commercial success, 5436-5442——Good faith with which those holding land under the Government are treated, 5442, 5443. 5467, 5468. 5481——Discouragement to the cultivation of cotton, &c., in the south of India, on account of the defective tenure of land, and the liability to undue taxation, 5444-5449. 5468, 5469——Facility of cultivation in the Neilgherries by means of subsoil spade husbandry; abundance of labour available for the purpose, 5450-5452.

Doubt as to the expediency of encouraging an undue amount of marriage among the soldiers, unless located permanently on the Neilgherries, 5453. 5518——Wretched condition and demoralising habits of the soldier in many parts of the low country, 5453, 5454——The removal of the soldier's children to the hills would be a most humane measure,

Reports, 1857-8—*continued.*

Ouchterlony, Captain John. (Analysis of his Evidence)—*continued.*

measure, and would not be likely to produce any injurious effect upon the parent's character, 5454, 5455. 5518. 5537——Impracticability of employing European children in "filatures" on the Neilgherries, 5456, 5457——Further reference to the obstacles unduly raised by a religious section of the community to the establishment of a school in the Neilgherries for soldiers' children, 5458–5460.

Different sense in which colonisation must take place in India as compared with Canada or Australia, 5461–5464——Witness has heard from mercantile men that capital has been deterred from India by the defective system of administration, 5465——Large amount of native capital in India, which is absorbed in some way, and disappears from the circulation, 5466——Probability of many of the ruined tanks or reservoirs in Southern India having never been completed as means of irrigation, 5470–5476——Advantage in a pier having recently been sanctioned at Madras, 5477.

Evil of the practice of issuing new papers or "puttahs" to the ryots in Madras every year, 5478–5481——There are not many native agriculturists in Coimbatore who are possessed of large capital, 5482–5484——Objection to a system of purchasing cotton from the natives, 5485, 5486——Impression that there will be no material deterioration so long as settlers' children in Madras are removed, when young, to a hill station, 5487–5489——There is no reason why men of enterprise and capital should not, by developing the resources of India, amass fortunes there as well as in Australia or other colonies, 5490, 5491. 5514.

Obstacles to the success of investments in pasturage land on the Neilgherries, 5492, 5493——Right of the Indian Government over the tenure of land in Mysore, 5495–5497. 5520——The Shevaroy hills are by no means extensive; they are resorted to chiefly as a sanatarium, 5498——Impression that Bengal comprises many more hill tracts than Bombay, 5499——Great importance, as an encouragement to settlement in Madras, of means to confer the land in fee-simple; suggestion hereon, and examination upon the question of interference thereby with the rights of the present cultivators, 5500, 5501. 5563–5576.

Failure of certain ironworks in the Madras Presidency further adverted to, 5502–5504——Poverty generally of the population of Madras; probable causes, 5505–5507——Anticipation that in course of time the Madras Railway will carry all the traffic now conveyed on the adjacent roads, 5509, 5510——Belief as to the excellence personally of the civil servants in Madras, 5511——The defects in the administration of justice are attributable to the system, 5511——The revenue servants in Madras are a very hard-worked and most efficient set of men, 5511.

Witness considers it impossible that Europeans can work as labourers on farms in the low country, 5512, 5513——Although the southern parts of India are thinly populated, labour is absurdly cheap, 5515, 5516——Improvement anticipated in the natives from increased means of education, the means now afforded them working very advantageously, 5519——Different causes to which may be attributed the limited settlement of Europeans in the Neilgherries, 5521–5523.

Respects in which the settlement of Europeans is discouraged by the Government functionaries; a sort of cold shade is thrown over them, 5522. 5577——The local authorities should be enjoined to extend something of their countenance to settlers of good character, 5522, 5523——Attention should be paid to the complaints of the settlers against being placed under the system of law as administered by the Company's courts, 5523——Greater encouragement should be given to the uncovenanted service, 5524——Illustration, in the case of a relative of witness, of the undue preference given to the covenanted over the uncovenanted servants; improper action of the home authorities in the case in question, 5525–5534.

Favourable results anticipated from a system of military colonisation in the hills, comprising free grants of land, 5535, 5536——Way in which soldiers' children reared and trained on the hills would be exceedingly useful auxiliaries in spreading European commerce and enterprise throughout the country, 5538–5542——Further reference to the advantages which would be derived from a system of breweries in the hills, 5543–5546——Importance of occupation for the soldiers or settlers in the hills, 5547.

System of police battalions suggested in each collectorate in the event of the European troops being removed to the hills, 5548——Suggestions for the attachment of a certain number of natives to the European regiments in lieu of a native army, 5548——The railway system will in time develop to an immense extent the resources of the country, 5549——Tendency of increased European settlement to produce identity of interests between Europeans and natives, and to strengthen our hold over the country, 5550.

Decided approval of the proposition for introducing the English language into the courts of justice, 5551——Inability, at present, of the judges to comprehend the native witnesses, 5551——Facility for acquiring efficient interpreters if the English language be used, 5552——The judges should still be required to have a knowledge of the native languages, which would be a sufficient check upon the native interpreters, 5557, 5558——Fall of rain respectively at Ootacamund and Kotergherry, 5559——Practicability, by the removal

Reports, 1857-8—*continued.*

Ouchterlony, Captain John. (Analysis of his Evidence)—*continued.*

removal of certain obstacles, of colonisation of the plains as well as of the hills, 5560-5562.

Requirement of a better tenure of land, that is, of a tenure in fee, as an encouragement to settlement, 5563, 5564. 5576——Means by which the land might be conveyed in fee-simple to capitalists; the ryots must be consulted in the matter, 5565-5569——Objection to the acknowledgment by Government of the claims of the todars to an interest in the land on the Neilgherries, 5570-5574——Among other reasons for non-emigration to India one is that the country is not properly known, 5575.

Ouchterlony, Captain. Statistical memoir by Captain Ouchterlony of a survey of the Neilgherry mountains, *App.* (*Fourth Rep.*) *p.* 263-289.

Oude. Probability of the disaffection in Oude being very much owing to the system of revenue settlement contemplated for that province, *Saunders* 10212-10216.

Ouseley, Colonel. Reference to the case of the removal of Colonel Ouseley, who was acting as agent of the Ranees of Nagpore, *Theobald* 872.

Overland Route. Steam communication and the overland route have led to great progress in the commercial habits of the natives, *Freeman* 1530-1532——Establishment, in the first instance by British settlers, of direct steam communication between Calcutta and Suez, *ib.* 1541.

P.

Parsees. Reasons other than the thirty years' assessment which prevent the Parsees in Bombay from buying land in the interior, *Wingate* 7894-7991——Statement relative to an offer by some Parsee merchants to lease a tract of pestiferous jungle if the assessment were unaltered for a term of 100 years, *ib.* 8025-8029.

Pasture Lands. Greater attraction to settlers as regards pasture lands in Australia and Canada than in India, *Waller* 5205-5207, 5208——Obstacles to the success of investment in pasturage land in the Neilgherries, *Ouchterlony* 5492, 5493.

Patna. Failure of an attempt to form a missionary settlement at Patna, *Mullens* 7125.

Patronage. Power and practice of the Court of Directors in regard to patronage in India; restrictions upon abuse of patronage, *Waller*, 5170-5172. 5175-5182.

See also *Civil Service*

Penal Code. Non-objection to a penal code; objections, however, to particular parts of the code proposed by Mr. Macaulay, *Theobald* 969-972——Expediency in any code of a due assimilation to the principle of English law; deviation by Mr. Macaulay from this principle, as, for instance, in the right of private defence, *ib.* 969-975——The objection to the penal code is that it substitutes for English law some law not so good, *ib.* 1119——Alteration by the new code of the Law Commission as regards the system of appeal in criminal cases; practice hitherto in such cases, *Hawkins* 4098-4106——Regulation in the new code as regards the constitution of the jury by which Europeans are to be tried in criminal cases, *ib.* 4113, 4114.

See also *Criminal Jurisdiction* (*Mofussil Courts*).

Peninsular and Oriental Steam Navigation Company. The monopoly of transit, as possessed by the company, should be broken down, *Theobald* 864, 865.

Pensioners. Reference to the discharged soldiers or pensioners, as a very low and intemperate class, the result very much of their idle life, *Mullens* 7130, 7131. 7203-7205. 7294. 7329-7334——Suggested removal of the pensioners to the hills, *ib.* 7131.

Permanent Settlement of Europeans. Evil of very few persons settling in India with a view to permanent residence there, *Tremenheere* 392——As a rule, settlers do not go to India to remain there, *Mackenzie* 3923——People go to India generally in the hope of making a fortune, and of returning, *Hawkins* 4400, 4401——Grounds for considering the colonisation of India by Europeans to be, in the ordinary sense of the term, impracticable, *Waller* 5078-5080; *Ouchterlony* 5461-5464; *Onslow* 6346; *Wingate* 7866-7868; *Landon* 8374. 8465; *Bidwell* 9270.

See also *Climate.* *European Capital and Skill.*

Permanent Settlement (*Land Revenue.*) See *Land Revenue Settlement, and Tenure and Sale of Land*, I. V.

Planters. See *Indigo, and Indigo Planters.*

Ploughing. Impracticability of deep subsoil ploughing in India; alternative course advisable, *Ouchterlony* 5261.

Reports, 1857-8—*continued.*

POLICE:

I. *Bengal:*
1. Corruptness and Inefficiency of the Native Police.
2. Low Class from which the Police are selected.
3. Effect of Increasing the Pay of the Darogahs.
4. Question as to the Employment of Native Christians.
5. Absence of proper steps for an Improved Police.
6. Other Evidence, generally.

II. *Bombay.*
III. *Guzerat.*
IV. *Madras.*
V. *Mysore.*
VI. *North Western Provinces.*
VII. *Advantages to be derived, generally, from European Superintendence and Military Organisation.*

I. *Bengal:*

1. Corruptness and Inefficiency of the Native Police:

Evidence in support of the charge that the native police in Bengal are corrupt, unprincipled, and useless; opinion of Mr. Halliday on the subject, *Theobald* 933-936——The system of police is a curse upon the country, which is discreditable to English humanity, and statesmanship and government, *ib.* 938——Personal knowledge upon which, in addition to the expressed views of Mr. Halliday, witness bases his evidence in regard to the magistracy and police, *ib.* 1089. 1089-1191——Check to settlement in Bengal, through the bad state of the police, who are exceedingly corrupt, *Auld* 1329, 1330. 1343, 1344. 1373-1377. 1395. 1429, 1430.

In illustration of the corrupt state of the police witness gives the particulars of a false accusation of murder, as brought against a European in Rajshaie in 1826; great indignities and violence manifested towards this gentleman by the darogah and other native officials previously to his exoneration, *Freeman* 1464-1473——Concurrence in the evidence as to the disgraceful state of the police in Bengal, *MacNair* 2002; *Wise* 2643-2648. 2860-2868. 3043-3046. 3097-3099; *Baillie* 4509-4511. 4734; *Bidwell* 9270; *Marsham* 9435-9440——The police are extortioners, and constant instigators of quarrels, and are corrupt in every sense of the word; witness has known many instances of this, *Dalrymple* 3192-3197. 3466-3468. 3527-3534——Instance of corrupt and extortionate conduct on the part of a darogah, in which witness was the victim; this occurred about twenty years ago, and ended in the exculpation of the darogah by the magistrate, *ib.* 3196-3204. 3466-3468——The native deputy magistrates are very unfit for the police, *ib.* 3211-3214.

Utterly inefficient and grievously oppressive character of the police; there would be less crime without them altogether, *Mackenzie* 3587. 3604-3606. 3774. 3857——Until the police is improved there can be no security for property, *ib.* 4029. 4032——The bad state of the police is less an obstruction to the settlement of Europeans than of the natives, *Baillie* 4509——Peculiar inefficiency of the police as a detective force, *ib.* 4510, 4511——The inefficiency of the police in Bengal, and throughout India, cannot be exaggerated, *Waller* 4874——The Government police are actually tyrants, and a curse instead of a blessing, *ib.* 4887.

In Kishnagur, and other districts, the police were not in witness's time so bad as they are now represented to be, *W. H. Martin* 9144-9147. 9190-9202——The police were singularly successful in some cases in the detection of crime, *ib.* 9147——Difficulty, through the native character, of organising an efficient police, *ib.* 9153, 9154——Mr. Halliday's description of the police may correctly apply to the present time, but they were not so bad during witness's experience, *ib.* 9190-9202——Although the police are very inefficient, they are not universally corrupt; witness has seen some very good darogahs, *Bidwell* 9296, 9297. 9312.

2. Low Class from which the Police are selected:

Low and criminal class from which the police are largely taken; they are said to be the sweepings of the gaols, *Theobald* 934-936——The police might better be called the sweepings of the population than of the gaols, *ib.* 1214——Bad material from which the police are selected, *Freeman* 1645 1648.

3. Effect of Increasing the Pay of the Darogahs:

The increased salary of the darogahs has operated mischievously; they now require larger bribes, *Freeman* 1757, 1758. 1959-1962; *Wise* 2647, 2648——The increase in the pay of the darogahs has not improved them, *MacNair* 2126, 2127. 2325.

Opinion that the increased pay of the darogahs is likely to improve them, *Hawkins* 4307——Dissent from the statement that the darogahs are worse since the increase of their salaries, *Mills* 8847; *W. H. Martin* 9153——Approval of increasing the pay of the darogahs, although in some instances better pay may have led to heavier bribery,

Bidwell

Reports, 1857-8—*continued.*

POLICE—continued.

I. *Bengal*—continued.

3. Effect of Increasing the Pay of the Darogahs—*continued.*

Bidwell 9298, 9299——As regards the increased pay of the darogahs, the measure was forced upon the Government, but it is a difficulty to say whether it has resulted in improvement or otherwise, *Marsham* 9547.

4. Question as to the Employment of Native Christians:

Impossibility of finding native Christians in sufficient numbers for a police force, *Mackenzie* 3777-3782——Importance of the appointment of native Christians to offices in the police, &c., from which they are now excluded, *Waller* 4898. 4960. 4966. 4999. 5054. 5055. 5214. 5215. 5217-5220.

5. Absence of proper Steps for an Improved Police:

As regards a certain despatch for the reform of the police and magistracy, witness shows that fundamental changes as regards the police are not insisted upon for the present, *Theobald* 1090-1093. 1158-1162——The Government are doubtless aware of the character of the police, &c., and some slight reforms have lately been made, *Auld* 1383-1389——The police in the Mofussil in Bengal have not yet been re-organised, *MacNair* 2523, 2524——The inefficiency of the police has for years been a general source of complaint, yet little, if anything, has been done in the way of reform, *Mullens* 7170, 7171. 7307-7311——Nature of the steps taken to improve the police in Lower Bengal, *Marsham* 9595-9603.

6. Other Evidence generally:

Improper way in which darogahs are often appointed, *Freeman* 1642, 1643. 1850——Suggestion with a view to the darogahs speaking English; advantages thereof, *ib.* 1644. 1652. 1736——Advantage if the police in any locality were brought from a distance, *ib.* 1650——Darogahs should not be allowed to examine witnesses, *ib.* 1651——Pay per month of the darogahs, peons, and Jemmadars, *ib.* 1653——Objections to Sikhs as policemen in Bengal, *MacNair* 2591, 2592——A proper police would be exceedingly acceptable to the natives, *ib.* 2593, 2594.

With a more efficient police, the duties of the civil service might be very materially abridged, *Hawkins* 4280-4282——Propriety of incurring the outlay necessary for an effectual improvement of the police in Bengal, *ib.* 4330-4335——Impression that the people would readily pay for a more expensive police, if efficient, *Waller* 4900-4902——The cess now paid by the zemindars towards the police should be administered in a different way, *Mullens* 7310, 7311——Appointment by the magistrates of the most efficient persons they can get as darogahs, &c., *Mills* 8848-8851——The character and conduct of the police depends much upon the district magistrate, *W. H. Martin*, 9147. 9200-9202.

II. *Bombay:*

Success of the extended European agency in the Bombay police, *Hawkins* 4294, 4295——Expediency of military sergeants being introduced into the police, although some European sergeants in the Bombay police turned out badly, *Warden* 7504-7507——European superintendents have been introduced into the Bombay police, but with what effect witness is unable to say, *Wingate* 7941, 7942.

III. *Guzerat:*

Good character of the police in Guzerat; great importance of the European superintendence over them, *Landon* 8468-8481. 8568-8575.

IV. *Madras:*

Excellent character of the municipal police at Madras, *Ouchterlony* 5407——Extremely bad state of the Madras rural or Mofussil police; steps, however, are being taken to reorganize this body, *ib.*

V. *Mysore:*

Improved character of the police in Mysore, through their better superintendence; they are, however, still very defective, especially as detectives, *Onslow* 6552-6566. 6720-6723——Native police always must be very defective, as they are not to be trusted, *ib.* 6552. 6560, 6561. 6566.

VI. *North Western Provinces:*

Very good character of the police in the North Western Provinces; different causes of their superiority to the Bengal police, *Saunders* 9899-9912——Advantage in having European officers in charge of the police, *ib.* 9910-9912.

Reports, 1857-8—*continued.*

Police—continued.

VII. *Advantages to be derived generally from European Superintendence and Military Organization:*

Evidence as to the expediency of introducing European superintendents into the native police, *Theobald* 938-941. 993, 994; *Freeman* 1564. 1727, 1728. 1963; *MacNair* 2317-2327; *Dalrymple* 3193. 3208-3215; *Waller* 4898; *Ouchterlony* 5407, 5408; *Onslow* 6562,6563. 6724, 6725; *W. H. Martin* 9155-9157——The native deputy magistrates should not act at all as superintendents of the police, *Theobald* 995——Further evidence in support of European superintendents of police; army sergeants might be so employed; result of such superintendence in Calcutta and Bombay, *ib.* 1158-1168. 1215-1218——The police in Bengal should have something of a military organization as in the Punjaub; respectable Europeans should fill the place of darogah and other subordinate places, *ib.* 1286, 1287.

Suggestions for improving the police, as regards the number, character, and expense of European superintendents, *Freeman* 1637-1640——The police should be improved by an extension of European superintendence, and the introduction of the English language, *MacNair* 2016——An efficient European magistracy would greatly improve the state of the police, *ib.* 2458——The darogah's place should be taken by a European, *Wise* 2647——Able magistrates are the best remedy for the police, *ib.* 2861, 2862——Prospect of advancement desirable in connexion with the introduction of the European element into the police, *ib.* 2863, 2864.

The system of police in Scinde and the Punjaub should be introduced into Bengal together with superintendence, through European sergeants of regiments, *Mackenzie* 3614. 3838——The infusion of European superintendence is the best means for improving the bad state of the Bengal police, but the expense may be an obstacle, *Hawkins* 4233-4237——Statement in favour of the introduction of military sergeants into the police, *Baillie* 4511. 4605-4610——Improvement if European detectives were also employed in the police, *ib.* 4511.

The European element in the police should be taken from European regiments in India, *Ouchterlony* 5409——The soldiers in the police should, on retiring, be entitled to liberal pensions, and to free grants of land in the hills, *ib.*——System of police battalions suggested in each collectorate in the event of the European troops being removed to the hills, *ib.* 5548——Advantage in placing European sergeants in the police rather than in raising the pay of the native police officers, *Warden* 6267. 6270, 6271——Means by which European superintendence may be spread over the police, *Onslow* 6791-6794——The European superintendents of police should have some kind of magisterialauthority, *ib.* 6892-6896.

The police should be under military organization, *Mullens* 7306——Europeans of good character might with advantage be introduced into the preventive police, but the detective police is better without them, *Mills* 8842. 8853-8862——Natives are much better qualified than Europeans as detectives, *ib.* 8853, 8854. 8858-8861——Bribery in the case of Europeans in the Calcutta police, *ib.* 8855-8857——The sons of European soldiers may advantageously be trained for employment in the police, *Bidwell* 9286, 9287.

See also *Administration of Justice* (*Mofussil*).

Pondicherry. Statement as to Pondicherry being a favourite place of resort for traders, and as to there being a greater degree of commercial freedom there than in Madras, *Ouchterlony* 5374. 5404-5406.

Poonah. Healthy character of the European soldiers stationed on the hilly districts near Poonah, *Warden* 6035, 6036——Witness is not aware that the soldiers at Poonah are kept under any particular restrictions on the score of health, *ib.* 7359-7361.

Pooroondhur (*Madras*). There is a large sanatarium at Pooroondhur between Poonah and Mahableshwur, *Wingate* 7912.

Population. The best parts of India are now densely occupied, *Hawkins* 4357.

Portuguese Settlers. Degeneracy of the Portuguese who settled many years ago in Ganjam, *Baikie* 818-821. 829-832——Great deterioration of the Portuguese settled in Chittagong and Dacca, *Wise* 3088-3091.

Press, The. Strong feeling of the commercial body of Calcutta in opposition to the measures for the restriction of the press, *Theobald* 1014——Freedom should be given to the press, *Wise* 2635——Want of the circulation of a press in the interior, as a check upon mal-administration, *ib.* 2969-2980.

Importance of the liberty of the English press in India; objection to the recent depression of its freedom in reference to the mutiny, *Waller* 4898. 4925-4927. 4981-4996.

Reports, 1857-8—*continued.*

Press, The—continued.

4996. 5026-5028. 5082-5084——Gain to the natives as well as to the settlers by a free English press, *Waller* 4925-4927——The native press should be placed under certain restrictions, but should not be prohibited altogether, *ib.* 4928-4930. 4979-4981.

Better character of the press if there were more Europeans in the country; it has hitherto remained very defective in many respects, *Mullens* 7115, 7116——Further evidence upon the subject of the English press and its defects; disapproval of its restriction by Government, *ib.* 7225-7227. 7232 7254. 7322-7325——A public press is indispensable for all classes, *ib.* 7225-7227——Operation of the native press; approval of some restriction upon it, *ib.* 7228-7231——Some papers seem to have been always friendly to the Government, *ib.* 7323-7325.

Witness established, in 1818, the first native newspaper in Bengalee, and was for eighteen years the editor of the "Friend to India," *Marsham* 9399-9401.

Procedure (*Courts of Law*). See *Administration of Justice*, XI.

Proceedings of the Committee. Fourth Rep. p. iv.-xi.

Produce of the Soil. The produce of India is, on the average, very little more than ten shillings an acre, *Balstin* 5898.——*See* also *Agriculture.*

Profitable Settlement. There are several instances of profitable cultivation by Europeans, as in the case of indigo, sugar, and linseed, *Tremenheere* 415-419——Notwithstanding the insecurity of property, witness has been enabled by experience to invest profitably in land, indigo, factories, coal mines, &c. *Freeman* 1683, 1684——Although witness and many others have contrived to be successful as settlers under the badness of the laws or of their administration, numbers have been unsuccessful, or have been afraid to settle, *ib.* 1788. 1806-1810. 1903-1907——Success, notwithstanding the present laws, of the more skilful and persevering settlers, *MacNair* 2287, 2288.

More profitable settlement but for the state of the laws and of the police, *Wise* 2770; *Waller* 4896, 4897——Witness would not have settled in India had he been aware of the difficulties to be encountered, nor would his experience be encouraging to others; his residence there has however been tolerably profitable, *Wise* 2771-2774. 2917. 2931, 2932——Witness was fortunate as a settler, *Mackenzie* 3924——Opinion that enterprising settlers would make money more quickly in India than in Australia, *Waller* 5206——There is no reason why men of enterprise and capital should not, by developing the resources of India, amass fortunes there as well as in Australia and other colonies, *Ouchterlony* 5490, 5491. 5514.

If capital and labour were properly applied to the soil, very remunerative results would follow, *Mullens* 7174, 7175——There are some very excellent openings for Europeans in India, but witness apprehends that in nine cases out of ten, Europeans could not overcome the difficulties arising from the native character and conduct, *Landon* 8594. 8678, 8679——Witness has been successful in overcoming the numerous obstacles to profitable settlement, and success is equally possible in all men of energy and perseverance, *ib.* 8706-8709. 8719, 8720.

See also *Foreign Settlers.*

Public Appointments. Reference to the official inquiry now going on into the state of public appointments in India, *MacNair* 2088-2091.

Public Opinion. Advantage of the influence of a large European community upon the actions of the Government, *Mullens* 7117, 7118——Advantage of public opinion in this country being brought to bear upon the conduct of affairs in India, *Bidwell* 9367-9370; *Marsham* 9581, 9582. 9661-9664.

Public Works. Almost total absence of provision by Government of roads, canals, or other beneficial public works in Bengal, *Freeman* 1815, 1816——Evil through public works not having been prosecuted long ago, *MacNair* 2610——Extract from Colonel Cotton's book as to the immense advantages of public works, such as irrigation, roads, &c., *Onslow* 6537, 6538.

See also *Bridges. Canals. Contractors. Engineers. Grand Trunk Road. Irrigation. Railways. Roads.*

Pubna (*Bengal*). Disturbed and lawless state of Pubna when witness was appointed joint magistrate there in 1828; frequent affrays between the indigo planters and zemindars, *Mills* 8763, 8764. 8774-8781.

Pulney Hills (*Madura*). The Pulney Hills in Madura are south of the Neilgherries, and are not so lofty, but their climate is delightful, and they are much resorted to by Europeans, *Ouchterlony* 5275. 5278——There is a considerable extent of cultivable land in the Pulneys, and when a railway is in communication with them they will offer considerable facilities for the settlement or location of Europeans, *ib.* 5278.

Reports, 1857-8—*continued.*

Punjaub. See *North Western Provinces.*

Putnees. See *Land Revenue Settlement, and Tenure and Sale of Land.*

R.

Railways. Great importance of the introduction of railways as regards European settlement and the development of the resources of the country, *Tremenheere* 14-17. 20, 21. 31-35; *Theobald* 1289; *MacNair* 2546-2553; *Wise* 2834; *Ouchterlony* 5549; *Onslow* 6331, 6332; *Wingate* 7705; *Saunders* 9813, 9814. 10084-10086. 10207-10211—— Great importance of railways as a means of bringing together the coal and the iron, *Tremenheere*, 20, 21. 31-35——Importance of railway communication between the plains and the hill districts as facilitating European settlement, *Tremenheere* 98-100; *Ouchterlony* 5252. 5254. 5432-5435——Necessity of an extensive system of railways, more especially of numerous branch lines as feeders to the trunk lines, in order properly to develope the resources of India; the present lines, though well laid out, are but the skeleton of what is wanted, *Tremenheere* 180-193——Belief that the resources of this country are fully adequate to the supply of any quantity of materials that may be required for the railways, *ib.* 194.

Increased duration of life where railways are established, *J. R. Martin* 221. 227, 228 ——Approval of the trunk lines of railway being first laid down, *Tremenheere* 387, 388 ——Increased population likely to be congregated along the lines of railway, *ib.* 513, 514—— Excellent investment afforded to capitalists by the railways, *ib.* 516, 517—— Undue delay in the progress of railways in Bengal, *Freeman* 1945-1949; *MacNair* 2544, 2545.

See also *East Indian Railway. Fuel. Hill Districts. Madras Railway.*

Rain. Inadequate falls of rain in India, as shown by the fall at Bombay, Calcutta, and Madras, *Balston* 5935.

Rammohun Roy. Great loss to the putneedars if Rammohun Roy had failed some years ago in paying the Government revenue, *Freeman* 1884; *MacNair* 2566-2568.

Rathbone, Colonel. Statement relative to an offer by Colonel Rathbone to lay out 150,000*l.* in land if Government would make the assessment perpetual, *Wingate* 7994-8004.

Re-appointment of Committee. The Committee recommend that a Select Committee be appointed to resume the inquiry in the ensuing Session, *Fourth Rep. p.* iii.

Recognizances to keep the Peace. Statement as to an amended law in Bengal on the subject of taking recognizances to keep the peace not having yet passed, *Theobald* 965-967—— Monstrous injustice involved in the operation of the law authorizing the magistrates to take recognizances to keep the peace, *ib.* 1234, 1235.

Recovery of Debts. Objection to interference with the rule of the Hindoo religion that the son should take upon himself the debts of his father; in practice, the recovery by law of such debts, as of debts generally, is extremely remote, *Waller* 4911-4918.

Redemption of Land Tax. Disapproval of a redemption of the land-tax; it saves a host of other taxes, *Theobald* 1022, 1023——Consideration of the grounds of political economy upon which witness objects to a redemption of the land-tax, *ib.* 1240-1247——Advantage of a permission to zemindars to redeem the tax assessed under the permanent settlement; the sum required would, however, probably deter redemption, *Freeman* 1664-1678—— Great distrust in the natives adverted to as an obstacle to a commutation of the payment of the land revenue, *MacNair* 2061, 2062.

Evidence as to the several advantages respectively as regards Government, the natives, and the settlers, to be derived from a commutation of the land-tax, *Mackenzie* 3667-3682. 4012-4021. 4043——Ground for concluding that zemindars would be willing to redeem the land-tax at from twenty-five to thirty years' purchase, *ib.* 4046-4048——Calculation that from twenty-five to thirty years' purchase would be given in redemption of the land revenue, *ib.* 3670 3672——Means of the people of India for redeeming the land-tax, *ib.* 3673-3677. 3895——The money acquired by a redemption of the land-tax should go towards paying off the Government debt, and towards works of irrigation, *ib.* 3681. 3962-3965——Gain to the Government and to the people by a redemption of the land-tax, *ib.* 3681.

Witness sees no objection to a redemption of the land-tax, but considers it quite hopeless to obtain twenty-five years' purchase, *Hawkins* 4214, 4215——Respect in which, as regards the application of capital, it is an advantage rather than otherwise that the land should be charged with the tax, *Baillie* 4558. 4746-4751——Whether as regards the zemindars or the ryots, witness does not see any advantage to them in a right of redeeming the tax, *ib.* 4558-4562.

Reports, 1857-8—*continued.*

Redemption of Land Tax—continued.

Advantages to be derived from a permission to redeem the land-tax, *Waller* 4885, 4886. 4906-4908; *Mullens* 7180. 7302, 7303——Objection upon financial grounds to a redemption of the land-tax, inasmuch as land is almost the only available source for taxation, *Wingate* 7643-7647——The capital, insufficient as it is, now invested in irrigation, &c. would be largely and injuriously diverted to a redemption of the tax, *ib.* 7643.

Advantage in allowing proprietors to redeem the land-tax at thirty years' purchase, *Bidwell* 9319-9323——Doubt as to the policy of a general redemption of the land-tax in Bengal, *Marsham* 9604-9607. 9787——Improbability of so much as twenty years' purchase being given in the event of a power to redeem the land-tax, *Saunders* 10104-10107.

Statement by certain Protestant missionaries in Bengal as to the desirableness of commuting the land-tax, *App.* (*Fourth Rep.*) *p.* 294-296. 423-426.

See also *Land Revenue Settlement, and Tenure and Sale of Land*, VI. *Ryots.*

Rent-free Tenures. See *Enam Commission.* *Resumption of Rent-free Tenures.*

Representation of Grievances. Abridgment by the Government of the right of remonstrance on the part of the European inhabitants; instances of this during the Governor-generalship of Lord Canning, to whom directly witness does not attribute this disposition to limit the right of representation of grievances, *Theobald* 977-980——Inability of the settlers to be heard orally before the Legislative Council; they can, however, be heard, by petition or memorial, *MacNair* 1992. 2252-2255——The settlers can remonstrate by memorial or petition, but no attention is paid to their remonstrances, *Dalrymple* 3380-3385. 3455-3457——Every civility is shown by the higher officials in Calcutta to settlers preferring complaints or remonstrance, *Mackenzie* 3973, 3974.

Resumption of Rent-free Tenures. Distrust through the resumption laws some twenty years ago; case of the Rajah of Burdwan adverted to herein, *MacNair* 2062, 2063——Further reference to the question of resumptions as having been considered very unjust; examination as to the existence of grounds for this view of the question, *ib.* 2161-2199. 2473-2478——Evidence as to the injurious and oppressive operation of the resumption law in Eastern Bengal; this law, which was an inquiry into titles, ceased about five or six years ago, *Wise* 2726-2728. 2808-2817. 2917-2919. 3100-3108——Instead of a limit of sixty years for inquiry into titles, the limit should be about twelve years, *ib.* 2816-2818.

Witness suffered through the operation of the resumption laws, *Dalrymple* 3564——Dissatisfaction and alarm consequent upon the resumption laws, or the inquiry into the titles to hold lands rent free, *Hawkins* 4218-4221——The resumption laws are not now in force, *ib.* 4296.

Belief that the resumption laws have not had the effect of damaging the value of landed property, *Marsham* 9548——Absence of breach of faith by the carrying out of the resumption laws; much dissatisfaction has however resulted from them, *ib.* 9548-9552. 9608-9611——Witness regrets that the resumptions were ever attempted, *ib.* 9612, 9613.

See also *Enam Commission* (*Bombay*).

Retired Officials. Doubt as to any advantage if grants of land were made to officers or soldiers when their term of service had expired, *Tremenheere* 162-170——Suggested further increase of the members of the uncovenanted civil service in India, who by retiring on moderate pensions might be induced to settle in the country, *ib.* 339-341. 449-451——Suggestion that retired officers of the several Indian services be offered some inducements to settle, *Onslow* 6923, 6924.

Revenue Service. Too much indulgence is often given to defaulting zemindars by the collectors, *Freeman* 1842——Approval of all revenue questions being tried in separate revenue courts, *Dalrymple* 3475——The principal reform required, as regards the revenue laws, is in their administration, *Mackenzie* 3643-3649.

Extremely light duties of the revenue collectors in Bengal, *Waller* 4875——Witness has heard that from half an hour to two hours a day was amply sufficient for any collector to discharge his duties, *ib.*——Further statement with reference to the exceedingly light duties and large salaries of revenue officers in Bengal, *ib.* 5052, 5053——Objection to the duties of the collectors being partly of a judicial character, *ib.* 5088. 5131.

The revenue-servants in Madras are a very hard-worked and most efficient set of men, *Ouchterlony* 5511——A man trained in the custom-house in London would make a better collector of customs than a civil servant, *Warden* 6278.

Corrupt practices resorted to under the present system of promotion, through the collectors, of subordinate revenue officials; amendment suggested, *Wingate* 7780-7794. 7810, 7811—— Practice in Bombay as regards the sending by the native officer, or karkoon, of petitions to the collector on questions of revenue; checks upon, and improbability of,

Reports, 1857-8—*continued.*

Revenue Service—continued.

a false reading by the karkoon, *Wingate* 7791-7824——Hasty way in which the evidence is taken down in Bengal in extra-judicial cases before the collector; difficulty in reading it, *W. H. Martin* 9160, 9161. 9220-9223——Practice in regard to the taking of written or oral evidence in revenue cases; language used, *ib.* 9219-9240.

Inaccuracy of the statement that collectors in Bengal get through their work in about two hours a day, *Marsham* 9471-9474.

See also *Civil Service.* *Judicial Service* (*European Judges*), 3. *Magistrates.*

Revenue Settlement. See *Land Revenue Settlement, and Tenure and Sale of Land.*

Rice. Enhanced price of rice in the interior, through the difficulties of transport from the seaboard, *Balston* 5931, 5932.—*See* also *Arracan.*

Ritchie, Stuart, and Company. Encouragement given by the Government collector in Khandeish to the operations of this firm in cotton manufacture, *Wingate* 7835. 7902-7905.

Rivers. Natural obstacles to the extended use of the feeders of the main rivers as a means of transport of produce, *Tremenheere* 511. 515——Improvement, through the introduction of steamboats on the rivers in Bengal, *Wise* 2925——Very defective system of administration of the rivers of southern India; each important river, such as the Cauvery, should be placed entirely under one engineer, *Ouchterlony* 5379, 5380——The rivers in Bengal are very numerous, and are the highways during the rains; Government has taken every measure to keep them open, *Mills* 8898. 8900-8902.

I. *Bengal:*

1. Number and Character of the Roads:

Information relative to the roads in Bengal, and the means of communication thereby, *Tremenheere* 82-88——Statement in proof of the deficiency of roads in central India, and the lower provinces, *Theobald* 981——Great want of roads, and the exceedingly bad condition of the existing roads, *Freeman* 1574-1596——Illustration of the loss to the producer through the badness of the roads, *ib.* 1584-1596——There are a few good roads near Calcutta, *ib.* 1597, 1598——Bad state of the roads in Bengal, so much so that the planters find it necessary to make roads themselves, *MacNair* 2010-2014.

Bad state of the roads in witness's district in Eastern Bengal, *Wise* 2758——Absence of new roads in Lower Bengal, *ib.* 2923——Roads are much wanted throughout Bengal, *Dalrymple* 3245-3247; *Mackenzie* 4028; *Waller* 4840. 5236-5239; *Mills* 8898, 8899——Want of a road from Calcutta to Moorshedabad, *Waller* 4840. 5236, 5237.

Mention of several roads out of Calcutta, *Thornton* 8208. 8216. 8267, 8268——Complete road from Calcutta to Kuttack; its character, *ib.* 8216-8222. 8240——Statement as to the existence of numerous roads in Bengal and throughout India; there can however be no question that there is a great want of roads, *ib.* 8237-8250. 8265-8269.

There is a great want of roads in Bengal; names and condition of some of the roads adverted to hereon, *Marsham* 9534-9546. 9717-9719——The road from Mirzapore to Jubbulpore is considered one of the best in India, *ib.* 9542-9545.

2. Action of Government in the matter:

Evidence as to the degree of blame attaching to Government for the non-formation of roads in Bengal, *Freeman* 1574-1596. 1937-1944.

Orders from the Court of Directors for the construction of roads as feeders to the railways, *Thornton* 8235, 8236——The Government of India cannot justly be charged with neglect in regard to roads; their conduct on this score has, in fact, been most exemplary, *ib.* 8260-8262. 8270——More care bestowed of late years upon the question of roads, *ib.* 8263.

Neglect until within the last few years of roads and public works in Bengal; cause of this, *Bidwell* 9270. 9366——General feeling in India that for many years the expenditure on roads was altogether inadequate, *Marsham* 9532, 9533——Unduly rapid outlay upon roads in consequence of representations from the home Government, *ib.* 9582. 9754-9757.

3. Mode

Reports, 1857-8—*continued.*

ROADS—continued.

I. *Bengal*—continued.

3. Mode of Construction and Maintenance:

Means by which the roads are constructed and maintained, *Tremenheere* 84. 88–93——System of management and means of support of the roads; improvement suggested on this point, *Theobald* 982–987——Tolls are taken on several of the roads, *ib.* 982——In making or maintaining the roads, compulsory labour should, if necessary, be resorted to, *ib.* 987. 1107–1111.

Advantage of a system of assessment upon zemindars, planters, &c., with a view to proper roads being formed, *MacNair* 2119–2125. 2303, 2304——The roads in Bengal might, without any great expense, be made passable throughout the rainy season; bricks might readily be procured, *ib.* 2301–2309——Advantage, on the score of road-making, if there were an increased number of settlers conjointly with a system of local self-government, *Dalrymple* 3248–3257——Probability of the Europeans and natives maintaining the roads if made by Government, *ib.* 3253–3255. 3391–3397—— The natives understand road-making, and there is no want of labour, *ib.* 3255. 3398–3401.

Reason why Government, rather than the zemindars, should make the roads; provision to that effect, under the decennial settlement, *Dalrymple* 3391–3397. 3431–3433——In making roads, bricks may be procured without any great expense; they are laid down broken, *ib.* 3420. 3483–3487——Want of proper funds and local committees for the formation of roads, *ib.* 3434, 3435——Good roads may be made in Bengal without any very great expense, *Mackenzie* 3914——There is a toll and ferry fund established by Government, and managed by a local body, for the maintenance of the roads, *ib.* 3915–3918.

Much greater cost of metallic than of earthen roads; particulars hereon, *Thornton* 8237–8239——Practice as regards the formation and management of roads through district committees, *ib.* 8264, 8265——Great obstacle on account of the rains to the construction of roads in Bengal, *Bidwell* 9270.

II. *Bombay:*

Bad state of the roads in different parts of Bombay, as shown by witness's experience in 1851; suggestion then made by him for their local maintenance, *Warden* 6100–6103. 6184–6188—— Information relative to the extent and character of the roads in Mysore; very favourable testimony on this point, *Onslow* 6505. 6536. 6513–6517——Want of better facilities in Mysore for reaching the places of export, *ib.* 6699, 6700. 6818–6825——Much has been done of late years to improve the roads in Bombay, *Warden* 7480.

Greatly improved state of the roads throughout Bombay, although in many places roads are still urgently required, *Wingate* 7723–7729——Particulars relative to the character and extent of the roads throughout Bombay, and the efforts made of late years to increase and improve them, *ib.* 7943–7953. 8030–8073——Commercial as well as military objects served by the principal roads in Bombay, *ib.* 8032–8043. 8067–8069——Better lines of road could not have been selected than those by the Tul Ghaut, Bhore Ghaut, and Ram Ghaut, *ib.* 8040–8043. 8069.

Less requirement of roads in Guzerat than in the Deccan, *Wingate* 8044. 8062–8065. 8074—— Roads are much required in the Deccan; much more should have been done to make or improve them, *ib.* 8044. 8070. 8072, 8073——Rate of travelling over the roads, *ib.* 8048–8061——Great value of new roads in order to develope the resources of the country, *ib.* 8079–8100—— Character of the roads in Bombay further adverted to in connexion with the rate of travelling of bullock-carts over them, *ib.* 8152–8160——There are about 500 miles of good roads in Bombay; the cross roads are much more extensive, *ib.* 8161–8164.

Evidence as to the character of the roads in Guzerat, more especially in the Broach and Surat districts; considerable improvement within the last seven or eight years, *Landon* 8291–8308—— The roads in Guzerat are now sufficient for local purposes, but are insufficient for external trade, *ib.* 8291. 8309, 8310——Practice as regards the appropriation of Government money in repairing the roads, *ib.* 8296–8300——Want of materials for road-making in Guzerat, *ib.* 8681—— State of repair of the roads from Broach to Baroda, *ib.* 8682.

III. *Madras:*

Excellent roads communicating with the hills in Madras, *Baikie* 767–770. 798–803——Information relative to the principal roads in the south of India; excellent manner in which many of them have been constructed and maintained, *Ouchterlony* 5365—— Better management of the roads when under a distinct road department than since their transfer in 1855 to the management of the several district surveyors, *ib.* 5365, 5366—— The cross or district roads are generally bad, *ib.* 5365. 5367——Of late years public money has been liberally voted for road purposes, *ib.* 5365—— Dislike of the natives to spend money on roads; they are all kept up by Government, *ib.* 5368, 5369——Advantage in there not being any tolls levied on the roads or canals in southern India, *ib.* 5382.

Reports, 1857-8—*continued.*

ROADS—continued.

IV. *North Western Provinces:*

Good and numerous roads in the North West Provinces in addition to the Grand Trunk Road which passes through the centre of the Doab, *Saunders* 9916-9918. 9929, 9930. 10087——System of local assessment for the maintenance of the roads; dissatisfaction hereby, *ib.* 9919-9928——Operation of the system of local assessment for the formation of roads further adverted to; the natives are alive to the value of roads, but object to the assessment as a separate charge from revenue, *ib.* 9973. 9977-9993——Illustration of the desire of the natives occasionally to make roads for religious purposes only, *ib.* 9974-9977.

V. *Character of the Roads of India under Heathen Dynasties:*

Much better roads throughout the country during the Hindoo and Mahomedan dynasties than at present, *Mackenzie* 3711, 3712——Further reference to the better state of the roads under former dynasties; in Shah Jehan's time the country was covered with roads, *ib.* 4027. 4049, 4050.

Information relative to the number and condition of the roads in India in ancient times; grounds for inferring that there were no good roads at all, *Thornton* 8228-8231.

See also *Grand Trunk Road.*

Ryots. Great advantages to the ryots through European capital and settlement, *Theobald* 1187, 1188; *Freeman* 1516, 1517; *MacNair* 1974, 1975. 2046-2049. 2328-2333. 2605. 2609; *Wise* 2630. 2637-2643. 2713, 2714. 2777-2786. 2858, 2859. 2963, 2964; *Dalrymple* 3268-3270. 3402-3406; *Mackenzie* 3692-3696; *Baillie* 4545; *Wingate* 7893, 7894. 8167-8170; *Landon* 8349-8359.

Nature of the rights of the cultivators of the soil in Bengal, and means by which those rights might be extinguished; difficulty hereon, *Freeman* 1662, 1663. 1671. 1707-1713——Under a system of fee-simple, or of extended European settlement, the ryots may be protected by a fixed rate, beyond which their rents should not be raised, *MacNair* 2498-2501. 2504, 2505.

Constant practice of the native zemindars in Bengal to enforce illegal exactions from the ryots, *MacNair* 2596-2605; *Mackenzie* 3638-3646. 3653-3656; *Mullens* 7212-7217. 7223, 7224. 7316, 7317.

Very favourable feeling of the cultivators of the soil towards European settlers; instances of this in Lower Bengal during the mutiny, *Wise* 2637-2649. 2715. 2869. 2965-2967——The rights of the ryots under the permanent settlement must be protected, *ib.* 2929, 2930——Nature of the occupation rights of the ryots in Bengal, *MacNair* 3034-3038.

There is no reason why the rights of the ryots may not be equitably purchased, *Wise* 3155-3157——Difficulty as regards the rights of the ryots if the land were to be sold out and out, *Dalrymple* 3347-3351——Tendency of the ryots to become attached to the European settlers, *ib.* 3402. 3576-3580——The population of Bengal are not generally in want of rice as food, but in winter they are under-clothed, *ib.* 3497-3499.

The better class of farmers in Lower Bengal are being impoverished, and live in less comfort than under the Hindoo and Mahomedan dynasties, *Mackenzie* 3630——The cultivators' farms in Bengal vary very much in size, but average about twelve acres each, *ib.* 3650——The farmers pay about 4 *s.* of rent, and 2 *s.* of illegal exaction, per English acre, *ib.* 3651, 3652——Political advantage in the cultivators becoming possessors of the soil, *ib.* 3678-3680——Right of continued occupancy of the soil in India if previously held for ten years, *ib.* 3741, 3742. 3871——There is less comfort among the better class of farmers in Bengal than there used to be in former times, *ib.* 3894.

Political difficulties anticipated in the event of the natives being largely ousted from the soil by European colonization, *Hawkins* 4326——With the exception of the upper class of natives, the great body of the people are favourable to European settlement, *Waller* 4838.

Reference to a "Statement of the Ryots in the Zillah Nuddea," complaining of the oppression and injustice experienced by them, and by the Bengal ryots generally at the hands of the native and European zemindars and indigo planters; witness believes that this document emanated directly and entirely from the natives themselves, that there is a great deal of truth in it, and that it is well worthy of the consideration of the Committee, *Mullens* 7154-7166——Further statement in confirmation of the truth of the complaints of the ryots against the zemindars, *ib.* 7209-7218.

Varying size of the ryots' holdings in Bombay; in the rice countries the average is probably below ten acres, *Wingate* 7827——The holdings underlet in Bombay are not generally the properties of large farmers, but of non-agricultural classes, *ib.* 7828-7830——Witness denies that the population throughout Bombay are in a poor and wretched condition; in many districts, the Southern Mahratta especially, they are exceedingly comfortable, and have abundance to live upon, *ib.* 8078-8084.

Reports, 1857-8—*continued.*

Ryots—continued.

In 1853 witness made a tour of the north-eastern parts of Bengal, and found the condition of the people to be on the whole good, *Mills* 8766-8769——Illustration of the friendly feeling of the natives in the North-Western Provinces towards European settlers, *Saunders* 10071-10073.

See also *Administration of Justice (Mofussil). Advances to Cultivators. Enam Commission (Bombay). European Capital and Skill. Land Revenue Settlement, and Tenure and Sale of Land. Native Character. Police. Zemindars.*

S.

Salaries (Public Servants). Increased pay of late years of different native officials, *MacNair* 2128-2130——Good pay at present of the sudder ameens and moonsiffs, *ib.* 2410. 2412-2414——Probability of improvement in the morality and efficiency of the police and of the native officials generally if they were better paid, *Wise* 3047-3051. 3118-3120——Reasons for the much better pay of European than of native officials, *ib.* 3052——Statement showing the low salaries of the great majority of the natives in the uncovenanted service, *ib.* 3054-3065——Unduly large salaries at present of many of the civil servants, *Waller* 4875——Effect of the exclusive character of the covenanted service as regards the subordinate positions and low salaries open to the uncovenated service, *ib.* 4919-4924. 5098-5101.

Improvement to be effected by an increase of the pay of native officials, *Wingate* 7776. 7780——Expediency of a further increase in the pay of the native judges, *Bidwell* 9373-9376——The emoluments of the native judges should be increased, but it is not necessary to give them the same salaries as the European judges, *Marsham* 9408. 9735-9746——It might be well to increase the pay of principal sudder ameens to 1,000 rupees a month, *ib.* 9408——Corruption among the Company's officers when they were underpaid, *ib.* 9745, 9746.

See also *Police*, I. 3.

Sale of Land. See *Land Revenue Settlement, and Tenure and Sale of Land. Redemption of Land Tax.*

Sale Law Improvement Bill. See *Land Revenue Settlement, and Tenure and Sale of Land.*

Salem. Successful and satisfactory establishment of a European zemindar in Salem, *Ouchterlony* 5423. 5464. *See* also *Coilamully Hills. Shevaroy Hills.*

Salt. Enhanced grievance in the case of salt through the difficulties of transit, *Freeman* 1521. 1599-1601——Great adulteration of salt by native traders; how Government might prevent this, *ib.* 1521. 1599——Enhanced price of salt in the interior through the difficulties of transport from the seaboard, *Balston* 5931, 5932.

Sanatariums. See *Darjeeling (Bengal). Neilgherry Hills (Madras)* 9. *Pooroonahur (Madras).*

Saunders, John O'Brien. (Analysis of his Evidence.)—Was in the North-Western Provinces, in the Allygurh district, as an indigo planter and merchant from 1827 till 1852; 9789-9793. 9795——Very few European settlers in the North-Western Provinces, 9794. 9796——Diminution in the indigo trade, and in the number of indigo planters in the North-Western Provinces, in consequence principally of the increased cultivation of a better quality of indigo in Bengal, 9797-9799. 9804-9807. 10080, 10081. 10132, 10133. 10146, 10147——Objection by the Europeans in the North-Western Provinces to be placed under the jurisdiction of native judges in criminal cases, 9800-9803.

Opportunity, by means of irrigation from the Great Ganges Canal, of improving the indigo cultivation in the Allygurh district, 9808-9812. 10082, 10083. 10126-10129——Advantage anticipated from the facility of transport to be afforded by the railways, 9813, 9814. 10084-10086——Unfriendly disposition of the majority of the Government officials in the Allygurh district, &c. towards the settlers, 9815-9830——The Government at Agra have always shown a wish to encourage settlement, 9831.

Grounds for objecting to the revenue settlement in the North-Western Provinces; the result has mainly been to transfer the land from the talookdars to merchants or other capitalists, and to destroy the influence and interest of the former in the management of the country, 9834, *et seq*——Plan of arrangement of the revenue under the new settlement, 9842——Way in which the new settlement has affected the European planters, 9852. 9865-9873——Power of the natives in the North-Western Provinces to protect themselves from extortion or oppression, 9862——Beneficial operation of the settlement in a commercial point of view owing to the investments by traders in the land, 9862-9869——Varieties of tenure open to the European in the North-West Provinces, 9874.

Reports, 1857-8—*continued.*

Saunders, John O'Brien. (Analysis of his Evidence)—*continued.*

Badness to the last degree of the native courts in the North-Western Provinces, 9875–9880. 10052–10055——Corrupt character of the native judges, 9876. 10052–10056——Also of the native officials attached to the courts, 9876——The natives generally are naturally most corrupt and false, 9876, 9877. 10113–10115——Great improvement if there were a despotic or summary mode of administering justice, 9881–9888——All the judges should, if possible, be Europeans, 9889. 10056——Opportunity, by departing from the exclusiveness of the covenanted service, and by employing Europeans in India or from England, of obtaining an adequate number of well-qualified Europeans for presiding over all the courts, 9889. 10057–10063. 10110, 10111.

As a matter of police the use of the native language in the courts should be retained, 9890——Opportunity taken by native officials, in official correspondence, to insult Europeans through their position not being properly defined, 9881–9895——Paramount importance of increased European superintendence generally in all departments in India, 9896–9899. 10108–10112——Very good character of the police in the North-Western Provinces; different causes of their superiority to the Bengal police, 9899–9912——Physical and moral superiority of the Hindoos in the North-West Provinces over the Bengalese, 9901–9905.

Physical advantages of the North-Western Provinces as compared with Bengal, 9908–9910——Advantage of the very perfect survey and registration of land in the North-West Provinces, 9913–9915——Good and numerous roads, in addition to the great trunk road which pass through the centre of the Doab, 9916–9918. 9929, 9930. 10087——System of local assessment for the maintenance of the roads; dissatisfaction thereby, 9919–9928——Good state of the portion of the trunk road in the Doab; it is well bridged, 9929–9934.

Large internal sugar trade in the North-West Provinces, the natives consuming as much as they can get, 9935–9943——Suitableness of the climate of the hill districts of Mussorie Nynee Tal, &c. for the European constitution, 9944–9949——Unsuitableness of the land on these hills for European cultivation, 9950–9953——Facility for largely extending the tea cultivation in the hills, 9953. 9956——The natives would gladly consume tea if they could procure it cheaply, 9953——There is no uncultivated land where witness has been in the North-West Provinces, 9955.

Further explanation as to the new settlement; the talookdars received eighteen per cent. of the revenue as a sort of retiring pension, 9958–9964——Operation of the settlement further objected to, as regards more especially the talookdars and the smaller class of cultivators among the newly recognised proprietors, 9965–9968. 9994–9997——Apparent benefit of the new system in giving merchants or money lenders, as capitalists, a vested interest in the soil, 9969, 9970. 10033. 10035——Dissatisfaction among the natives in consequence of the new system, 9970. 10010–10020. 10092——Violence arising out of the settlement during the late rebellion; the new proprietors have been ousted or murdered, 9971, 9972. 9998–10000. 10037–10039.

Operation of the system of local assessment for the formation of roads further adverted to; the natives are alive to the value of roads, but object to the assessment as a separate charge from revenue, 9973. 9977–9993——Illustration of the desire of the natives occasionally to make roads for religious purposes only, 9974–9977——Further examination relative to Mr. Bird's revenue settlement, and further objection to it on the ground of its having dispossessed those who were the old proprietors according to the native system 9994 *et seq.* 10096–10101.

The new settlement had appeared to Government up to the time of the outbreak to work well, 10026. 10029, 10030. 10100, 10101——The revenue might have been collected still more readily under the old than the new system, 10027, 10028——Opinion that it would be wise even now to take steps for restoring the proprietorship to men of influence in the country, 10031——Experience of witness as a mortgagee in the case of land under the new settlement; great litigation and expense in the enforcement of his claims in the native courts, 10040–10055.

Suitableness of the half-caste population for employment under Government; the natives, however, occasionally hold them in contempt, 10064–10070——Illustration of the friendly feeling of the natives towards European settlers, 10071–10073——The Mahomedans have always been much more inimical than the Hindoos to British rule, 10075. 10088, 10089——Fitness respectively of Mahomedans and Hindoos for employment by settlers, 10076–10079. 10113–10115——On the abolition of the Persian language in the courts a mixed language was used which was not intelligible to the bulk of the natives, 10076. 10220——The natives, although not fitted for judicial offices, might be employed in the management of estates and in Customs' appointments, 10090, 10091. 10111, 10112.

Opinion that the mutiny has been owing to a combination of causes, our social reforms having been a main cause, 10092–10095——From all that witness knows of the Punjaub system of Government he fully approves of it, on the score of its simplicity, 10103——Improbability of so much as twenty years' purchase being given in the event of a power to redeem

Reports, 1857-8—*continued.*

Saunders, John O'Brien. (Analysis of his Evidence)—*continued.*

redeem the land-tax, 10104-10107——Greater honesty on the part of natives of the banker class than of any other class, 10116, 10117.

Necessity of thorough experience in settlers in the North-Western Provinces before they can with safety make advances of capital, 10118, 10119——The rate of interest on mortgage is usually twelve per cent., 10120, 10121——Witness, though successful as a capitalist, would not advise other Europeans to embark their capital in the North-West Provinces, 10122-10125——Witness and his relations in the Doab have not found the climate unhealthy, 10130, 10131. 10135-10137.

Falling off in the cultivation of cotton in the Doab for export; causes thereof, 10132-10134. 10225-10229——Advantage in point of health if a European regiment were stationed on the hills at Nynee Tal or Almorah; inconvenience in other respects, 10138-10145——Large margin for profit by the growth of tea in the Kumaon hills and the Dhoon, where the cultivation would be largely increased if there were proper facilities given by Government, 10149-10158.

The close and excellent superintendence carried out by the Lieutenant-governor of the North-Western Provinces, has been productive of great advantage, 10159-10161——Although the employment in greater numbers of competent Europeans is very desirable, witness does not consider it expedient to throw open the civil service, or to select Europeans in India for any of the higher offices, 10162-10184. 10224——As regards the numerous changes in our system of administration, during Lord William Bentinck's time, witness questions whether they can all be considered improvements, 10185-10196.

The greater development of the country during the last thirty years, has been owing to measures that have been pressed upon the Company, 10197-10200——Much less bribery if there were Europeans in every department, 10201-10206——Further reference to the importance of railways as an encouragement to settlement, 10207-10211——Probability of the disaffection in Oude being very much owing to the system of revenue settlement contemplated for that province, 10212-10216——Impolicy of keeping up a large native army in India, 10217-10218——Increased litigation through the system of native judges, 10221-10223.

The cultivation of cotton in the North-West Provinces may be increased and improved by means of irrigation, but its competition with American cotton must be very uncertain, 10230-10240——The best crops are now irrigated, 10243——Increased crops of indigo by means of irrigation; the quality can hardly be further improved, 10245, 10251-10253——Large growth of wheat and barley, 10247-10249——The cotton is inferior to all the Bombay cottons, 10250——The indigo fetches a lower price by twenty-five or thirty per cent. than the Bengal indigo, 10254-10256.

A general improvement of the courts is one of the remedies required as an encouragement to settlement, 10257, 10258——The knowledge that Government officials wished to encourage settlement is also required, *ib.*——Nothing is simpler than for the capitalist to be on good terms with the natives; the reception of Europeans going to re-settle would be favourable, save on the part of the Mahomedans, 10259-10264.

Savings Banks. Circumstance of savings banks not being resorted to by the native community, *Bidwell* 9324-9327.

Schlagintweit Hermann, Phil. Dr. LL.D., *and Robert Schlagintweit, Phil. Dr.* (Analysis of their Evidence.)—Were, together with their brother, Mr. Adolphe Schlagintweit, sent out by the Court of Directors, on a scientific mission, to Central Asia, the Himalaya Mountains, and the territories generally of the East India Company, 6976-6978——Outline of the travels of each brother, 6979-6981——As regards Mr. Adolphe Schlagintweit, it is feared that he has fallen at Yarkand, in action against the Chinese, 6981. 7068——The total length of the lines along which the researches were carried amounts to about 18,000 miles, 6981.

Principal roads or passes over the Himalayas into Tibet; the lowest is the Niti Pass which is 16,000 feet high, 6982. 6990. 6998——Different climates in different parts of the Himalayas; the north-western portion is the most favourable for Europeans, 6983-6985——Dry and healthy climate in Tibet, 6984. 6995, 6996——Cashmere is an exceedingly favourable place for European settlement, 6986, 6987——In Sikkim the climate is very mild, but there are very heavy falls of rain, which cause much ill health, 6988-6994.

Character of the valleys of the Himalayas, 6989——Absence of dairy farms throughout the Himalayas, though some portions are exceedingly suitable for them, 6991-6993——The villages are situated at a much less altitude in the Himalayas than in Tibet, 6997——Inaccessibility of Bhutan Proper to European trade; causes of this, 6998. 7032-7039——Obstacles to British trade with Nepaul, through the exclusive character of Jung Bahadoor's government, 6998. 7054-7058.

Evidence as to the character and quantity of the Chinese tea now consumed in Tibet, and as to the means for supplying that country with a better and cheaper tea, to be grown

Reports, 1857-8—*continued.*

Schlagintweit, Hermann, Phil. Dr., L.L.D., and Robert Schlagintweit, Robert, Phil. Dr. (Analysis of their Evidence)—*continued.*

along the Himalaya range, where an unlimited quantity may be produced, 7000-70011. 7024——Principal articles of Central Asia and of Tibet, which might be exported to India, 7012, 7013. 7025-7031——Supply of cloth and other manufactures from Russia in Central Asia and Tibet; necessity of proper means of transit of goods in order that an English trade may be substituted for the Russian trade, 7014-7020. 7070-7079.

Obstacle to the supply of Indian-grown tea to the regions northward of Tibet, 7021-7023——Difficulties of a trade with Sikkim, on account of the Chinese control there exercised, and of the want of proper roads, 7040-7053——Impediment to Europeans going to Tibet, *viâ* Kumaon and Gurwahl, 7059-7061——Importance of an improvement of the British trading relations with Cashmere; obstacles at present against European settlement there, 7062-7064. 7084-7086.

Indirect way in which British trade must take place with Central Asia, 7064——Mode of conduct of the trade, and character of the people, of Turkistan, 7064-7066——Suggestions with a view to an improved communication with Central Asia, through Cashmere, 7073-7079——Reference to the terms on which the Indian Government grant land in Kumaon for tea cultivation, 7080-7083——The fact that the Hindoo commercial classes in India have not established an extended trade with the regions north of the Himalayas is explained by the want of proper and safe communications, which want it is most expedient to remedy, 7087-7104.

Schools. See *Education of Natives.*

Scientific Mission. Witnesses were, together with their brother, Mr. Adolphe Schlagintweit, sent out by the Court of Directors on a scientific mission to Central Asia, the Himalaya Mountains, and the territories generally of the East India Company, *H. and R. Schlagintweit* 6976-6978——Outline of the travels of each brother, *ib.* 6979-6981——As regards Mr. Adolpe Schlagintweit, it is feared that he has fallen at Yarkund, in action against the Chinese, *ib.* 6981. 7068——The total length of the lines along which the researches were carried, amounts to 18,000 miles, *ib.* 6981.

Seeds. Deterioration of foreign seeds in India when continued to be grown on the same soil, *Warden* 6178-6180. 6183; *Onslow* 6886.

Shevaroy Hills (Salem). Particulars as to the climate and resources of the Shevaroy hills, *Ouchterlony* 5278——The Shevaroy hills are by no means extensive; they are resorted to chiefly as a sanitarium, *ib.* 5498.

Sikkim. Impression that Sikkim is now an independent territory, *Hooker* 566, 567——Absence of restriction upon the purchase of land, *ib.* 675-677. 1717-1721——Large fall of rain in Sikkim, *ib.* 678, 679.

The climate is very mild, but there are very heavy falls of rain, which cause much ill health, *H. and R. Schlagintweit* 6988. 6994——Difficulties of a trade with Sikkim, on account of the Chinese control exercised there, and the want of proper roads, *ib.* 7040-7043——The people of the country are a good-natured and kind-hearted race, and are always very friendly towards Europeans, *ib.* 7053.

Silhet, Cachar, &c. Increased cultivation in Silhet, Cachar, and the upper Gangetic delta, through the improved Governments in these districts, *Hooker* 648-652. 707-713.

Silk. Statistics as to the silk cultivation of Bengal, *MacNair* 2045.

Silver. Way in which the silver is absorbed in the country without hoarding, *Baillie* 4540——The present demand for silver in India is an indication of prosperity, and should be viewed with satisfaction by exporters and manufacturers in this country, *Wingate* 7708, 7709.——*See* also *Currency. Hoarding.*

Skilled Labour. See *Children of European Soldiers. European Capital and Skill.*

Small Cause Courts. Besides the proposed courts of extended competency in the large towns, there should be in those places small cause courts, as at Calcutta, *Theobald* 1003-1005.

Spinning Factories. Advantage to be derived from the establishment of factories for spinning yarn from the raw cotton; successful operation of some of these factories or "filatures" in Pondicherry, *Ouchterlony* 5311-5314——Impracticability of employing European children in "filatures" on the Neilgherries, *ib.* 5456, 5457.

Stamp Law. The stamp law, as making litigation a source of revenue to the Government, should be abolished, *Waller* 4899.

Steam Communication. Great benefit of a subsidy from Government in aid of steam communication along the coast, and in connexion with the interior, *Onslow* 6834-6838.

Sudder

Reports, 1857-8—*continued.*

Sudder Ameens. See *Administration of Justice.*

Sudder Court (*Calcutta*). Views of the commercial body of Calcutta, &c. as represented by witness, in regard to the amendments desirable in the Sudder Courts, with a view to professional judges, *Theobald* 1012——Curse to the people in the operation of the Sudder Dewanny and Nizamut Adawluts at Calcutta, *Mackenzie* 3800, 3801——Opinion that an amalgamation of the Supreme and Sudder Courts is not practicable at the present time, *Hawkins* 4160, 4161; *Baillie* 4597-4599; *Mills* 8871——Non-objection to the appointment of one or two English barristers as judges in the Sudder Court; an amalgamation of the Supreme and Sudder Courts would not necessarily follow from this plan, *Hawkins* 4480, 4481.

Great advantage of the reforms in the Sudder Court at Calcutta by the introduction in a great measure of the English language, *Waller* 4852-4855——Causes to which may be attributed the much more satisfactory operation of the Sudder Court than of the Zillah and district courts, *ib.* 4876——Further reference to the extended use of the English language in the sudder court, and to the advantages arising therefrom, *ib.* 5116-5119——Result in the Sudder Court as regards the translations into the English language, *ib.* 5122-5128—Great improvements if one or two barristers were appointed as judges to the Sudder Court, *Marsham* 9627-9629.

Sugar. Cultivation of sugar respectively by the natives and by Europeans, *Tremenheere* 56-59——Of two sugar companies in Bengal, one has ceased to exist, *ib.* 489-492——Particulars relative to the cultivation of date-sugar in Bengal; cost, quantity produced, and means of extending the production, *Mackenzie* 3727-3737. 3756-3763——Great facilities for a largely increased production at a very small cost, *ib.* 3727-3737. 3756-3761——Good quality of the date-sugar, *ib.* 3731. 3763.

Calculation that by proper means of irrigation, sugar may be produced at less than one-fifth of the cost of produce of slave-grown sugar, *Balston* 5945——Effect of the climate in checking the growth and produce of the sugar cane as well as of the cotton plant, *ib.* 6279. 6284——Statement that in the case of sugar the land tax and the cost of irrigation amount together to fifty per cent. of the cost of production, *ib.* 6279-6284——Great importance of facilities of irrigation in the case of sugar, *ib.* 6284, 6285.

Successful cultivation of sugar in Mysore; large increase anticipated if the canal system of irrigation be introduced, *Onslow* 6635-6648——Belief that a great deal may be done in Mysore in the profitable cultivation of sugar, *ib.* 6701——Increased exports of sugar from Mysore, although the Indian exports generally many have decreased of late, *ib.* 6710-6713——The Mysore sugar is all extracted from the cane, *ib.* 6714-6717.

Great increase in the exports of sugar from Bengal, *Marsham* 9509——Large internal sugar trade in the North West Provinces, the natives consuming as much as they can get, *Saunders* 9935-9943.

See also *Mysore*, 11.

Sunderbunds. Great risk of the approach to Calcutta through the Sunderbunds, *MacNair* 2010.

Supreme Council. The Supreme and other local councils are wholly useless and enormously expensive, *Waller* 4944——Besides several other sweeping reforms, which are much required, the Supreme Council should be abolished; the members of it are drawing 8,000 *l.* a-year, and are doing nothing, *ib.* 5090, 5222.

Supreme Court. Suggestion that in all the great cities there be English courts with civil and criminal jurisdiction in important cases, *Theobald* 1003-1005——Strong objection of the planters and merchants to the abolition of the Supreme Court at Calcutta; their views on this point, *ib.* 1097-1099——Favourable feeling of the natives of Calcutta towards an approximation to the English criminal law, *ib.* 1263——English law has been administered satisfactorily in Calcutta for eighty years, *Freeman* 1730——Absence of complaints by natives or others against the operation of the Supreme Court at Calcutta, *ib.* 1768-1770——Operation of English law as in the Supreme Court of Calcutta compared with the operation of the Mofussil Courts, *MacNair* 2217-2230.

Higher class of practitioners in the Supreme Courts than in the Mofussil Courts, the expense being very irregular in the latter courts, *Baillie* 3595, 3596——Objection to an extension of the Supreme Courts to the larger towns in the interior; the natives would strongly oppose it, *Hawkins* 4287-4289; *Mills* 8869, 8870. 8881-8884——Greater expense of the regular proceedings in the Supreme Court than in the Mofussil Courts, *Baillie* 4595——Parties to contracts in the interior can only sue in the Supreme Court in the event of one of them being a European, *ib.* 4643, 4644——Superiority of the Supreme Courts to the Mofussil Courts on the common-law side, and probably on the equity side, so that suitors in Calcutta are not likely to resort to the latter courts, *ib.* 4645-4654. 4710——As regards the views of the natives at the Presidency towns in favour of the Queen's Courts, they reflect very much the views of the Europeans around them, *ib.* 4706-4710.

Reports, 1857-8—*continued.*

Supreme Court—continued.

If the Company's courts were substituted for the Supreme Court in Calcutta the bulk of the Europeans would desert the place, *Waller* 5144——Strong approval in certain petitions from Calcutta and Madras of the Supreme Courts at those places, *ib.* 5144. 5152——Reference to the petition from the Madras Native Association as being far more in accordance than are the sarcasms of Lord Macaulay with the views of the people relative to the Supreme Court, *ib.* 5151, 5152——Great and growing confidence of the natives as well as the Europeans in the Supreme Courts, the constitution of which courts is admirable and the administration of justice most satisfactory, *Warden* 6079-6084. 6111-6113.

In Calcutta the natives are well satisfied to be under the Supreme Court, to which they have become habituated, *Mills* 8885; *Bidwell* 9352-9357——Illustration of the strong complaints made by English settlers against the Supreme Courts and its expense, such, settlers having been also opposed to the jurisdiction of the Mofussil Courts, *W. H. Martin*, 9132-9136——The expenses of the Court at Calcutta are very great, *Bidwell* 9353.

Petitions from planters, merchants, and British subjects generally in Bengal in strong opposition to an abolition of the Supreme Court, and praying for its extended jurisdiction, *App.* (*Fourth Rep.*) *p.* 233-238.

See also *Administration of Justice* (*Mofussil*), XI. 5.

Surplus Labour. See *Coolie Emigration.* *Migration of Native Labourers.*

Survey. Doubt as to the Government Survey of the Bengal and Berar districts being yet brought into practical use in remedying the difficulty through the absence of settled boundaries to estates, *Freeman* 1886-1890——Benefit anticipated from the survey in Bengal, *M'Nair* 2153-2155——Advantage if there were an increased number of European superintendents over the conduct of the survey, *ib.* 2156-2160——Extent to which the survey in Bengal had proceeded when witness left India, *ib.* 2479——Corrupt conduct of the survey in taking the boundaries, so far as the natives have to do with them, *ib.* 2583-2585.

Importance of a complete survey of every tenure, *Mackenzie* 4022——A proper survey of the land in Bengal would have saved a good deal of trouble and litigation, *Hawkins* 4216——There have been no reports recently as to the progress of the survey in Bengal, *ib.* 4217——Statement as to the great importance of a proper survey being undertaken generally by Government as a first step towards colonization, *Ouchterlony* 5314-5320——Practice in regard to the employment of natives and European officers generally on surveys in Madras; inadequate number of officers for the purpose, *ib.* 5314. 5316, 5317. 5320——Advantage of the very perfect survey and registration of land in the North-west Provinces, *Saunders* 9913-9915.

T.

Tanjore. Statement by Colonel Cotton as to the great benefits resulting from public works in the district of Tanjore, *Onslow* 6538.

Tar. Ample means for providing tar in India from the resinous woods of the Himalayas, *Tremenheere* 471.

Taxation. Propriety of new taxes in India if the exigencies and just government of the country require them, *Warden* 7499-7502.

See also *Land Revenue Settlement, and Tenure and Sale of Land.* *Redemption of Land Tax.*

Tea. Cosiderable facilities for the production of tea in the Himalayas at a very low cost, *Tremenheere* 6169——Great facilities for the cultivation of tea along the Himalayas, in Sikkim particularly, *Hooker* 551-557. 725-727——Growing taste of the natives for tea, *ib.* 558-560——Good quality of the Assam tea, *ib.* 561. 722-724——Statement as to the tea now used in Tibet and Central Asia; importance of some means for introducing tea from India, *ib.* 598-617. 680-682——Price of the tea now cultivated in the Upper Provinces, where Chinese labour is employed through British capital, *ib.* 728-730.

Successful perseverance of the European settlers in the cultivation of tea in Assam, *Freeman* 1541——Consideration of the extent to which Government assisted in the cultivation of tea in Assam and Kumaon, *ib.* 1921-1925——There are a good many Europeans in Assam superintending the tea cultivation, *Wise* 2874——Facility for the cultivation of tea in Mysore and Coorg, *Ouchterlony* 5283——Successful experiment by witness in growing tea in his garden in Coorg, *Onslow* 6426——The natives would soon consume tea largely if it were produced in sufficient quantities, *ib.* 6431.

Reports, 1857-8—*continued.*

Tea—continued.

Evidence as to the character and quantity of Chinese tea now consumed in Tibet, and as to the means for supplying that country with a better and cheaper tea to be grown along the Himalaya range, where an unlimited quantity may be produced, *H. and R. Schlagintweit* 7000-7011. 7024——Obstacle to the supply of Indian-grown tea to the regions northward of Tibet, *ib.* 7021-7023——Reference to the terms on which the Indian Government grant land in Kumaon for tea cultivation, *ib.* 7080-7083.

Terms of the grant of land to the Assam Tea Company; operations of the Company up to 1853, *Mills* 8825, 8826. 8832-8836——The use of tea is likely to increase among the natives, *ib.* 9112——Facility for largely extending the cultivation of tea on the hills, *Saunders* 9953.9956——The natives in the North-west Provinces would gladly consume tea if they could procure it cheaply, *ib.* 9953——Large margin for profit by the growth of tea in the Kumaon hills and the Dhoon, where the cultivation would be largely increased if there were proper facilities given by Government, *ib.* 10149-10158.

See also *Neilgherry Hills* (*Madras*), 7.

Teak. Importance of a proper development of the teak forests in Travancore, &c., *Ouchterlony* 5278-5283.

Temporary Settlement. See *Climate.* *European Capital and Skill*, 1.

Tenasserim. The climate of Tenasserim is favourable to the health of Europeans, and the soil is very fertile, but the great scarcity of labour renders the province not a desirable one in which to invest British capital, *Tremenheere* 152-156.——*See* also *Tin.*

Tenure of Land. See *Enam Commission* (*Bombay*). *Land Revenue Settlement, and Tenure and Sale of Land.* *Redemption of Land Tax.*

Terais (*Hill Districts*). Extremely unhealthy character of the terais or plains leading to the base of the mountains; particulars hereon, *J. R. Martin* 226-228. 266-269. 282-284——Belt of unhealthy country on the approach to the Neilgherries, *Baikie* 789.

Theobald, William. (Analysis of his Evidence.)—Barrister; practised for fourteen years tn India, 846, 847——Left Calcutta at the end of 1856, as agent to this country, on the part of a considerable body of planters and merchants, who complained of the contemplated enactment of the "Black Acts," and of the want of reforms long asked for in vain, 847, 848——Acted since 1854 as agent for an association of planters and merchants in the Mofussil, established for the purpose of securing reforms in the local administration of justice, 850-852.

Distribution of Europeans all over Lower Bengal as indigo planters and purchasers of produce, 853. 856——Lower Bengal comprises a population of about 40,000,000, and is the most fertile part of all India; it includes Behar and Tirhoot, 854, 855——Absence of increase of late years in the number of Europeans engaged in agricultural and commercial pursuits in the interior districts of Lower Bengal, 857——The Bengal climate is a very fine one, considering the latitude; its drawbacks, 858——Opportunities of the Europeans in Bengal for change of air, by journeys to the hills or by sea voyages, 859-864——Increased settlement in the interior where there is a readier access to the hills and a speedier and cheaper means of return voyages to England, 863-867.

Reference to a plan several years ago for East Indian colonization in the Bombay Presidency, which was encouraged by Sir John Malcolm, but was disapproved of by the Court of Directors, 868-870——Obstacle to European settlement previously to 1833, on account of the licence system, 870——Belief that all legislative restrictions upon settlement have been removed by Act IV. of 1837; doubt held by some on this point, 871——Reference to the case of the removal of Colonel Ouseley, who was acting as agent of the Ranees of Nagpore, 872——Prohibition upon the civil servants in India from holding land, 872-875——Right of East Indians, and of children born in India of European parents, to hold land without restriction, 876.

Impracticability of a settlement of India by European emigrants in large numbers, 877——The want of roads and railroads must be supplied before Europeans can properly penetrate and develop the country, 877. 886——An improved administration which shall afford proper security for the persons and property of Europeans is greatly required as an encouragement to settlement, *ib.*

Particulars as to the mineral resources of different parts of Bengal; these are very great, 878-885——How far the mineral resources have been developed, 883-885——Way in which the land revenue system in Madras and part of Bombay, as comprising the employment of a most unprincipled police, deters capitalists from investing in the land, 886-890——Particulars of the land revenue system in Lower Bengal, that is of the permanent settlement, and of its very injurious operation as regards European enterprise and the security of property, 886. 891 *et seq.*

Origin of the permanent settlement adverted to, 891. 901, 902——The grievance of the present settlement system in Bengal lies mainly in the fact, that the rights of the

Reports, 1857-8—*continued.*

Theobald, William. (Analysis of his Evidence)—*continued.*

zemindars may peremptorily be sold in default by the revenue collectors, and that the rights or vested interests of the putneedars, izaradars, and ryots may thereby be swept away, 891-895. 905-921——Reference to the circumstance of Mr. J. P. Grant, a member of the Government, having brought in a Bill for the purpose of improving the revenue settlement law; explanation as to its not having passed into law, 893. 896-898——Feeling of the commercial body in Bengal that they should be represented in the Legislative Council, 898-900.

Public merits of the permanent settlement in Bengal as opposed to its serious defects, 901, 902——Exceptional class of cultivators whose interests are protected by the Permanent Settlement Act, 903-905——The indigo planters are generally landlords; objects in their becoming so, 922, 923——Imperfect security of the planters even as landlords, 924——Nature of the security of the indigo planters previously to 1837, when they could only go into the country by licence, 925-931——Lessees as well as proprietors have extended rights under the Act of 1837; 932.

Evidence in support of the charge that the native police in Bengal are corrupt, unprincipled, and useless; opinion of Mr. Halliday on the subject, 933-936——Low and criminal class from which the police are largely taken; they are said to be the sweepings of the gaols, 934-936——Great importance of an extension further downwards of European agency in India, 937-941——Considerable improvement if Europeans were employed in the police force, 938-941.

Grounds for the statement that the covenanted or European magistrates are very inexperienced and inefficient, and are altogether too small in number; views of Mr. Halliday to a similar effect, 942-949——Increasing inexperience of the European magistrates on account of the increased number of young men sent out lately from Haileybury, 942-945——Very inefficient and prejudiced character of the uncovenanted class of magistrates, who are mostly natives, and are appointed by the local governments, 947.

Corrupt character of the omlah; the European magistrates are, to a great extent, in their hands, 949-950——Importance of a large increase of Europeans in the uncovenanted service, 951-954——Expediency of greater care in the selection of native servants; the Government has not done justice in this respect, 951. 954, 955.

Grounds for the statement that there is a pressing want of a *lex loci*, 956, 957——Europeans should not be tried to such an extent in the native courts, 957——The revenue law, and many other laws, require improvement, 958, 959——A law is much wanted for the enforcement of contracts, and for the regulation of proceedings with the natives; reference hereon to a repealed law of Lord W. Bentinck on the question of indigo contracts, 958-964.

Particulars as to the Affray Bill for Bengal proposed by the Government about four years ago, and subsequently dropped; grounds on which the commercial interest opposed this Bill, 965——In dropping the Affray Bill an improved law was not brought forward, *ib.*——Statement as to an amended law on the subject of taking recognisances to keep the peace not having yet passed, 965-967.

Reasonableness of the objections of the Europeans to be placed under the Black Acts, that is, Acts placing them indiscriminately with the natives of the country under the same local tribunals, 968——Non-objection to a penal code; objection however to particular parts of the code proposed by Mr. Macaulay, 969-972——Expediency in any code of a due assimilation to the principle of English law; deviation by Mr. Macaulay from this principle, as, for instance, in the right of private defence, 969-975.

Prejudicial action of the European magistrates towards European planters, &c.; cause of this, 976——Cold treatment experienced by the European inhabitants from the upper ranks of the civil service, and from the Government; instances of this, 976-980——Abridgment by the Government of the right of remonstrance on the part of the European inhabitants; instances of this during the Governor-generalship of Lord Canning, to whom, directly, witness does not attribute this disposition to limit the right of representation of grievances, 977-980.

[Second Examination.]—Statement in proof of the deficiency of roads in Central India and the Lower Provinces, 981——Great want of bridges throughout the country, *ib.*——Tolls are taken on several of the roads, 982——System of management and means of support of the roads; improvement suggested on these points, 983-987——In making or maintaining the roads, compulsory labour should if necessary be resorted to, 987. 1107-1111.

Want of a better police for the protection of the Ganges traffic, 988——Want also of engineering appliances for deepening parts of the Ganges, *ib.*——Importance of proper measures being adopted for keeping one of the Nuddea rivers navigable throughout the year; steps taken on the subject, 989——Particulars relative to the Calcutta canals; their bad management and utter inadequacy to accommodate the traffic, 989*-992.

Further

Reports, 1857–8—*continued.*

Theobald, William. (Analysis of his Evidence)—*continued.*

Further statement as to the expediency of introducing European superintendents into the native police, 993, 994——Want of sundry reforms in the magistracy further adverted to, 995——The native deputy magistrates should not act at all as superintendents of the police, *ib.*——Magistrates and judicial officers of all classes should be put under proper legal responsibility to the public, 995-997——Explanation as to the origin of the Act of 1850 for the "Protection of Judicial Officers," 995.

Qualifications suggested as indispensable before admission to the judicial office, 998, 999——Exclusive character of the system in the distribution of judicial offices between the covenanted and uncovenanted services; instances of this, 1000–1002——Suggestion that in all the great cities there be English courts with civil and criminal jurisdiction in important cases, 1003–1005——Besides the proposed courts of extended competency in the large towns, there should be in those places small-cause courts, as at Calcutta, 1003–1005.

Further evidence relative to the question of a *lex loci;* propriety of acceding to the wishes of the East Indians in this matter, 1006–1011——Views of the commercial body of Calcutta, &c., as represented by witness, in regard to the amendments desirable in the Sudder Court, 1012—— Importance of an infusion of commercial knowledge into the Legislative Council further adverted to, 1013. 1015, 1016——Strong feeling of the commercial body in opposition to the measure for the restriction of the press, 1014—— Non-objection to natives being qualified for admission to the Legislative Council, 1017.

The introduction of the English language into the courts is in every way desirable, 1018——Advantage if the principle of municipal government, or local self-government in certain matters, were encouraged, 1019–1021——Disapproval of a redemption of the land tax; it saves a host of other taxes, 1022, 1023——Disposition among the planters to encourage the establishment of schools and the moral welfare of those about them, 1024, 1025.

Examination on the question of the climate of Bengal, to the effect that it is less unhealthy and less deteriorating than is generally supposed, 1026–1032——Good health enjoyed by the planters, 1028, 1029——Belief that though colonisation, as in America or Australia, may not be practicable even on the hills of India, colonists may with success go to India in much greater numbers, 1033——Belief that the Act of 1833 does not enjoin the same law for natives and Europeans, and offers no proper foundation for the threatened Black Act, 1034, 1035.

Nature of the protection afforded by the existing criminal law in cases of maltreatment of natives in the interior by Europeans; approval of other recourse in grave cases besides the Supreme Court, 1036–1039. 1137–1141——The objection of the planters, &c., is to being tried by the inefficient or prejudiced native courts, 1039–1044——Corrupt character of the omlahs further adverted to, 1040–1042——Trial by the sessions judges is not satisfactory to the planters, 1042–1044——The planters, &c., should be tried in their own language by a jury and a competent professional judge, 1043–1046.

Better qualifications for the judicial office of barristers after short experience in India, than of the ordinary civil servants after many years' experience, 1047–1052——Witness has not seen a certain despatch from the Court of Directors ordering that the magistracy be placed in the hands of older men, 1053–1055——Nature of the examinations undergone by the civil servants adverted to, in connexion with their imperfect acquaintance as magistrates with the native language; whatever the examination, there is inadequacy on this score, 1056–1066——Probable causes of the frequent selection of incompetent natives as magistrates, 1067–1072.

Further statement as to the insecurity of capital under the revenue system in Bengal, 1073–1075——Obstacle to the investment of European capital in Madras on account of the ryotwarry system further adverted to, 1076–1079——Further reference to the revenue system as the probable cause of the migration from the Coromandel coast, 1080–1082——Origin of the permanent settlement in Bengal further adverted to; its wisdom in a political point of view, 1083–1086—— Further reference to the means of investment of indigo planters in the land previously to 1837; 1087, 1088.

Personal knowledge upon which, in addition to the expressed views of Mr. Halliday, witness bases his evidence in regard to the magistracy and police, 1089. 1189–1191—— As regards a certain despatch for the reform of the police and magistracy, witness shows that fundamental changes as regards the police are not insisted upon for the present, 1090–1093. 1158–1162——Larger operations, but not larger number of the European agriculturists in the interior of Bengal, 1094——Witness further attributes the paucity of Europeans to the state of the local administrations, the revenue system, and other causes, 1095.

Strong objection of the planters and merchants to the abolition of the Supreme Court; their views on this point, 1097–1099——Explanation as to the employment by the planters of their own establishments, or latteeals, in protecting their interests, 1100——

Reports, 1857-8—*continued.*

Theobald, William. (Analysis of his Evidence)—*continued.*

Approval of the appointment of planters as honorary magistrates and deputy magistrates, 1101–1104——The magistrates generally are more or less under the influence of the omlahs, 1105, 1106.

Witness further contends that it is essential to have one law for the natives, and another law for the Europeans, 1112–1119——The objection to the penal code is, that it substitutes for English law some law not so good, 1119——Way in which witness would provide for proper qualifications in judicial officers as a separate service; barristers should be largely resorted to, and the more fitting members of the civil service selected, after superadding the legal education required, 1120–1136. 1237–1239.

False charges would constantly be brought against Europeans if liable to be tried by the local tribunals for capital offences, 1140——The present system of criminal jurisdiction does not give an impunity to Europeans, 1141——Action respectively of the Indian and home authorities in regard to the appointment of some uncovenanted servants in lieu of covenanted servants, 1142–1152 —— Belief that the exclusion of uncovenanted servants from certain judicial offices rests entirely upon custom, 1151, 1152——Approval of an extension of the uncovenanted service, and of an abolition of the social and pecuniary distinction between uncovenanted and covenanted judicial officers, 1153–1156 ——The civil service should be recast, but not abolished, 1157.

Further evidence in support of European superintendents of police; army sergeants might be so employed; result of such superintendence in Calcutta and Bombay, 1158–1168. 1215–1218——The natives as well as the Europeans suffer under the grievances complained of by witness, 1169, 1170. 1177——No remedy has yet been applied to the reform of those grievances, the existence of which have been admitted by Mr. Halliday and Mr. Grant, 1171–1175.

Further reference to the effect of the evils complained of in deterring European settlement in the Mofussil, 1176. 1272, 1273——The insecurity to person and property through the inefficiency of the police and magistracy goes to a great and grievous extent, 1178, 1179——Further evidence as to the inadequacy in the representation of the Legislative Council of interests which ought to be represented, 1180–1186. 1292, 1293——Great advantage of European settlement to the natives, 1187, 1188.

Effect of the Acts of 1853 and 1857 in regard to the previous restrictions upon the tenure of land, 1192, 1193——Further reference to the propriety of re-considering the prohibition upon officials against holding land, 1195, 1196——Witness cannot suggest any remedy for the ryotwarry system in Madras, 1197, 1198——Evils of the ryotwarry system further adverted to; the ryot fares worse at the hands of the police or agents of Government than at the hands of the agents of the zemindars, 1198–1204.

Explanation as to the objections of the indigo planters to Mr. Grant's Bill for remedying the law of sales of land, 1205–1209. 1271. 1297, 1298——Although the Europeans generally have increased in number of late years the colonists have not increased, 1211, 1212——As regards a *lex loci*, its want is established by the Indian Law Commissioners, 1213——Low grades from which the police are taken further adverted to, 1214—— Approval of a recent proposition on the part of Government for the employment of planters and other European residents as instruments in carrying out the police laws, 1219, 1220.

Further reference to the large number of young men sent out from Haileybury in 1853, and to the probable cause thereof, 1221–1227——Different ways in which Europeans are now amenable to the jurisdiction of the local magistracy, 1228, 1229——The introduction of the English law, as a *lex loci*, need not injuriously affect the natives as regards their employment in judicial offices, 1230, 1231——Different grounds of the objection of the planters to the Affray Bill, 1232, 1233——Monstrous injustice involved in the operation of the law authorising the magistrates to take recognizances to keep the peace, 1234, 1235.

Favourable feeling of the natives of Calcutta towards an approximation to the English criminal law, 1236——Consideration of the grounds of political economy upon which witness objects to a redemption of the land tax, 1240–1247——Defence of the principle upon which witness contends that Europeans in the Mofussil should be subject to the jurisdiction of the Supreme Court alone until a system of courts can be devised in the Mofussil with which they may reasonably be satisfied, 1248–1263.

There is no difficulty in purchasing land in the Mofussil, save that the part of any zemindary purchased is liable for the revenue of the whole, 1264–1270——Value of the Bill of Mr. Grant in proposing to divide zemindaries and to apportion the revenue among the different co-sharers, 1269–1271——Importance of utilising the local knowledge obtained by revenue or judicial officers in any district, 1274–1276——The revenue and judicial services should be thrown open to all competent Englishmen in India, 1277.

Greater number of civil servants absent on leave since the overland route, 1278–1282 Mischievous effect upon the civil service of the new regulation permitting furlough at the

Reports, 1857-8—*continued.*

Theobald, William. (Analysis of his Evidence)—*continued.*

the end of seven years, 1283——Unfitness of many of the native judges to administer justice to natives, 1285——The police in Bengal should have something of a military organisation, as in the Punjaub; respectable Europeans should fill the place of darogah and other subordinate places, 1286, 1287——Long period now taken in the transit of goods by the Ganges, &c., from Calcutta to Delhi, 1288. 1299-1302——Great advantage anticipated from railway communication in making settlement generally possible, 1289.

Views of Lord Metcalfe as to the great importance of colonisation, 1290, 1291——Views of Lord Metcalfe as to the discontentment of the European settlers and the East Indians with the Company's government, 1291——Healthy character of the indigo planters further adverted to, 1294-1296——Facility for the formation of joint-stock companies in India, 1303-1306——There are no legal obstacles to settlement in India any more than in any other dependency of the Crown, 1307——Since Act IV. of 1837, Europeans may settle in every part of the country without a licence, 1308.

[Third Examination.]—Explanation that the Act IV. of 1837 does not appear to have removed the restriction in the statute of 1834 as to the necessity of licence before settlement in provinces acquired during the present century, 2986, 2987.

[Fourth Examination.]—Explanation in support of former evidence as to the origin of Act XVIII., the Act of 1850; 9390——Statement in support of former evidence, and in correction of the evidence of Mr. Hawkins, in regard to the question of the legal liability of Indian judicial officers previously to the Act of 1850, *ib.*

Explanation relative to the success of M. Courjon and Mr. Laruletta as indigo planters in the Mofussil, although subject to native jurisdiction; it is several years ago since these gentlemen were in business, 9392-9396——Further statement as to the expediency of a different constitution of the Legislative Council, 9397, 9398.

Thornton, William Thomas. (Analysis of his Evidence.)—Conducts the correspondence of the India House regarding public works in India; has never been in India, 8205-8207——Particulars as to the present state of the Grand Trunk Road from Calcutta to Lahore; it is excellently metalled nearly the whole way, and is completed between Calcutta and Delhi, save that about eight bridges are yet to be made, 8208-8215——Perfect character of the road where completed, 8209. 8257——Explanation relative to the bridges, more especially as to those yet to be built; stupendous character of some of these works, the delay in the construction of which is by no means to be wondered at, 8209-8216. 8223-8227. 8232-8234. 8255-8259. 8271-8273.

Complete road from Calcutta to Kuttack; its character, 8216-8222. 8240——Information relative to the number and condition of the roads in India in ancient times; grounds for inferring that there were no good roads at all, 8228-8231——Orders from the Court of Directors for the construction of roads as feeders to the railways, 8235, 8236——Statement as to the existence of numerous roads in Bengal and throughout India; there can, however, be no question that there is a great want of roads, 8237-8250. 8265-8269.

Much greater cost of metalled than of earthen roads; particulars hereon, 8237-8239 The Government of India cannot justly be charged with neglect in regard to roads; their conduct on this score has, in fact, been most exemplary, 8260-8262. 8270——More care bestowed of late years upon the question of roads, 8263——Practice as regards the formation and management of roads through district committees, 8264, 8265.

Thuggee. Success of witness in procuring the conviction of river Thugs; means other than the ordinary police employed for this purpose, *W. H. Martin* 9148-9152. 9203, 9204.

Tibet. Successful result of the fair established by Dr. Campbell about thirty miles from Darjeeling; numerous commodities brought thither from Tibet and the hills, *Hooker* 562-565——Nature of the route to Tibet through Sikkim and Darjeeling, *ib.* 569-575——Principal productions of Tibet; evidence hereon as to the attempts hitherto made and as to the importance of further attempts to develop a trade between that country and India, *ib.* 576 *et seq.*——Military and civil authority exercised by the Chinese in Tibet, *ib.* 596, 597. 700-702——The frontier of Tibet is closed by the Chinese and Sikkim authorities against British trade from India; character of the communications or passes into the country adverted to hereon, *ib.* 619-629. 666-668. 683-695——The people of Tibet are chiefly of the Mongolian race, *ib.* 731.

Principal roads or passes over the Himalayas into Tibet; the lowest is the Niti Pass, which is 16,000 feet high, *H. & R. Schlagintweit* 6982. 6990, 6998——Dry and healthy climate in Tibet, *ib.* 6984. 6995, 6996——The villages are situated at a much less altitude in the Himalayas than in Tibet, *ib.* 6997——Principal articles of Central Asia and of Tibet which might be exported to India, *ib.* 7012, 7013. 7025-7031——Large quantities of salt in Tibet, easily procurable, *ib.* 7013——Supply of cloth and other manufactures from Russia in Central Asia and Tibet; necessity of proper means of transit of goods in order

Reports, 1857-8—*continued.*

Tibet—continued.

order that English trade may be substituted for the Russian trade, *H. & R. Schlagintweit* 7014-7020. 7070-7079——Impediment to Europeans going to Tibet *viâ* Kumaon and Gurwahl, *ib.* 7059-7061.

See also *Central Asia.* *Tea.*

Timber. See *Forests (Madras).* *Himalaya Mountains.* *Mysore*, 9. *Neilgherry Hills (Madras)*, 8. *Teak.*

Tin. In the Tenasserim provinces tin abounds and is worked by Chinamen, *Tremenheere* 26.

Tipperah Territory. Particulars as to the corrupt conduct of the police and of the nazir, or sheriff, with reference to a case of murder in the Tipperah territory some sixteen years ago; the nazir was dismissed the service, but was reappointed by the local collector, *Wise* 2721-2725. 2819-2867. 2849-2851. 2907——The late rajah of Tipperah was more advanced and intelligent in character than the present rajah, *ib.* 3085, 3086.

Tirhoot. In Tirhoot there are a million of inhabitants with only one magistrate and one judge, *Freeman* 1633——The planters in Tirhoot are no healthier than those in Bengal, *ib.* 1838, 1839——Absence of disputes between the planters, zemindars, and ryots in Tirhoot, where there are no complaints of the inefficiency of the police, *Marsham* 9440.

Title to Land. See *Enam Commission (Bombay).* *Land Revenue Settlement, and Tenure and Sale of Land.* *Redemption of Land Tax.* *Resumption of Rent-free Tenures.*

Torture. Instance of resort to torture about twenty months ago by a darogah at Pubna, near Calcutta; particulars of this case and of the action of the magistrate in the matter; the darogah received only a slight reprimand, with a caution to be more careful in future, *Freeman* 1759-1762. 1766. 1852——Witness absolves all gentlemen in the civil service from a disposition to encourage torture, *ib.* 1852——Many cases of torture by the natives have come to witness's knowledge, *Dalrymple* 3568, 3569.

Transit Duties. Advantage of the abolition of transit duties in India generally, *Onslow* 6915-6918——Improvement in Bombay through the abolition, in part, of the native transit duties, *Wingate* 7699, 7700.

Transit, Means of. See *Communication, Means of.*

Transport of Produce. See *Communication, Means of.*

Travancore. Belief as to the considerable resources of the Travancore hill districts, both as regards climate and agricultural capabilities; they are, however, but imperfectly known, *Ouchterlony* 5278-5283.

Travellers. Good police arrangements for the protection of the property of travellers on the trunk lines of communication in Bengal, *Tremenheere* 96, 97.

Tremenheere, Major-general George Borlase. (Analysis of his Evidence.)—Retired from the Bengal Engineers about two years ago; spent twenty-five years in different parts of India, 1-3——Necessity of colonisation in India springing from the capitalist instead of from the labourer, 4-6——Very slight progress of British settlement in India, 7——Doubt as to there being any proper record of the number of British settlers, 8-10——Permission given to British subjects under the Acts of 1833 and 1837 to purchase and cultivate land in India, 11-13.

The want of proper means of intercommunication throughout the country is the first and chief obstacle to European settlement, 14-17——Capital is indispensable in colonists, 16——Importance of facilities for the transit of the products of the country from one district to another, 17. 20, 21——The chief mineral resources of India are coal, iron, copper, and tin, 18——Particulars as to the available supplies of coal; the coal of Burdwan and of the Nerbudda is the best adapted to commercial purposes, 19-24.

Great importance of railways in India as a means of bringing together the coal and the iron, 20, 21. 31-35——Several parts of India in which iron exists abundantly, 25, 26. 33——In the Tenasserim provinces tin abounds, and is worked by Chinamen, 26——Copper exists in the Himalayas, but has not yet been profitably worked, *ib.*——Available supplies of wood fuel in Kumaon for the smelting of the iron of that district, 26-30——Vicinity of coal, iron, and lime on the Nerbudda River, 33, 34——Want of lime in many parts of India; available supply near Sylhet as a flux for iron, 36. 39, 40——Existence of deposits of kunkur, which is an impure carbonate of lime, and is hardly available as a flux for iron, 36-38. 41.

Principal vegetable products of India, 42——Facilities in the Punjaub for the production of large supplies of wheat at an exceedingly slight cost, 42-49——Great importance

Tremenheere, Major-General George Borlase. (Analysis of his Evidence)—*continued.*

ance of European superintendence in the production and preparation of Indian cotton, 50–52. 176–179——European supervision is most essential in the case of all vegetable or agricultural productions in India, 50 *et seq.*——Strong illustration of the value of European enterprise and superintendence in the case of indigo, 53–55.

Considerable attention bestowed by the natives upon the cultivation of opium, 55——Cultivation of sugar respectively by the natives and by Europeans, 56–59——Great importance, in times of famine, of facilities for the transport of produce, 60——Considerable facilities for the production of tea in the Himalayas at a very low cost, 61–69——Great want of a proper economy by the natives of the available resources of manure; illustration hereon of the beneficial results of a proper use of manure in developing the soil, 70–79.

Works of irrigation are of the greatest importance, and might well be undertaken by private enterprise, 80, 81——Information relative to the roads, and the means of communication thereby, 82–88——Means by which the roads are constructed and maintained, 84. 88–93——Good police arrangements for the protection of the property of travellers on the trunk lines of communication, 96, 97.

It is most important, for several reasons, to make the hill stations accessible by railway from the plains, 98–110——Particulars as to the large mortality of English soldiers in India, 107–109——Obstacles, through the climate, to the settlement in the plains of English families of the labouring class, 110——Limited extent to which the Himalayas are adapted to European colonisation, *ib.*——Abundance and cheapness of native labour, *ib.*——The true function of the European in India is, not as a labourer, but as a director of native labour, *ib.*

Importance of some plan for an increased number of Englishmen in India, 110——Proposition that the children of European soldiers be removed from the plains to hill stations, and there trained at the cost of Government to different puruits, 110 *et seq.*——As part of witness's scheme, he proposes that an increased proportion of married soldiers be taken to India with their wives; objections to this suggestion considered; slight increase of cost in consequence, 110. 112–122——Different places at which stations or asylums, like the Lawrence Asylum, might be formed for the reception of the soldiers' children, 110.

Several ways in which the children thus trained in the country might, when grown up, be most usefully employed, 110, 111. 137. 142. 146. 149——Objections to half-castes being received in the proposed asylums; degeneracy consequent upon the mixture of races, 112. 123–136——Every precaution should be taken to prevent the European soldiers from marriage with natives, 112. 116. 150. 151——Respects in which the cost of the proposed establishments would in a great measure be counterbalanced, 137–141.

The climate of Tenasserim is favourable to the health of Europeans, and the soil is very fertile, but the great scarcity of labour renders the province not a desirable one in which to invest British capital, 152–156——Large export of rice from Akyab, in Arracan, through the enterprise mainly of Sir Archibald Bogle, 157–161——Doubt as to any advantage if grants of land were made to officers and soldiers when their term of service had expired, 162–170——Advantage rather of European agency in superintending cultivation by native labour than of direct European cultivation, 162–179——Facilities at present for purchasing land in Bengal, 171–175.

Necessity of an extensive system of railways, more especially of numerous branch lines as feeders to the trunk lines, in order properly to develope the resources of India; the present lines, though well laid out, are but the skeleton of what is wanted, 180–193——Belief that the resources of this country are fully adequate to the supply of any quality of materials that may be required for the railways, 194.

[Second Examination.]—Suggested further increase of the members of the uncovenanted civil service in India, who by retiring on moderate pensions might be induced to settle in the country, 339–341. 449–451——Importance, on the score of an improved administration, of substituting Europeans, educated in India, for the native officials now employed as sudder ameens, moonsiffs, &c., 341. 364, 365. 382–386. 401–403. 472–478.

Evidence as to the want of morality and honesty in the native subordinate officials, and in the native character generally; argument therefrom in favour of the extended employment of Englishmen of good moral qualifications in the administration of justice, 341. 364, 365. 382–386. 401–403. 425–443. 452–459. 472–478. 487, 488.

Urgent importance of agricultural improvement in India, agriculture as a science having been altogether neglected, 342. 348–350.——Great importance of branch railways in Bengal as a means of remedying the want of wood fuel in different districts, 343. 345——Statement as to the East Indian Railway being more on the line of commerce than on the line of production, 343–345——Advantages anticipated from the settlement on the hills of European farmers, as likely to lead to an interchange of the products of the hills and of the plains, 346–358.

Reports, 1857-8—*continued.*

Tremenheere, Major-General George Borlase. (Analysis of his Evidence)—*continued.*

Training institutions desirable in the case of young Europeans intended for the uncovenanted civil service, or for agricultural or other occupations, 361, 362. 389, 390. 455——Objection to a substitution of the English language for the vernacular in the courts of law, or as the medium of instruction, 363——Produce or yield of wheat in the North-west Provinces further adverted to; character of the land on which grown, 366-378.

Impression that there are not on the part of Government any obstacles to settlement, 379, 380. 410. 413. 420, 421——In Bengal great complaints have been made by Europeans against the administration of justice, 381. 456-459——Approval of the trunk lines of railway being first laid down, 387, 388——Evil in very few persons settling in India with a view to permanent residence there, 392——Further reference to the illustration previously cited as to the value of manuring the land, 393, 394.

Amount of additional expense in the event of increasing the proportion of married soldiers further adverted to, 395-397——Means by which the parents of children removed to the proposed training institutions in the hills might at times visit their children, 398-400——Enhanced value of products if there are increased facilities of export, 404-406——Further reference to the want of means of communication and transport as a main cause of a non-development by Europeans of the resources of India, 407-412, 422-424——Very important effect of the climate in deterring European settlement, 413, 414. 460-469.

There are several instances of profitable cultivation by Europeans, as in the case of indigo, sugar, and linseed, 415-419——Mention of several natural resources of the Himalayas, &c., 471——Very large timber obtainable in the Himalayas, 471——Circumstance of the land in some districts producing two crops of wheat, but only one of cotton, 479-482——Great importance of numerous branches to the East Indian Railway adverted to in connexion with the delay in sanctioning lines into Oude and Rohilcund, 483-486.

Of two sugar companies in Bengal, one has ceased to exist, 489-492——The improvement in the cultivation of opium has been owing solely or mainly to native labour, 493, 494. 512——Soldiers in India do not now educate or provide for their children, 495——Advantage in a moral point of view, both as regards the parents and their children, in removing the latter to the proposed training asylums, 495-498——Improvident marriages need not be increased under the contemplated scheme of dealing with the children, 499, 500.

Further statement as to the means of lightening the expense of the proposed establishments, 502-504——The staff of the establishments should comprise natives as well as Europeans, 503——Way in which the industrial qualifications of the young men trained at the establishments should eventually be disposed of, 504-508——There should be a proper separation of the different religious denominations, 509, 510.

Natural obstacles to the extended use of the feeders of the main rivers as a means of transport of produce, 511. 515——Increased population likely to be congregated along the lines of railway, 513, 514——Excellent investment afforded to capitalists by the railways, 516, 517——Supply of timber in the Himalayas further adverted to, 518, 519——Witness will lay before the Committee a paper being prepared by him on public works in Bengal, 520, 521.

Turkistan. Mode of conduct of the trade, and character of the people, of Turkistan, *H. and R. Schlagintweit* 7064-7066.

Uncovenanted Service. See *Civil Service.*

Under Tenures. See *Land Revenue Settlement, and Tenure and Sale of Land.*

Union Bank (Calcutta). Decrease of European settlers in Kishnagur, Jessore, and other districts, chiefly through the failure in 1848 of the Union Bank at Calcutta, *Mackenzie* 3907, 3908——Mismanagement of the Union Bank, *ib.* 3909-3911.

V.

Vegetable Products. Principal vegetable products of India, *Tremenheere* 42——Successful introduction of European vegetables and fruits through English settlement, *Freeman* 1522-1524.

Reports, 1857-8—*continued.*

W.

Wages. Rate of wages in Bengal; system of monthly payment, *MacNair* 2147-2152——Considerable improvement anticipated in the physical condition of the natives if by means of more liberal wages they were enabled to procure better food, *Ouchterlony* 5303——Improvement in the condition of natives by the employment given by witness, *Fowler* 5740, 5741——Increase of wages through the increased employment of capital, *Mullens* 7176. 7214.——*See* also *European Capital and Skill.*

Waller, Joseph Gabriel. (Analysis of his Evidence.)—Resided continuously in India for twenty years; lived principally at Calcutta, but travelled over a great part of the country, 4830, 4831——Was a solicitor in the Supreme Court, and subsequently an advocate in the Sudder Dewanny Adawlut, and has kept up his connexion with the country since his return to England in 1855; 4832-4835.

The European settler has in India all the inducements that a rich and fertile country, with an abundance of cheap labour, can offer to skill, capital, and enterprise, 4836——The climate does not offer any serious impediment whatever to settlement by Europeans, 4837——With the exception of the upper class of natives, the great body of the people are favourable to European settlement, 4838——The Bengalee is not, either mentally or morally, in any way inferior to the native of the Upper Provinces, *ib.*——European settlement would be most beneficial to India and to its people; it would effect more than any number of legislative enactments, 4839.

Argument that the real impediment to the colonisation of India is to be found in the exclusive policy of the system under which the country has been governed, 4840——Evil of the constant antagonism between the official and non-official Anglo-Indian communities, 4840, 4841——Wretchedly inefficient, oppressive, and corrupt character of the departments of administration, *ib.*——Radically defective constitution of the Legislative Council, 4840. 4843-4845.

Great evil of the present system of the covenanted civil service in its leading to the appointment of magistrates and judges exceedingly inexperienced and inefficient, 4840. 4873, 4874——Full concurrence in the evidence of other witnesses as to the wretchedly corrupt state of the Company's courts, 4840——Also as to the difficulties experienced by the English magistrates and judges, through their imperfect acquaintance with the native language, *ib.*——Effect of the exclusive system of the civil service in deterring well-educated and professional men from going out from this country, *ib.*

Bar to settlement through the neglected condition of India as regards roads and other means of communication. 4841——Immense importance of a transfer of authority from the Company to the Crown; the change would be very popular with the natives, 4842, 4843——Evil at present through the series of antagonisms in the judicial and other services, 4842——Suggested re-constitution of the Legislative Council, by the formation of a separate Council for each Presidency, and by the infusion of unpaid non-official Europeans and of natives, 4843-4851——The Supreme and other local Councils are wholly useless and enormously expensive, 4944.

Evidence strongly in favour of the introduction of the English language into the courts of law; sundry arguments in support of the proposition, 4852-4868——Entire failure of the present system of competitive examination to secure the most efficient men for India, 4869, 4870——Necessity of throwing the service entirely open in order to obtain efficiency, 4870.

Sufficiency of the salaries in order to induce competent men to go out from this country, 4870. 4875——A knowledge of the native language for colloquial purposes would be sufficient, if the English language be used, 4871——Education in jurisprudence is essential in any one appointed to the judicial office, 4872, 4873——Admission by numbers of gentlemen in the civil service that to attempt to dispense justice is a total failure, 4873.

As regards the police throughout India, its inefficiency cannot be exaggerated, 4874——Unduly large salaries at present of many of the civil servants, 4875——Exceedingly light duties of the revenue collectors, *ib.*——Absence of difficulty in finding members of the uncovenanted service to fill positions previously occupied by covenanted servants at much larger salaries, *ib.*

[Second Examination.]—Causes to which may be attributed the much more satisfactory operation of the Sudder Court than of the Zillah and district courts, 4876——In the Company's courts the trouble of the litigant may be said really to commence on the day when he gets his decree, 4877——Grounds for objecting to the subjection of European settlers, or Christians, to the jurisdiction of the native criminal judges, 4878, 4879——Approval of the extended employment of natives, and of opening some higher offices to them, 4879. 5091.

Reports, 1857-8—*continued.*

Waller, Joseph Gabriel. (Analysis of his Evidence)—*continued.*

Further statement as to the advantages to be derived, indirectly as well as directly, from the introduction of the English language into the courts, 4880——Objection to Europeans being subject to the Company's courts in the interior presided over by Europeans, 4881——Way in which the present revenue sale laws necessarily deter settlement, 4882. 4903-4905——Difference between a talook and putnee, 4883, 4884——Advantages to be derived from a permission to redeem the land-tax, 4885, 4886. 4906-4908——Necessity under which indigo planters and others keep in their pay bodies of police, 4887.

Belief that the character of the natives is very favourable to European settlement; they are mild, docile, and gentle, and capable of being trained to everything that is good, 4888. 4961——Decided objection to the introduction of the non-regulation system into Bengal, 4889——Further evidence as to the deficient training of the civil judges, 4890. 5002-5006. 5085-5089. 5134. 5199——Causes of the antagonism between the settlers and the civil servants, 4891-4893. 4946, 4947. 5081, 5082——Dissent from Mr. Baillie's statement that the business of indigo planters has, on the whole, been a losing one, 4894-4896.

More profitable settlement but for the state of the law and of the police, 4896, 4897——Means suggested for putting an end to the antagonism between the official and non-official communities, 4898. 4930-4934——Importance of the liberty of the English press in India; objection to the recent suppression of its freedom in reference to the mutiny, 4898. 4925-4927. 4981-4996. 5026-5028. 5082-5084——The body of English law should be introduced with such modifications as are necessary to suit the religious habits and social condition of the natives, 4898.

Further statement as to expediency of abolishing the present exclusiveness of the civil service, 4898. 4919-4924. 4930-4934. 5006, 5007, 5223, 5224——The police must be remodelled by the introduction of the European element, and of the native Christians, 4898——Suggestions for providing an efficient magistracy, *ib.*——A worse judicial system than the present could hardly be devised, 4898, 4899——The stamp law, as making litigation a source of revenue to the Government, should be abolished, 4899——Necessity of the introduction of professional judges independent of the Government, 4899.

Impression that the people would readily pay for a more expensive police, if efficient, 4900-4902——A system of registration and a proper survey of the country are essential, under a permission to hold the land in fee-simple, 4909, 4910——Objection to interference with the rule of the Hindoo religion, that the son should take upon himself the debts of his father; in practice, the recovery by law of such debts, as of debts generally, is extremely remote, 4911-4918——Effect of the exclusive character of the covenanted service as regards the subordinate positions and low salaries open to the uncovenanted service, 4919-4924. 5098-5101.

The native press should be placed under certain restrictions, but should not be prohibited altogether, 4928-4930. 4979-4981——Further evidence in favour of a separate Legislative Council for each Presidency, and of its comprising non-official Europeans and natives, 4933-4939. 4955-4958. 5048-5051——Incompetent character of the native pleaders; they should undergo a sort of apprenticeship, 4940-4942——Natives should be allowed to plead in the Supreme Court, without first being called to the bar in England, 4943-4945.

Evil in the necessity under the present system of keeping incompetent men in the service, and of promoting them, 4948-4951. 5087——Instances of the promotion of utterly inefficient men to the bench, 4951-4954——The promotion of natives to high offices should not be encouraged until the mutiny is entirely over, 4959——Importance of the appointment of native Christians to offices in the police, &c., from which they are now excluded, 4960. 4966. 4999. 5054, 5055. 5214. 5215. 5217-5220——Advantage if Government had taken an open and plain course in regard to Christianity; instead of professing to be hostile to its introduction, they should be perfectly neutral in the matter, 4960. 4965. 4974. 4997-5001. 5070. 5112-5114.

Respect entertained by the natives for the missionaries, 4962-4964——There are a great many coloured Christians in Bengal, 4966. 5212, 5213——Degraded condition of the coloured Christians or Eurasians; they are unjustly held in much contempt, 4967-4971. 5071-5073——The lower orders of natives who turn Christians are not considered very trustworthy, 4972——More bitter feeling of the Mahomedans than of the Hindoos against Christians and Christianity, 4975. 5031-5034.

Expediency of all Christians, as well as of European settlers, being subject to the jurisdiction only of European or Christian judges, 4976, 4977. 5029, 5030. 5056-5069. 5074-5077——In a physical sense only are the Bengalees at all inferior to the people of Upper India, 4978——Further statement as to the unsuitable test to which the candidates for the civil service are subjected, 5002-5007. 5085-5087——Way in which the patronage should

Reports, 1857-8—*continued.*

Waller, Joseph Gabriel.—(Analysis of his Evidence)—*continued.*

should be administered, with a view to efficient appointments, if the civil service were thrown entirely open; checks upon jobbery under the system, 5006-5025. 5102-5109. 5164-5188.

Explanation as to the qualifications or professional training desirable in the case of every person appointed to a judgeship; how such qualification might in practice be secured, 5016-5021. 5102-5109. 5135. 5192——The more commerce is extended in India the greater will be the security of the British rule, 5034-5036——Anticipation that in course of time caste will, if not interfered with in any way, gradually disappear, 5037-5041——The Hindoos believe the Christian religion to be a true religion, and consider that its progress will be great if not forced in any way, 5042——Advantage if the Church were entirely disconnected from the State in India, 5043-5047.

Further statement with reference to the exceedingly light duties and large salaries of revenue officers in Bengal, 5052, 5053——Mixed system of native judges and of European and native Christian judges comprised in witness's plan of an improved judicial system, 5057-5069. 5074-5077——Further evidence as to the importance of introducing the substance of the English law all over India; equity must not, however, be separated from law, as in this country, 5061, 5062. 5192-5198.

Different sense in which colonisation can take root in India, as compared with other colonies, 5078-5080——Objection to the duties of the collectors being partly of a judicial character, 5088. 5131——Besides several other sweeping reforms which are much required, the Supreme Council should be abolished; its members are drawing 8,000*l.* a year, and are doing nothing, 5090. 5222——Very inefficient constitution of the Legislative Council further adverted to, 5092-5097. 5221——Each Presidency should enact its own laws, and should act as far as possible subject to the imperial authority of this country, instead of to the authority of the Governor-General, 5110, 5111. 5155-5163. 5189-5191.

Further evidence in favour of the introduction, that is, gradually, of the English language into the courts generally throughout India, 5115-5133——Impression that Mr. Hawkins does not object to the introduction of the English language, provided it be done gradually, 5120——An improvement in the administration of justice will not only encourage British settlement, but will lead to an improvement of the condition of the natives, 5136, 5137.

Belief that the great majority of the natives prefer the Queen's system of law to the Company's system, 5138-5141——Reference to, and confirmation of, certain documentary evidence, showing the strong preference of natives as well as of Europeans for the Queen's courts over the Company's courts, 5142-5154——Power and practice of the Court of Directors in regard to patronage in India; restrictions upon abuse of patronage, 5170-5172. 5175-5182.

Reference to the hill station of Darjeeling as presenting very great resources for colonisation, 5200, 5201——Opinion that settlers' children or grandchildren would not degenerate in Darjeeling, 5202, 5203——In the plains settlement, as distinct from colonisation, may be carried out, notwithstanding the climate, 5204——Greater attraction to settlers, as regards pasture lands, in Australia and Canada than in India, 5205. 5207, 5208——Opinion that enterprising settlers would make money more quickly in India than Australia, 5206.

Witness entirely dissents from Mr. Mackenzie's objection to the employment of native Christians in the police, 5209-5214——Dissent also from Mr. Mackenzie's evidence in regard to the number and success of Greek houses in India, 5216——Approval of there being one grand appellate court at Calcutta, constituted of Queen's judges, the covenanted service being at the same time abolished, 5223, 5224.

Slightly increased mortality of civilians in India as compared with this country, 5225-5227——Mechanics and skilled labourers would be of the greatest use in India, 5228——Importance of a bridge being built over the river at Calcutta, 5229-5235——Further reference to the great want of roads in Bengal, 5236-5239.

Warden, John. (Analysis of his Evidence.)—Left India in 1854, after having been thirty-three years in the civil service, chiefly in the Deccan and the South Mahratta country; held several of the highest offices in the Bombay Presidency, 6020-6026——Considers that the climate in Bombay need not prevent colonisation by Europeans, that is as capitalists, or superintendents of native labour, 6028——The exceedingly low cost of native labour, about eight shillings a month, must always, irrespectively of the climate, prevent the successful settlement of Europeans as manual labourers, 6028. 6047, 6048.

On the Mahableshwur hills in the Deccan Europeans may live permanently, and their race be continued there, 6029-6034——Heaviness of the monsoon in some parts of the Mahableshwur hills, 6030. 6038, 6039——Healthy character of the European soldiers stationed on the hilly districts near Poonah, 6035, 6036——On parts of the Mahableshwur hills, and in other places in Bombay, depôts for the soldiers and asylums for their children may, with great advantage, be established, 6037, 6046.

Reports, 1857-8—*continued.*

Warden, John. (Analysis of his Evidence)—*continued.*

The security of our rule in India depends upon the natives' opinion of our power and justice, 6049——Lower opinion entertained by the natives during the last fifteen or twenty years of our power or justice, 6050, 6051——Excellence of the Elphinstone code, as first laid down for the administration of the Mofussil territories in Bombay; it has since been encumbered with a number of supplementary regulations which have destroyed its simplicity and deformed its beauty, 6052-6056.

Reference to Mr. Elphinstone's proclamation in 1818, declaring the principles on which the Presidency should be settled, and promising that private rights should be treated with generosity, 6057, 6058. 6062——Excellent progress of the settlement of the Company under Mr. Elphinstone's administration, 6059, 6060——As an obstacle to European colonisation, the Enam Commission has not attracted that notice in this country which it should have done, 6061, 6062——Excellence of the tenure of enamdars under the native rule and at the time of Mr. Elphinstone's settlement; enams, in fact, offered the best investment to a European colonist, 6062, 6063. 6075.

Origin of the Enam Commission, 6062——The Commission has disturbed Mr. Elphinstone's settlement, and has unduly interfered with the rights of the Peishwa's subjects, 6062 *et seq.*——The liability of enamdars to be called upon to prove their titles for a period extending back sixty years before the abdication of the Peishwa necessarily operates in deterring settlers from investment on the security of the enams, 6062-6077. 6143-6145——Hardship of the exclusion of enamdars from the right of supporting their claims in a court of justice, 6066-6068. 6129-6134.

Main objection to the operation of the Enam Commission, on the ground that active steps were not taken until 1852, thirty-five years after the abdication of the Peishwa, when many prescriptive titles had been established by the mere lapse of time, and that then sixty instead of thirty years' possession before the abdication should be shown, or ninety-five years' possession altogether, 6068-6075. 6126-6128. 6138, 6139. 6211, 6212. 6219. 6223-6225. 6229. 6248.

Deprivation by the Act of 1852 of the right of female succession to enams; belief that under the native system such succession was unquestioned, 6069-6071. 6247——Impropriety in the *onus probandi* being thrown upon the enamdar, 6074, 6075. 6138, 6139——Also in the final appeal being only to the Governor in Council, and in the claimant not being allowed to support such appeal in a proper manner, 6074, 6075. 6129-6134——Also in the Commission being composed of inexperienced and unqualified men, 6075.

Grievance in the slow progress of the Commission; particulars hereon, 6075. 6146-6153——Disaffection and symptoms of rebellion in certain districts through the operation of the Commission, 6075. 6243-6246——If it be the fact that a large proportion of the land in Western India is alienated, and held by fraudulent titles, the proper way to test such titles is through the courts of law, 6075——As the operation of the Commission involves a violation of public faith, and a rigorous and partial administration of the laws, the Commission should at once be revoked, *ib.*——All decrees passed by the Commission should be declared open to appeal to the Sudder Court, and to Her Majesty in Council, *ib.*

Ample opportunities of witness for acquiring information in regard to the administration of justice in the Mofussil and at Bombay, 6078——Great and growing confidence of the natives, as well as of the Europeans, in the Supreme courts, the constitution of which courts is admirable, and the administration of justice most satisfactory, 6079-6084. 6111-6113——Obstacle to the satisfactory administration of justice by European judges in the Mofussil in Western India on account of the several native languages spoken, and which they do not properly understand, 6081-6083. 6090. 6249, 6250.

Arguments in favour of the administration of justice in the language of the judge, 6082-6086——Aptness of the natives in learning foreign languages, 6083, 6262——Gradual way in which the English language should be introduced into the courts, 6083-6086——Expediency, if the English language be used, of the judges being still acquainted with the native languages, 6083. 6087-6091——Higher test and further examination proposed with a view to greater proficiency in the native languages, 6083. 6249, 6250.

Advantage if the barristers in the Supreme Court were appointed to judgeships; illustration of their fitness for such position, 6087-6089. 6251——There is every desire in Western India to administer justice properly, but the judicial system is defective, 6087-6095. 6111-6118. 6194——Importance of a legal education in the case of all judges, 6087-6092. 6114-6118. 6204. 6252-6255——Improvement if the judicial administration were separated from the civil service, 6094, 6095. 6276. 6278——Expediency of a simpler and cheaper course of proceeding especially in petty cases, 6096, 6097. 6174, 6175——Undue amount of the costs in small cases, as ascertained by witness when on a circuit as judicial commissioner from Bombay, 6097-6099.

Bad

Reports, 1857-8—*continued.*

Warden, John. (Analysis of his Evidence)—*continued.*

Bad state of the roads in different parts of Bombay, as shown by witness's experience in 1851; suggestion then made by him for their local maintenance, 6100-6103. 6184-6188——If the English language be used in the courts any attempt at deception on the part of the interpreters would be detected by the pleaders on either side, 6104-6109——Facility for providing a class of native pleaders conversant with the English language; deficient attainments of students at the Bombay College adverted to hereon, 6105-6108. 6262-6264.

Influence of the sheristadars over the European judges; belief that the British officials generally are more or less influenced by their native subordinates, 6110-6113. 6272-6274——Circumstance of the use of the English language in the Supreme Court at Bombay not being distasteful to the natives, 6119-6122——The interpreters, if the English lanaguage be introduced in the Zillah courts, would not be more costly than the present staff of the judges, 6123, 6124——Interpreters might readily be procured, 6125.

Letter from Jafur Alee, a landowner in Bombay, to Sir Erskine Perry, complaining generally of the proceedings of Government, and more especially of their disregard of native rights in land, 6136——Distinction between an enam and a jagheer, 6136, 6137——Rare instances of any grants by Government either in jagheer or enam, 6140, 6141, ——Gradual disappearance of enamdars in Bombay under the present system of resumption as pursued by Government, and growing obstacle thereby to European settlement, 6142-6145. 6154-6156. 6168, 6169.

Reference to a statement showing the number of enam claims received and recorded in the northern and southern divisions of the Bombay Presidency, 6146-6153——Except the enam lands, the lands in Bombay have not generally a saleable value, on account of being too heavily assessed, 6157-6164——Confirmation by Mr. Elphinstone of all grants or promises of enam where the right was properly shown, 6165-6167.

Opening for European capitalists in Bombay in the superintendence of cotton and sugar cultivation, 6170, 6171——Witness never met with any European capitalists in the Mofussil, 6172——The mode of administering justice in Bombay is some obstruction to successful colonisation, 6173-6176——The main obstacle to settlement is the difficulty of procuring land with a proper title, 6174. 6176, 6177——Opinion that cotton in India, though it may be much improved, can never be brought to equal American cotton, 6178-6183.

Impression that there is no disinclination among the civil servants in Bombay to encourage European settlers, 6189. 6194——Higher social position of the civil servants than of the settlers; the civil service is in fact a caste, 6190-6193——The native judges have on the whole turned out very well, 6195. 6265——Greater deference and consideration shown by the natives to Europeans in proportion to their rank and wealth, 6195-6197. 6206-6208——An abolition of the covenanted civil service would not have any effect in deterring European settlement, 6198, 6199——Advantage if uncovenanted servants of tried efficiency were eligible for offices now held exclusively by the covenanted servants; it would in fact be well to abolish the covenanted system, 6200-6205. 6275-6278——Instance of an uncovenanted servant of tried ability having been excluded from high office by the Home authorities; he was originally a domestic servant, 6202, 6203.

Examination with reference to certain statements put forward (by Mr. Mangles) in justification of the principle of a resumption of rent-free tenures; witness repeats his objections to the practice pursued in the matter, 6209-6232——Instead of re-assessing the lands held in enam, it would have been better to have levied some new tax on the enamdars, 6216-6219. 6226, 6227. 6230——Further reference to the members of the Enam Commission as not the most competent men for the office; Mr. Hart is a very able man, of some twenty-three years' standing in the service, but Captain Cowper is probably under thirty years of age, 6233-6242.

Witness considers it very important that the European judges should have a practical knowledge of the character and habits of the people, but they should as well have a legal education; means by which both qualifications may be secured, 6252-6261——Approval of the appointment of natives as judges; they should however have more education and higher salaries, 6265-6270——Advantage in placing European sergeants in the police rather than in raising the pay of the native police officers, 6267. 6270, 6271.

[Second Examination.]—Further reference to the plateau in the neighbourhood of the Mahableshwur hills as a very favourable place for settlement by Europeans, 7353-7358. 7362. 7536-7546——Witness is not aware that the soldiers at Poonah are kept under any particular restrictions on the score of health, 7359-7361.

The main objection of witness to the Enam Commission is, that time alone had established prescriptive titles, and that whatever was done under the Commission was done too late, a period from 1817 till 1852 having been allowed to elapse, 7363-7365. 7389-7395——Certain provisions in the Act XI. of 1852 adverted to as professing to acknow-

Reports, 1857-8—*continued.*

Warden, John. (Analysis of his Evidence)—*continued.*

ledge titles confirmed by British authority, or declared hereditary under a sunnud; the Enam Commission is nevertheless the opposite of protection, 7365 *et seq*——Further evidence in confirmation of the statement that the *onus probandi* is improperly thrown upon the claimant or defendant, 7370 *et seq.* 7528, 7529.

If Government have reason to believe that lands are held by fraudulent titles the adjudication of such titles should be delegated to a properly constituted court, founded on recognised principles of justice, and carrying out the general provisions of the law, 7387-7394. 7424. 7578——Probable necessity of a long delay before the settlement of the numerous claims to be investigated, 7389-7395. 7423, 7424.

Impression as to its having been contemplated to extend the Act XI. of 1852 to Guzerat, 7396-7402——Circumstance of its having been said by some one in the Bombay Council that the introduction of the Act of 1852 into Guzerat would produce a rebellion, 7399. 7403. 7404. 7467——Further reference to the information contained in a certain return to the House of Commons relative to the different ways in which the cases before the Enam Commission have been decided, 7405-7418——Want of a proper appeal in India against the decision of the Enam Commission further adverted to, 7419-7422. 7530-7535——Less trustworthy evidence now procurable from the Peishwa's dufter at Poonah than in Mr. Elphinstone's time, 7425-7430.

Practice under the native governments always, on receipt of a nuzzer, to grant the right to convey to an heir by adoption any interest in the public revenue, 7431. 7581——Witness fully believes that, whatever may have been the orders of the Court of Directors, adoptions to enams are disallowed by the Enam Commission, 7432-7437——Age and experience of Captain Cowper further adverted to, 7438-7440——Belief that under the native governments enams were not saleable, 7441-7445——Probability of Mr. Elphinstone having contemplated extensive resumptions, but not at so distant a period as 1853; 7446-7448.

Further evidence as regards the young men educated at the Elphinstone and Poonah Colleges, to the effect that some of them are equal to the civil servants from Haileybury, and possess proper qualifications for the office of pleader, 7449-7461. 7514-7527——Origin of the law by which in the Deccan enamdars were unable to sue the Company in courts of justice, 7462, 7463——How far it can be said that the Peishwa abdicated in favour of the British Government, 7464, 7465——Judges of Her Majesty's courts would have made most efficient members of the Enam Commission, 7466.

Although Government cannot be said to have altered the law of prescription in the Deccan, they instituted a rigorous and unjust law there, as compared with the law in other parts of the Peishwa's dominions, 7468-7472——The attempt of Sir John Peter Grant to extend the jurisdiction of the Supreme Court was differently received in the Mofussil, 7473-7476——An examination in Mahratta should be sufficient for barristers, the evidence being conveyed through interpreters, 7477——Civil servants are not always examined with reference to the language of the district to which they are appointed, 7478.

Further disapproval of the appointment of collectors as magistrates, 7479——Construction of the road from Poonah to Sholapore further adverted to, 7480-7485——Education must go on hand in hand with the reforms contemplated by witness in the courts of justice, 7486. 7503——Considerable reduction of the rent of the Government land in the Bombay Presidency, 7487-7490——Any European capitalists who may have gone out to Bombay are exceptional cases, 7491-7494.

With reference to a strong statement by Lord Macaulay in the House of Commons in 1853, in opposition to throwing open the public appointments, the same does not alter witness's opinion on the subject, 7495, 7496——Further reference to the impropriety of the exclusion from a high office of a person who was formerly a domestic servant, 7497, 7498——Propriety of new taxes in India, if the exigencies and just government of the country require them, 7499-7502——Expediency of military sergeants being introduced into the police, although some European sergeants in the Bombay police turned out badly, 7504-7507.

Witness fully adheres to the substance of each statement made by him on his first examination before the Committee, 7510, 7511——Explanation, by reference to Mr. Elphinstone's History of India, of the practice in regard to the succession of females, 7511——Reference to Mr. Elphinstone's delineation of the character of the Hindoos as illustrating the injurious operation of the system of omlah under the Company's courts, 7511-7513.

Further reference to the importance of judicial education and training in the European judges, 7541——System of education and training suggested in the case of judges, supposing the service to be thrown open and the judicial service separated from the revenue service, 7542-7550——There would be no practical difficulty in a distinct judicial service, 7543. 7550, 7551——The introduction of the English language into the courts

Reports, 1857-8—*continued.*

Warden, John. (Analysis of his Evidence)—*continued.*

courts must be gradual, 7552. 7560——Further statement as to the interpreters, &c. necessary if the English language be used; necessity of the continued employment of some natives, 7552-7560.

The students at the Elphinstone College are all natives, without reference to caste or religion, 7561-7563——The mischievous influence of the native official is exercised more or less over all European officers, however high their position, 7564-7567——The statement made by witness at Question 6075 was drawn up by himself, 7568——He repeats that the Enam Commission should be revoked; this opinion is fortified by a reference to Mr. Elphinstone's proclamation, 7569——Enam means literally a gift, 7570.

Where the enamdar is ousted the subtenures are not disturbed, 7571-7573——The enams are principally in the Deccan and the South Mahrattan country, 7574——Tendency of the Enam Commission to produce disquiet and rebellion on the part of the natives in Bombay, 7575-7577——Difficulty in Europeans settling in Bombay by the purchase of land from the enamdars, 7579-7584——Further reference to the interference by Government with the system of adoption, 7581, 7582. 7588, 7589——The practice of adoption was general under the Peishwa and the Hindoo rajahs, 7585-7587.

Watson, J. and R. There are upwards of fifty Europeans in Messrs. Watson's concerns in Lower Bengal; difficulty in keeping up the number, *Dalrymple* 3175-3177——Messrs. Watson have in their silk, indigo, and sugar concerns a capital of about 300,000 *l.* in block, and expend about 200,000 *l.* annually, *ib.* 3178-3187——In Messrs. Watson's operations there are 20,000 yearly contracts, *ib.* 3223——Advantage if an increased number of Europeans could be procured for the concerns of Messrs. Watson, *ib.* 3217-3221——Advances to the ryots by the firm of Messrs. Watson, have accumulated during the last thirty years to about a million sterling, of which about half has been remitted, *ib.* 3540-3544.

Western India. See *Bombay.*

Wheat. Facilities in the Punjaub for the production of large supplies of wheat at an exceedingly slight cost; large yields per acre, and character of the land on which grown, *Tremenheere* 42-49. 366-378——Circumstance of the land in some districts producing two crops of wheat but only one of cotton, *ib.* 479-482——Exceedingly low price at which wheat sells at some places in the interior of the country, *Balston* 5905, 5906——Irrigation will largely increase the cultivation of wheat in Mysore, &c., *Onslow* 6655——The wheat of the Broach district is the best in Western India; it is not exported to any extent, nor has the cultivation much increased, *Landon* 8320-8322——Large growth of wheat and barley in the North-west Provinces, *Saunders* 10247-10249.

Statement in letter from H. Williams, Esq., dated Jubbulpore, 3 May 1858, as to the extremely low price of wheat at that place, *App.* (*Fourth Rep.*) *p.* 261.

Wingate, Major George. (Analysis of his Evidence.)—Joined the Engineer corps in the Deccan in 1831, and has since had about twenty years' actual service in the Bombay Presidency, chiefly in settling the land assessment, 7590-7595——The revenue settlement of Bombay is a field settlement, a separate assessment being fixed on each field as recognised by means of boundary marks, 7596——The system of revenue settlement in Bombay differs from the Bengal and Madras system very materially, in the fact that in Bombay the holder of each field is simply responsible for the assessment of each field, 7597-7600.

Important respects in which the present settlement in Bombay differs from and is an an improvement upon the old ryotwarree system upon which it is founded, 7601-7605——Object of the settlement to recognise all existing rights, and to confer them where they do not already exist, 7604-7608——The assessment is for thirty years, at the end of which period there may be a general re-assessment, 7606-7608. 7609. 7621——Important advantages of the regulation that the holder of land may sell or under-let as many fields as he pleases, by giving certain notice; objection hereon to the late Mr. Mackay's proposition of a compulsory lease of the entire holding, 7610-7620.

Belief that the present system is highly favourable to the investment of capital in land and agricultural works, 7610-7612. 7620——The present system in Bombay was commenced in 1835 and finally settled in 1847; 7618——Objection to a permanent assessment, on financial grounds, 7618, 7619——The liability to a re-assessment at the end of thirty years ought not in any way to deter European settlement, 7621-7624.

Exceedingly favourable effect of the present assessment upon the condition of the agricultural population; letter in 1849 from the present Commissioner of Scinde in corroboration of this statement, 7625, 7626——The system was first tried on the recommendations of Mr. Frere, Mr. Goldsmid, and Mr. Williamson Ramsay, 7626——The security of tenure, directly under Government, and the reduction and certainty of the assessment, are the causes of the improved state of the ryots, 7627-7631——Save by an increased or reduced land-tax, the position of the landholder will nobe affected at the end of the thirty

Reports, 1857-8—*continued.*

Wingate, Major George. (Analysis of his Evidence)—*continued.*

years, 7632——Favourable operation of the settlement in checking pauper holdings, 7633-7637.

[Second Examination.]—Absence of greater tendency to subdivision of occupations under the Bombay revenue settlement than under that in the other Presidencies, 7638——Facilities of European capitalists for acquiring land under the system in Bombay, 7639-7640——Argument that the land-tax, as in Bombay, does not and should not deter the purchase of land by Europeans, 7641, 7642.

Grounds for concluding that the redemption of the land-tax would be a great evil to the interest of agriculture in India, 7643——Objection, upon financial grounds, to a redemption of the land-tax, inasmuch as land is almost the only available source for taxation, 7643-7647.

Except in Khandeish there is no great extent of unappropriated land in the Bombay Presidency, 7648. 7653——Opinion that there is no part of the Presidency suitable for colonisation by Europeans, 7648——Europeans and their children might, with much advantage, be located on the Western Ghaut ranges in Bombay, 7648-7652——Witness has estimated that there are 5,000,000 acres of waste lands in Khandeish, upon the greater part of which cotton or other produce might be grown, 7653, 7654. 7667-7669.

Considerations as to the probable amount of cotton which, by means of European capital, may be produced in Khandeish; opinion that it is not possible to produce a crop at all approaching that of the United States, 7654 *et seq.*——Considerable facilities for irrigation in Khandeish; it is, however, found more profitable to extend dry-crop cultivation than to irrigate, 7655. 7663. 7673. 7684——Cotton is now extensively grown in Khandeish, and its cultivation is increasing very rapidly, 7656, 7657——Bar to settlement through the unhealthiness of the climate, 7678, 7679——Doubt as to any particular improvement in the mode of cleaning cotton in Khandeish, 7685-7688.

Europeans cannot successfully compete with the natives as actual tillers of the soil, 7689——European capitalists or colonists can most advantageously operate by setting in motion native labour, and by purchasing and preparing native produce, 7689. 7690. 7749, 7750——European capital and skill may with excellent prospects of success be employed in manufacturing processes, the native processes being very defective, 7689——The use of agricultural machinery is by no means incompatible with small occupations, as in Bombay, 7691-7694.

Evidence showing that the land assessment in Dharwar and throughout Bombay is anything but burthensome, 7695-7697——Great extension of cultivation in consequence of the re-assessment, 7697——Reference to the views of Mr. Green, formerly professor of literature at Poonah College, as to the liberal policy of the Bombay Government in matters of land revenue, 7697, 7698——Depressed state of agriculture at one period in the districts conquered from the Peishwa, 7699——Quotation from an article by witness in the "Bombay Quarterly Review" for April 1857, referring to great improvements during recent years, and great prospective improvements in the condition of the agriculturists, 7699.

Improvement through the abolition, in part, of the native transit duties, 7699, 7700——In many of the native states the system of taxation altogether is oppressive, 7701, 7702——Explanation as to the use of manure on land in Bombay; its value is well known, 7703, 7704——Railways will be of immense advantage to the agriculturists in every way, 7705——Fine breed of cattle in Guzerat, but not in the Deccan, 7706.

Very much larger metallic currency required under the British revenue system than under the native system; quotation hereon from the article, before referred to, in the "Bombay Quarterly Review," 7707——The present demand for silver in India is an indication of prosperity, and should be viewed with satisfaction by exporters and manufacturers in this country, 7708, 7709——Grounds for objecting to the substitution of a gold standard for a silver standard in India; reference hereon to witness's article in the "Bombay Review," 7710-7714.

The experience of witness goes to show that the Presidency of Bombay has during the last twenty-five years made great advances in commerce, manufactures, population, and civilisation, 7715-7729——Increased use of British as well as of native manufactures in the Presidency; effect of competition upon the latter, 7714-7723——Great increase in the use of bullock carts in the Deccan, &c. 7723-7729——Greatly improved state of the roads throughout Bombay, although in many places roads are still urgently required, 7723-7729.

Inefficient state of the harbours along the Bombay coast, 7729——Great importance to the settlers as well as to the natives of improved means of transit, 7730——Readiness of the natives to adopt European improvements, 7731-7738——Large growth of New Orleans cotton in the South Mahratta country, where it was only introduced in 1845;

Reports, 1857-8—*continued.*

Wingate, Major George. (Analysis of his Evidence)—*continued.*

7733——Particulars as to the increased use of saw-gins in cleaning cotton; great importance of these machines, 7733-7744.

Witness does not consider it possible, having due regard to the interests of existing proprietors, to create a permanent race of large landed proprietors; the customs of inheritance would break up large properties, 7745, 7746——There is no obstacle to the purchase by colonists of individual properties in Bombay, 7747, 7748——Large estates in the hands of Europeans are not the bsst investment for capital, 7749, 7750——Bad condition of the large estates in the hands of native proprietors, who, in Bombay, are generally a worthless class, 7750.

Bar to the efficient administration of the Bombay Presidency through the control exercised by the supreme authority at Calcutta, 7751-7762——Reference to the circumstance of Bombay not having yet paid its own expenses, 7754-7761——There should be a great freedom of action and power of legislation in the local Government, and the superintending authority over each Presidency should be in England rather than Calcutta, 7762-7772——Witness does not directly recommend the abolition of the office of Governor-general, 7764. 7767. 7770. 7773, 7774.

Improved administration if there were a greater number of European officials or superintendents, 7775-7779——Improvement to be effected by an increase of the pay of native officials, 7776. 7780——Witness considers that under a proper system natives may be made very efficient public officers, 7776, 7777. 7780——Corrupt practices resorted to under the present system of promotion, through the collector, of subordinate revenue officials; amendment suggested, 7780-7794. 7810, 7811——Practice as regards the reading by the native officer, or karkoon, of petitions to the collector on questions of revenue; checks upon and improbability of a false reading by the karkoon, 7791-7824——Belief that the European officers in the Bombay Presidency are not, generally, under the influence or in the hands of the native officials, 7794*. 7818, 7819.

The removal of the jungle in Khandeish would obviate the ill effects on the score of climate, 7825, 7826——Varying size of the ryots' holdings in Bombay; in the rice countries the average is probably below ten acres, 7827——The holdings underlet are not generally the properties of large farmers, but of non-agricultural classes, 7828-7830——The increased cultivation in Bombay has more than compensated for the reduced assessment, so that Government have lost nothing whilst the people have gained enormously, 7831-7833.

Statement, based on an experience of twenty-five years, that the general tendency of Government and its officers is not in any way to thwart or discourage, but in every way to promote and encourage European settlement, 7834-7839——Reference to the encouragement given by the Government collector in Khandeish to the operations of the firm of Ritchie, Stewart, & Co., in procuring cotton, 7835.

Very large proportion of land in Dharwar and Belgaum which is alienated, in the shaps of enams, &c., from the Government assessment, 7840——Enamdars possess an exemption from taxatiou rather than a property in the land, 7841——Reasons why enamdars are not generally cultivators of their enams, 7842-7844——Impression that the rent-free land in Bombay amounts to a third of the entire revenue of the Presidency, 7845-7849——Only a small portion of the property held under free grants is appropriated to religious purposes, 7850, 7851.

There are doubtless some members of the civil service in Bombay who are not efficient, but the body is on the whole a zealous and efficient one, 7852——Efficiency of the Bombay civil servants generally in regard to the native languages, 7853-7856——Different native languages spoken in Bombay, 7853-7855——Approval of a separation, as far as possible, of the judicial from the revenue service, 7857-7859——In Bombay promotion in the judicial branch is confined to the officers of that branch, 7858——Legal training for judgeships should be acquired in India, rather than in this country, *ib.*

Offices of high trust and emolument should be open to natives, if proved qualified by examination, 7860. 7864——Opinion that natives have more confidence in the decision of European than of native judges, 7861——Objection to substituting barristers from this country for natives in the offices of sudder ameen and moonsiff, 7862-7865——European settlement in India may be greatly extended, but not on the same principle as in Australia, 7866-7868——Belief as to the probability of an increased number of Eurasians in India, and as to their fitness as colonists, 7869-7871——As regards enams in Bombay, the general impression of witness was that a great many were held on imperfect or fraudulent titles, 7872.

[Third Examination.]—Practice, under the Bombay revenue survey, in regard to the ascertainment of the capabilities of the soil, on which the assessment was fixed, 7873-7875——Advantageous position in which the ryot is placed by his occupancy being permanent for thirty years without liability to an increased assessment, whilst he has it

Reports, 1857-8—*continued.*

Wingate, Major George. (Analysis of his Evidence)—*continued.*

in his power to cultivate as much or little as he pleases, 7876-7882——Further explanation of the reasons why the power to increase the assessment at the end of thirty years should not deter European settlement, 7883-7886——Further statement that the direct, as opposed to the indirect, cultivation of land by Europeans, is not likely to be profitable, 7887-7890.

Witness reads to the Committee the rules under which the revenue survey settlements of Bombay are now administered, 7891, 7892——Benefits likely to be derived by the natives in various ways from an increased ssttlement of Europeans, 7893, 7894——Wild and uninhabited state of large portions of the province of Khandeish during the unsettled period preceding our occupation of the province; reference hereon to witness's Khandeish report of March 1852; 7895. 7897, 7898.

Witness has recently heard from the present collector in Khandeish that within the last seven years the cultivation has increased by about 400,000 acres, 7895, 7896—— Unhealthiness of the jungles in Khandeish, and paucity of the population further adverted to as a bar to European colonisation, 7899-7901——Further reference to the encouragement given by Government, though without success, to the firm of Ritchie, Stewart, & Co., 7902-7905.

Localities on the east of the line of ghauts in Bombay might be fixed upon as favourable places for asylums for European children; the Mahableshwur hills are too wet for the purpose, 7906-7921——There is a large sanitarium at Pooroondhur, between Poona and Mahableshwur, 7912——Further statement that the Bombay Government offer no hindrance to European settlement, 7913, 7914——The inducements to settlement offered by Canada, the United States, and Australia, and the unhealthy climate of India, sufficintly account for the non-settlement of the latter country, 7915.

Tabular statement delivered in, showing the extent of cotton cultivation in the collectorates of Belgaum and Dharwar for a series of years between 1841 and 1857; 7916—— Further statement relative to the effect upon native manufactures and the condition of the natives through the increased import of European manufactures, 7917-7921——Opinion that the future wealth of India will depend upon the development of her manufacturing power as well as of her productive power, 7922, 7923.

Belief that although cotton may be very extensively cultivated in India, a sufficient quantity cannot at any time be relied upon to make this country independent of American cotton; the price, in fact, will govern the production in India, 7924-7932—— Grounds for the statement as regards the operation of the Enam Commission that the *onus probandi* really rests with the Commissioner, 7933-7937——The establishment of the Enam Commission was by no means calculated to create a rebellion in the country, 7939, 7940.

European superintendents have been introduced into the Bombay police, but with what effect witness is unable to say, 7941, 7942——Further particulars relative to the character and extent of the roads throughout Bombay, and the efforts made of late years to increase and improve them, 7943-7953. 8030-8073——Witness had no practical knowledge of any young men educated at the Elphinstone College, but he fully believes that English education will vastly improve the native mind, and that properly educated natives may be largely made use of for Government employment, 7954-7965.

There have been several instances of sales of land, as well as of subletting, under the new assessment in Bombay, but not many years' purchase have as yet been obtained, 7966-7978. 8023, 8024——Witness conceives that there will be quite as great a commerce in land in Bombay under the thirty years' assessment as under a perpetual assessment, or under a right to acquire the fee simple; examination hereon with reference to some offers which have been made for the purchase of lands, provided the assessment on such lands were made permanent, 7979-8029.

Reasons other than the thirty years' assessment to which may be attributed the absence of investment in land by Bombay capitalists, 7984 *et seq.*——High rates of interest, but not so high as fifty or sixty per cent., paid for loans by the ryots in Bombay, 8014-8017 —— Commercial as well as military objects served by the principal roads in Bombay, 8032-8043. 8067-8069——Less requirement of roads in Guzerat than in the Deccan, 8044. 8062-8065. 8071——Roads are much required in the Deccan; much more should have been done to make or improve them, 8044. 8070. 8072, 8073——Rate of travelling over the roads, 8048-8061.

Under the present revenue settlement the ryots in Bombay may be said to be untaxed, 8074-8079——Witness denies that the population throughout Bombay are in a poor and wretched condition; in many districts, the Southern Mahratta country especially, they are exceedingly comfortable, and have abundance to live upon, 8078-8084——The system of assessment according to the crop ceased several years since in Bombay, 8085-8088. 8090——Approval of a water rate for irrigation, as in Khandeish, 8086.

The settlement is not completed throughout Bombay; the surveys are still going on in Guzerat

Reports, 1857-8—*continued.*

Wingate, John George. (Analysis of his Evidence)—*continued.*

Guzerat and Khandeish, 8089. 8091-8093——Further statement that the expiry of the term of thirty years does not affect the title of the occupant, 8094-8096——Great value of new roads in order to develop the resources of the country, 8097-8100——Enhancement in the market price of cotton through the cost of transit, 8100-8103.

Careful manner in which the assessment has been carried out; re-assessment has not been necessary in any district, 8104-8108——Further evidence to the effect that the liability to increased assessment at the end of thirty years is not calculated to deter European investment or settlement, 8109-8123——Limited extent to which European settlement now exists in the Bombay Presidency; absence of European agricultural settlement, 8124-8133. 8144, 8145——Prospects of India as a manufacturing country further considered; success anticipated, 8134-8143.

Witness, who is not now in the Company's service, is perfectly unbiassed in his evidence, 8147-8149—— Character of the roads in Bombay further adverted to in connexion with the rate of travelling of bullock-carts over them, 8152-8160——There are about 500 miles of good roads in Bombay; the cross roads are much more extensive, 8161-8164——Tendency of the want of roads to check migration to the unpopulous districts, 8165, 8166.

Beneficial effect of increased European settlement upon the moral and social condition of the people, 8167-8170——Tendency of increased settlement to strengthen our hold upon the country; line of demarcation now existing between the governing and the governed adverted to hereon, 8171-8175——Further statement, that although the cultivation of cotton is being much extended, it is not likely to be produced so profitably as to lead to the same extent of cultivation as in America, 8176-8185.

Improbability of the assessment in Bombay ever being reduced below the present limit, 8186——Any further reduction of the assessment would be a loss of revenue, as all the valuable land is now cultivated and assessed, 8187-8189——Although the present assessment was first tried in 1835, it was not carried out rigorously until within the last five years, 8190, 8191——In the collectorate of Broach and other old assessed districts the assessment has been reduced without a re-survey, 8192, 8193.

Further reference to the successful cultivation of New Orleans cotton in Dharwar, although in adjacent districts the experiment has failed, 8194-8200——Belief that good faith exists on the part of the Government of India towards its subjects, and that in course of time the many causes of complaint on the part of the latter will be remedied, 8201-8204.

Wise, Josiah Patrick. (Analysis of his Evidence.)—Has resided for upwards of thirty years in several districts of Eastern Bengal as a proprietor and manager of indigo and other concerns, 2622-2629——Marked improvement in the condition of the people of India wherever Europeans have settled, 2630-2637——Largely increased revenues if settlement had been encouraged as recommended by Sir C. Metcalfe, 2630. 2857——Constant hostility displayed by the Indian Government, through its laws, towards European settlement, 2630. 2647. 2650-2653. 2877-2885——Expense and insecurity in the investment of capital under the perpetual settlement system, as at present administered in Eastern Bengal, 2632-2636——Instance of the reversal of a sale after seventeen years' purchase, 2634. 2886-2895.

Outline of measures necessary in order to facilitate the investment of capital in zemindaries and under-tenures without impairing the security of the revenue, 2635, 2636——Very favourable feeling of the cultivators of the soil towards European settlers; instances of this in Lower Bengal during the mutiny, 2637-2642. 2715. 2869. 2965-2967——Sundry respects in which the presence of the settler has benefited the material condition of the native, and protected him from oppression, 2637. 2643. 2777-2786. 2858, 2859——Increased benefit to the native accordingly as settlement is extended, 2638-2642. 2713, 2714. 2776. 2963, 2964.

Strong complaint against the threatened enactment of measures for subjecting European settlers to the criminal jurisdiction of native judges and native juries, 2637. 2645. 2647. 2650——Entire inadequacy of the European magistrates in the Bengal districts to see to the proper administration of justice, 2645. 2647——Want of training and experience in the magistrates, *ib.*——Corrupt state of the native police, 2643-2648——Very little power of the sessions judges over the magistrates, 2643. 2896——Under the present system neither person nor property is secure, 2645-2647.

Failure of the appointment of natives as deputy magistrates, 2647——Increased exactions through the increased pay of the darogahs, 2647, 2648——Suggestions for a reform of the magistracy, 2647——The darogah's place should be taken by a European, *ib.*——Ample power at present of the country magistracy over Europeans, 2649——Witness has suffered in several ways through the present state and administration of the laws, 2654-2656——Particulars as to witness having been unjustly dispossessed of an estate which he had legally purchased; it was re-purchased and held by Government, 2654. 2917. 2940-2943.

Reports, 1857-8—*continued.*

Wise, Josiah Patrick. (Analysis of his Evidence)—*continued.*

Check to settlement through the defective Sale Law, 2657——Great improvement if the English language were introduced into the courts of law, 2658, 2659——Practice as regards leases and management in the case of property which has reverted to Government in respect of arrears of revenue, 2660-2669. 2944-2951——Facilities for European colonization in the tea districts of Assam, and in the hilly districts generally, 2670-2679——The land in Assam chiefly belongs to Government; favourable terms upon which it is leased, 2672, 2673. 2870. 2879-2882.

Excellent natural facilities for the production of cotton in India, 2679——Large crops of very good cotton grown by witness near Dacca, 2679, 2680. 2735——Under a proper state of laws, and with power to hold land in perpetuity, cultivation would soon be immensely extended by Europeans, 2681, 2682——Experiment by the Government in cotton cultivation in Dacca; causes of its failure, 2683, 2684. 2742-2757——Bad state of the roads in witness's district, 2758——Also of the canals, *ib.*——Very good health of witness in India, 2686-2688. 2852-2856.

Evidence in favour of the introduction of a gold currency into India, and of the issue of Government paper bearing a certain rate of interest and payable after twelve months, 2689-2691. 2952-2962——Immense property held by European settlers and capitalists in indigo cultivation, and immense value of the indigo produced annually by them, 2692-2695——Enhanced value of indigo, silk, sugar, &c., when produced under European superintendence, 2696-2699——Explanation as to the system of native money-lending to cultivators, and the usurious price paid for loans in the interior of the country, 2700, 2701. 2775, 2776. 28272845. 2981-2983.

Vast increase of production through the extended settlements of Europeans, 2702-2704——The number of Europeans in the Mofussil has not increased, 2705, 2706. 2848——The great body of the people have not derived due advantage from the increase of production; the advantage goes rather to the money-lenders, 2707, 2708. 2711. 2775——Advantage of an increased introduction of capital as a means of adjusting the balance of trade, which, under the present system, continues much against this country, 2709-2713——Easier access to loans if there were more European capital, 2710-2713. 2776.

Young Englishmen well acquainted with the native language are much wanted in the service of the planters, 2716, 2717. 2720——Strong approval of well-organised institutions in the hills for the education and practical training of the sons of soldiers, 2717-2720——Particulars as to the corrupt conduct of the police, and of the nazir, or sheriff, with reference to a case of murder in the Tipperah territory some sixteen years ago; the nazir was dismissed the service, but was re-appointed by the local collector, 2721-2725. 2819-2826. 2849-2851. 2907.

Evidence as to the injurious and oppressive operation of the Resumption Law in Eastern Bengal; this law, which was an inquiry into titles, ceased about five or six years ago, 2726-2728. 2808-2817. 2917-2919——Further particulars relative to the cultivation of cotton in Dacca, and the reasons why it has not been more extensively produced, 2729-2766. 2790-2793. 2803-2807. 2908-2916——Difficulty as regards water communication between Dacca and Calcutta, 2760-2769.

Settlement would doubtless be more profitable if there were good laws and a good police, 2770——Witness would not have settled in India had he been aware of the difficulties to be encountered, nor would his experience be encouraging to others; his residence there has, however, been tolerably profitable to him, 2771-2774. 2917. 2931, 2932——Reference to the practice of the natives to submit disputes to the settlers for arbitration, 2780-2786——Settlement of disputes at times through punchayetts, or village juries, 2785-2789——Inadequate means of communication between Calcutta and Assam; Government have put two steamers on the route, 2794-2802. 2871-2873.

Instead of a limit of sixty years for inquiry into titles, the limit should be about twelve years, 2816-2818——Railways will greatly induce settlement, 2834——Witness does not consider that the population of Dacca, &c. have retrograded during the last fifty years, 2846-2848——Jealousy of the native zemindars when Europeans purchase zemindaries, and no longer oppress the ryots, 2858——Further evidence as to the disgraceful state of the police, 2860-2868——Able magistrates are the best remedy for the condition of the police, 2861, 2862——Prospect of advancement desirable in connexion with the introduction of the European element into the police, 2863, 2864.

There are a good many Europeans in Assam superintending the tea cultivation, 2874——Difficulty as regards the supply of labour in Assam, 2875, 2876——There are not above thirty or forty Europeans in the five districts of Eastern Bengal in which witness is interested, 2897——Further statement as to the importance of introducing the English language and English judges into the courts, 2898. 2904. 2937-2939——The magistrates at present are, very many of them, unacquainted with the native language, 2899——Facility for procuring efficient interpreters in the proposed English courts, 2905, 2906.

Sundry respects in which it may be said that reforms or improvements have of late years

Reports, 1857-8—*continued.*

Wise, Josiah Patrick. (Analysis of his Evidence)—*continued.*

years been introduced by the Indian Government, 2920–2926——Improvement if some Government situations now held by natives were bestowed upon Europeans, 2927, 2928——The right of the ryots under the permanent settlement must be protected, 2929, 2930——When witness went to India thirty years ago the magistrates were more efficient than at present, 2933–2936——Want of supervision over the native courts, 2968–2970——Want of the circulation of a press in the interior as a check upon mal-administration, 2969–2980——Check to settlement through the spirit of Government opposition further adverted to, 2984, 2985.

[Second Examination].—Further evidence in support of the proposition for the introduction of the English language into the courts in the interior, 2988–3041——The Persian language was, till about ten years ago, the language of the courts in Lower Bengal, and Hindee is now chiefly used, although Bengalee is the vernacular of the province, 2988–3005——In exceptional cases only can the European magistrates and judges converse or deliver judgments in the native language, 3006-3009. 3109–3114.

Further statement as to the facility and advantage of a system of interpreters under judicial officers using the English language, 3010–3024. 3115–3117——Advantage, for purposes of appeal, of the evidence being all recorded by the judge in the English language, 3026–3029. 3066–3068——Readiness with which natives would qualify themselves as judges using the English language, 3035–3041. 3066——Low morality in many instances of the native judges; instance of this in the dismissal of a sudder ameen for bribery, 3042. 3150-3154.

Further expression of belief in the corrupt character generally of the police and omlah, 3043–3046. 3097–3099——Probability of improvement in the morality and efficiency of the police and of the native officials generally if they were better paid, 3047–3051. 3118–3120——Reasons for the much better pay of European than of native officials, 3052——Statement showing the low salaries of the great majority of the natives in the uncovenanted service, 3054–3065——Very limited number of European judges required in the mofussil in order to exercise jurisdiction over the planters, 3069-3080.

There are many highly respectable and intelligent natives in Dacca, but Europeans there would still like to be tried by a jury of their own countrymen, 3081–3084——The late rajah of Tipperah was more advanced and intelligent in character than the present rajah, 3085, 3086——There is a good number of very superior intelligent and worthy natives in different parts of the country, 3087——Great deterioration of the Portuguese settled in Chittagong and Dacca, 3088–3091——Many parts of Lower Bengal are occasionally very unhealthy, 3092–3096.

Harsh and unjust operation of the resumption laws further adverted to, 3100–3108——The native omlah would still be required under a system comprising the English language and efficient interpreters, but their bribery would be duly checked, 3115–3117. 3158, 3159——Further reference to the circumstances under which a certain sale was reversed after seventeen years' purchase, 3121–3126——Explanation as to witness not having taken any steps, as regards an appeal or a re-purchase, in the matter of the property which he had bought, and which was re-purchased by Government, 3127–3137.

Facility for introducing the decimal system of currency into India, 3138, 3139——Although witness has had excellent health in Lower Bengal, and has known several instances of the sons of planters remaining there in good health up to the time of manhood, he is not aware of any instance of a third generation there, and considers that deterioration takes place after the first generation, 3140–3149. 3160, 3161. 3164–3167——There is no reason why the rights of the ryots may not be equitably purchased, 3155–3157——Witness has a better opinion of the moral character of the Hindoos than of the Mussulmans, 3162, 3163.

Witnesses (Mofussil Courts). See *Administration of Justice,* X.

Wool. Coarse character of the wool produced in India; it may easily be improved, *Freeman* 1542–1545.

Y.

Yarn. Large import in Bombay of yarn from England, *Wingate* 7718–7721.

Z.

Zemindars. Explanation as to the native zemindars being mostly absentee landlords, *MacNair* 2050, 2051——Oppressions to which the ryots in Bengal are subject by the native zemindars, but not by the European zemindars or planters, *ib.* 2596–2605——Jealousy of the native zemindars when Europeans purchase zemindaries, and no longer oppress the ryots, *Wise* 2858——Higher prices generally bid at sales by natives than by settlers, *Dalrymple* 3344–3346.

Reports, 1857–8—*continued.*

Zemindars—continued.

Unduly large power of the zemindars in Lower Bengal, who constantly exercise them to the oppression of the ryots, *Mackenzie* 3638–3646. 3653-3656——The zemindars in Bengal are nearly all new men; their hereditary rights formerly were merely as tax-gatherers, *ib.* 3683-3689——The zemindaries very seldom change proprietorships, *ib.* 3690——The laws since 1840 have induced considerable absenteeism on the part of the Bengal zemindars, *ib.* 3691. 3939.

Benefits resulting wherever European zemindaries are established in Madras; difficulty in extending the system, *Ouchterlony* 5423–5427.

Statement by certain ryots in Bengal, and evidence in confirmation thereof, as to the ill-treatment experienced by them at the hands of the zemindars, native and European, *Mullens* 7154–7166. 7209–7218——The condition of the ryots on any estate depends greatly on the individual character of the zemindar, many of the English zemindars being very just, *ib.* 7212–7214. 7316, 7317——Means of the zemindars for exacting undue payments from the ryots, *ib,* 7215. 7217. 7223, 7224——The zemindars should be properly checked by law against unduly increasing the ryot rents, or making other exactions, *ib.* 7219–7224.

Witness does not consider it possible in Bombay, &c., having due regard to the interests of existing proprietors, to create a race of large landed proprietors; the custom of inheritance would break up large properties, *Wingate* 7745, 7746——Large estates in the hands of Europeans are not the best investments for capital, *ib.* 7749, 7750——Bad condition of the large estates in the hands of native proprietors, who in Bombay are generally a worthless class, *ib.* 7750.
